We are on a mission to make our airports and travel services the number one choice for travellers and airlines.

BOUTVEREL

## Our business at a glance

## Who we are

Manchester Airports Group (MAG) is the UK's largest airports group, owning and operating Manchester, London Stansted and East Midlands Airports, and a digital travel services business, CAVU.

In FY23, the Group served 54 million passengers and 261 destinations across its three airports. With catchments spanning the UK, around 70% of the population live within a two-hour journey of a MAG airport.

Together with CAVU, the Group employed over 5,800 colleagues at the end of FY23.

## MANCHESTER

Manchester Airport is the UK's global gateway in the North, serving 25 2m passengers in FY23. It is the only airport outside of London with two full-length runways and is home to 49 airlines serving 196 destinations across four continents. The airport employs over 2,900 people directly and supports 16,000 jobs across the site. Manchester Airport is currently undergoing the final phase of its £1.3bn transformation programme, which is set for completion in 2025.

25.2m

## CAVU

CAVU was founded in 2022 by bringing together the MAG-O and MAG-US business units. including their network of directto-consumer brands, CAVU combines the expertise of these entities to provide services both to MAG airports and other airports across the world, driving improved revenue by delivering digital solutions and physical experiences that make air travel more smooth and enjoyable. CAVU operates MAG's own car parking and lounge products, and has also secured deals to operate 24 lounges in the UK and US

Read more on page 32

## EAST MIDLANDS

East Midlands Airport is a popular regional hub for business and leisure travel across Europe, offering passengers across the Midlands a strong array of affordable and stress-free travel options. It is home to the UK's largest pure freight operation, playing a vital role in UK global trade. This year the airport served 3 3m passengers across 63 destinations and handled 395 000 tonnes of cargo.

Read more on

## LONDON STANSTED

London Stansted Airport serves connections to more European destinations than any other airport in the UK, as well as providing access to the rest of the world through its route to Dubai with Emirates. It is the only major London airport with spare runway capacity to support future growth. The airport served 25.5m passengers in FY23 to 194 destinations. London Stansted employs more than 1 900 people directly and supports a total of 13,000 jobs on site

## Our business at a glance continued

## Where we

## operate

With a route network spanning four continents, MAG connects passengers and businesses to key destinations across the globe. Through CAVU, we are developing a global footprint of both physical and digital airport services.

## **OUR REVENUES**

AVIATION

## £355.9m

MAG has a diverse mix of carriers from across the globe, allowing our airports to provide choice, value and convenience for our passengers.

We forge strong commercial partnerships with our airlines, and work with them to deliver growth which allow our airports to help drive economic growth of their regions.

Cargo operations across MAG's airports handle more than 700,000 tonnes of air cargo to and from global hubs and the UK every year.

## £325.1m

Through CAVU's market-leading approach to online airport services, MAG operates highly successful airport car parking businesses. Our car parks cater for all tastes and budgets ranging from our competitively-priced JetParks brand through to Meet & Greet and Valet services.

STRATEGIC REPORT GOVERNANCE FINANCIAL STATEMENTS
05

## **EUROPE**

MAG airports have direct connections to 205 European destinations, with multiple daily frequencies to many of the most popular. London Stansted has the strangest European network of any airport in the UK.

## ASIA

Manchester Airport is the only UK airport outside London with Far East connectivity, with direct routes to Belling, Hong Kong and Singapore.

East Midlands and London Stansted Airports serve direct cargo routes to key Asian markets

## MIDDLE EAST & AFRICA

Our proports have multiple Middle East routes, with direct services to the key hids of Dubai, Abu Dhabi and Gatai, as well as Soudi Arabia, Kuwaii and Bahrain, Landon Stansted's Dubai service was the fastest to progress to double-daily in the UK. Popular North African hallday destinations are served from Marchester, as well as a artical route.

RETAIL SPACE

£234.5m

Our airports have more than 355,000 sq ft of retail space. We work with a diverse range of brands, both new and established, to help them operate successfully in an airport environment. As part of the Manchester Airport Transformation Programme, we have delivered a retail offering including regional brands that reflect the best the North has to offer. Partnering with MAG gives retailers potential access to more than 50m customer journeys.

## OPERATIONAL HIGHLIGHTS

 Rapid growth in passenger demand during the year, with our airports handling 54.0m passengers

OVERVIEW

- Strong recovery in the route networks at all three airports, including direct long-haul connections at Manchester and London Stansted
- Investment plans across the Group resumed, including the final phase of Manchester Airport's £1.3bn transformation programme, due for completion in 2025
- Partnerships established to secure supplies of Sustainable Aviation Fuel and hydrogen technology to help our industry reach net zero by 2050
- Developed and implemented a new Group strategy and operating model, alongside a refreshed set of company values
- CAVU continued to develop its global footprint, now operating in 13 locations across the US

Our people	

With passenger demand returning close to pre-pandemic levels across the Group, we are now looking ahead to a period of growth and investment that will drive a sustained increase in shareholder value over the next decade.

## Chair's foreword

# A year of recovery

I am delighted to report a strong performance that demonstrates the resilience of our business and draws a fine under one of the most turbulent periods in the history of the aviation industry. With a clear strategy, well-invested assets and our talented colleagues, we are able to look ahead with confidence to the next five to 10 years.

The rapid recovery of air travel following the removal of Covid-19 restrictions confirmed how much people value the ability to travel, and MAG's choice and value proposition meant we were well-placed to satisfy that demand. This was reflected in the industry-leading recovery of our airports, with MAG ending the period close to pre-pandemic passenger volumes [90.6%].

The acceleration of demand put significant pressure on the whole industry in the months after travel restrictions were lifted. The well-documented operational issues experienced across the sector impacted our airports to varying extents and were most pronounced in the earlier part of the recovery period. As the summer progressed, service levels improved consistently, and we are confident the challenges faced in the earlier part of the financial year are behind us. Service performance at our airports has been restored to good levels setting us up for a successful year.

### INVESTMENT

MAG has continued to invest in infrastructure, lacilities and customer service, to meet the needs of passengers today and in the future. We recently announced the final phase of the £1.3bn Manchester Airport Transformation Programme (MAN-TP), which will enhance the passenger experience and support growth over the coming decades.

This year marked the 10th anniversary of MAG's acquisition of London Stansted Airport, making it an apportune time to reflect on the growth we've delivered to make it one of the largest airports in the UK. Having recovered faster than any other major UK airport. Stansted is now developing investment plans to enable it to handle 43m passenger journeys a year (up from a current cop of 35m), in line with the planning consent it secured in 2021.

Almost back to full strength and with ambitious investment plans in place, it is clear that our airports are important engines of economic growth for the regions they serve and for the UK as a whole. We are committed to working with the Government to maximise the contribution made by our airports - and air travel more generally - by unlocking the potential of high-growth and internationally significant industries. In this way, our airports will play a leading role in rebalancing the national economy by stimulating growth in the communities and regions surrounding them This includes working with the Government on driving forward its plans to deliver Northern Powerhouse Rail, which will transform connectivity to Manchester Airport from across the North

### **DECARBONISATION**

Decarbonisation is an urgent priority for the aviation sector and for MAG. The recent commitment to achieving net zero aviation by 2050 by the International Civil Aviation Organisation (ICAO) member states is a historic development in aviation and its significance cannot be overstated.

I am proud of the leading role MAG is playing in delivering our sector's sustainability commitments, having been a founding member of the Government's Jet Zero Council in 2020 and of Sustainable Aviation in 2005. MAG is working hard to make its operations net zero by 2038, and recently entered strategic partnerships for the delivery of both Sustainable Aviation Fuel (SAF) and hydrogen to Manchester Airport You can read more about these on page 34.

## GOVERNANCE

This will be my final annual report as Chair of MAG having taken the decision to retire from my position after nine years

Having overseen the business's recovery from the pandemic it felt like an appropriate moment to step down, and I am delighted the Board has approved the appointment of Charlie Cornish as the new Chair, from 1 October 2023

His leadership will be vital as MAG enters into an exciting phase of investment and growth and I wish him his Executive team – including newly-appointed CEO Ken O'Toole – and all MAG colleagues all the best for the future.

## Chief Executive's statement

# Firm foundations for growth

Last year was one of the most significant in our sector's history, the first full year following the removal of the restrictions imposed in response to the Covid-19 pandemic, enabling the full resumption of international travel.

## **ROBUST PERFORMANCE**

Demand recovered well across all three of our airports. We were delighted to see passenger volumes returning close to pre-pandemic fevels, growing from 83.8% of 2020 volumes at the half year, to 90.6% at the financial year end. Total passenger numbers for the financial year reached 54.0m, an increase of 163.4% compared with FY22.

Manchester Airport saw 25 2m passengers over the year, 89.4% of 2020 levels and up 176.9% compared with FY22-25.5m passengers passed through London Stansted representing 94.8% of 2020 levels and 147.6% above FY22 figures. East Midlands achieved 73.3% of 2020 levels, serving 3.3m passengers, 200.0% more than in the last financial year.

Our recovery translated into a positive financial performance. Improved passenger numbers underpinned an increase in revenue to £1,029.0m, up 122.7% compared to the previous year. Adjusted EBITDA\* grew by 228.0% to £412.0m, and Adjusted Operating Profit\* was £169.8m, improved from a loss of £113.2m in FY22. Operating Profit was £28.0m, improved from a loss of £130.3m in

FY22 after deducting adjusted items including the Deferred Debt Arrangement (DDA) in relation to the exit of the Group refirement scheme with GMPF.

Demand was particularly strong in the low cost, short-haul segment, with seat capacity and passenger volumes exceeding pre-Covid levels at various times in the last quarter. This pattern was seen across the industry, although it is pleasing to see that the rote of recovery ocross MAG typically outpaced that of other UK airports. Our performance reflects the strength of demand within the catchment areas of our airports as well as our close relationships with artlines, based on a mutual desire to pravide the best value and choice to the customers we jointly serve.

The rebound in the short-houl market was coupled with the strong return of long-houl travel, as international markets opened up and full service airlines advanced their own recoveries. This was reflected in the resumption or addition of long-houl routes from Manchester and London Stansted, and we are in discussions with a range of oitlines to add further destinations.

The whole of the UK aviation sector experienced challenges in meeting the rapid increase in demand following the removal of travel restrictions. This caused well-accumented operational issues that impacted our airports to varying extents.

\* As explained in Other Information of the financial statements on page 1/3

## ADJUSTED EBITDA

£412.0m

+7.8%

MAG's purpose is to connect our customers to the world with great airport experiences and innovative travel services. As we begin a new financial year, our strategy sets out clear priorities to drive long-term sustainable growth in shareholder value and an increased social and economic contribution to the regions we serve."

## Charlie Cornish

Group Chief Executive Officer

## Chief Executive's statement continued

Manchester was one of the UK airports more acutely impacted in the early part of the financial year, due to its scale, pace of recovery and the challenging labour market conditions it faced. Our teams worked hard to improve service levels as the summer progressed, enabling airlines to operate their planned schedules so that passengers' travel plans were protected throughout. Over the last year we have recruited more than 1,600 security officers across the Group to enable us to improve service levels and meet using demand.

More recently, we delivered a highly successful winter season, maintaining strong service levels through Christmas and half-term holidays when our airports see significant increases in passenger demand. After a successful Easter period and early part of the 2023 peak summer season, all three of MAG's airports are continuing to provide consistently good service levels, and we are committed to sustaining this performance and engaging with partners to optimise passenger experience.

In our interim report we provided an update on the formation of CAVU, through the bringing together of our digital and US businesses. This has already proven to be a successful development and presents a major commercial opportunity for MAG. We are making the most of CAVU's commercial expertise and extensive network to build products and services that help airports and travel businesses internationally to unlock value from their end-to-end customer journeys.

## **CLEAR STRATEGY FOR GROWTH**

As the sector resumed operations after the pandemic, we took the opportunity to review and refresh our strategy to provide firm foundations for the future.

We believe MAG's purpose is to connect our customers to the world with great airport experiences and innovative travel services. As we begin a new financial year, our strategy sets out clear priorities to drive long-term sustainable growth in shareholder value and an increased social and economic contribution to the regions we serve

By focusing on our strategic priorities, outlined on page 17, we will achieve our vision of being a world leader in the provision of airport facilities and travel services, delivering value for all our stakeholders.

Our new strategy is complemented by a refreshed set of values see page 40, co-developed with colleagues, to serve as guiding principles as we develop the arganisation and build a brilliant and diverse team over the years ahead. We have also embedded a new operating model, which empowers our airports to maximise their potential and adapt to the apportunities presented by their particular markets, whilst retaining the benefits of being part of the UK's largest group of airports.

## INVESTING FOR THE FUTURE

After the challenges of the last few years, it has been hugely positive to move forward with our ambitious plans to invest in our infrastructure. In January we announced a £440m investment in the final phase of the £1.3bn Manchester. Airport Transformation Programme (MAN-TP). By completing the transformation of Terminal 2- which will double the size of the departure founded and a second security hall — we will enhance the passenger experience, unlock billions in economic activity and create more than 500 jobs in the construction phase alone, with many more set to be generated as a result of the economic activity stimulated by the expansion of the airport.

In 2021, we secured planning permission to increase passenger capacity at London Stansted from 35 to 43 million passengers per year. We are now developing the investment plans that will enable us to grow to reach that target. Meanwhile, we look forward to setting out plans to further enhance East Midlands Airport's cargo capability, cementing its status as the UK's most important pure freight airport

Across all three airports, we are making the necessary investments to introduce Future Security technology in line with agreed Government imescales. This will remove the need for passengers to take liquids, gels and large efectrical items out of their hand luggage, significantly improving their airport experience.

These investments will enhance the role of our airports as strategic economic assets in the regions they serve, and increase the contribution they make to rebalancing economic growth, creating jobs and driving prosperity. We will continue to work closely with the Government on the policies and investments needed to ensure the economic potential of our airports is fully realised. We are keen to see projects such as HS2, Northern Powerhouse Rail, rail infrastructure in the South East and the East Midlands Freeport next to East Midlands Airport come to fruition in a timely manner.

### VALUED COLLEAGUES

Our people have been central to our recovery and strong ongoing performance. It was a pleasure to welcome more than 3,000 new colleagues during the reporting period, and I want to recognise the contribution of colleagues ald and new to MAG's success.

MAG's refreshed strategic framework places our people at its core and is underpinned by an updated set of values that define the culture we want to embed in the Group going forward. As a major employer, we are conscious of our responsibilities and the important role we play in driving positive change. We want our airports to represent the communities they serve, and have articulated ambitious Equity, Diversity & Inclusion targets – read more on page 41.

## WORKING TOGETHER FOR A BRIGHTER FUTURE

Decarbonisation is a key strategic priority for MAG, and we have seen real progress this year in our journey to a net zero aviation industry.

At a global level it has been encouraging to see the aviation industry renewing its commitment to achieving net zero carbon emissions by 2050-184 countries also committed to delivering net zero aviation by 2050 at the International Civil Aviation Organisation (ICAO) General Assembly in October, a move that will help drive progress with decarbonisation over the coming decades.

At a national level, the UK Government published its Jet Zero Strategy in July 2022. To support the announcement, MAG created five Jet Zero Pledges, (see page 34.) which set out how the Group will help to drive decarbonisation through various ways, including education research and airspace modernisation.

Zero Carbon Airports is one of the throa themes of MAG's CSR work, and we are developing robust plans to enable our airports to achieve our target of net zero emissions by 2038. We are also working in partnerships with Fulcrum BioEnergyUK and HyNet with the goal of making Manchester Airport the first UK airport with a direct supply of Sustainable Aviation Fuel and hydrogen.

In August, London Stansted received planning permission to build a 14-3 megawatt (MW) solar farm on airport land, the largest of its kind in London With work set to start on the development of the form imminently, this will make an important contribution to Stansted's net zero ambitions. The other two pillars of our CSR work are Opportunities for All and Local Voices, and it has been a strong year of activity in both these areas, a period that also marked the 20th and 25th anniversaries of the Community Trust Funds at Manchester Airport and East Midlands Airport respectively. Highlights included formation of Youth Forums at each airport and investment in accessibility provision. We were delighted that East Midlands Airport was voted Europe's top-performing airport at The Ozion Accessibility Awards, and that the quality of our assisted travel provision in all our airports was recognised in the Civil Aviation Authority's (CAA) Interim Accessibility Report. Meanwhile our MAG Connect Aerozones and Airport Academies continue to perform vital work in inspiring the next generation of aviation professionals and creating pathways for them to fulfil their dreams.

## OUTLOOK

Operationally, we enter our new financial year in a strong position.

Our airports are resourced to the level required for the peak summer season, and our targeted investments in equipment and infrastructure across our airports will enhance the passenger experience.

As we look ahead, we will continue to work closely with our airline partners to ensure our airports provide the best possible choice and value. Combined with our investment in passenger experience and our clear strategy, MAG has firm foundations for growth and value creation for our stakeholders in the months and years ahead.

Finally, I want to use this statement to reflect on my 13 years as CEO of MAG, with this being my last set of results in that role.

Since joining the Company in 2010, it has grown to become the UK's largest group of airports, including through the acquisition of London Stansted in 2013, at which point we welcomed IFM as shareholders. I am proud to have seen all our airports increase their global reach, with the addition of a number of flagship routes to key international markets.

It has been exciting to launch the  $\mathfrak L1.3bn$  MAN-TP, and I look forward to seeing what is the largest investment in the airport's history reach its conclusion. The creation of CAVU has added a new and exciting dimension to MAG, and it is pleasing to see our business playing such a leading role in the decarbonisation of our sector.

I am thrilled to see the Board has approved the appointment of Ken O'Toole as my successor, and I look forward to supporting him and his leadership team in delivering the Group's strategy in the years to come.

Charles T. Comish

## **Charlie Cornish**

Group Chief Executive Officer

4 July 2023

## Our strategy

# the world

At MAG, our role is to connect our customers to the world with great travel experiences and innovative travel services. That is our purpose.

The Group's facus over the last three years has been dominated by protecting the business through the pandemic and then deliveting a strong recovery in performance once travel restrictions were lifted.

Over the last year, as demand has recovered, we have been looking further ahead to consider the Group's strategic outlook and refresh our long-term corporate strategy

We have established a new strategic framework that sets out a new purpose, vision and mission for the Group to drive our strategy.

As part of the strategic framework, we have identified seven strategic priorities for the Group that will ensure we deliver sustainable growth in shareholder value

Our strategy sets out how we will rackle the challenges and apportunities we will face as we grow our business to meet the needs of our customers and stakeholders, both today and into the future.

Our strategy highlights what we need to do to be successful in connecting our customers to the world and provide the great airport experiences and innovative travel services they want.

Our strategy shows how we will meet customer needs by developing a brilliant and diverse team of people who are committed to service delivery, operational excellence, innovation and achieving sustainable growth

MAG's purpose arives our culture, and our number one priority is to protect the safety and wellbeing of our customers and everyone working at our airports

We want our business to be a great place to develop a career and we place a high value on Equity. Diversity and Inclusion ensuring our teams reflect the communities they serve.

We know we have an important job to do for our customers and stakeholders and are proud of the essential role our airports play in connecting the regions we serve to the world.

Our people are at our core, and they are focused on making sure travellers have a great experience at our airports, providing a service our customers trust will be reliable and friendly

Innovation and competitiveness will be key to giving us a commercial edge ensuring we meet users' needs by affering them the products and services they want in a way that represents good value for money to them

By taking a responsible and sustainable approach to managing and developing our business, we will create value for customers wider society and our shareholders.

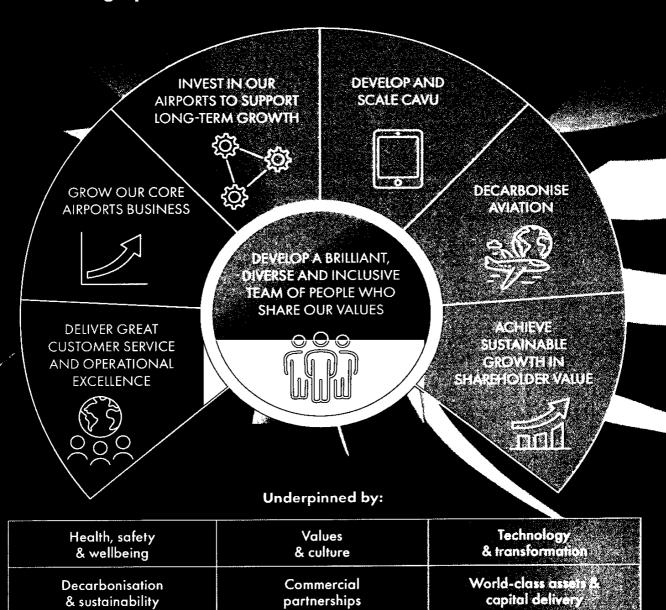

See our business model and value for our stakeholders on pages 20

Our strategy sets out what we need to do to successfully deliver our purpose to connect our customers to the world with great airport experiences and innovative travel services.

It sets out how we will meet customer needs by developing a brilliant and diverse team of people who are committed to service delivery, operational excellence, innovation and achieving sustainable growth.

## Our business model

## How we operate

## MAG's business model will support the successful delivery of the Group's strategy by empowering our three airport businesses and CAVU to meet the needs of their customers in the most effective way.

We will develop a strong and growing business by putting the needs of our customers at the centre of everything we do.

By taking a responsible and sustainable approach to managing and developing our business, we will create value

for customers, wider society and our shareholders.

MAG's business model will support the successful delivery of the Group's strategy by empowering our three airport businesses (Manchester, London Stansted and East Midlands) and travel services business (CAVU) to meet the needs of their customers in the most effective way. This will be supported by a corporate centre that provides strategic direction and governance and Group-wide services and solutions where these generate value.

