Notes to the abbreviated Financial Statements
for the period ended 31 March 2010

1. Accounting policies

1.1. Accounting convention

The accounts are prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008)

1.2. Revenue recognition

Revenue arising from fees charged to clients, acting on behalf of personal injury claimants, is presented in the financial statements under net fees receivable. Net fees receivable comprise amounts invoiced, net of any allowances given for failed cases.

Revenue is recognised when both the following conditions are met: it is probable that the economic benefits associated with the transaction will flow to the company, and the amount of revenue can be measured reliably at fair value. Where there is significant uncertainty regarding recovery of the consideration due, then these amounts are not included in income.

Allowances, as described above, are recognised in the period in which the underlying sales are shown, as a reduction of sales revenue. The estimates of outcome and financial effect are determined by the judgement of management, supplemented by experience of similar transactions. Provision for such allowances is calculated on the basis of management's best estimate of the amount that will ultimately be credited to customers. This provision is subject to continuous review and adjustment as appropriate, which includes any additional evidence provided by events after the balance sheet date.

1.3. Tangible fixed assets and depreciation

Depreciation is provided at rates calculated to write off the cost less residual value of each asset over its expected useful life, as follows:

Fixtures, fittings and equipment	- 25% straight line

1.4. Deferred taxation

Deferred tax arises as a result of including items of income and expenditure in taxation computations in periods different from those in which they are included in the company's accounts. Deferred tax is provided in full on timing differences which result in an obligation to pay more (or less) tax at a future date, at the average tax rates that are expected to apply when the timing differences reverse, based on current tax rates and laws.

Deferred tax is not provided on timing differences arising from the revaluation of fixed assets where there is no commitment to sell the asset.

Deferred tax assets and liabilities are not discounted.
