#### NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 August 2014

#### 1 ACCOUNTING POLICIES

#### **BASIS OF ACCOUNTING**

The financial statements have been prepared under the historical cost convention and in accordance with applicable accounting standards.

#### **GOING CONCERN**

The financial statements have been prepared on a going concern basis. Having carried out a detailed review of the company's resources, the directors are confident that the company has sufficient cash flows to meet its liabilities as they fall due for at least one year from the date of approval of the financial statements.

#### **CASH FLOW STATEMENT**

The directors have taken advantage of the exemption in Financial Reporting Standard No 1 (Revised 1996) from including a cash flow statement in the financial statements on the grounds that the company is wholly owned and its parent publishes a consolidated cash flow statement.

#### **TURNOVER**

Turnover is recognised at the fair value of the consideration received or receivable for sale of goods and services in the ordinary nature of the business. Turnover is shown net of Value Added Tax.

#### **FIXED ASSETS**

All fixed assets are initially recorded at cost.

#### **DEPRECIATION**

Depreciation is calculated so as to write off the cost of a tangible fixed asset, less its estimated residual value, over the useful economic life of that asset as follows:

Plant & Machinery Motor Vehicles 15% reducing balance
25% reducing balance
20% reducing balance

Equipment

STOCKS

Stocks are valued at the lower of cost and net realisable value, after making due allowance for obsolete and slow moving items.

## **OPERATING LEASE AGREEMENTS**

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged against profits on a straight line basis over the period of the lease.

#### **DEFERRED TAXATION**

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

## NOTES TO THE FINANCIAL STATEMENTS

for the year ended 31 August 2014

#### 1 ACCOUNTING POLICIES (continued)

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.

#### FINANCIAL INSTRUMENTS

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.

At 31 August 2014 the company has entered into various forward contracts to fix the price of the purchase of certain raw materials. The total purchase commitment at 31 August 2014 was £4.9m (2013: £3.9m).

2014

#### 2 TURNOVER