## MAG's corporate centre

- Establishes the Group's corporate strategy and strategic priorities
- Monitors performance of Airports Divisions and CAVU
- Reviews long-term business plans and secures funding
- Defines Group-wide policies, strategies and standards (including CSR and Health and Safety)
- Drives forward corporate priorities and ensures appropriate governance across the Group
- Provides a limited range of Group-wide services and solutions where these generate value

## Airport businesses

- Develop and execute their respective strategies, in line with the Group's overall strategy and strategic priorities
- Deliver day-to-day performance and accountability for results
- Standalone management identify and respond to the specific needs of their customers and competition from other airports
- Facus on building longterm partnerships with arrline customers and stakeholaers to maximise growth prospects and value
- Operate in a responsible and sustainable way, consistent with Group policies and standards

## CAVU

- Standalone commercial business that provides airport products and services to travellers
- Warks with airport clients to sell products and services across the passenger journey
- Partners with onward distributors who sell our products through their own channels
- Creates scale via single digital platform, increasing the volume and value of marketplace bookings
- Develops automated business processes that are powered by data and insight
- Direct engagement as CAVU with customers and colleagues

## Creating value for our stakeholders

## We create value by managing and developing our business in a responsible and sustainable way that recognises the needs of all our stakeholders, and maintains the highest standards of safety and security.

## **TRAVELLERS**

We provide travellers with airport services that offer the right mix of choice, quality and value to meet their different needs.

## **AIRLINES**

Our airline customers include passenger airlines, cargo airlines and general aviation operators. We compete with other airports to attract airlines and look to develop long-term agreements to support their growth.

## **EMPLOYEES**

MAG employees play o vital role in delivering services for our customers and they are critical to the successful delivery of our strategy.

We value positive engagement with trade unions who provide collective representation for unionised colleagues. We also recognise that the Group's performance is important to former colleagues who are members of the MAG pension scheme.

## LOCAL COMMUNITIES AND REGIONS

People who live and work in the communities and regions around our airports are key stakeholders. We engage with local communities to understand their concerns and work to minimise our impacts as far as possible.

We also work with local schools to support the education of young people and provide training and skills to people looking for work. Our airports also support the work of local charities and organisations through volunteering and funding.

## SUPPLIERS AND OTHER AIRPORT PARTNERS

We work closely with a wide range of organisations to deliver a high quality airport experience to our customers, including National Air Traffic Service, UK Border Force, ground handling componies, providers of services to passengers with reduced mobility, retailers and food and beverage providers, and public transport operators.

## GOVERNMENT, REGULATORS AND AGENCIES

The Government takes a strong interest in our airports because of their role in delivering wider policy objectives, including economic growth, strategic connectivity and regional development.

Aviation is a highly regulated industry and we work closely with Government, the CAA and other agencies to ensure we comply with their requirements and help shape development of new policy.

## SHAREHOLDERS AND DEBT INVESTORS

Our shareholders and debt investors provide the private capital needed to operate and develop the Group. We work closely with them to ensure they understand business unit performance, and the strategic opportunities and risks for the Group.

## Key performance indicators

## Financial measures

## We focus on a number of key performance measures to ensure we build value for our shareholders on a consistent basis over the long term.

The comparatives used to measure against the current year's performance is 2020, management considers this to be the most appropriate benchmark due to the impact of Covid-19 on 2021 and 2022.

REVENUE

£1,029.0m

2020: £922.3m

+11.6%

### Definition

Revenue is an indicator of our top-line growth. It consists of aviation income, retail income, car parking, property and other income.

### **Aim & Context**

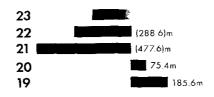

We aim to achieve long-term sustainable growth in revenue across all areas of our business – aviation, car parking, retail and property

(LOSS)/PROFIT BEFORE TAX

## Divisional reviews

## Manchester

## AMPOONT

**Manchester Airport** handled 25.2m passengers in FY23, equivalent to 89.4% of FY20 levels. The sustained recovery through the year means the airport is once again driving wider economic growth as the UK's global gateway in the North.

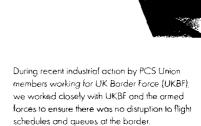

As the UK's global gateway in the North. Manchester Airport saw strong demand after the litting of pandemic travel restrictions. This is reflected in passenger numbers for FY23 of 25.2m equating to 89.4% of pre-pandemic levels in FY20, and 176.9% higher than FY22 figures.

Alongside our airline partners, we worked over the period to maintain full flight schedules, appreciating the value people attach to their travel plans. However, the time required to recruit and clear people to work in secure airside environments – typically a three-month process – resulted in operational challenges at Manchester in the first few months of the financial year, with service levels in peak periods falling below those we aim to deliver.

As new recruits joined the operation, we were able to drive sustained improvements in service levels throughout the summer period, with 85% of passengers passing through security in 15 minutes or less in August. We have delivered sustained improvements in operational performance since the summer, including at peak times. For example auring the most recent Easter period, 99.0% of passengers passed through security in 15 minutes

Our recruitment efforts saw us welcome nearly 2,000 new colleagues into the business including around 1,000 security officers. We were pleased to have achieved this outcome, particularly given labour market challenges faced by a number of sectors, and we are grateful for our colleagues' hard work in restoring our service levels so swiftly. This was achieved through strong partnership working with regional stakeholders, including the staging of multiple jobs fairs and utilising the network of our Airport Academy.

### ROUTES

The majority of pre-pandemic routes were reinstated promptly after restrictions were removed. Demand was strongest for shart-haul destinations, although direct long-haul routes have also recovered strongly during FY23.

Adding to the airport's long-haul destinations, Kuwait Airways and Gulf Air began services to Kuwait and Bahrain, and Hoinan Airlines resumed its Beijing-Manchester services in August after a two-and-a-half-year long suspension.

In September, Emirates announced it would re-commence its third daily service to Duba: returning the airline to its pre-pandemic capacity at Manchester. Air Canada also resumed its direct service to Toronto, five times a week during the summer season.

## INVESTMENT

Having received extremely positive feedback from passengers and airlines since the first phase of the Terminal 2 extension opened in July 2021 we recently announced the go-ahead for the final phase of the Manchester Airport Transformation Programme. An investment of £440m will double the size of the departure lounge, provide an additional security hall fitted with next-generation security scanners and increase hold baggage processing cupacity. The airfield will also be upgraded to cater for next generation a rcraft. Upon the completion of the work, 80% of the airport's passengers will fly through this world-class terminal

## Divisional reviews continued

## London Stansted Airport

London Stansted Airport demonstrated an industry-leading recovery, with passenger volumes reaching 94.8% of FY20 levels in FY23. Operational performance remained strong throughout the period, with significant numbers of new colleagues joining the business to support the additional services being offered by our airline partners.

### PERFORMANCE

Thanks to the strength of its route network, with more European destinations than any other UK airport, London Stansted's recovery outperformed other UK airports Passenger numbers rebounded to 94.8% of those seen before the pandemic, with 25.5m passengers welcomed in FY23, up by 147.6% compared to the previous year.

Operational performance was strong throughout the year, with 99.0% of passengers passing through security in 15 minutes or less throughout the summer season. We added 377 people to our team thanks to our extensive recruitment programme, which included the staging of a series of jobs fairs and close partnership working with key regional stakeholders. We are grateful to colleagues for delivering an industry-leading customer experience last summer.

East Midlands Airport saw passenger numbers recover to around two-thirds of what they were before the pandemic, representing a significant increase on the prior year.

A significant recruitment drive ensured service levels were strong throughout the year, making it the airport of choice in the region it serves.

This year, Ryanair, Jet2 and TUI all increased their number of based aircraft at East Midlands. Ryanair is now operating eight aircraft and Jet2, seven. TUI will operate five planes out of East Midlands this summer compared with three last year and, coupled with this investment, have brought back additional routes this summer to Antalya (Turkey), Hurghada (Egypt) and Gran Canaria. Eastern Airways, which recently launched Newquay and Paris Orly flights, also has an aircraft based at the airport. Other domestic routes are served by Aer Lingus Regional and passengers flying to the Channel Islands are catered for by airlines Blue Islands and Aurigny.

Summer 2022 saw the addition of two new

Egyptian resort city Hurghada

OVERVIEW

PERFORMANCE

In FY23, East Midlands Airport served 3.3m passengers, an increase of 200.0% compared to the previous year and 73 3% of the numbers before the pandemic in FY20. Operational performance was strong, with 99.0% of passengers passing through security in 15 minutes or less. Recruitment has been the principal driver of service levels, and we were pleased to welcome more than 150 new colleagues over the reporting period.

## CARGO

Alongside its passenger operation, East Midfands Airport is the UK's leading airport for dedicated cargo operations, flying more tonnes by pure freight aircraft than any other in the country.

In FY23, cargo loads decreased by 13.4%, with the airport handling more than 395,000 tonnes of freight. Although cargo volumes are down on last year, they are still ahead of prepandemic levels; and the airport continues to have, by some margin, the UK's largest share of the freight-only aircraft market. This was demonstrated throughout the pandemic when the airport played a critical role in facilitating the movement of PPE and other medical supplies around the world

The airport's role as a key facilitator of international trade was recognised in June, when a study by York Aviation showed that East Midlands' freight operation was giving businesses across the Midlands a competitive advantage. Research showed that the customs value of exports per tonne at East Midlands was £335,000 compared to £180,000 at some other UK airports

## FREEPORT STATUS

In March, the East Midlands Freeport was officially designated by the Government. This is the UK's only Inland Freeport with three modes of transport - road, rail and air. The airport is the international 'port' of the Freeport as well as forming part of one of three designated tax sites – the East Midlands Airport and Gateway Industrial Cluster (EMAGIC). The site will be a key enabler for international business within the region and is expected to create 60,000 jobs.

## WORKING TOGETHER FOR A BRIGHTER FUTURE

We have a longstanding commitment to supporting those living in our surrounding area. In 2022, we marked 20 years of our Community Trust Fund, over which time it has awarded over £1.3m in donations to more than 1,500 community groups, schools and charities. In February, we also marked 30,000 visitors to the MAG Connect Aerozone since it first opened in 2010.

During the year, we made significant investments in our accessibility provision and are proud to have had our work recognised internationally, having been voted Europe's top performing airport at The Ozion Accessibility Awards. Soon ofter, the CAA's Interim Airport Accessibility Report in December found that East Midlands Airport had been consistently "very good" throughout the year.

## Divisional reviews continued

Over the last 10 years, MAG has established a strong track-record for developing and expanding our offering to customers, both directly to passengers and through the services we provide to partners in the travel sector. We have developed a commercial agility, digital skillset and a deep understanding of the customer that enables us to stimulate demand and grow revenue. This capability creates new opportunities for growth on a global scale.

Recognising the market potential in these areas, we created a new business — CAVU — in March 2022, through the union of MAG-O (MAG's digital division), MAG-US and our direct-to-consumer distribution brands. With a mission to be the number one airport product and services company in the world, CAVU, is a global organisation with a vision of how to make airport travel seamless and enjoyable for passengers and more profitable for the businesses that serve them.

5 Intelligent

INTELLIGENT PERFORMANCE CONTRACTS (INCLUDING ALL THREE MAG AIRPORTS)

24

LOUNGES ACROSS THE US/UK (INCLUDING SEVEN AT MAG AIRPORTS) OVERVIEW

CAVU helps airports and other businesses within the sector, including MAG, create better truvel experiences and increase revenue by helping stimulate demand for their products and services through a global distribution network. Enabled, by propel<sup>TM</sup>, CAVU's proprietory e-commerce platform supported by a range of commercial products and services, CAVU helps clients by unlocking value from the end-to-end passenger journey.

propetim will enable customers to buy a bundle of products (including parking, transfers, hotels) by putting them into a single basket and checking out with a seamless transaction via any one of its distribution channels. CAVU increases the value of transactions through revenue management and by upselling and cross-selling inventory from its marketplace to passengers and builds customer loyalty by incentivising repeat purchase and customer retention. The ultimate aim for CAVU is to increase the volume and value of marketplace bookings flowing through propel<sup>TM</sup> across its global distribution network.

Our ambition is to develop CAVU into an £80m EBITDA business over the medium term. To achieve this, CAVU will adopt a 'buy and build' strategy to accelerate growth, achieve necessary scale, and market share. A recent example has been the June 2023 acquisition of ParkVia, a global online parking reservation platform. By the early 2030s, we are confident that CAVU has the potential to generate EBITDA in the region of £100m.

## PERFORMANCE

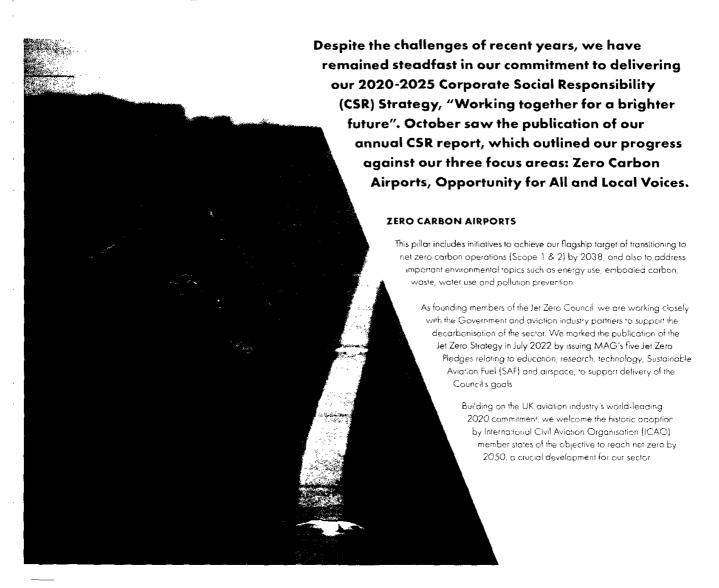

Performance in the financial year has been strong. Financial outcomes exceeded largets, with EBITDA of £36 9m, £4.5m ahead of plan. Commercial arrangements for trading MAG's Parking, Lounges and FastTrack were formalised at the start of FY23, putting in place an arm's-length contract between CAVU and MAG's airports. These were embedded smoothly, resulting in a strong performance for both CAVU and MAG more widely. EBITDA growth outside of MAG is a focus for the team, evidenced in distribution revenues in the Americas and EMEA. There have also been new client wins for Intelligent Performance and additional lounge openings in both these markets, including a notable partnership at Bristol.

and a further lounge at Syracuse has opened in early FY24

## Sustainability

# Working together for a brighter future

GOVERNANCE

GRESB

CLIMATE 2021-2023

We have taken meaningful action towards decarbonisation with the announcement in November of a partnership with HyNet, which could see Manchester Airport become the first in the UK to secure a direct supply of hydrogen fuel from the mid-2030s. This complements our existing partnership with Fulcrum BioEnergy in relation to SAF.

A East Midlands Airport, we were pleased to see an investment of more than €60m in SAF from DHL which could reduce CO<sub>2</sub> emissions by around 70,000 tons. Furthermore, Ryanair, Europe's largest airline, signed a Memorandum of Understanding with Shell to advance the supply of SAF, with the potential to save over 900,000 tonnes in CO<sub>2</sub> emissions. We are pleased to see Ryanair focusing on one of its largest bases, London Stansted Airport, for this project

As we work to reduce the emissions of our operations, we were pleased to secure planning permission for a 14,3MW solar farm at London Stansted Airport, and also submitted airspace change designs for the airport.

It has been pleasing to receive external recognition of our long standing commitment to aviation decarbonsiation. This financial year MAG was the only airport operator to be named a Financial Times 'Climate Leader' in 2021, 2022. In 2023 we received a 5-star GRESB rating once again.

2038

OUR AIRPORT OPERATIONS WILL BE NET ZERO BY 2038

# Sustainability continued

# OPPORTUNITY FOR ALL

Our 'Opportunity for All' pillar highlights our dedication to fostering a safe, inclusive, and diverse work environment, and creating high-quality employment opportunities for everyone. Our MAG Connect Airport Academies played a critical role in scaling up recruitment following the easing of international travel restrictions, assisting job seekers from local communities to apply for positions with MAG and our business partners. We have organised and attended 345 jobs fairs to make the employment appartunities available at our airports as accessible as possible, with 12,525 people attending these events over the past 12 months

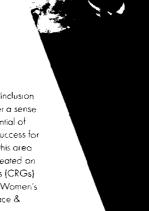

We worked closely with the Department for Transport on the launch of 'Generation Aviation' recruitment campaign and are using our expertise and specialised education facilities to create a pipeline of future talent for our sector.

During the financial year, more than 6,500 young people visited our MAG Connect Aerozones, which offer high quality, free and engaging learning experiences to local schools and are instrumental in inspiring the next generation of aviation professionals. We celebrated several milestones, including the first anniversory of Manchester Airport's Aerozone, which welcomed more than 3,000 students since its faunch. We welcomed our 30,000th visitor to our East Midlands Aerozone and the 20,000th visitor to aur London Stansted centre since they opened in 2010 and 2015 respectively.

By championing Equity, Diversity, and Inclusion (ED&I) in our workplace, we can foster a sense of belonging and unleash the full potential of our team members, ultimately driving success for our business. To advance our work in this area we established on ED&I forum, and created on initial five Colleague Resource Groups (CRGs) focused on Men's Mental Health, the Women's Network, Fly with Pride LGBTQIA+, Race & Ethnicity, and the Carers Network

To ensure that businesses local to our airports also benefit as much as possible from our success, we were delighted to welcome local businesses to London Stansted Airport as the 'Meet the Buyers' event returned ofter a two-year hiarus. This event has been one of the region's longest-running business expos, generating more than £28m in business since 2011. More than 200 businesses ranging from start-ups to large companies attended the event in the hope of securing contracts with major organisations such as Essex County Council, Aggreko, and SPIE UK The event was organised by London Stansted and co-run by Marketing Kinetics and UMI. In addition to this, Manchester Airport held its first 'Meet the Buyers' event where more than 100 local businesses had the apportunity to connect with prospective clien's in Greater Manchester. With over 200 attendees, this event was a great success and helped local businesses to expand their reach and networks.

We are seeking accreditation to become a Real Living Wage Employer and anticipate certification in FY24.

MORE THAN
6,500
YOUNG PEOPLE VISITED
OUR AEROZONES

# LOCAL VOICES

Our 'Local Voices' pillar outlines our commitment to listening to local communities and responding to local priorities to improve the areas closest to our airports.

The litting of Covid-19 restrictions in March 2022 meant we were physically able to return to the communities around us and re-establish our outreach programme, including attendance at local events and giving talks to communities Complemented by the continuea use of online channels, our hybrid engagement model enables improved accessibility and reach in working with our stakeholders.

Our Airport Consultative Committee meetings provide a key forum for listening to local vaices and supporting the management of our Community Funds. During the year we held 33 meetings with more than 370 attendees. These provided important input into our updated materiality assessment for which we also collected the views of more than 600 of our local residents.

We understand the value of actively seeking out diverse perspectives and were thrilled to announce the launch of Youth Forums at each of our airports to amplify the voices of young people and gather their perspectives.

# OUR ENERGY AND EMISSIONS PERFORMANCE

We have a long history of disclosing the climate impacts of our airports. In compliance with the Companies (Directors' Report) and Limited Liability Partnerships (Energy and Carbon Report) Regulations 2018, this report provides an overview of our energy usage and emissions. It covers our responsibility for energy consumption and emissions related to our operations.

The information presented below details MAG's energy use and emissions, both in obsolute terms and in comparison to our

passenger and cargo throughput, measured in 'Traffic Units' (defined by the International Civil Aviation Organization as equivalent to 1,000 passengers or 100 tonnes of freight). We have prepared this report by following the environmental reporting guidelines published by the Government and adopting the principles of the World Resources Institute's Greenhouse Gas Protocol.

To gather our energy usage and associated emissions data, we primarily relied on primary sources. In cases where primary data was unavailable, we estimated consumption by extrapolating historic energy use.

We recognise the significance of greenhouse gas emissions reporting to our stakeholders and we are committed to reporting transparent and well-informed climate data. In addition to this report, we publish our annual CSR report every autumn which will include supplementary information about MAG's emissions from our activities and other emissions indirectly associated with our business.

Further details on measures to increase energy efficiency can be found in the Zero Carbon Airports section of this report on page 34.

SECR Table 4.5	2022/2023	2021/2022	2020/2021	2019/2020	
Energy consumption used to calculate emissions (kWh)	196,353,334	181,98 <i>4,777</i>	181,314,564	210,406,900	208,525 600

Total net emissions based on the above (Location-based, $(CO_3c)$	23,512	22 687	25,015	34,551	33,225
Total net emissions based on the above (Market-based, $tCO_2e$ )	_	_			_

Our energy and emission performance have been restated for 2021/22 to make use of the most recent and complete dataset. This approach follows best practice outlined in the World Resources Institute Greenhouse Gas Protocol and guidance issued by the UK Government.

<sup>\*</sup> toculon-based emissions are based on the average emission intensity of the UK electricity grid. MAG proactively chooses to purchase renewable electricity which is backed by Renewable Energy Guarantees of Origin. To demonstrate the carbon saving of our procurement decision we "dual report" our location and market-based greenhouse gas emissions.

We measure carbon intensity against traffic units, which are defined by the International Civil Aviation Organization (ICAO) as equivalent to 1,000 passengers or 100 tonnes of freight.

<sup>&</sup>lt;sup>4</sup> SECR scape 1, 2 and 3 greenhouse gas emissions are defined in our latest emissions report, which can be found here https://www.magoirports.com/media/1809/mag-emissions-report-2021-22\_final pdf. This SECR data has been independently verified by TUV NORD CERT GmbH.

Additional measures to improve energy efficiency will be discussed in our latest CSR Report that will be published in Autumn 2023. Previous CSR Reports can be found here https://www.inagoriports.com/responsible-business/csr-teports.

# Our people

Our people are the keystone to MAG's success. Across the Group, more than 5,000 colleagues work to keep our airports running smoothly, deliver great service to passengers and partners, and help us achieve our strategic objectives.

As MAG emerged from the pandemic and introduced a new operating model and an updated Strategic Framework, we were keen to ensure that these changes were accompanied by a refresh of our company values and continue the evolution of our proposition to current and prospective colleagues. This has been all the more important over the recovery period, as we welcomed a high volume of new colleagues across the business.

# **OUR VALUES**

We are united by our shared purpose to connect customers to the world, and MAG's refreshed values encapsulate the culture we aim to cultivate across the business, shaping behaviours and decision-making:

- 1. People at our core
- 2. Growing every day
- Safe hands
- Power of teamwork
- 5. Sustainable future for all

MAG delivered a major programme of engagement to communicate our new values across the Group.

