Notes to the Financial Statements for the year ended 31 March 2022

1. Statutory information

The company is a private company limited by shares and registered in England and Wales. The company's registered number and registered office address can be found on the Company Information page.

2. Compliance with applicable reporting framework

The financial statements have been prepared in compliance with FRS 102 Section 1A as it applies to the financial statements for the period and there were no material departures from the reporting standard.

The financial statements have been prepared on the going concern basis, which the directors consider to be appropriate, as they have agreed not to withdraw their loan accounts and to provide the necessary finance to enable the company to meet its liabilities as they fall due.

3. Accounting policies

Turnover policy

Turnover is measured at the fair value of the consideration received or receivable, net of discounts and value added taxes. Turnover includes revenue earned from the sale of goods and from the rendering of services. Turnover represents sales of licenced software systems together with the provision of advisory and support services in the application of digital media performed during the year.

Property, plant and equipment policy

Tangible fixed assets are stated at cost or valuation less depreciation. Depreciation is provided on all tangible fixed assets as follows:

Office Equipment 33.33% on cost

Intangible assets policy

The value of intangible assets represents the expenditure by the company on licensable software systems, less historic accumulated amortisation and adjusted to reflect, in the opinion of the directors, their future realisable value. The directors took the decision to freeze the valuation of intangible assets at £500,000 in the financial year ending 31 March 2021. On reviewing this in the financial year ending 31 March 2022 the directors have decided to halt amortisation on intangible assets and thereby maintain the said freeze.

Revenue recognition policy

Turnover from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have transferred to the buyer. Turnover from the rendering of services is recognised by reference to the stage of completion of the contract. The stage of completion of a contract is measured by comparing the costs incurred for work performed to date to the total estimated contract costs.

Deferred tax policy

Deferred tax is recognised in respect of all timing differences between the recognition of income and expenses in the financial statements and their inclusion in tax assessments. Unrelieved tax losses and other deferred tax assets are recognised only to the extent that it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits. Deferred tax is measured using the tax rates and laws that have been enacted or substantively enacted by the reporting date and that are expected to apply to the reversal of the timing difference, except for revalued land and investment property where the tax rate that applies to the sale of the asset is used. Current and deferred tax assets and liabilities are not discounted.

Foreign currency translation and operations policy

Transactions in foreign currencies are initially recognised at the rate of exchange ruling at the date of the transaction. At the end of each reporting period foreign currency monetary items are translated at the closing rate of exchange. Non-monetary items that are measured at historical cost are translated at the rate ruling at the date of the transaction. All differences are charged to profit or loss.

Employee benefits policy

Contributions to defined contribution plans are expensed in the period to which they relate.