Colleagues at leadership level took part in a series of 'Breakthrough' education sessions, delivered to 500 people across MAG. In these sessions, leaders came together as a team to launch the new Empowered Airports Operating Model, as well as the refreshed Values and continue the evolution of our culture. These sessions aimed to energise and inspire teams across MAG, by learning new leadership tools and techniques that are easily applicable at scale within the business.

In total our new values were rolled out to all 6,500 of our colleagues, at approximately 180 briefing sessions across our airports.

# DEVELOPMENT AND ENGAGEMENT

We are committed to developing and inspiring colleagues across MAG and over the last 12 months worked hard to deliver initiatives to

In December, our most recent Your Voice improvement in our colleague engagement score - demonstrated the positive impact our initiatives are having across the organisation.

Information Officer Nick Woods, MAG launched its Data Literacy Programme, in partnership with apprenticeship provider Multiverse, in April 2022. 53 leaders across the Group have so far taken the training, as part of our wider Digital Transformation programme Colleagues have now completed the first year of their programme, bringing with them new skills that will contribute to the future of MAG A second cohort of colleagues started their courses in April this year.

# GOVERNANCE 41

# RECRUITMENT

We scaled up at pace following the lithing of pandemic-related travel restrictions, recruiting 3,391 people within 12 months. This was achieved through the development of MAG's new employer brand 'We are the Journey Makers', combined with a large scale recruitment compaign including the facilitation of 345 jobs fairs through our Airport Academies, as outlined on page 36.

Recognising the importance of a compelling employer brand to attract and retain talent, we worked with stakeholders to capture the essence of what makes MAG special, and were pleased to launch our 'We are the Journey Makers value proposition during the year.

MAG also recommenced its Early Talent programme in October, welcoming new graduates to teams across the business, including Strategy, Commercial, People and Finance. The Group is also developing a new operations apprenticeship scheme to begin later this year initially at Manchester Airport

# ED&I

We believe our business should reflect the diverse communities in which we operate, and understand our responsibility to ensure all our colleagues feel able to be their authentic selves at work.

In December, we published our new Equity, Diversity and Inclusivity (ED&I) Strategy, which sets out a series of frameworks as to how we can deliver positive change within MAG, which is overseen by our ED&I Forum, sponsared by current Deputy CEO Ken O'Toole and representation from members of MAG's Executive Committee.

We are committed to ensuring diversity of talent flows right the way through our business, and we have set out a series of ambitions for our leadership population:

- 50% representation of female colleagues by 2033
- 12% representation of ethnic minority colleagues by 2026
- 12% representation of colleagues under 25 by 2025

Other elements of MAG's ED&I Strategy also include recommending diverse shortlists for leadership appointments and facilitating hiring manager training across the organisation covering the topic of unconscious bias. MAG has also started a women in leadership programme in partnership with the Everywoman organisation, which also provides online support and resources for all colleagues across the Group.

In 2021 we established Colleague Resource Groups (CRGs) that continue to support and inspire colleagues across MAG. Our CRGs include the Men's Mental Health, the Women's Network, Fly with Pride LGBTQIA+, Race & Ethnicity, and the Carers' Network. Over the last year, our networks have championed topics including supporting new parents returning to work, International Women's Day, celebrating diversity in faith across our organisation, Movember 2022, Pride Month, Black History Month, World Mental Health Day and celebrating neurodiversity.

# Financial Review

# Profitable growth

"Rapid growth in passenger demand, and tight management of the cost base, has delivered a strong financial performance, enabling the Group to relaunch the transformation programmes at both Manchester and London Stansted"

FINANCIAL STATEMENTS

# **HEADLINE FINANCIALS**

After overcoming operational challenges in the early part of the summer, the full year position saw passenger levels increasing by 163,4% to 54.0m (87.5% of pre-Covid-19 levels). Recovery in passenger numbers was the principal driver in increasing revenue by £566.9m, an increase of 122.7% compared with FY22 MAG continued to manage its cost base, with volume-driven cost increases amounting to an 83 2% uplift on the prior year cost base. Consequently, this bolstered the Group's adjusted EBITDA1 to £412.0m (FY22: £125.6m) and operating profit to £28.6m (FY22: operating foss £130.3m).

MAG's strong brought forward cash position from FY22 and positive cash generated from operations of £450.4m during FY23 enabled the Group to recommence payments of shareholder loan interest, which had previously been deferred since Morch 2020. This enabled MAG to relaunch the transformation programmes at both Manchester and London Stansted to invest in new facilities and enhance service levels for passengers. MAG also fully paid back amounts drawn on its £500m revolving credit facility and maintained a positive net cash position of £67.6m (FY22: £462.9m).

# **MEASURES USED TO ASSESS PERFORMANCE**

The Group uses a number of measures to assess financial performance that are not defined within IFRS and are widely referred to as 'Alternative Performance Measures' (APMs). The Group's accounting policy related to APMs is detailed on page 119, and the Other Information section of the financial statements on page 173 defines the Group's APMs, their purpose and definition, along with a reconciliation to the nearest IFRS measurement.

APMs are defined by management and should not be considered as comparable with similarly named measures used by other companies. They are not considered superior to IFRS measures but are issued by management to provide additional information which may prove useful to the readers of the accounts. Many of the Group's APMs are referred to as 'adjusted' meaning prior to the impact of 'adjusted items'. Adjusted items are separately disclosed and relate to items that are significant in size and/or infrequent in nature, and where, in the directors' view, their separate disclosure gives additional information on the Group's underlying financial performance.

For example, costs incurred owing to restructuring activities, financial instrument modification gains, additional expenditure owing to Group transformation activities, and merger & acquisition activity are considered infrequent and are presented within Adjusted items as adjustments to the IERS measures of financial performance.

# Financial review continued

# ADJUSTED EBITDA

The directors use APM measures to review the performance of the Group, there are a number of measures, but the predominant one applied is adjusted EBITDA<sup>1</sup>, as it is the main measure of business performance, is used across peers and is part of MAG's financial covenants.

	Year ended 31 March 2023			Year ended 31 March 2022

<sup>1</sup> Restated the prior year as detailed in note 2 on page 131

FY23 was the first full financial year following the lifting of travel restrictions imposed in response to the Covid-19 pandemic. After some operational challenges experienced across the industry early in the summer season, resources were rapidly scaled up to meet the release of latent demand. This required the combinea efforts of our teams to meet the challenge and resulted in an industry-leading recovery which has seen passenger numbers using to close to pre-pandemic levels.

Over the course of the year, we welcomed 54.0m passengers across our three airports, a 163.4% increase on the prior year. The increase was primarily driven by higher volumes with Ryanair, Jet2.com, easyJet and TUI, predominantly through international flights and with load factors increasing from 61.4% primary to 83.7% MAG's destination airports increased towards pre Covid-19 levels to 261 (up from 235 in FY22). The top destinations across the Group were Dublin, Spain (Canaries Balearics and the mainland). Portugal and Turkey.

The Group delivered an overall revenue increase at 122.7% in comparison to the prior period. The increases in the airport divisions were driven lorgely by passenger footfall through the airports, with aviation, car parking and retail revenues more than doubling in comparison to the prior reporting period. The percentage growth in revenue was lower than that of passenger numbers as aviation yields softened as volumes increased both at Manchester and London Stansted.

Yields for car parking also reduced across MAG's airports. This is partially explained by the entry into a commercial agreement from 1 April 2022 for CAVU to sell car parking on the airports' behalf on a commission basis. However, there has also been a slight reduction when viewed from a Group perspective due to the significant increase in passenger numbers and mix of products. Retail yields remained strong, improving across all of our airports with the largest contributions coming from duty-free, food and beverage, and newsagents.

CAVU revenue increased by £109.7m (338.6%) to £142.1m (2022; £32.4m). Included within this uplift is the commission earned under a commercial arrangement between CAVU and MAG's airports for the sale by CAVU of the airports' car parking and fast-track products which took effect from 1 April 2022. Excluding the impact of this uplift, the year-on-year increase would have been £35.2m (112.1%).

Property income contracted slightly during the year, with a 4.3% decrease over the prior year. Other income increased by 75.4%, with passenger-telated activities such as retail travel services, refuelling and check-in desk rental providing the main year-on-year increases, along with improved (non-passenger related) recovery on utility costs incurred from tenants.

before adjusted items

As explained in Other Information on page 173

# Financial review continued

Excluding the impact of the sale of fixed assets, depreciation and amortisation, the Group's net overall operating costs, comprising employee costs and non-employee costs increased by £280 2m to £617.0m (2022: £336 8m). This increase is net of the £36.0m government assistance the Group received in FY22 under the UK Government's Covid-19 Job Retention Scheme and the Airport and Ground Operations Support Scheme (AGOSS).

Employee costs increased by £127.0m to £291.7m, partially resulting from the ramping up of headcount which enabled the Group to meet the rapid increase in passenger demand, and the impact of the UK Government's Job Retention Scheme contribution to the prior year  $\{£18.2m\}$ .

The Group's other operating costs before adjusted items increased by £153 2m to £325.3m. This was due to increased energy costs, increases in costs of maintenance, airfield costs and marketing, and the impact of AGOSS in the prior year accounts  $\{£17.8m\}$ .

Adjusted EBITDA* by Division	Year ended 31 March 2023 £m	Year ended 31 March 2022 restated (£m)	Change £m	Change %
Manchester Airport	157.3	36.1	121 2	335 7%
London Stansted Airport	164.5	39.7	124.8	314 4%
East Midlands Airport	32.8	220	108	49 0%
CAVU	35.2	8.3	269	324 1%
Group, consolidation and other	22.2	19.5	2 <i>7</i>	13 8%
Total adjusted EBITDA <sup>1</sup> – continuing operations	412.0	125.6	286.4	228 0%

As explained in Other Information on page 173

Adjusted EBITDA<sup>1</sup> for the Group increased by £286 4m to reach £412 0m, driven by the £566.9m (122.7%) passenger-driven revenue uplift, whilst the Group's operating cost base increased by only £280.2m (83.2%)

Depreciation and amortisation costs before adjusted items relating to continuing operations were 1.4% higher than the prior year at £242.2m. This increase reflects a full year's charge of the Manchester Transformation Programme (MAN-TP) brought into use in FY22 and additional depreciation of £8.4m arising from an increased charge as a result of shortening airfield asset lives

The financial statements have classified as adjusted items: a total charge of  $\mathfrak L$  110.9m {FY22: charge of  $\mathfrak L$ 9.7m}, including  $\mathfrak L$  119.7m relating to the exit of the Group's pension scheme with GMPF following the settlement of the Deterred Debt Agreement, depreciation and impairment of  $\mathfrak L$ 15.9m; a finance cost of  $\mathfrak L$ 5.7m {reflecting a shareholder modification loss of  $\mathfrak L$ 5.3m and a  $\mathfrak L$ 0.4m write-off of previously capitalised interest within design costs};  $\mathfrak L$ 4.1m relating to other operational airport transformation schemes, profit from discontinued operations net of tax of  $\mathfrak L$ 4.7m and  $\mathfrak L$ 1.5m of other adjusted items. There is a tax credit of  $\mathfrak L$ 31.3m relating to adjusted items, for detailed reconciliation of the taxation refer to note 9. The summary of adjusted items is given in note 3 to the accounts at page 132 and the definition of the Group's APMs are explained in the Other Information section of the financial statements on page 173.

The adjusted charge of £15.9m relates to £11.4m of impairment upon review of Airfield assets and US contract assets, with the remaining balance of £4.5m relating to accelerated depreciation following the decision to mothball T1 as a result of the announcement to launch MAN-TP phase 2

When accounting for the Group's total operating costs including adjusted items and depreciation, the Group incurred £1,000 4m in FY23 (this includes the GMPF Settlement loss of £119.7m reflected in the income statement which was offset by an uplift recognised through reserves – see note 35. This was an increase of £408 0m (68.9%) in relation to (FY22-£592.4m)

# **BUSINESS OUTLOOK**

MAG has recovered strongly from the Covid-19 pandemic, with robust financial performance indicative of the underlying demand for air travel. The strength of the recovery gives us confidence in a promising outlook, based on:

- Strong financial foundations, reflecting the resilient and prudent strategy that MAG has adopted over the past three years. Consequently,
  management's assessment of going concern concluded that there is no longer a material uncertainty. Further information regarding MAG's going
  concern assessment is detailed in the Basis of Preparation on page 109;
- The Group successfully addressed the operational challenges experienced as a result of the requirement to scale up activity rapidly in Summer 2022. The new MAG operating model will enable the business to deliver good service levels at all of our airports;
- MAG's strong financial position can act as a springboard for the Group to both resume investment activities to transform our infrastructure and
  improve our service levels, and look at business opportunities to grow our business; and
- Our ability to grow sustainably remains key to the business strategy

MAG is in a strong position to progress with its strategy for the future. Development of both our people and infrastructure remains key in delivering a quality service to our customers. Our relationships with our airlines and other partners, our strategic locations and catchment areas allow us to deliver great customer choice and value.

# TRADING UNITS

# **Manchester Airport**

25 2m passengers travelled through Manchester Airport in the year ended 31 March 2023 an increase of 176.9% over the prior year.

	FY23	FY22 restated	Change	Change %
Passengers (million)	25.2	91	161	176.9%
Revenue (£m)	429.0	188 5	240.5	1276%

Operating costs (before adjusted items and depreciation)	10.8	16.7
Operating costs (including adjusted items and depreciation)	21.0	30.7

<sup>1.</sup> As explained in Other Information on page 173.

<sup>2.</sup> All revenue streams excluding aviation

# Financial review continued

The 161m recovery in passenger numbers translated into a £240.5m increase in revenue of Manchester to £429.0m, with increases seen in all the core revenue streams of aviation, retail and car parking that are principally volume related. Passenger growth was led by a load factor uplift from 62.0% to 82.5%; with Ryanair, easylet, Jet2.com and TUI leading the growth and the top three destinations for the airport being Dublin, Dubai and Tenerife. The volume increase has also driven a softening in aviation yields. Car parking yields also softened though this is partially attributable to the impact of the commercial arrangement with CAVU which came into effect on 1 April 2022. However, the airport's retail yields improved, driven by duty free, food and beverage, and newsagents.

The airport cost base (before adjusted items and depreciation) increased by 78.3% during FY23 to £271.7m as management sought to increase operational capacity to support the increased volume. The largest increases were experienced in employee costs, rent, rates & utilities, maintenance, and airfield costs. The uplift in costs was diluted by the significant increase in passenger numbers, resulting in a reduction in cost per passenger from £17.8 to £11.0.

The combined impact of improving revenue per passenger for oviation and commercial coupled with the reduction in operating cost per passenger resulted in Manchester's adjusted EBITDA1 increasing by £121.2m to £157.3m (FY22: £36.1m).

Manchester's depreciation increased by  $\Sigma$  12.8m to  $\Sigma$ 123.4m during the year. The principal reasons for the increase were a full year's depreciation charge for the first phase of the MAN-TP assets brought into use in the first half of FY22.

Depreciation of £123.4m, amortisation of £4.4m and adjusted items of £132.4m (principally the GMPF settlement loss of £119.7m) increased total operating costs by £262.0m to £533.7m. Consequently, Manchester delivered an operating loss of £104.7m (FY22, loss of £96.7m).

# **London Stansted Airport**

London Stansted Airport experienced an increase of 147.6% in passenger numbers over the course of the year, with a total of 25.5m passengers passing through the airport.

	FY23	FY22 restated	Change	Change %
Passengers (million)	25.5	10 3	15.2	1476%
Revenue (£m)	373.2	180 8	192.4	106 4%
Adjusted EBITDA' (£m)	164.5	39. <i>7</i>	124 8	314 4%
Operating profit (£m)	91.0	(42.0)	133.0	n/a

£ per Passenger	FY23	FY22 restated
Aviation	5.9	70
Commercia! <sup>2</sup>	8.7	<sup>-</sup> 0 5
Operating costs (before adjusted items and depreciation)	8.2	13 <i>7</i>
Operating costs (including adjusted tems and depreciation)	11.0	21.4

As explained in Other Information on page 173

The 15.2m increase in passengers was ariven by Ryanair and Jet2.com. with an increase in load factor from 61.6% to 84.6% with Dublin, Istanbul and Rome remaining the most popular destinations. The passenger uplift translated into a £192.4m rise in revenue across all key revenue streams, with aviation retail and car parking all experiencing increases. Aviation yields weakened due to the volume increase and retail yields improved principally in duty-free, food and beverage, newsagency and financial services. However, the commercial arrangement with CAVU reduced the car parking yield achieved by the airport, resulting in an overall reduction in commercial revenue per passenger from £10.5 to £8.7.

Whilst passenger volumes more than doubled, the cost base (before adjusted items and depreciation) increased by £67.6m (51.0%) to £208.7m. The main areas of cost increases were in employee costs, rates & utilities, airfield costs, and maintenance. Consequently, adjusted EBITDA increased by £124.8m (314.4%) to £164.5m.

Altirevenue streams excluding aviation

Stansted resumed the STN-TP Programme during the year. The airport's depreciation charge reduced by 14.2% from £81.8m in FY22 to £70.2m in FY23 due to additional depreciation recognised in the prior year. Adding in depreciation of £70.2m, amortisation of £0.8m and adjusted items of £2.4m increased total operating costs by £73.5m to £282.2m. Consequently, Stansted delivered an operating profit of £91.0m {FY22: loss of £42.0m}.

# **East Midlands Airport**

East Midlands Airport has a very important dual role as the biggest airport for dedicated cargo traffic in the UK and servicing the East Midlands region.

	FY23	FY22 restated	Change	Change %
Passengers (million)	3.3	11	2 2	200 0%
Revenue (£m)	81.3	57.6	23.7	41.1%
Adjusted EBITDA <sup>1</sup> (£m)	32.8	220	10.8	490%
Operating profit (£m)	13.4	78	5.6	71.8%

£ per Passenger	FY23	FY22 restated
Aviation	12.9	32 <i>7</i>
Commercial <sup>2</sup>	11.7	196
Operating costs (before adjusted items and depreciation)	14.7	32.4
Operating costs (including adjusted items and depreciation)	20.5	45.1

As explained in Other Information on page 173.

Passenger numbers improved by 2 2m compared to FY22, increasing from 11m to 3 3m and delivering a £23 7m uplift in revenue. Cargo activity maintained its strong contribution to the East Midlands figures, softening by £2.8m (8.5%) to £301m in comparison to the prior year's record highs which had been driven by the pandemic impact.

The airport also experienced an overall reduction in commercial yields with car parking reductions (partially driven by the impact of the commercial agreement with CAVU) more than offsetting retail improvements. However, the overall uplift in volumes resulted in an increase in revenue of £23.7m (41.1%).

Costs (before adjusted items and depreciation) increased by £12.8m (35.7%) to £48.6m with the largest increases being seen in employee costs driven by increased headcount, and higher energy prices. Overall, East Midlands improved its adjusted EBITDA\* position by £10.8m to £32.8m (2022 £22.0m). Adding in depreciation of £17.9m imports attorned of £0.1m and adjusted items of £1.4m increased total operating costs by £19.4m to £67.9m. Consequently, East Midlands delivered an operating profit of £13.4m (FY22: £7.8m).

# CAVL

On 31 Morch 2022 MAG founched its new digital business, CAVU. CAVU comprises the legacy MAG-O and MAG US businesses which have been bolstered in the past five years through acquisitions in both the UK and the US. These businesses have a track record of developing and delivering products for airport hospitality and car parking. CAVU will continue to work with both MAG companies and external clients to develop and provide services to aviation customers across the whole customer journey

MAG has a proven track record in this innovative area, in which the Group can provide service to the wider travel sector as well as MAG's core airport businesses. CAVU is regarded as a separate reportable segment in these accounts to align with the structure of management reporting within the Group, replacing MAG US which forms part of the CAVU segment.

CAVU performed strongly during FY23 with revenues increasing from £32.4m to £1421m of which the commercial agreement with the Group's airports amounted to £75.5m. Other growth was principally achieved through CAVU's EMEA business with US operations remaining flat year on year. Operating costs increased marginally which resulted in the bulk of the revenue uplift delivering an increased profitability with adjusted EBITDA increasing by £26.9m to £35.2m, and operating profit increasing to £21.8m (FY22: operating loss of £1.5m).

<sup>&</sup>lt;sup>2</sup> Alt revenue streams excluding aviotion

# **GROUP'S PROPERTY**

The MAG Property division manages the Group's core property investment portfolio, comprising offices, hotels and cargo properties, and is also responsible for managing the Group's investment in the Airport City project, and its results are included within the Group, consolidated and other category

Revenue increased over the course of the year to £3.4m (2022: £2.8m) which includes the sale to THG of land at Airport City South, resulting in adjusted EBITDA1 and operating profit increasing to £71m (FY22: £2.1m).

The investment properties are revalued to fair value at each reporting date by independent property valuers and valuations. During the year ended 31 March 2023, the Group's investment properties experienced a £26.7m downward revaluation, largely driven by increasing yields. This, coupled with reclassification of some assets to PPE, resulted in the partfolio's value reducing to £155.1m (FY22: £188.9m).

MAG continues to retain a 20% interest in the Airport City development and account for its investment on an equity basis as an associate. The carrying value of MAG's investment reduced to  $\Sigma 7.1 \,\mathrm{m}$  following a distribution in August of  $\Sigma 4.9 \,\mathrm{m}$  following practical completion of a development.

# CASHFLOW

Cash generated from continuing operations-adjusted<sup>1</sup> increased to a net inflow of £455.0m, a significant improvement in comparison to £166.5m in FY22. {cash generated from operations of £450.4m, FY22<sup>1</sup> £145.7m} This was driven primarily by the increase in passenger numbers. Cash generated from operating activities-adjusted<sup>1</sup> represented 110.4% of adjusted EBITDA<sup>1</sup>, due to strong working capital management and the mix of car parking revenues which provide a cash benefit from advanced bookings.

Over the year ended 31 March 2023, the Group's net cash position reduced by £395.3m to £676m. £455 0m of adjusted cash generated by operations was more than offset by a net outflow of £163.4m for tax and interest, investing activities outflow of £184.3m, financing outflow of £498.0m, and an outflow of £4.6m in relation to adjusted items. During the year, MAG repaid all of the £500m revolving credit facility which was fully drawn as at 31 March 2022.

Group Cash flow (£m)	FY23	_FY22	% Change
Cash generated from/ (used by) operations-adjusted	455.0	166.5	173 3%
Adjusted items	(4.6)	(20.8)	<i>7</i> 79%
Cash generated from operations	450.4	145.7	209.1%
Net interest	(131.3)	(83 7)	(569)%
Tax pard	(32.1)	(0 4)	(7925.0)%
Net cash used in investing activities	(184.3)	(118.4)	(55.7)%
Net cash used in financing activities	(498.0)	(10.5)	(4642 9)%
Net decrease in cash and cash equivalents	(395.3)	(673)	(483 7)%
Year end position			
Net cash and cash equivalents <sup>1</sup>	67.6	4629	(85.4)%

<sup>1.</sup> As explained in Other Information on page 173

Maintaining MAG's strong investment grade ratings with both Fitch and Moody's is key to our strategy of providing the Group with a robust long-term financing structure that supports growth. Shareholder support, sale of non-core property and strong control of costs has helped MAG to reduce net senior debt over the course of the impact of the Covid-19 pandemic which has been an important component in the maintenance of investment grade ratings. Together with a robust liquidity position MAG is in a good position to invest in infrastructure and business opportunities that will enable the Group to meet the anticipated increase in demand over the coming years

Group net debt (excluding leases) decreased to £2,500.5m (2022: £2,520.3m). The movement during the year reflects the cash inflow from operating activities after interest and tax of £287.0m offset by the outflow from investments of £184.3m, resulting in a net £102.7m inflow before financing. Consequently, after taking into account IFRS 16, Group net debt of £2,958.7m comprised long-term fixed rate bonds (£1,439.8m); shareholder loans (£1,132.0m); and lease liabilities (£458.2m), offset by net cash of £67.6m and £3.7m of unamortised fees at 31 March 2023, which had reduced substantially as a result of the Group paying back in full the £500m Revolving Credit Facility.

Group net interest charge in the financial statements amounted to £ 199.8m, reflecting an increase of 10.2% in comparison to the prior year (2022: £ 181.3m). Both FY23 and prior year interest charges were impacted by modifications to the Group's shareholder loans (2023: loss of £5.3m, 2022: gain of £8.8m). The initial deferral of shareholder loan interest as a consequence of the Covid-19 pandemic resulted in modification gains as the deferred interest attracted a lower interest charge than the effective interest rate on the loans. Subsequent modifications were impacted by increases in the timing of the estimated deferred interest repayments and increases in the rate at which the deferred interest payments attract interest, which is linked to the bank deposit rate. The modification loss in FY23 was driven by later repayments, partially offset by a higher bank deposit rate than was assumed in FY22. The Group recommenced the payment of shareholder loan interest on 31. March 2023, and paid £47.6m regular SHL interest payments as well as £2.5m of deferred interest. It is currently anticipated that repayment of the previously deferred interest payments amounting to £277.4m (2022: £221.7m) will continue over the next 5 to 7 years until all deferred interest has been repaid by FY30.

Excluding modification adjustments, the underlying interest charge increased by 5.8% to £201.1m (2022: £190.1m). Interest paid in the year amounted to £138.3m (2022: £83.7m), comprising interest on senior debt, lease liabilities and the recommencement of payments on shareholder loan interest. £62.8m (2022: £106.7m) of residual interest costs related primarily to accrued shareholder loan interest. FY23 saw higher capitalisation of borrowing costs of £4.9m (2022: £0.6m) following the relaunch of the Group transformation programmes at Manchester Airport and London Stansted, in line with IAS 23 and the Group's accounting policies. Interest income from the Group's long-term lease receivable remained static at £0.6m, whereas IAS 19 interest on the Group's defined benefit pension schemes amounted to an income of £0.5m (2022: expense of £0.9m).

# CAPITAL EXPENDITURE

As the economy recovered from the Covid-19 pandemic in FY23, MAG increased its capital expenditure programmes to commence the next phases of the transformation programmes, MAN-TP and STN-TP Consequently, the Group's investment of  $\mathfrak L$  193 Zm (2022;  $\mathfrak L$ 68.Zm) in infrastructure during the year was largely driven by the recommencement of the MAN-TP and STN-TP programmes.

MAG's property, plant and equipment balance reduced to £3,1072m (2022: £3,140.9m) with depreciation and impairment charges of £230.1 m more than offsetting the investment made during the year.

# LEASES (IFRS 16)

During the year ended 31 March 2023, the Group's lease liability increased to £458.2m (2022; £435.8m), principally as a result of remeasurements of the Group's leases with MCC and UK Power Networks (see note 31). The Group's right-of-use asset position which amounted to £4370m (2022 £4177m) with the uplift reflecting the impact of the remeasurement of the lease liability

# Financial review continued

### PENSIONS

The accounting position is calculated by the directors and supported by independent actuaries, PwC, who incorporate data taken from a number of sources in calculating the closing position at the year-end across the defined benefit schemes. The net surplus included in the financial statements under IAS 19 increased from £22.1 m at 31 March 2022 to £86 6m at 31 March 2023.

Summary of changes in aggregate pension scheme surplus	£m
Net surplus as at 31 March 2022	22 1
Administration expenses	(1,1)
Other financial incomes / (expenses)	0.5
Contributions	74
Curtailment gain	_
Settlement loss	(119 <i>7</i> )
Actuarial gain due to release of asset ceiling due to settlement	116.7
Other actuarial gain	33 3
Impact of change in asset ceiling	27.4
Net surplus as at 31 March 2023	86.6

All of MAG's defined benefit pension schemes were closed to future accrual after a period of consultation in the year ended 31 March 2022. The Stansted and East Midlands scheme surpluses increased from a combined £23.7m to £90.7m over the period. The surplus has increased over the period due to large actuarial gains recognised in the SOCI mainly due to the significant increase in the discount rate assumption partially offset by a small cost recognised in the income statement. Based on the Group's understanding of the rules for the two schemes, it is the Group's view that MAG is provided a right to a refund of any surplus in the schemes and consequently the surplus has been recognised in the financial statements.

During FY22 MAG also entered into a Deferred Debt Arrangement ('DDA') with the Greater Manchester Pension Fund (GMPF) as part of the Group's exit from the scheme. This resulted in MAG continuing to fund its obligations in the GMPF without crystallising a significant exit debt at that time. The DDA provided that should the GMPF develop a surplus on an 'exit basis' of calculation then the Group's obligations under the DDA would cease, other than the ongoing financing of any unfunded liabilities.

At 31 March 2022 the GMPF was in an IAS 19 accounting surplus of £25m. This included an allowance to reflect committed cash contributions at 31 March 2022 of £1.6m. As this surplus did not comprise a surplus under the exit basis, MAG did not have a right to a refund. Consequently, an asset ceiling, as required by IFRIC 14, resulted in the accounting surplus not being recognised in the accounts. During the 12 months ended 31 March 2023 changes in market conditions resulted in an increase in discount rates such that by 2 September 2022, the GMPF were able to confirm that there was no longer a deficit in the GMPF in respect of MAG's obligations on the exit basis. At that point in time MAG's obligations to the GMPF ceased other than the ongoing commitment of unfunded liabilities of £3.9m.

Whilst overall the GMPF liability in the accounts has increased by £2.3m to £3.9m at 31. March 2023 (31. March 2022 £1.6m), IAS 19 requires that the loss on settlement in the income statement is calculated without the impact of the accounting basis asset ceiling, with the asset ceiling movement itself being taken through reserves. Consequently, MAG has recognised a settlement loss of £119.7m in the income statement, reflecting the difference between the GMPF's assets and liabilities as at 2 September 2022. This has been classified as an adjusted item. The offsetting impact of removal of the asset ceiling has been recognised directly to reserves in accordance with IAS 19. This, along with other actuarial adjustments for the GMPF, amounts to a £116.4m credit

The net surplus of £86.6m in the accounts reflects a net liability of £4.1m in the AVPS and GMPF schemes and a net surplus of £90.7m in the EMIA and STAL schemes. The total of £86.6m shows the net position across the Group, however the net surplus in the EMIA and STAL schemes cannot be offset against the net liability of the AVPS and GMPF schemes, so these are presented separately in the financial statements

### TAXATION

The total tax credit in the consolidated income statement is \$.32.1m compared to a \$.31.0m charge in the prior year, which includes tax charges attributable to discontinued operations of \$.1.1m (2022: \$.01il). The underlying effective current tax rate is higher than the standard rate of corporation tax of 19% (2022: higher), with differences explained in note 9 to the financial statements. The total tax paid in the year of \$.32.1m relates to payment on account for the profits in FY23.

# **EQUITY SHAREHOLDERS' FUNDS AND DIVIDENDS**

Equity shareholders' funds were \$703.0m as at 31 March 2023 (2022: \$724.9m). The movement comprises \$159.5m loss after tax and adjusted items, a gain on settlement of the DDA with GMPF and remeasurement of pension liabilities (net of tax) of \$137.9m, acquisition of a non-controlling interest of \$10m, foreign exchange gain of \$5.7m (net of tax) on the investment in CAVU and the effect of change in rate of corporation tax of \$70m.

The Group started repayments to its shareholders through the recommencement of shareholder loan interest payments at 31 March 2023 with an overall payment of £50.1m. There is no proposed final dividend for the year ended 31 March 2023.

# **POST-BALANCE SHEET EVENTS**

On 12 May 2023 MAG secured a bridge to bond facility that provides the Group with assurance that it will be able to refinance its bond for £360m by providing the facility to drawdown £360m up to 12 May 2024, with options to extend to 12 May 2025.

On 31 May 2023, MAG acquired 100% of the share capital of ParkCloud Holdings Limited, trading as ParkVia, a Manchester based ecommerce airport parking aggregator in the UK and EU market. Initial cash consideration of £8.4m was paid, subject to finalisation of the completion accounts, with further contingent consideration payable depending on financial performance in the first year following acquisition. As the completion accounts are yet to be finalised, no information has been disclosed at this time on the fair value of assets and liabilities acquired, and goodwill arising.

# Chair's statement on corporate governance

"Welcome to the corporate governance report for the year ended 31 March 2023 which I am pleased to introduce on behalf of the Board."

principles throughout the year Details of the directors' performance of their duties under Section 172 of the Companies Act 2006, including important long-term considerations that direct the Board's overall thinking, can also be found on pages 74 to 77.

A clear area of focus for the Board this year has been on MAG's readiness for Summer 2023 and the performance of our airline partners across each of our airports. Alongside this, the Board has continued its oversight of the requirement to improve customer service across our sites, which I am pleased to report has seen a marked improvement As recovery became evident over the course of the financial year, the Board engaged in an exercise to refresh our corporate strategy which is set out in full on pages 16 to 19

Our Board Committees have once again played an important part in the detailed scrutiny of MAG's performance and the insight and challenge they have provided to the Board has been very welcome. The detailed work of each Committee is set out in the reports that follow on pages 66 to 73. In particular, I would like to highlight a busy year for the CSR Committee in implementing our 2020-2025 CSR Strategy, which is ser out in full on pages 34 to 41.

# MAG STRUCTURE AND GOVERNANCE ARRANGEMENTS

In ownership terms, the Group is structured as a joint venture between the ten local authorities of the Greater Manchester region and IFM Investors (IFM) (as illustrated below). Amongst those owners, The Council of the City of Manchester and IFM enjoy, in equal shares, the voting rights in general meetings of Manchester Airports Holdings Limited (the holding company of the Group), have certain matters reserved for their exclusive decision as shareholders, and make two appointments each to the Board.

**CONYERS TRUST** 

MANCHESTER AIRPORTS
HOLDINGS LIMITED

We undertook an externally facilitated Board Effectiveness Evaluation this year which concluded that both the Board and Committees were viewed very positively with a strong alignment to governance. The small number of areas highlighted for further enhancement have been acted on and will be embedded over the next financial year.

Finally, I would like to acknowledge the contribution to MAG made by Robert Napier who retired as Non-Executive Director and Chair of the Audit Committee in June 2022. I am pleased to welcome Paul Venables to the Board as Non-Executive Director and Chair of the Audit Committee and look forward to his contribution over the coming year.

I hope that this report clearly shows the work the Board has undertaken during the year and how our governance and Board operations are aligned with the Group's strategy.

Sir Adrian Montague Chair

# Corporate governance report

# THE ROLE OF THE BOARD

The Board is accountable to our shoreholders for developing, setting and delivering the Group's strategic objectives, safeguarding its reputation, managing its risks effectively, setting and overseeing its values and standards, and maximising its multiple stakeholder relationships (as set out further in the s172 statement on pages 74 to 77. The directors satisfy themselves that the necessary resources and controls are in place to do this.

The Board comprises of 12 directors<sup>1</sup>. The names of the directors who served on the Board during the year and their biographical details are set out on pages 56 to 61.

The directors consider that the Board is an appropriate size for the requirements of the business and that there is a good balance of Executive, independent and shareholder-appointed Non-Executive Directors on the Board with the shareholder representative groups being equally represented. The Board is provided with updates every month and meets formally six times a year. In addition, the Board meets on other occasions to consider specific business matters as and when they arise

Certain matters are reserved for decision by the Board and other matters reserved for decision by the voting shareholders.

# CHAIR AND CHIEF EXECUTIVE

The roles of the Chair and Group Chief Executive are separate and clearly defined.

The Chair is responsible for the leadership of the Board They orchestrate its work (in close consultation with the Group Chief Executive) and plays a critical role in ensuring that it discharges its responsibilities effectively and that the diverse capabilities and experience of individual Board members are used to the best advantage of the Group to execute its long-term strategy successfully

The Group Chief Executive is responsible for the day-to-day management of the Group, the development and implementation of strategy, the delivery of Group financial and operational objectives and ensuring that the Group achieves its climate change goals and commitments. They are supported by their Executive Committee which comprises: Deputy Chief Executive, Chief Financial Officer, Chief of Staff, General Counsel and Company Secretary, Chief Information Officer, Chief Development Officer, Chief People Officer and Chief Executive of CAVU.

# **NON-EXECUTIVE DIRECTORS**

The Board's Non-Executive Directors bring extensive knowledge, skills and experience from both the private and public sectors, which supports the Executive team in the development and execution of strategy whilst ensuring that plans and proposals are scrutinised effectively and holds the Executive team to account in meeting agreed goals and objectives

All Non-Executive Directors are appointed subject to objective capability criteria and the appointment of every independent Non-Executive Director (including their remuneration) is, in common with that of Executive Directors, subject to prior approval of the voting shareholders. The Non-Executive Directors appointed by the voting shareholders hold office for so long as the shareholders wish them to do so

The remaining Non-Executive Directors are appointed initially for a term of three years, with any renewal thereof being a matter for the voting shareholders (on the recommendation of the Board and the Nomination Committee). Any decision on such renewal will have regard to the contribution made by the director in the immediately preceding period and relevant corporate governance best practice at the time to ensure the ongoing efficacy of the Board.

# INDEPENDENT NON-EXECUTIVE DIRECTORS

The Board considers there to be four independent Non-Executive Directors, being Vanda Murray, Catherine (Cath) Schefer, Jonathan (Jon) Wragg and Paul Venables. Sir Adrian Montague also meets the independence criteria set out in the Code, both on his appointment as Choir, and at all times since. Vanda Murray has served on the Board for 10 years as of february 2023 and will retire off the Board in March 2024. The shareholder appointed Non-Executive Directors during the year were Clir Bev Craig and Clir John Blundell (representatives for the District Councils of Manchester) and Manoj Mehta and Christian Seymour (representatives for IFM GIF)

# BOARD MEMBERS' BACKGROUND/ BIOGRAPHIES

Further information on all individual Board members, including their background and experience is available on the MAG corporate website at www.magairports.com.

# **BOARD EFFECTIVENESS**

All directors receive a comprehensive suite of Executive reports and popers in advance of each Board meeting to support quality decision-making via ari electronic board paper system which supports efficient dissemination of information in a safe and secure manner. These cover commercial, operational and health and safety matters across the Group, including updates from the Chief Executive Officer and the Chief Financial Officer which appraise the Group's key performance indicators, risks and opportunities, both strategic and financial. In the months when the Board does not meet an abridged reporting pack is provided. The Board has established Audit, Corporate Social Responsibility and Remuneration Committees with specific delegated authorities (more information on the membership and remit of each of these is provided later in this report on pages 67 to 73). The Board also ensures, through the work of the Nomination Committee that succession planning at Board, Executive and senior management levels reflects the changing needs of the Group's businesses.

# DIRECTOR INDUCTIONS AND ONGOING TRAINING

It is important to the Board that Non-Executive Directors are in a position to influence and constructively challenge. The Group provides a formal and tailored induction programme for new directors comprising a combination of introductory meetings, site visits, briefing materials, and the opportunity to meet the shareholders, the external auditors and other key stakeholders. The induction content includes corporate strategy and structure; current and recent Board topics; sectoral and competitive context; key operations; financial performance and funding; reputation and brand; and stakeholder management.

The Group seeks to provide the necessary resources to enable directors to remain abreast of developments relevant to the Group's business, operation and their own responsibilities. In addition, the directors may take independent advice in relation to their duties at the Company's expense, if appropriate.

# **BOARD EVALUATION**

The Board understands the importance of Principle Two of the Wates Principles for regular evaluation of the Board to help the directors to contribute effectively and highlight the strengths and weaknesses of the Board as a whole. As part of this evaluation, Independent Audit Limited (IAL) was asked to facilitate a self-evaluation of the Board and Committees of the Group, the first time that assessments of this nature have been carried out since the beginning of the pandemic. Questionnaires for the Board and Committees were prepared by IAL in discussion with the General Counsel & Company Secretary. Directors did not complete questionnaires for committees which they do not routinely attend

Overall, the Board feels positively about how it operates on a basis of trust, openness and inclusivity, with particular strength on the Covid-19 response and business planning and prioritisation. The Committees similarly feel very positively about how they operate. Only a few areas are highlighted to be considered for improvement, all of which have been implemented and will be embedded over the course of the year.

# **S172 COMPANIES ACT 2006**

The Board takes decisions with a long-term perspective and the annual business planning cycle assists in focusing on the impact of decisions on the long-term strategy.

The Company Secretary plays an important role in advising the Board on the \$172 requirements by setting out the substance of those requirements at appropriate times in order to ensure meaningful discussion with regards to:

- considering the likely consequences of any decision in the long term;
- considering the interests of MAG employees;
- fostering and developing MAG business relationships with suppliers, customers and others.
- assessing the impact of the operation on the community and the environment (as further explored on pages 76 to 77 in the CSR Report);
- assisting MAG in maintaining a reputation for high standards of business conduct; and
- acting fairly as between members of MAG

The separate Section 172 section on pages 74 to 77 illustrates how the Board and management have taken account of these matters in decision-making throughout the year. The impact of MAG's operations on the community and environment (including climate change) in particular is addressed in detail in the Strategic Report on pages 76 to 77.

# WATES PRINCIPLES

MAG seeks to adhere to the Wates Principles at all times with regard to the structure and effectiveness of its internal governance arrangements and the size and composition of the Board.

In particular, Principle Two of the Wates Principles (Board Composition) advises: 'Effective board composition requires an effective chair and a balance of skills, backgrounds, experience and knowledge, with individual directors having sufficient capacity to make a valuable contribution. The size of a board should be guided by the scale and complexity of the company." MAG considers that the structure outlined above and the individuals appointed to the Board adhere to the guidance set out in the Wates Principles (and in particular Principle Two) with regard to the balance and diversity, size and structure, and effectiveness of the Board.

Furthermore, in adherence to Principle 3 (Director Responsibilities) of the Wates Principles, MAG considers that, through the arrangements set out above, the Board and individual directors have a clear understanding of their accountability and responsibilities and that the corporate governance arrangements and procedures support effective decision-making and independent challenge

Please note that Paul Venables was appointed in February 2022 as Audit Committee Chart designate and assumed the role and responsibilities of the Audit Committee Chart when Pobert Napier retired at the end of Line 2022.

# Nomination Committee report

The Committee held four meetings this year and spent a large part of its time considering the succession plans for the Group CEO. The succession plans were a regular agenda item over the year and the Committee was able to review the status of the structured development programme in place for Ken O'Toole to ultimately assess his capability to succeed into the role of Group CEO. The Committee also considered the suitability of Charlie Cornish succeeding into the role of Group Chair upon my retirement. Consideration was given to the scope and remit of both roles, the desire for continuity during an important time in our capital programmes and corporate governance principles. I am very pleased to report hat the Committee felt able to recommend to the shareholders that Ken O'Toole succeed into the role of Group CEO and that Charlie succeed into the role of Group Chair effective from 1 October 2023

The Committee maintained oversight of the development plans of senior Executives and succession options on critical posts which has been key to support the continuing recovery and transformation of the business. It is vital that the business has the right individuals in place of our Airports and, during the year, the Committee oversow the appointment of Chris Woodroofe (MD of Manchester), Gareth Powell (MD of Stansted) alongside Steve Griffiths (MD of East Midlands)

A key priority for the Committee was to build bench strength and diversity of the Senior Leadership teams across the business and the Committee considered other critical oppointments in operational and commercial roles at the Airports (a mix of internal promotions and external appointments). Separately the Committee discussed the talent and succession pipelines for CAVU and endorsed the appointments of commercial directors to support the ambitions for growth Looking forward, the Committee's focus on talent and succession planning will confinue, ensuring that effective planning and development is in place for Executive and senior management teams to promote the success of the Company

The Committee has begun the process of replacing Vanda Murray who is due to retire as Non-Executive Director and Remuneration Chair in March 2024. In our discussions, the Committee agreed the relevant expertise and experience required for this role. With the recruitment process in its final stages, the Committee expects to be able to recommend an appointment to the shareholders shortly.

The Committee closely follows and supports the efforts of the CSR Committee and the Management team to strengthen the presence of women across the Group and remains committed to promoting equity, diversity and inclusion in line with the Board approved ED&I Strategy. This will continue to form part of the Committee review of succession and talent in FY23. Indeed, the Committee was updated on the search for a permanent Chief People

Officer a female candidate due to start in September 2023.

The Nomination Committee plays an important role in ensuring that the structure, size and composition of the Board are appropriate, monitoring the balance of skills, knowledge, experience and diversity on the Board, leading the process for potential appointments to the Board and overseeing succession planning in respect of the directors (other than shareholder appointed directors) and senior Executives In discharging its obligations, the Committee will take soundings from the Chief Executive Officer and seek guidance from other Executives and outside advisers and consultants, as appropriate.

Lam satisfied that the Nomination Committee met its responsibilities this year.

Sir Adrian Montague CBE
Chair of the Nomination Committee

# **CSR** Committee report

"As Chair of the CSR Committee, I am proud of the way MAG is committed to operating a responsible, forward-looking business and over the last year I have overseen another detailed programme of work to deliver the Group's CSR Strategy -'Working together for a brighter future."

The CSR Committee met four times during the year. All members, which comprise my fellow Non-Executive Directors, Cath Schefer and Jon Wragg, attended all of those meetings. The meeting is also attended by the Non-Executive Chair, Managing Directors of each airport, the Chief of Staff, Group CSR and Airspace Change Director, plus other senior Executives and external speakers, as necessary.

The Committee is responsible for maintaining and reviewing the Group's CSR Strategy, as well as offering advice where necessary and ensuring that the Strategy is effectively implemented. In addition to receiving regular reports on performance, this year the matters considered by the Committee included:

- The creation of five pledges as part of the let Zero Charter, to support the Government's Strategy for the UK aviation industry to reach net zero by 2050
  - The partnership between Manchester Airport and HyNet partners Codent and Progressive Energy to become the first in the UK to secure a direct supply of hydrogen fuel
    - The plans for a Solar Farm at London Stansted Airport
    - · Progress on the Airspace Modernisation programme which currently makes MAG the operator of the only two large airports to have passed Stage 2 of the CAA's CAP 1616 process
      - The publication of a materiality & stakeholder trust study
      - The approval of MAG's Equity, Diversity and Inclusion (ED&I) Strategy in September, after which the Committee welcomed representatives from the Group's Colleague Resource Groups who presented their work about improving ED&I across all areas of the business
        - · Marking significant milestones at our MAG Connect Aerozones including the first anniversary of the facility at Manchester Airport, marking 30,000 visitors to East Midlands and 20,000 to London Stansted
          - Developing the Youth Form pilot scheme to ensure MAG is listening to the more diverse range of local voices
          - Celebrating the work of our Community Trust Funds and their eco garden competitions across the Group

More information about the Group's commitment to corporate responsibility can be found on pages 34 to 41 and pages 88 to 97

**Vanda Murray OBE Chair of the CSR Committee** 

# Remarkation Committee report

# WHAT ARE OUR REWARD PRINCIPLES AND HOW DO THESE LINK TO MAG'S STRATEGY?

The Committee considers the Group's key strategic priorities when setting remuneration and ensures that all remuneration packages are linked to the long-term sustainable financial performance of the Group. The Committee ensures that incentive structures drive performance that will enhance the experience of our customers shareholders and our colleagues. The Committee's approach is to ensure a significant proportion of pay for Executives is linked to the performance of the Group rather than being fixed in base pay. For the CEO, 25% of compensation is fixed, with 75% variable and based on the achievement of financial metrics, personal performance and the achievement of key priorities. All Executives have not less than 60% of their remuneration linked to performance metrics each year (the proportion varies dependent on role).

The Short-Term Incentive Plan (STIP) is balanced between key financial performance measures (60%) and the achievement of personal objectives (40%). Personal objectives are specific to each Executive and are aligned to the achievement of specific in year actions and the achievement of our longer term priorities.

The Long-Term Incentive Plan (LTIP) is linked to the achievement of both financial measures and key priorities for MAG

The Committee review and set targets each year aetails of which are set out below

This approach of a basket of key measures each year ensures an approach which is focused on the long-term health of the Group as well as in year performance.

Outcomes for both the STIP and LTIP are determined based on threshold, targets and then stretch measures. Full vesting can only occur where all stretch targets are achieved across all measures.

Both schemes are discretionary, and in determining final awards the Committee considers the overall performance of the Group in determining final outcomes for participants.

To achieve further alignment with the long term performance of the Group, a new plan has been introduced, the Executive Investment Plan (EIP), which is designed to ensure that Executives are facused on sustainable growth in shareholder value through the retention of a proportion of their vested LTIP award each year Retained monies attract a return only based on the performance of the Group, and such monies are generally only available one year after cessation of employment

As one of the largest employers in the region MAG is committed to being a good corporate citizen and doing the right thing for our colleagues and local communities and therefore supports the Corporate Social Responsibility (CSR) Committee in areas such as fairness, gender pay and diversity and inclusion. We are currently seeking and should shortly receive accreditation as a Real Living Wage (RLW) employer.

The Committee is guided by the following principles:

- attract and retain talent allow the Group to attract, motivate and retain senior Executives of high calibre who are capable of delivering the Group's stretching objectives,
- performance-driven link rewards to both individual and corporate performance, responsibility and contribution over both the short and long term;
- market aligned position the Group competitively in the principal markets in which it competes for talent (both private and listed companies);
- fair fairly designed and applied with consideration to market positioning, internal relativity and individual contribution, in the context of pay within the wider workforce; and
- simple rewards are simple and understandable with a clear link between performance expectations, outcomes and rewards.

# WHAT WERE THE COMMITTEE'S RESPONSIBILITIES AND KEY **ACTIVITIES UNDERTAKEN IN FY23?**

GOVERNANCE

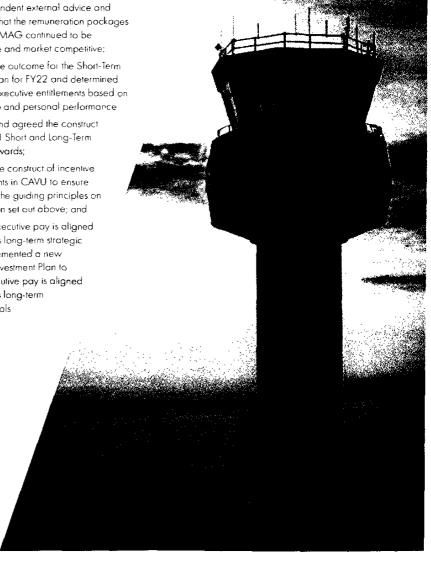

At the end of FY22, the exceptional steps taken during the Covid-19 pandemic in relation to pay ceased, and for FY23 our pay policies and practice returned to normal.

During the year, in addition to the regular duties the Committee performs year-on-year, the Committee undertook the following duties:

- determined that, in line with both market practice and overall affordability constraints, the Executive pay award be determined at a lower level than either leaders or colleagues:
- commissioned market reviews from FIT Remuneration Consultants of both Non-Executive and Executive pay during the period to ensure that the Committee had independent external advice and assurance that the remuneration packages offered by MAG continued to be appropriate and market competitive;
- reviewed the outcome for the Short-Term Incentive Plan for FY22 and determined individual Executive entitlements based on both Group and personal performance
- reviewed and agreed the construct for the FY23 Short and Long-Term Incentive awards;
- reviewed the construct of incentive arrangements in CAVU to ensure these meet the guiding principles on remuneration set out above; and
- To ensure Executive pay is aligned with MAG's long-term strategic goals, implemented a new Executive Investment Plan to ensure executive pay is aligned with MAG's long-term strategic goals

# MEMBERSHIP OF THE COMMITTEE, REMIT AND ATTENDANCE AT MEETINGS

The Committee's members during the year were Vanda Murray (Chair), Christian Seymour, Cath Scheler and Bev Craig (all Non-Executive Directors, with Christian Seymour and Bev Craig being shareholder-appointed The Committee met four times during the financial year

# Remuneration Committee report continued

# HOW DO WE REWARD OUR EXECUTIVES AND HOW DOES THIS LINK TO THE GROUP'S STRATEGY?

Reward element and purpose in supporting the

Group's strategy

Operation of reward element for Executive Directors and senior Executives

# Basic Salary

Support the recruitment and retention of Executive Directors and other senior Executives, recognising the size and scope of the role and the individual's skills and experience.

- The basic salaries of Executive Directors and senior Executives are reviewed annually and serbased on.
- · personal performance;
- Group size and performance
   responsibility levels;
- affordability, and
- competitive market practice against a comparator group of similar sized organisations.

Individuals who are recruited or promoted to the Board may, on occasion, have their salaries set below the targeted policy level until they become established in their role. In such cases subsequent increases in salary may be higher until the target positioning is achieved

In line with all employees a pay award was made during the year, but at a lower percentage than for all other employees

### STIP

Ensures a market-competitive remuneration package links total remuneration to achievement of the Group's strategy against measurable performance criteria in the short term, both driving individual performance and creating shareholder value. Short Term Incentive awards for FY23 were deployed during the year. These awards vest subject to the achievement of key performance measures as to 60% (EBITDA and cash), and personal objectives (40%).

in addition to the performance targets, the Committee retains the discretion to defer or reduce \$11P awards in part or in full for this year, based on an overall assessment of both Group and personal performance to line with best practice, a clowback provision is included in the \$TIP. This provision enables the Group to reduce awards or reclaim payments made, in the event of a material misstatement or error in the financial results, where the Group has made an error in calculating the amount of award, or where there has been gross misconduct on the part of the participant.

# LTIP

Designed to incentivise participants towards sustainable long-term growth and shareholder value whilst acting as an effective retention mechanism.

ITIP awards are subject to the achievement of a basket of largets.

Details of conditions for current awards are set out below.

# LTIP vesting in FY23 and FY24

Financial measures are EBITDA, credit rating/financing, recurring efficiencies and shareholder payments. As an example, an element of the vesting of ETIP this year was determined through the delivery of recurring efficiencies of over £60m alongside the achievement of in year EBITDA performance.

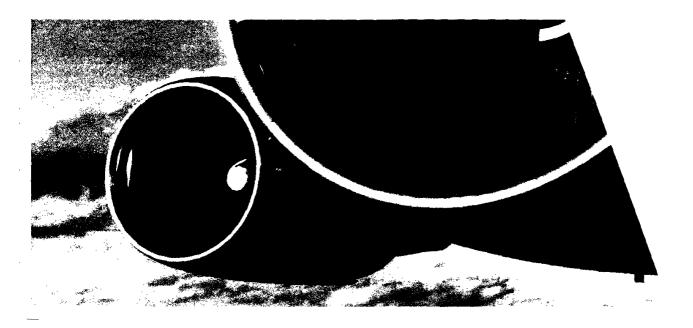

Key priorities are customer service index targets

# LTIP vesting in FY25

Financial measures are shareholder returns, EBITDA, operating margin, and return on capital employed

Key priorities are ED&I targets on gender, age and ethnicity, customer service index and market share.

The Committee reserves the discretion to reduce awards down to nil where it considers underlying performance is not at a satisfactory level during the performance period.

#### Reward element and purpose in supporting the Group's strategy

#### ΕIP

Designed to ensure that Executives are focused on sustainable growth in shareholder value through the retention of a proportion of their LT:P award the value of which is linked to the long-term financial performance of the Group.

#### Operation of reward element for Executive Directors and senior Executives

The EIP was implemented during FY23 and applies to all LTIP awards that vest in respect of FY23 onwards The investment requirements for Executives are as follows:

Executive Directors required to invest 50% of each LTIP award until a threshold of 300% of solary is met in terms of invested monies, and

Other Executives required to invest 30% of each ETIP award until a threshold of 200% of solary is met.

Such monies cannot be accessed until, in general, one year after cessation of employment

GOVERNANCE

The Remuneration Committee has discretion to consider requests to both increase or decrease investment amounts, and to increase the holding period for Executives greater than one year post cessation of

#### Pension

The pension arrangements comprise part of a competitive remuneration package and facilitate long-term retirement savings for Executive Directors and senior Executives.

The Company provides pension benefits to eligible employees through legacy defined benefit arrangements or the MAG Pension Savings Plan, which is a defined contribution (DC) arrangement. The DC arrangement is available for newly eligible employees and provides money purchase pension benefits.

Executive Directors and senior Executives are entitled to receive a salary supplement in lieu of pension contributions

#### Additional benefits

Provide a market competitive benefits package that is consistent with Group values and supports Executives to carry out their duties effectively

Other benefits include a car cash allowance, or an equivalent car, in addition to permanent health insurance, private health insurance, critical illness cover and death-in-service life cover.

Directors' remuneration is set out in note 6 to the financial statements.

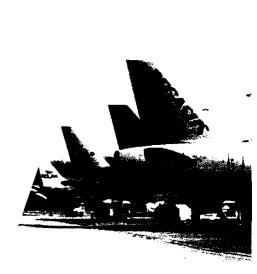

#### HOW DOES THE COMMITTEE GIVE CONSIDERATION TO THE WIDER **EMPLOYEE WORKFORCE?**

The Committee understands the importance of giving consideration to the wider employee workforce when making remuneration decisions, in terms of fairness, gender pay, and diversity and inclusion. The Remuneration Committee works closely with the Corporate Social Responsibility (CSR) Committee to understand the positive work being done in this area and the stakeholder engagement undertaken as part of the CSR agenda.

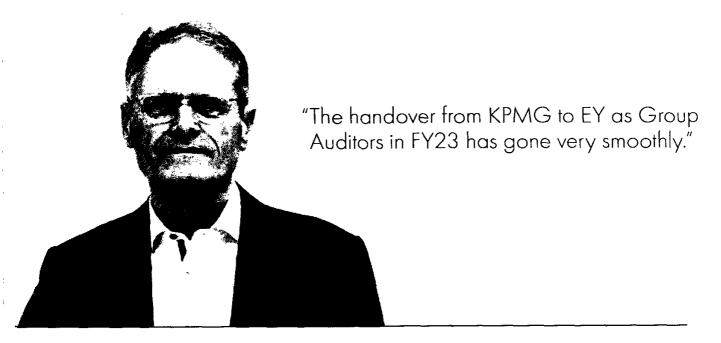

More information about the Group's commitment to gender pay and diversity and inclusion can be found in the Sustainability section of the report on page 36. Examples of the initiatives MAG has implemented are.

- · Establishment and operation of several Colleague Resource Groups, including the MAG Women's Network, Fly with Pride, Race & Ethnicity, the Carer's Network and Mens's Mental Health;
- Launch of the ED&I forum, chaired by the Deputy CEO, and launch of diversity training modules;
- We continue to offer a flexible benefits system that allows employees to choose the benefits most appropriate for their circumstances;
- We have produced a Gender Pay Report as set out in the Gender Pay Regulations; and
- Commitment to seek accreditation as a Real Living Wage employer

Vanda Murray OBE Chair

### Audit Committee report

Lassumed the role of Audit Committee Chair from 1st July 2022 following the retirement of Robert Napier Lam pleased to present the Audit Committee's report for the year ended 31st March 2023 on behalf of all members. As at 31st March 2023, the Committee comprised of myself, Vanda Murray, Jon Wragg, Cllr John Blundell and Manaj Mehta (all Non-Executive Directors with Manaj Mehta and John Blundell being shareholder appointed).

The Audit Committee is responsible, primorily, for monitoring the Group's financial statements, the adequocy and effectiveness of its internal control systems (including financial controls), the operation of its risk management frameworks and whistleblowing procedures and for reviewing the appointment independence performance and cost effectiveness of the Group's external auditor. During the year the Committee:

- reviewed the Interim and Annual Report and Accounts including significant judgements going concern, impairment considerations and Management Representation Letter;
- reviewed and approved the Group's Tax Strateav:
- reviewed and approved compliance with the Group's Treasury Policy and financial risk limits:

- monitored the Group's cyber security activity and key controls, including developments in the external threat environment and progress required by the Network and Information System Regulations (NIS);
- considered the impact of changes to the accounting and financial reporting regimes applicable to the Group
- considered and approved the results of an independent External Quality Assessment of MAG's Risk and Internal Audit functions,
- reviewed the Group's internal control and risk management framework, including: a biannual review of principal risks: regular updates on the status and completeness of MAG's corporate risk profile and associated control measures; and horizon scanning regarding new and emerging risk considerations:
- reviewed the results of risk-based and cyclical internal audit work and challenged management in relation to key findings and implementation of recommendations:
- considered internal audit skilis and resources and satisfied itself that these are adequate to meet the needs of the business and will be supplemented with co-sourced independent specialist support as and when necessary.

- assessed the adequacy and basis
   of renewal of the Group's insurance
   provision; reviewed alternative performance
   measures and adjusted items;
- evaluated external audit activity, specifically in relation to the key risks (impairment of non-financial assets, going concern and valuation of investment property) and key judgemental areas (pensions and tax); and
- evaluated the impact of the final phase of the Manchester Transformation Programme and subsequent closure of Terminal 1,
- in the course of satisfying itself as to the independence and objectivity of the external auditor, analysed the level of fees poid to the external auditor for audit and non-audit work, and the performance of the external auditor.

The Audit Committee met three times during FY23 as part of its regular cycle, with meetings taking place in June 2022, November 2022 and March 2023. All members attended all meetings, with the exception of Vanda Murray who sent apologies for the November 2022 meeting.

Following a robust evaluation process in FY22. Ernst & Young LLP were appointed as statutory auditor for a five year period commencing from FY23. Mindset and culture were all key factors used in determining the appointment of MAG's external auditors and these factors, alongside judgement, collaboration and quality control, are all used on an ongoing basis to assess the quality of service provided.

The independence and objectivity of the external auditor are safeguarded by a number of control measures including:

- Imiting the nature and extent of non-audit services;
- the rotation of the lead audit partner every five years;
- monitoring changes in legislation and best practice guidance related to auditor independence and objectivity;
- the external auditor's own internal safeguarding processes and procedures;
- independent reporting lines from the external auditor to the Chair of the Audit Committee, along with regular in-person sessions with the full Audit Committee.

The external auditor, the Chief Executive, the Chief Financial Officer and the Chief Audit Officer all routinely attend the Committee's meetings. The external auditor and the Chief Audit Officer each have the opportunity to meet members of the Committee and/or the Committee's Chair, without Executive management present.

In the assessment of the draft FY23 Annual Report and Financial Statements, there was a continued robust focus upon the evidence supporting the ability of the Company to release its financial statements on a going concern basis, the viability of the Company and ensuring that the Annual Report was fair, balanced and understandable.

The directors consider that the Annual Report and Financial Statements taken as a whole is fair, balanced and understandable, and provides the information necessary for shareholders to assess the Company/Group's position and performance, business model and strategy.

The Board is satisfied that, through the range of skills and business experience possessed by each member of the Audit Committee, throughout this financial year, the Audit Committee, as a whole, had the competence relevant to the sectors in which the Group operates

Paul Venables Chair – 1 July 2022 onwards

Robert Napier CBE DL FRCS (Hon)
Chair – until 30 June 2022

### S172 report

# Statement by the directors in performance of their statutory duties in accordance with \$172(1) Companies Act 2006

Section 172(1) of the Companies Act 2006 requires directors to promote the success of the Company for the benefit of its stakeholders and to achieve the Company's purpose. The Board of Directors are aware of their responsibilities and consider they have acted in accordance with their statutory duties. This section sets out how they have discharged this obligation.

The Company's key stakeholders, and our interaction with them are summarised below.

	135 cm 18 dm 31 812	Control of the second	and the grown is the second
Shareholders	Our shareholders provide the equity finance necessary to support the operation and future development of the business  Shareholders also appoint Non-Executive Directors who are critical to overall governance and make a valuable contribution to the working of the Board and developing the Company's strategy.	Our shareholders have invested in the long-term success of MAG. In return they seek predictable and sustainable returns on their investment.  Our shareholders require high standards of governance, responsible business practices and transparent disclosure of information. This allows them to make informed decisions and to meet their own disclosure and reporting requirements.	Shareholders are directly represented on the Board and oversee the appointment of Non-Executive Directors. They receive regular reports from the management team on all aspects of the business. Shareholders receive regular reports from Board sub-committees, including the CSR Committee, which considers responsible business practices, including environmental and community impacts, health, safety and wellibeing, modern slavery as well as equity, diversity and inclusion.
Colleagues	Colleagues are our greatest asset. They make our strategy a reality and deliver services to our customers. Their engagement, energy and ideas are critical to the continued innovation and improvement of the services we offer.	Our colleagues need a workplace that is safe inclusive and offers them apportunities to develop their careers. They expect to be treated equitably and to be rewarded appropriately for their contribution to the success of the Company.  Colleagues want to be a part of the decisions that offect them and to be	The Board receives regular reports on safety as a first priority and scrutinises safety performance. The CSR Committee, which is attended by the Chief People Officer, provides an apportunity for workplace issues, including fair pay equity, diversity and inclusion, to be discussed.
		supported by effective systems of internal communication.	
Passengers	Passengers provide much of our income and are the foundation for our business. It is important that, working with our airline partners, we provide an appropriate range of services to meet their transport needs.	Our passengers want our airports to provide a safe, secure clean and welcoming environment, and to experience an efficient service. Our customers expect us to make our services available to all by providing an accessible environment.	The Board receives regular reports on passenger feedback, including our use of the Net Fromoter Score. The Board's consideration of passenger experience includes regular reports on the service provided to passengers who require additional support to access our services.
Communities and the environment	Many of our calleagues and customers are drown from local communities and the economic impact of our operations is greatest in the regions we serve.  Many of the environmental consequences of	Local communities want to share the economic success of our airports. They expect us to take all reasonable steps to reduce local impacts, including noise and emissions.	The Board established the CSR Committee to allow extensive discussion of these issues. The Board regularly considers environmental impacts including diimate risks and considers the views of local communities through an independently facilitated materiality survey.
	our operations including noise congestion and local air quality have greatest impact on communities closest to our airports, though some of the impacts of our operations, including climate change, have global implications.	Communities are concerned by climate change and expect us to progressively reduce the emissions of our airports and work with airlines to ensive that tagether we play a full part in delivering the Government's	independently activated indiendiry solvey
	It is vital that we understand the priorities of communities and ensure our operations take place within acceptable environmenta. limits By doing so we earn our social licence to operate and grown.	economy-wide target to reach net zero emissions by 2050

Customers, partners and suppliers	We deliver our services with the support of our airline customers business partners and suppliers across our entire value chain. Having effective and respectful relationships with them supports the long-term success of our businesses and maximises mutual benefit.  It is important that those that we work with adopt responsible and sustainable practices, to minimise the risk to our operations and reputation.	Our customers, partners and suppliers want to work with us to maximise mutual benefit.  They require us to adopt high standards of governance, responsible business practices and transparent disclosure of information. This allows them to make informed decisions and to meet their own disclosure and reporting requirements.	We work collaboratively including holding one-to-one key account management meetings with all our business partners – including airlines, retailers, tenants and aviation service partners. Our Airport Consultative Committees bring these customer groups together with business, passenger and community representatives, whilst our Airport Operator Committees bring airlines together to consider operational practices and management policies. Significant issues are drawn to the attention of the Board and associated risks are captured in our risk register.  Our approach to procurement is accredited to the Corporate Certification Standard of the Chartered Institute of Procurement and Supply. This incorporates practices to make responsible procurement decisions which treat suppliers fairly, mitigate the risk of modern slavery, and ensure prompt payment. The Board receives regular reports on the management of the risks of modern slavery.
Industry, regulatory bodies, government and government agencies	Our operations are highly regulated. The policy and regulatory framework determines how we operate including ensuring that we operate safely and securely, that competition is fair and that our environmental impacts remain within acceptable limits.	Government and industry regulators seek to work closely with industry partners and their associations to ensure that the policy and regulatory framework is informed by and takes full account of, relevant issues. Regulators rely on clear and transparent disclosures	The Board receives regular updates on government policy and oversees our work to engage with government, government agencies and regulatory bodies to help formulate and implement their policies. Reporting to the Board highlights regulatory risk and any instances of non-compliance.

### \$172 report continued

# HAVING REGARD TO THE LIKELY CONSEQUENCES OF DECISIONS IN THE LONG TERM

As set out on page 80, the Board oversees a risk management process, including a dedicated Audit Committee that oversees the management and implementation of the risk framework. The regular review and assessment of risk that is shared with the Board protects the long-term interests of MAG. As reported on page 88, in recent years greater emphasis has been given to assessing the risks posed by climate change and MAG meets the provisions of the Task Force on Climate-Related Financial Disclosures. This year key risks identified included the risk of a safety and/or security incident; the mitigation of and adaptation to climate change: the recruitment and retention of talented people, the security of data and information and macro-economic uncertainty.

Whilst it has been necessary in some instances to rephase investment plans as the business has recovered from the pandemic, the Board has continued to support the measures necessary to secure the long-term growth of the business, including completing the  $\mathfrak{L}1$  3bn transformation of Manchester Airport.

The Board has also supported investment in a Future Airspace Programme, to ensure that airspace arrangements can support the objective to make best use of the airports' physical infrastructure.

### HAVING REGARD TO THE INTERESTS OF THE COMPANY'S EMPLOYEES

This has been another demonding year for our colleagues, as the business recovered from the pandemic and sought to accommodate pent up demand for flying, particularly over the peak Summer period. The large-scale recruitment necessary to respond to increased demand proved challenging, but the business is now fully resourced. The Board oversaw this process and received regular progress reports throughout.

Through the CSR Committee, the Board has continued to receive regular reports on a wide range of workplace issues, including gender pay gap, equity, diversity and inclusion and modern slavery. This year the Board approved a new Work Charter making clear the commitment to and support available to colleagues. Safety remains a critical priority for the Board and safety performance is closely and regularly scrutinised

# HAVING REGARD TO THE NEED TO FOSTER THE COMPANY'S BUSINESS RELATIONSHIPS WITH SUPPLIERS, CUSTOMERS AND OTHERS

We have mature and extensive consultation practices. Our regular consultation forums have been maintained and strengthened. Our airport consultative committees bring together customers, airport users, government and community groups. At an operational and commercial level, liaison groups and regular one-to-one account management meetings ensure timely exchange of information. This enables us to understand the priorities of these important stakeholders and to ensure we take account of their views in decision making. This year we were able to reinstate our 'Meet the Buyer' programme at Staristed and to extend the programme to Manchester. This has ensured that economic benefits of our operation and growth are increasingly shared with smaller local businesses.

We continue to regularly review our assessment of materiality and this year we undertook a survey focusing on tocal stakeholders. This review has helped to build our understanding and inform our decision making

The Board receives regular reports on all aspects of the business, including a specific report on the findings of the materiality review.

to the environmental management systems standard ISO 1,4001 and to participate in the GRESB benchmark. Our 'five star' rating in this global ESG framework was retained this year. Through the CSR Committee, the Board receives regular reports on environmental performance, considering a wide range of performance indicators, including legislative compliance. The Board continues to oversee the implementation of the CSR Strategy and the detailed supporting programme of work to deliver the commitments that it contains.

### Internal controls and risk management

# Internal controls

The directors are responsible for the Group's system of internal control, which aims to safeguard assets and shareholders' investment, and seeks to ensure that proper accounting records are maintained, that statutory and regulatory requirements are met, and that the Group's business is operated economically, effectively and efficiently.

It is acknowledged that any system of internal control is most likely to manage rather than eliminate risk, and can provide only reasonable, but not absolute, assurance against material misstatement or loss.

The Group's system of internal control has been in place throughout the year and up to the date of this Annual Report. The key elements of the internal control environment, which includes the process for preparing the consolidated financial statements, are:

- clearly defined organisational structures, schemes of delegation and lines of responsibility,
- the involvement of qualified, protessional employees with an appropriate level of experience (both in the Group's Finance function, relevant 2nd and 3ra Line assurance functions and throughout the business).
- regular meetings of the Board and the Chief Executive's Executive Committee
- quarterly Airport, IT and CAVU Risk and Audit Boards meetings, chaired by the relevant MD or Executive member.
- Board approval of long-term business strategies, key business objectives and annual budgets (with an annual review being undertaken to update the business strategies and key business objectives).

- preparation, and Board approval, of revised financial forecasts during the year – monitoring financial performance on a monthly basis against budget, and the benchmarking of key performance indicators, with remedial action being taken where appropriate,
- monitoring annual performance against business plans.
- established procedures for planning, approving and monitoring capital projects, together with post project investment appraisal,
- regular review by the Group's Finance function of each business unit including a reconciliation to the management accounts on a segmental basis.
- the review by the Audit Committee and the Board of the draft consolidated financial statements, and receipt of and consideration by the Audit Committee of reports from management and the external auditor, on significant judgements and other perinent matters relating to those statements.
- the activities of the Group Risk Team and Group Internal Audit function (see below);
- Implementation of Group-wide procedures, policies, standards and processes concerning business activities including financial reporting, health and safety, and human resources.

The Group has an established, independent Internal Audit function, the role of which is to provide impartial, objective audit, assurance and consulting activity that is designed to strengthen, improve and add value to core processes and procedures across the Group.

The Internal Audit team takes a disciplined and risk-based approach to evaluating and improving the effectiveness of risk management, internal controls and governance processes, aimed at providing assurance that MAG's key risks are being well managed, and controls are adequately designed and operating effectively. Their methodology is based on the Chartered Institute of Internal Auditors Internal Audit Standards and best practice guidelines along with the updates as detailed in the 2020 Internal Audit Code of Practice.

An annual risk-based Internal Audit Plan is developed which provides appropriate and targeted coverage of the Group's risk profile over a rolling three-year period, with an initial focus on areas of high inherent risk and areas where the Group is heavily reliant on mitigating controls to manage the risk to an acceptable level. The plan is reviewed and refreshed in line with MAG is annual cycle of Audit Committee meetings and according to the Group's evolving risk profile.

Over the course of the year, the Internal Audit team carried out 25 reviews across a broad range of areas including treasury management and cashflow, fixed assets; recruitment controls and processes, operational rostering; business resilience; modern slavery governance; drones governance arrangements and environmental management systems. The IT audit plan this year remained focused on key cyber and information security risks, and deep dives were conducted into areas such as MAG's Airport Content Management Systems and Amazon Web Services Security.

In line with Internal Audit standards, Internal Audit activity has continued to focus on the adequacy and continuous improvement of MAG's 2nd Line functions and the associated controls, maturity and assurance processes that are in place across the Group. Where relevant, Internal Audit scopes include a review of governance arrangements and as appropriate, the reliability and quality of key business information which is being provided to support strategic decision-making processes across the business

The Internal Audit team carries out an annual self-assessment exercise to establish its effectiveness and to identify any areas for improvement, based on the Chartered Institute of Internal Auditors Standards. In addition, in FY23, a full External Quality Assessment of MAG's Risk and Internal Audit functions was undertaken by BDO LLP which covered the five key areas of Purpose, Profile; Planning; Protocols; and Performance. The Internal Audit team was assessed as fully compliant with the Standards and graded as effective/leading in all six areas, with six minor improvement opportunities identified which were addressed at the time of the review.

In line with best practice, MAG also operates an independently provided, confidential reporting telephone helpline and web portal for employees to raise matters of concern in relation to fraud, dishonesty, corruption, theft, security and bribery. All claims are fully investigated in line with MAG's standard policies and procedures and a full whistleblowing update is provided at each Audit Committee meeting.

As standard, Internal Audit reviews consider the Group-wide application of policies and procedures with the aim of promoting best practice and standardisation across MAG. Any areas of non-compliance with policies and procedures are reported to appropriate

governance forums including Risk & Audit Boards, leadership team meetings and Audit Committee. There is full transparency in respect of MAG's strong framework of risk management and controls assurance, and attendance at key forums by the Head of Risk and Head of Internal Audit ensures that cultural aims in respect of tone from the top and risk appetite are instilled across the business.

Regular reports on control issues are presented to, and discussed with, the Audit Committee, and there is a process in place to ensure that audit recommendations are fully implemented by senior Executive management. As such, 99% of recommendations made during the period have now been fully implemented or are on track to be implemented in line with initial agreed deadlines. There are updated, risk-based deadlines in place for the 1% of overdue actions.

On behalf of the Board, the Audit Committee has received the Chief Audit Officer's Annual Report and Opinion and has conducted a review of the effectiveness of the system of internal control. Based on the Internal Audit work delivered during the year, in the context of materiality, and considering management's commitment to implement agreed control improvement recommendations, the Internal Audit team concluded that MAG's internal control and risk activities were operating effectively for the period under review.

The Board, having considered the Audit Committee's review, is able to confirm that no significant failings have been identified in the system of risk management and internal control.

### Internal controls and risk management continued

# Risk

# management

At MAG we believe that effective risk management is critical to our success as a business – from delivering safe, secure and efficient operations which provide a great customer experience, to the delivery of our strategy and business plans, all of which are underpinned by a clear understanding of the risk environment and robust strategies to manage and mitigate material risks.

#### **Risk Management Framework**

MAG's Risk Management Framework covers the full spectrum of our corporate and operational activities. The framework is embedded in day-to-day operations and is characterised by strong management ownership and engagement.

MAG operates a '3 Lines' governance model whereby risk is awned and managed by management within the business ('1st Line'), supported and facilitated by Risk Management and Assurance functions (2nd Line') and independently assured by functions including MAG's own Internal Audit Department ('3rd Line').

MAG's Risk Management Framework is focused on providing management, the Audit Committee and the Board with a clear and current view of the organisation's risk profile and strategies in place to manage and mitigate material risks, and to identify emerging risks. The framework is structured to ensure that all aspects of the Group's risk profile are subject to regular review at a strategic, corporate and operational level. The

framework also supports the prompt escalation and assessment of material or emerging risks at the appropriate internal governance forums as they arise or are identified. This assessment process is underpinned through the delivery of an extensive programme of risk review workshops facilitated by our 2nd Line team of risk specialists. MAG's risk specialists support management across the organisation in identifying and evaluating existing and emerging risks and in the development of effective mitigation strategies designed to manage risk exposure to an acceptable level.

The framework also enables management to identify and evaluate potential business and operational opportunities, enhancing the ability of the organisation to maximise these at an early stage and in a controlled manner.

The Risk Management Framework provides a clear and comprehensive basis for a consistent approach to risk management across the business. This core foundation means that managers can respond with agility to new and emerging risks thanks to a clear understanding of how risks should be identified, measured,

monitored, and governed. This was facilitated in FY23 with the establishment of Risk and Audit Boards across the Group. These provide a forum for the escalation, discussion and governance of local airport and functional risks to ensure that they can be appropriately managed at the right level.

Having a well-embedded risk management process allows MAG to promptly identify the key uncertainties and challenges that our business faces alongside the mitigations and actions required to meet passenger needs and achieve our strategic objectives.

#### Risk appetite

Risk appetite is well understood within the business and is a core element of our risk evaluation methodology, providing clear boundaries for management on the levels of risk the business is prepared to accept, and prompting action where risks fall outside of our defined appetite. Defined risk tolerances provide the foundation for consistent evaluation of risk across the business and the basis for assessing risks against our stated risk appetites.

The MAG Risk Management Framework establishes a set of key evaluation criteria for risk impact scoring. Each of these impacts is associated with a relevant appetite. In this way, a greater appetite may be attributed to some commercial risks compared to a significantly lower appetite for regulatory/compliance and health and safety risks. Risks are escalated through the reporting process based on whether they are inside or outside of appetite. This enables a clear differentiation between a higher scoring risk for which MAG has a greater tolerance and a lower scoring risk for which the appetite is low or indeed zero.

This methodology applies to all MAG risks, from operational through to strategic level. This consistent approach facilitates comparison of risks which means the most significant are escalated to appropriate governance forums. Risk appetite is considered regularly by management and the Audit Committee as part of its annual plan of work to ensure that it remains fit for purpose.

Strong emphasis is placed on the development and implementation of robust action plans to mitigate or manage identified risks to a level which is inside MAG's risk appetite. Timely implementation of risk action plans is monitored by our Risk team and progress is regularly reported to senior management and, where appropriate, to the Audit Committee and Board.

Ownership and accountability are key to the success of any risk framework, and management at all levels is expected to engage actively in the risk management process and take full ownership of risks within their areas of responsibility. As a minimum. management is required to engage in risk review workshops in advance of each Audit Committee meeting, ensuring that the Executive and Audit Committee has an accurate and up-to-date view of the Group's risk profile throughout the year. This process is supported by the regular engagement of MAG s Risk team with Risk Owners and their teams. This ensures that risk is considered on a regular basis and remains at the forefront of business planning and decision-making.

The Audit Committee and our Executive receive regular detailed management information on the Group's risk profile through risk reports which highlight key risks, material changes to the risk profile and risks outside of appetite. In addition, Airport Leadership teams receive

regular risk reports with a focus on both the risk profile and management's progress in implementing agreed mitigating actions. Management is occustomed to regular constructive challenge on its strategies to manage key risk exposures and is held to target deadlines to implement agreed mitigating actions.

#### RISK CULTURE

Risk management is embedded in MAG's decision-making processes through the requirement to provide detailed risk assessments within business case submissions and decision papers submitted to the Board and our various other governance forums that exist in the business. In addition, the Board receives periodic updates on the Group's risk profile to support strategic decision-making. The Board is also updated as required to inform them on new and emerging significant risks. This includes the outputs of biannual Strategic Risk workshops held with the Executive team to ensure that MAG's strategic and emerging risk assessments remain up to date and accurate.

At MAG we continuously strive to maintain a strong risk management culture which is open and transparent. It is important that management feels able to discuss risk issues openly and receive the support it needs to ensure that risks are actively managed or mitigated. The Risk team engages regularly with management across the business to achieve this, facilitating open conversations around risk, ensuring they have the knowledge and tools to manage risk effectively within their own areas of responsibility.

To facilitate the consistent implementation of the Risk Management Framework, MAG uses a risk system to ensure accessibility to all colleagues of a single repository for all organisational risks.

This is a dynamic tool to manage and escalate risks, increasing the accountability and ownership of MAG colleagues and enhancing the visibility of risk and therefore our ability to govern them. The system also provides a mechanism to link risks, acknowledging the interdependency of risks and the need to govern them with a clear understanding that many risks do not sit in silo. This enhances colleagues' ability to make informed decisions.

#### EMERGING RISKS

The established processes autlined above mean that risk is considered at all levels of the organisation. Regular liaison with senior management provides a basis on which to consider new and emerging risks. Horizon scanning to consider potential emerging risks is the responsibility of all senior MAG officers, supported by the Risk team to ensure that they are recorded in a timely manner to underpin appropriate governance and attention. Any significant or strategic risks are supported by the establishment of programmes with their own risk registers.

Our Internal Audit team provides management and the Audit Committee with independent assurance over the management of MAG's risk profile through the delivery of a risk-based Internal Audit Plan which assesses the adequacy and effectiveness of MAG's internal control environment. The Plan is designed to provide appropriate and targeted assurance over the Group's risk profile across a rolling three-year period with a focus on prioritising the biggest risks. Findings from Internal Audit reports are reflected in the risk register to verify scoring, enhance the robustness of existing controls, identify new controls and ensure that any further actions are tracked through to completion.

### Internal controls and risk management continued

#### **PRINCIPAL RISKS**

The table below summarises the key risks currently faced by MAG, with details of the strategies for managing them

# Key risk Principal risk:

#### Risk detail

#### Mitigation strategy

Principal risk: Major health & safety incident affecting our customers or colleagues The health and safety of our customers, employees and stakeholders is a priority for us. The inherent nature of our business means that we are a thriving hub of activity centred around our people, third parties and the public. We recognise our responsibility to all our stokeholders and have a zero-tolerance policy to health and safety incidents involving our stakeholders. We understand our legal, regulatory, and moral obligations and recognise the importance of embedding best practice to mitigate the risk of failure to achieve these.

MAG recognises within the Corporate risk register the potential risk around failure to design a strong Health & Safety management system that meets the legal framework that MAG operates in as well as third party accreditation to the ISO 45001 standard.

Key to the miligation of this risk includes

- The provision of competent and sufficient resources within each of MAG's business areas to advise on health and safety.
- Centralised experts establish compliant, best practice guidance to be implemented
  consistently across all MAG airports. Processes ensure that there is appropriate crossGroup collaboration which represents best practice and incorporates relevant feedback
  from subject matter experts.
- Regular 2nd and 3rd line audits take place to verify compliance and assure management
  of the adequacy and effectiveness of controls
- The MAG Health and Safety Policy is supported by a documented Health and Safety Management System. This is aligned to ISO 45001 Standard which means that guidance reflects best practice.
- The CAMMS system, initially ralled out across MAG to support risk management processes, has been embedded to underpin incident management governance in a consistent manner across the Group. The key benefits of this system include: consistency of data input leading to consistency of reporting: improved incident management consolidation of data; ability to review and act upon lessons learned; and improved management information reportable to key governance forums.
- As noted above, the Health and Safety governance process is supported by the
  establishment of 2nd line assurance roles which focus on both compliance and
  operational risk. Audit findings are reflected in the risk register in terms of both risk scoring
  and action tracking. This enables the business to monitor implementation and embedding
  of recommendations and their overall effect on the quality of MAG's control environment.
- Health and safety training is provided to all employees at all levels and briefings are
  provided to contractors and other visitors to our sites to ensure that key health and safety
  risks are understood and effectively managed. Our health and safety governance
  structure is designed to ensure that there is appropriate oversight of our management of
  health and safety risk and enables material risks to be quickly escalated and addressed.

## Principal risk: Security breach

The UK security threat level is substantial meaning an attack is likely. We have an obligation to ensure that our systems processes, assets, and operations are secure at all our sites in the context of the current threat level.

We work closely with the police and government security agencies to ensure that our security facilities and processes meet the high standards required to respond to existing and emerging security threats.

Our security facilities and processes are subject to extensive internal and external inspections and audits by regulators, external specialists and internal teams who regularly test the design and effectiveness of our security processes and controls

Security governance is embedded at all our arports and all security assurance activity is overseen by multi-agency governance forums. MAG subject matter experts liause with thrat porties to review security risks and document the mitigation strategies in place to ensure the continued monitoring, development and discussion of key security risks.

At MAG, as with the aviation sector in general, we recognise that failure to respond effectively to the threat of terrorism has the potential to significantly impact on safety and security, stakeholder confidence and regulatory compliance. MAG is able to demonstrate to customers and stakeholders robust comprehensive security controls across all of our airport sites, which are subject to frequent independent review by regulators externally appointed auditors Redline and other stakeholder organisations, and overseen by multi-agency governance forums

#### Key risk

Change

Principal risk: Climate

#### Risk detail

#### Classia ak

Climate change is a significant global risk that has implications across the sector. The principal risk centres around the impact of policies that governments implement to ensure aviation achieves net zero by 2050, as well as consumer and stakeholder confidence in the ability of the sector to decarbonise.

#### Mitigation strategy

MAG has already taken significant action to reduce emissions associated with its own operations. Our operations are carbon neutral, and our CSR Strategy sets out how we will transition to a net zero carbon business no later than 2038.

Under MAG's leadership of the Sustainable Aviation coalition, the UK aviation industry became the first in the world to commit to net zero aviation by 2050 and publish a plan to achieve this gool. The Sustainable Aviation Decarbonisation Roadmap sets out how emissions from aircraft will reduce to net zero by 2050. The Sustainable Aviation Roadmap represents joint working between airport operators, airlines, aerospace manufacturers and air navigation service providers. It provides a basis to tangibly reduce  $CO_2$  emissions and influence positive public sentiment.

MAG continues to work with industry partners to achieve this target, playing our full part in decarbonising the industry through membership of the Government's Jet Zero Council and working with Government to shape policy on relevant issues

Our mature understanding of physical climate risks directly informs asset standards and infrastructure planning. Further work to consider the financial implications of climate change will position MAG well as economies more generally decarbonise. MAG has also undertaken two climate change adaptation assessments, considering the physical climate risks to MAG's infrastructure and airport operations. These reports, which were submitted to the Government to inform its National Adaption Programme, will be updated this year as we complete our third assessment, making use of the Met Office's latest climate projections.

Last year we enhanced our Annual Report reporting to more closely reflect the recommendations made by the Task Force on Climate-Related Financial Disclosures (TCFD)

#### Principal risk: People

The lifting of Covid-related travel restrictions resulted in a rapid recovery in passenger demand which placed significant demands on operational colleagues.

The competition for tolent is increasing across many sectors as organisations build back following the pandemic Jobs in the hospitality and travel sectors were significantly impacted, a situation exacerbated by lower availability of EU nationals resulting from Brexit. This has ultimately decreased the size of the available talent pool which could impact MAG's ability to attract the right people at the right time to meet business needs as recovery continues.

The same risk applies to the many third parties that provide essential services that support the day-to-day running of MAG's airports. We are dependent upon critical third parties including. Border Force and ground handlers. Their ability to recruit and retain the right number and quality of staff is a key element of the People risk to the business.

Recruiting and retaining talent is critical to the success of our business and this has been an area of significant focus in recent years. Our talent strategy aims to attract the best available people in the market and retain employees through a variety of initiatives, including incentive schemes, career development programmes and mentoring.

We are also adapting and enhancing our recruitment approach in key areas such as 'digital' to reflect the changing external environment, where the competition for talent is high.

MAG leadership recognises the importance of People and understands that our colleagues underpin the operation and are at the heart of the success the organisation has enjoyed. As colleagues returned to work following the pandemic, there has been a focus on providing the necessary support and resources to enable them to thrive in their current roles and in their longer term carriers.

Specific measures include.

- The rollout of targeted sessions to re-engage colleagues and provide them with a framework and toolkit to promote a positive, engaging, collaborative culture at MAG.
- The creation and communication of refreshed MAG values. These values represent the collaborative, passionate, sustainable culture that embodies MAG.
- The delivery of employee engagement surveys to all staff to gauge the sentiment of our colleagues as they returned to work after a time of disruption and uncertainty.
- Regular employee performance reviews, combined with regular communications
  from management and the use of pulse surveys enables MAG to remain proactive
  in developing initiatives to deliver any required ongoing improvements in the overall
  employee experience.
- A significant focus on health and wellbeing to support colleague return to work and underpin the recovery process
- Increased governance, liaison and stakeholder management regarding MAG's
  critical third parties, including the introduction of formalised performance monitoring
  and resilience planning.

### Internal controls and risk management continued

#### Key risk

#### Risk detail

#### Principal risk: IT compliance, security and infrastructure

- MAG is subject to a number of regulations governing the protection of information systems (hardware, software and associated infrastructure), the data on them, and the services they provide. These include General Data Protection Regulation (GDPR) and Network and Information Systems (NIS). The financial and reputational penalties that relate to these are severe

#### Mitigation strategy

#### Compliance

MAG is part of the UK Critical National Infrastructure (CNI) and under the Security of Natwork & Information Systems Regulations (NIS Regulations) its airports are considered to be an essential service. MAG is defined as an Operator of Essential Service (OES). This change in legislation now sees cyber security controls being regulated by the Civil Aviation Authority (CAA) and MAG has to comply with this regulatory requirement that sees cyber security associated with aviation safety

MAG is committed to providing a world-class cyber security service and will continue to take its cyber security responsibilities with the utmost seriousness. MAG has adopted an in-depth approach to cyber security protection and has developed an embedded security culture through awareness, education and empowerment to ensure that we keep MAG's operations customers, employees and stakeholders safe from cyber threats.

MAG has a well-established approach to the governance of IT compliance. This is developed and designed by a team of specialists who ensure that ways of working are founded on best practice principles. The following outlines some of the ways in which compliance is embedded across the business

 ${\rm Ad}$  colleagues undertake an annual mandatory DPA/GDPR training to increase their knowledge of GDPR risk and reporting requirements.

MAG has developed a readily accessible Privacy Strategy. The Privacy Strategy is reviewed and updated annually and will take into account changes in legislation case iaw and new guidance published by the ICO.

MAG takes data breaches serrously and training sessions are made available to all

MAG takes data breaches servously and training sessions are made available to all stoff in bitesize lessons which provide a succinct and focused summary of key points for coileagues to be aware of. Where breaches do occur, the relevant legal and governance processes are followed.

Privacy impact assessments are undertaken as part of business-ay-usual activity in line with the Data Protection Impact Assessment Standara. All DPIAs are reviewed and approved by the Data Protection Team. This means any projects processing personal data will meet GDPR requirements. This is reviewed by MAG's DPO as and when new guidance is released by the ICO to ensure compliance.

MAG has a suite of DPA policies and procedures in place. This includes a Tier one policy (signed off by MAG's CEO) which gives an averview of GDPR processes and compliance. This is reviewed annually and is supported by 11 standards which define more detail as to how individuals should comply with GDPR. The guidance is accessible to all MAG colleagues.

#### Key risk

#### Risk detail

#### Principal risk: IT compliance, security and infrastructure continued

- MAG is part of the Critical National Infrastructure and holds valuable customer, employee, financial and intellectual property, making it a valuable target to cyber criminals. Furthermore, the cyber-attack threat level has increased due to the conflict in Ukraine. We are conscious at MAG that the nature of our operations means that there is a risk that MAG is subject to either a direct or indirect cyber-attack / loss that results in a loss of confidentiality, integrity and availability of critical MAG data

- MAG is increasingly dependent upon technology for improved operational efficiency, passenger and colleague experience, safety and security. Increased digitalisation and connectivity bring with them greater scope for vulnerability and associated business impact in the event of failure

#### Mitigation strategy

GOVERNANCE

#### Security

MAG has an Information Security Management System (ISMS) in place which is supported by a suite of polices and standards that define the security controls required to mitigate cyber risks. The ISMS is governed by the Group's Cyber Security Steering. Committee (CSSC)

MAG's Information Security Risk and Audit Compliance regime audits against the ISMS standards to ensure compliance with ISO27001. This is part of MAG's annual certification to ISO27001. Audits are performed annually and cover all aspects of MAG's Statement of Applicability

A policy and robust procedure for minimising the ongoing risk from  $\Pi$  vulnerabilities is in place at MAG. This Standard is part of MAG's ISMS and is reviewed annually as part of MAG's ISO 27001 certification / internal policy governance

Vulnerability scanning and penetration testing takes place at appropriate frequencies to identify potential vulnerabilities and enable risk-based decision making. The Patch Vulnerability Group (PVG) governs the activities to ensure they are compliant and, where non-compliance is identified, action is taken to remedy this where required

The ISMS is aligned to ISO 27001 and is audited both internally by the Cyber Risk and Compliance Team, and externally on an annual basis Additional high-level oudits are conducted as required.

#### Infrastructure

MAG has a Group Technology Strategy which sets out priorities and plans to address identified technology needs across the business. The Technology Operating Model has evolved to align with MAG's Empowered Airports model. This has been designed to ensure a business-partner-led approach to technology strategy development

The Technology department have adopted the ITIL Framework for service management, aligning to industry best practice. This includes detailed processes for change, problem and incident management, as well as a robust delivery framework which includes ligorous testing and where necessary, third-party assurance of critical projects

In addition, a comprehensive Technology Governance Model is in place encompassing a Business Design Authority (responsible for ensuring delivery is aligned to strategy), a Technical Design Authority (responsible for ensuring designs meet necessary standards) and an overarching Technology Governance Board which tracks Technology risk, assurance and audit findings, reporting outputs to the Audit Committee as required

As MAG's airports are part of UK Critical National Infrastructure, critical systems are covered under the Network and Information Systems Regulations 2018 and are subjected to annual audit and assurance, with results and action items reported to the Civil Aviation Authority (CAA)

### Internal controls and risk management continued

#### Key risk

political and geopolitical uncertainty

#### Risk detail

# Principal risk: The Macroeconomic, opolitical and

The nature of our operations and size of the organisation mean that we are impacted by external factors that are inherently outside of our control to directly manage Understanding these factors allows us to consider the possible impact to the business and take the required steps to minimise the impact and ensure that MAG can successfully respond to national and global uncertainties.

Macroeconomic, political and geopolitical factors have the potential to reduce demand for air travel and thereby restrict growth throughout the industry. There could be multiple consequences arising from this, including the risk of airline failure and reduction in consumer spending. The impact of this could prevent MAG airports from delivering forecast traffic volumes.

A weak economic outlook and/or recession, alongside cost of living pressures could impact on consumer demand and ability to travel in the way the public would wish to due to personal cost pressures and the lack of disposable funds. A natural consequence of this is a reduction in airline capacity and growth which, as we have seen in the recent past, can lead to airline failure, particularly when combined with an increased cost base.

furthermore macroeconomic, political and geopolitical factors currently at play increase the costs associated with operating and developing MAG airports. This includes but is not limited to, an increase in operating and capital costs as a result of supply chain issues labour shortages, continued weakness in sterling and high energy costs.

#### Mitigation strategy

As noted above, whilst the factors impacting on MAG are inherently outside of our control, we take a proactive approach to assessing the market and the implications of uncertainties on our business. By taking early and decisive action, we are able to navigate these uncertainties and continue to flourish. We also incorporate appropriate flexibility into our long term plans and strategies to enable us to respond to changes in circumstances.

#### Examples of this include

- We maintain a manageable level of external debt, it is primarily long term and as evidenced in the pandemic, we have supportive shareholders.
- During the pondemic, we were able to pause the Manchester Airport transformation programme because of the phasing we had incorporated into the planning and delivery of the project. With the recovery now established, we are pressing ahead with second phase of the programme.
- We have developed and maintained close relationships with our airline partners. This
  is further enhanced by strong route development, particularly among the Low-Cost
  Carriers who have seen the fastest recovery in operations. This diversity of offering,
  alongside robust key account management, enables MAG airports to remain
  competitive and ensures that routes remain attractive and exciting to customers, even
  during times of economic uncertainty.
- We have also focused on ensuring that we have the right skills, resources and
  organisational design in place to grow back better following the disruption
  caused by the pandemic. We undertake a robust process of modelling resource
  requirements to align to forecast demand levels.
- MAG is a diverse business and we consider our product and geographical diversification when making business decisions. We undertake regular reviews of economic growth prospects for the UK and the world economy, and implications for demand forecasts for MAG airports. We support this approach to sound economic planning by ensuring that our corporate and airport strategies incorporate sensitivities for economic shocks and broader world events such as the current conflict in Ukraine. In this way, we have the information to be able to make business decisions that incorporate the information at our disposal to ensure it is considered, appropriate and ensures the best short, medium and long term outlook for the Group

GOVERNANCE

#### Key risk Risk detail Mitigation strategy Principal risk: Government policy support is an essential We work closely with Government to shape policies and decisions that affect our Government part of the continued growth of the airports to ensure they take full account of the impacts on our airports, their customers aviation industry as we recover from the aviation and our stakeholders, and recognise the contribution the growth of MAG airports can strategy pandemic. Government policy changes make to the delivery of policy objectives could limit MAG's ability to make best We invest time across the business to work with partners, stakeholders and advocates use of its airports, impose additional costs to ensure that the strategic significance of MAG airports is communicated to decision on the business and impact shareholder value, and adversely affect colleagues makers. We also work to build relationships with a range of political stakeholders to stakeholders and passengers who use ensure that emerging policies take into account MAG issues our airports. We take an active role in Sustainable Aviation and the Jet Zero Council to ensure that the Government maintains an appropriate policy framework to deliver net zero for aviation. We take a proactive approach to engaging with Government, the CAA and stakeholders to support the delivery of airspace modernisation at our airports and across the UK more generally, highlighting the range of benefits the programme Principal risk: Works already delivered in connection with the Manchester Airport Transformation Major capital programmes will play a key Programme provide new facilities and infrastructure to enhance customer experience Delivery of role in enabling future growth in passenger Phase 2 of the programme which is underway will transform the original part of Terminal major capital volumes, as well improvements in customer 2, significantly increasing capacity and further enhancing customer experience. service and operational efficiency. programmes We are working closely with airline partners to ensure that transformation programmes Failure to deliver transformational benefits from major capital programmes may underway and in plan at both Manchester and Stansted deliver benefits for users and meet customer needs. We engage with airlines and critical third parties to ensure that impact MAG's ability to grow and sustain they are on board with the works we propose to undertake and have visibility of the investment across our airports latest design proposals It will be critical for MAG to have appropriate funding in place to enable We have established strong Group-wide programme management controls and these major capital programmes to be are subject to regular 2nd and 3rd line assurance reviews. There is ongoing crossfunctional involvement in all programmes to ensure that capex projects meet MAG's delivered in line with customer needs and operational and commercial requirements, as well as continuing to enhance the market demand. passenger experience into the future High levels of inflation may also impact the affordability and fundability of major transformation programmes, and MAG s ability to deliver the benefits associated with these investments. Principal Founded by MAG, CAVU aims to The CAVU business has been formed with an appropriate leadership structure to Risk: Failure revolutionise airport travel, driving value foi oversee the implementation of robust governance arrangements. This is an important foundation for the future success of the business. Specific ongoing activities to embed to grow the CAVU business passengers and growing non-aeronautical best practice include. revenue for clients and partners around the world. The establishment of appropriate Business Development and eCommerce teams within the CAVU structure to maximise growth opportunities (adding channels and inventory) These are adapted to market conditions as required As a newly formed business, there is an Putting in place appropriate Customer teams within the CAVU structure to maxim se inherent risk around the failure to grow at pace and achieve sufficient scale. This commercial opportunities (lifetime value, advocacy loyalty and membership), which would result in dilution of competitive can be adapted to market conditions as required advantage and shortfalls against the Significant work since the establishment of CAVU to deliver a single platform that CAVU business plan, impacting MAG's provide competitive advantage in the market to leverage capabilities and gain wider financial performance and market share. diversification strategy.

CAVU team

 Regular review (weekly) of trading performance, financial outcomes and forecasts across all revenue streams at EXCO level.

### Task Force on Climate-Related Financial Disclosures (TCFD)

We recognise climate change as a global societal and environmental challenge that poses both risks and apportunities to our business. After becoming the UK's first carbon neutral airport group in 2016, in 2020 we announced a flagship environmental commitment to address our residual emissions by transitioning to net zero carbon operations (for our Scope 1 & 2 emissions) no later than 2038, 12 years ahead of the Government's national target. Through our Corporate Social Responsibility (CSR) Strategy, working together for a brighter future, we position climate change at the forefront of our approach to ensure we deliver as a sustainable business.

This year, we were pleased to welcome the UK Government's Jet Zero Strategy and - at the United Nations' International Civil Aviation Organisation - international agreement to a long-term aspirational goal to make global aviation net zero by 2050. MAG recognises the importance of our role in supporting and enabling the industry to achieve these goals

We support the UK Government's decision to implement mandatory climate risk reporting in accordance with the recommendations of the Task force on Climate-Related Financial Disclosures (TCFD). Recognising the importance of climate change and the need to understand and mitigate climate risk, we began reporting against the TCFD recommendations in 2021. This year, we have enhanced our reporting by developing our approach to assessing climate-related risks and opportunities with a particular focus on transition risks and the financial impact of key climate-related risks.

An overview of our disclosures against the TCFD recommendations is provided below. Our reporting is in line with the TCFD recommendations and disclosures. This includes the four TCFD recommendations and the 11 recommended disclosures outlined in Figure 4 of Section C of the TCFD's published report titled "Recommendations of the Task Force on Climate-Related Financial Disclosures" published by the TCFD in 2017. We divide our risks and apportunities into those related to the transition to a low-corbon economy and those related to the physical impacts of climate change.

#### GOVERNANCE

#### Governance Board

Climate change is regarded as a principal risk for MAG and forms part of our Strategic Risk Register which means it is considered as a significant risk to the achievement of our objectives and strategic goals. The register is considered by the Board through the Audit Committee twice yearly with climate issues also discussed at the CSR Committee meetings every quarter. Where relevant, climate-related matters are presented directly at Board meetings. With climate change presenting a financial risk to the business, our Non-Executive Director Vanda Murray OBE, in her role as Chair of the Corporate Social Responsibility (CSR) Committee (a sub-committee of the MAG Board), has been assigned specific accountability for climate change. The Corporate Social Responsibility (CSR) Committee provides regular updates to the Group Board regarding our CSR Strategy, ensuring that the Group Board is well-informed about the CSR Committee's activities and performance against agreed targets. Moreover, climate and CSR-related matters that hold significant importance are duly considered within the standard Group Board agenda cycles and specifically during business planning processes.

Climate change is also embedded within our CSR Strategy with performance targets across a number of topics, including energy, emissions, climate change communications, sustainable surface occess, and airspace modernisation. MAG's Environmental, Social and Governance (ESG) team provides quarterly updates to the CSR Committee which include performance updates, policy developments and strategic updates.

#### Management

Charlie Cornish, our Chief Executive Officer, is responsible for ensuring that MAG achieves its climate change goals and commitments. Tim Hawkins, MAG Chief of Staff, reports to Charlie Cornish and is also the Chair of the CSR Coordination, Programme Management and Strategy Board which comprises of senior leaders from across the business. This Board is responsible for executing our CSR Strategy and programmes, and Tim holds accountability for the progress of our CSR initiatives.

Neil Robinson, the Group CSR & Future Airspace Director, who reports into Tim Hawkins, leads our response to climate change and is supported by business leaders and experts across the organisation.

MAG has a centralised team of experts to manage, review and manitor the delivery of our climate strategy across our airports and wider business. The team provides climate change and emission reports to senior leadership which are reviewed and updated regularly to provide adequate coverage of performance and ensure progress towards our CSR Strategy.

#### Strategy

As a business, we recognise that climate change poses a significant set of strategic risks for us and the aviation sector as a whole. As an operator of critical national infrastructure, our climate change physical adaptation assessments need to align with the assessments conducted by other operators. By harmonising our reporting with other operators, we contribute to the development of the UK Government's national infrastructure adaptation plan. We assess our climate-related risks over the short, medium, and long term, short term, covering the time period up until 2030; medium-term, covering the time period 2031-2050; and, longterm, covering the time period 2051-2070. The risks identified feed into how we set the business strategy and associated plans. If a physical risk was to materialise, we make use of emergency and business continuity. plans to address and adapt to it. Our analysis shows that transitioning to a low-carbon economy poses a higher risk in the short and medium term. as MAG strives to achieve net zero operations by no later than 2038. Whereas climate-related physical risks pose significant business impacts to MAG over the medium to longer term as this is when the physical impacts of climate change become more frequent and severe

Scenario analysis has been used to assess the climate-related physical and transition risks and apportunities under the climate scenarios autlined below.

for physical risks and opportunities, we have considered the following scenarios:

- A medium-emission scenario associated with Representative Concentration Pathway (RCP) 6.0, this scenario approximates an outcome in line with a 3-4°C warming by 2100. In this scenario, greenhouse gas emissions peak around 2080 and then start to decline.
- A high-emission scenario, associated with RCP 8.5, this scenario approximates an outcome in line with a 4°C warming by 2100. In this scenario, greenhouse gas emissions continue to grow unmitigated.

For transition risks and apportunities, we have considered the following scenarios.

- A high-ambition emission scenario: associated with RCP 2.6, this scenario approximates an outcome in line with a 1.5° C warming by 2100.
- An ambitious-emission scenario: associated with RCP 4.5, this
  scenario approximates an outcome in line with a 2 to 3 °C warming
  by 2100. In this scenario, greenhouse gas emissions peak around
  2040 and reach roughly half the levels of 2050 by 2100.
- A high-emission scenario: associated with RCP 8.5, this scenario approximates an outcome in line with 4°C warming by 2100. In this scenario, greenhouse gas emissions continue to grow unmitigated

### Task Force on Climate-Related Financial Disclosures (TCFD)

#### continued

#### Strategy (communical)

Our CSR Strategy's sets out our strategic approach to climate change. In addition to reducing the climate impact of our own operations, a fundamental part of our climate strategy is to proactively contribute towards the decorbonisation of the wider aviation industry. We recognise that the challenges posted by climate change cannot be tackled alone, and we continue to engage directly with stakeholders and the wider industry. MAG was a founding member of the UK aviation industry coalition, Sustainable Aviation, and remains a member of the managing council. Our CEO, Charlie Cornish, is one of two airport members of the Government's Jet Zero Council, with MAG also an active member of the environmental committees of the regional and global environment committees of our trade association Airports Council International (ACI).

We recognise the critical importance of climate-related topics and issues in shaping the future of our business. We proactively incorporate climate considerations into our business strategy reviews and when making other business decisions.

Our strategy also considers climate change adaptation and resilience. In accordance with the TCFD recommendations we have considered the impact of a 1.5 degree scenaria (i.e. 2 degrees or fower) in this section and have forecast the business remains resilient from both a liquidity and a regulatory perspective. For more than a decade, MAG has comprehensively considered climate change adaptation. In December 2021, we submitted our third Climate Change Adaptation Report? to the Government, including the results of our third adaptation risk assessment.

#### Risk management

We recognise chimate change as a key risk to our business and it forms part of our organisational strategic (principal) risk register which is reported to the Audit Committee twice a year. The CSR Committee further engages in the identification, assessment, and management of climate-related risks.

Over the past ten years, MAG has issued three reports on Climate Change Adaptation. Our adaptation reports contribute to the Government's national adaptation risk assessments and National Adaptation Programme. This report represents a comprehensive evaluation that aligns our climate change adaptation risk assessment approach with MAG's overarching Risk Management Framework methodology. This year, we further refined our approach to identifying climate-related transition risks (see "transition risks" below). The findings from both climate change risk assessments contribute to our corporate assessment of risk and ensure that climate change is discussed regularly at the highest level within the organisation.

Our climate change risk methodology considers the potential impact of the risk (on a scale of 1 "minimal" to 5 "critical") and likelihood (on a scale of 1 "miprobable") of a potential risk materialising. The impact and likelihood scores for each risk are multiplied to calculate risk exposure, hence the maximum exposure rating for any risk is 25. Risk exposure ratings are considered against our appetite to risk. The risks with the highest score and which exceed our risk appetite are, therefore, considered the most significant and are prioritised for mitigation and management.

For each climate-related transition risk identified, we assess the risk score against three climate change scenarios. For each climate change scenario, we assess the risk score over short, medium, and long-term time horizons (see the 'strategy' section of this TCFD report). To best identify areas where further control is necessary our climate change risk registers baseline future risk against current net risk

#### CLIMATE-RELATED PHYSICAL RISKS AND OPPORTUNITIES

We have published climate change adaptation risk registers considering the physical risks for each of our airports. In line with the TCFD recommendations, physical risks are defined as follows.

- · Acute physical risks; event-driven risks, including increased severity of extreme weather events, such as cyclones, hurricanes, and floods; and
- Chronic physical risks: longer term shifts in climate patterns (e.g. sustained higher temperatures) that may cause sea level rise and chronic heat waves.

Our climate change adaptation risk registers identify a range of risks relating to infrastructure, network operations and human health and wellbeing. The most significant climate-related physical risks and associated business impacts across our airports are outlined below.

Climate-related physical risk	Business impact to MAG	Current and future actions
Increased frequency and severity of storm events including high winds, intense rainfall and icy	<ul> <li>Operational disruption resulting from physical impacts to infrastructure at MAG's airports.</li> </ul>	<ul> <li>Emergency and business continuity plans for the loss of services</li> </ul>
conditions.	<ul> <li>Business disruption and reduced revenue due to lost time.</li> </ul>	<ul> <li>Safety measures for ramp workers in the event of increased storms and lightning events</li> </ul>
Expected to materialise, short term	<ul> <li>Increased likelihood of airfield safety accidents and incidents as a result of hazardous conditions posing health risks to MAG's staff and passengers</li> </ul>	<ul> <li>Maintenance of climate-change watching briefs using the latest climate change projections.</li> </ul>
Increased frequency and intensity of winter rainfall events resulting in the release of contaminated surface water.	<ul> <li>Increased likelihood of contaminated surface water, due to more intense precipitation, may lead to the overspill of balancing ponds</li> </ul>	<ul> <li>Full review of the existing drainage networks to improve data capture and inform decisions on future improvements to the system.</li> </ul>
• Expected to materialise, short term.	containing de-icing chemicals.  Negative impacts on the natural environment around the airports.	Monitoring of balancing pond performance organg. Extreme weather conditions can overwhelm pond capacity in a short period
	<ul> <li>Potential health risks to MAG's airport operators, passengers, employees and third party staff</li> </ul>	of time. All site developments now required to include onsite attenuation to alleviate impacts on balancing ponds. Asset standards have been updated to reflect these additional requirements.
Disruption to flight schedules as a result of adverse weather events, sea level rise and storm surges at and enroute to destination airports	Atmospheric disruption may affect the routing of aircraft between arrival and departure.     Delays to landing times and enhanced fuel burning resulting in business disruption and	Performance-based navigation (PBN) to address the risk of extremities of wet and dry conditions affecting ground reflection or navigational aids
Expected to materialise short term.	enhanced operating costs for airlines	Engaging with emerging research through partnerships with EUROCONTROL and Airports
	<ul> <li>Sea level rise and storm surges at destination airports may reduce the viability of future destinations being available to passengers, thereby reducing passenger demand,</li> </ul>	Council International (i.e. being a member of the European Aviation Climate Change Adaptation Working Group).
	profitability and revenue for MAG's airports.	<ul> <li>A watching brief on sea level rise and storm- surge risks that will cause loss of low-lying airport destinations.</li> </ul>
Restrictions to airport water supplies due to prolonged drought conditions and lowering of the	Prohibition of certain non-critical activities such as washing of infrastructure and assets.	Leak detection and repair programme – distribution system maintenance/upgrade
water table.	<ul> <li>Financial impact arising from the need to obtain alternative sources of water.</li> </ul>	<ul> <li>Conformance to asset standards and building regulations – asset renewal strategy – ongoing</li> </ul>
Potential for water supplier drought orders to limit the availability or use of mains water	Reputational impact – asset renewal may be	dialogue with water companies.
Expected to materialise; medium term.	required to introduce water-efficient equipment	<ul> <li>Planned development of a formal airport water drought management plan to respond to the four levels of drought trigger.</li> </ul>

The following appartunities were identified by MAG in relation to the physical impacts of climate change:

- Improved staff and passenger comfort as well as wellbeing protections delivered through the design of low-carbon buildings with climate-resilient heating and cooling systems.
- Improved ability to plan and adapt to the physical impacts of climate change and limit disruption to employees and passengers through the provision of regularly maintained and updated climate change watching briefs.
- Enhanced marketing positioning within the aviation sector through the healthy design of airport buildings which mitigate against the negative health
  and wellbeing impacts of climate change such as thermal discomfort and heat stroke
- Cost savings as a result of reduced and adjusted de-icing requirements (e.g. through increasing stock and improving product performance where
  necessary) delivered as a result of regular reviews of weather conditions, including snow events

### Task Force on Climate-Related Financial Disclosures (TCFD)

continued

#### **CLIMATE-RELATED TRANSITION RISKS AND OPPORTUNITIES**

In 2023, we conducted detailed analysis of trends in the aviation sector including policy signals, production and technological drivers and changes to the price of assets and services within the market to further advance our approach to climate-related transition risks and apportunities.

In accordance with recommendations from the TCFD, we categorise transition risks in four distinct categories:

- Policy and legal policy measures that seek to mitigate against the adverse effects of climate change, and those measures which promote adaptation to climate change.
- Technology technological improvements or innovations (or lack thereof) that impact upon the transition to a lower carbon, energy-efficient economic system
- Market shifts in supply and demand for certain commodities, products and services.
- Reputation changing customer, community and wider stakeholder perceptions of an organisation's contribution or detraction from the transition to a low-carbon economy.

The key climate-related transition risks and associated business impacts to MAG are outlined below.

#### **POLICY AND LEGAL**

Climate-related transition risk	Business impact to MAG	Current and future actions
Policy misalignment, including between climate policy developed by national and regional stakeholders, requiring a greater level of decarbonisation than national policy	<ul> <li>Protracted planning applications owing to stringent policy and regulations posing potentially complex legal challenges relating to expansion and development</li> </ul>	<ul> <li>Regular engagement on policy and legislative changes through participation in regional collaborations (such as the Manchester Climate Change Partnership).</li> </ul>
Expected to materialise: short term	<ul> <li>Difficulty in accessing competitively priced finance may limit investment opportunities</li> </ul>	<ul> <li>Direct engagement with policy officers and elected members</li> </ul>
	<ul> <li>A lack of investment may reduce opportunities to further tackle climate change, thereby leading to local reputational damage.</li> </ul>	
Policy changes regarding non-CO <sub>2</sub> climate impacts of aviation. This may result in the realignment of carbon budgets for aviation emissions.	<ul> <li>Increased demand and urgency for the rapid decarbonisation of the aviation industry which may lead to accelerated investment in airport infrastructure.</li> </ul>	<ul> <li>Initiatives to support sustainable aviation fuels and alternatively fuelled aircraft which would reduce both the climate impact of CO<sub>2</sub> and non-CO<sub>2</sub> emissions</li> </ul>
• Expected to materialise: short term	<ul> <li>Increased climate-related operating costs for ordines which could reduce the overall demand for aviation due to increased ticket prices.</li> </ul>	<ul> <li>Monitoring, engagement and support with academic research which aims to lead to the consensus on how to best mitigate non-CO<sub>2</sub> impacts and incorporate the findings into policy.</li> </ul>

Following global agreement to a Long-Term Aspirational Goal to make international aviation net zero by 2050 at the 41st General Assembly of the International Civil Aviation Organisation (ICAO), we have closed the previously reported risk of failure to reach an international agreement on aviation decarbonisation, leading to the differentiation between UK, EU and international policy.

#### TECHNOLOGY

Climate-related transition risk	Business impact to MAG	Current and future actions	
The introduction of alternatively fuelled, zero-carbon aircraft will require new airport infrastructure and could reduce airport capacity  • Expected to materialise long term	The need to invest in new infrastructure to support the turnaround of alternatively fuelled aircraft. Reduced passenger throughput due to business disruption resulting from lower aircraft capacity owing, in turn, to longer refuelling turnaround times.	Participation in UK and international trade associations, with a focus on the development of national and international decarbonisation roadmaps  Engagement with UK policymakers through, for example, the Government's Jet Zero Council (JZC) and the JZC's Zero Emission Flight Intrastructure subgroup.  Planned engagement with airlines and manufacturers on alternative fuel aircraft infrastructure and investment as technologies.	
large-scale, permanent carbon capture and storage technologies may not mature quickly	Increased expenditure associated with the cost of increasing carbon emissions and	Participation in UK and international trade associations, with a focus on the	
enough or at sufficient scale to support aviation decarbonisation	therefore enhanced carbon taxes faced by the aviation sector	development of national and international decarbonisation roadmaps.	
• Expected to materialise medium term.	<ul> <li>Limited possenger demand and revenue potential owing to increased regulation and compliance costs from heightened carbon pricing (resulting, in turn, from limited carbon capture and storage technologies)</li> </ul>	The Sustainable Aviation Coalition and the Jet Zero Council are working with industry and government on the development of regalive emissions technologies. We are working collaboratively to further the understanding of scaling-up carbon capture and storage technologies. In line with the 2023 Sustainable Aviation Decarbonisation Roadmap, we will continue our focus on improving market-based measures to support the transition to net zero.	

#### MARKET

Climate-related transition risk	Business impact to MAG	Current and future actions	
failure of UK and international policy to deliver effective carbon markets which could lead to higher ticket prices and reduced passenger demand	Increased airline operating costs may result in heightened costs of flying for passengers.     Difficulty accessing competitively priced finance as a result of reduced attractiveness to	Participation in UK and international trade associations including those focused upon the development of national and international decarbonisation roadmaps.	
Expected to materialise, short term.	prospective investors and shareholders  • Reduced availability and increased cost of	<ul> <li>Engagement with UK policymakers through for example, the Government's Jet Zero Council.</li> </ul>	
	carbon credits.	<ul> <li>Delivery of MAG's decarbonisation programmes, including a focus on enabling aviation decarbonisation</li> </ul>	
Changes in societal behaviours and attitudes towards climate change may reduce possenger demand due to increased 'flight shame' and wider behavioural changes	Reduction in passenger demand (and, therefore, revenue) may reduce the attractiveness of MAG to investors and shareholders, thereby posing challenges to accessing competitively.	<ul> <li>MAG's CSR Strategy places net zero carbon oiports at the forefront of its approach towards delivering a sustainable business (with a target for net zero carbon by 2038)</li> </ul>	
Expected to materialise medium term.	<ul> <li>priced finance.</li> <li>Challenges for employee retention and recruitment owing to reduced market attractiveness.</li> </ul>	<ul> <li>MAG airports are already certified corbon neutral (through Airport Carbon Accreditation) with programmes to deliver further decarbonisation and net zero.</li> </ul>	
		<ul> <li>Continued engagement with the Government's Jet Zero Council to understand and influence policy.</li> </ul>	

### Task Force on Climate-Related Financial Disclosures (TCFD)

#### REPUTATION

Climate-related transition risk Business impact to MAG Current and future actions Investors shifting capital allocation and finance in favour of low-carbon and MAG's failure to align with changed investor priorities may result in a lack of capital and investment . MAG 5 CSR Strategy focuses on the delivery of net zero carbon airports and outlines initiatives and climate-resilient businesses. Increased commitments to the decorbonisation of its operations Reduced revenue and associated reputational risks for scrutiny from investors for businesses not and the wider aviation sector the business may impact upon investment opportunities. having and/or meeting a science-based · MAG will continue to report progress against this · Reduced market attractiveness to the current and future commitment to its key stakeholders and investors. workforce, as well as prospective passengers • Expected to materialise short term. Risk of not meeting MAG's net zero commitment for 2038 through a lack of MAG's CSR Strategy focuses on the delivery of • Higher expenditure associated with the cost of net zero carbon airports and outlines initiatives and increasing carbon emissions from the organisation investment in measures to reduce Scope commitments to the decarbonisation of its operations Reduced capital and financing from current and future and the wider aviation sector. I and 2 emissions associated with fuel investors due to negative stakeholder perceptions and energy consumption. Passengers and Engagement with the UK Government and industry Reduced passenger demand, leading to a reduction in airlines may move to other airports that partners on the Sustainable Aviation Decarbonisation airline networks are taking faster, proactive climate action. Roadmap and Jet Zero Council. . Expected to materialise: short term

The transition to a low-carbon economy poses a number of climate-related apportunities. We continue to review and realise apportunities for our business and its stakeholders whilst ensuring a just transition to a socially inclusive low-carbon future. Key climate-related transition apportunities as well as MAG's current low-carbon actions and initiatives include:

- Positioning the business as a thought-leader in the aviation sector for decarbonisation through continued engagement in policy dialogue, UK and
  international trade associations and industry working groups.
- Promote green skills transformation and development through employee participation in green training, education, and skills decision-making which
  may result in improved innovation and business performance.
- Increased supply chain reliability through ongoing engagement with MAG's supply chain partners to understand the ability of the supply chain to
  operate under various conditions and its resilience to adverse shocks (to the market and supply trends).

#### FINANCIAL QUANTIFICATION OF CLIMATE RISK

To advance our reporting of climate risk, we have outlined the financial impacts of the key risks identified through our risk assessment processes. To streamline the report and provide a clearer understanding of their implications we have grouped similar risks together. In this section, we focus on the risks we consider most material, assessing the highest impact scenario for each risk identified below.

By quantifying these risks, we gain insights into the possible financial consequences of climate change and can make more informed decisions about how we address climate-related risks. We are committed to continually improving our understanding of climate-related risks and their financial dimensions. We believe that by quantifying these risks, we enhance our ability to make informed decisions allocate resources effectively, and seize opportunities in a rapidly changing business landscape. In December 2021, we submitted our third Climate Change Adaptation Report 1 to the Government, which further explains how the outputs of this exercise inform our financial planning process.

In assessing the financial materiality of the identified risks, we have employed a scale ranging from 1 to 5. This method of scoring is derived from our corporate risk assessment methodology and is consistent with the way we assess other business risks. This impact scale allows us to quantitatively evaluate the magnitude of the risks and their potential financial consequences. The table below illustrates the scoring scale we have used, providing a framework for categorising the risks based on their financial significance:

#### FINANCIAL MATERIALITY

Impact \$core	Financial Impact
1	3
2	22
3	222
4	2222
5	22222

We strive to provide accurate and informative assessments of the risks we identify. It is important to note that the following tables, which provide an overview of the risks identified, their potential impact on MAG, and the corresponding financial materiality scores, reflect our initial assessments. Our analysis considered the impact each risk had on areas such as operating costs, revenues and capital expenditures. They represent the information available to us at this time, and include a number of assumptions. As we develop our knowledge and understanding of climate-related risks, these assessments will be refined and updated accordingly. We remain committed to regularly reviewing our assessments as our knowledge increases, ensuring that our risk management strategies are robust and aligned with the evolving landscape.

Business impact to MAG	Current and future actions	Financial materiality score
<ul> <li>Financial implications of repair or replacement of affected infrastructure</li> <li>Operational disruptions and airport closure</li> <li>Reputational damage</li> <li>Additional construction costs incurred during the development of new buildings, including factors such as the BREEAM premium and compliance with evolving building regulations</li> </ul>	Implementation of structural inspection programme Development and execution of asset maintenance schemes     Ensuting conformity with asset standards and building regulations	£
Decline in revenue and passenger numbers     Reputational damage     Possible increase in staff absence rates     Potential rise in passenger health issues	Management and maintenance of heating ventilation, and air-conditioning (HVAC) systems     Capital planning for the acquisition of new assets and replacement of existing ones	233
Financial implications associated with equipment repair or replacement     Operational disruptions     Reputational damage	Implementation of a comprehensive monitoring and maintenance regime for critical assets     Incorporation of design requirements that address and consider potential impacts of flooding	£
	Financial implications of repair or replacement of affected infrastructure  Operational disruptions and airport closure  Reputational damage  Additional construction costs incurred during the development of new buildings, including factors such as the BREEAM premium and compliance with evolving building regulations  Decline in revenue and passenger numbers  Reputational damage  Possible increase in staff absence rates  Potential rise in passenger health issues  Financial implications associated with equipment repair or replacement  Operational disruptions	<ul> <li>Financial implications of repair or replacement of affected infrastructure</li> <li>Operational disruptions and airport closure</li> <li>Reputational damage</li> <li>Additional construction costs incurred during the development of new buildings, including factors such as the BREEAM premium and compliance with evolving building regulations</li> <li>Decline in revenue and passenger numbers</li> <li>Reputational damage</li> <li>Possible increase in staff absence rates</li> <li>Potential rise in passenger health issues</li> <li>Financial implications associated with equipment repair or replacement</li> <li>Operational disruptions</li> <li>Implementation of structural inspection programme Development and execution of asset maintenance schemes</li> <li>Ensuring conformity with asset standards and building regulations</li> <li>Management and maintenance of heating ventilation, and air-conditioning (HVAC) systems</li> <li>Capital planning for the acquisition of new assets and replacement of existing ones</li> <li>Implementation of a comprehensive monitoring and maintenance regime for critical assets</li> <li>Incorporation of design requirements that address</li> </ul>

### Task Force on Climate-Related Financial Disclosures (TCFD)

#### continued

Risk description	Business impact to MAG	Current and future actions	Financial materiality score
Reduced Passenger Demand – Reduced demand for business travet, the rise of sustainable travel afternatives, and the unpredictable occurrence of goopolitical events  • Expected to materialise, long term.	Reduced competitive positioning compared to other modes of travel and ways of working (e.g. increase in virtual conferences, meatings etc.) Reduced revenue Loss of customers and less revenue, affecting investment opportunities.	Net zero operational target Carbon Neutrality across the Group Fincouraging low-carbon action (e.g. through offering free landing fees for five years to the first zero-emission commercial plane based at one of our airports) Working with Government and industry partners on the decarbonisation of aviation e.g. Jet Zero Council, Sustainable Aviation and FlyZero	333 01 3333
laxation - The impact of the emergence of new climate regulations such as increased carbon pricing and taxation for the aviation sector  • Expected to materialise short term	Additional expenditures due to higher cost of capital Reduced capital and financing from investors Reduced revenue due to passengers choosing other modes of transport	Alignment to ISO 14001 Environmental Management Systems  Working with Government and industry partners on the topics relating to taxation and aviation decarbonisation  Engagement with industrial research such as FlyZero and partnerships with HyNet on hydrogren fuel	£
Fossil fuel replacement  - Provision of low corbon energy and associated infrastructure at the airport to enable the decarbonisation of aircraft and airport aperations  • Expected to materialise, medium term.	Reduced passenger throughput due to business disruption resulting from lower discraft capacity owing, in turn, to longer refuelling turnaround times. Patential operational disruptions as a result of potential market-inability to scale up, therefore affecting the availability and increasing the price of alternative fuels.  Negative stakeholder perceptions of airlines may also arise if the airport is less able to position itself favourably.	Working with Government and industry partners on the decarbonisation of aviation e.g. Jet Zero Council, Sustainable Aviation and FlyZero Updating Sustainable Development Plans (SDP) for each of our airports	3
Reduced financing – Investor movement towards de-carbonisation options may lead to higher borrowing costs and challenges with refinancing  • Expected to materialise- short term	Reduced capital and financing Increased experiditure due to potential higher rates on lending Reduced revenue (c.g. from delayed planning approvals as a result of new or stricter policies)	Working with Government and industry partners on the decarbonisation of aviation e.g. Jet Zero Council Sustainable Aviation and FlyZero Active member of the European and World Trade Association Airports Council International Engaging with investors and lenders & ensuring transparent carbon reporting	£ I.

In conclusion, our analysis of climate-related financial risks has been a crucial step in our commitment to sustainability and we are proud to report on our progress so far. By assessing these risks, we have gained valuable insights that enable us to take proactive measures to mitigate them effectively.

We understand that our journey towards sustainability is ongoing and we remain dedicated to refining our understanding of climate risks and their impact. Moving forward, we will continue our analysis and research, working closely with industry partners to deepen our knowledge and build confidence in quantifying more complex risks. This includes assessing the infrastructure changes required to support future hydrogen and electric aircraft, as we believe these technologies will play a vital role in shaping the sustainable future of aviation.

Furthermore, we aim to evaluate and quantify climate-related opportunities identified through the TCFD process. We understand that tackling climate change not only presents risks but also opens doors to innovative solutions and business prospects. By harnessing these opportunities, we can drive positive change and contribute to a greener and more sustainable aviation sector.

#### METRICS AND TARGETS

Since 2007, we have reported our approach to reducing direct carbon emissions. Our airports were the first in the UK to achieve carbon neutral status which is certified through participation at Level 3+ (Neutrality) of the Airport Carbon Accreditation programme. Within our CSR Strategy we have a strategic priority to achieve net zero carbon emissions from our airport operations by 2038 at the latest. To achieve this commitment, our progress against our CSR Strategy is regularly reviewed and reported on to relevant stakeholders.

We measure, monitor and disclose our emissions from sources that we own or control (Scope 1), emissions from the energy we purchase (Scope 2) and emissions from our value chain (Scope 3) annually in line with the UK Government's Streamlined Energy and Carbon Reporting (SECR) and following the guidance of Greenhouse Gas Protocol Corporate Standard. We disclose absolute greenhouse gas emissions and an industry-specific carbon intensity measure, which is emissions per traffic unit (where traffic units are equivalent to 1,000 passengers or 100 tonnes of freight and mail).

We ensure that the reporting of our greenhouse gas emissions is insightful and transparent. We have been publicly disclosing our greenhouse gas emissions for over a decade, with reports regularly enhanced through methodology improvements and the calculation and disclosure of a wider range of indirect emissions. Our greenhouse gas footprint is audited by independent third party TÜV Nord. In addition to this, we further discuss our progress against our CSR Strategy 'Working together for a brighter future' and its climate-related targets in our dedicated CSR Report and Greenhouse Gas Emissions Report<sup>1</sup>. Further details of our SECR emissions can be found on page 38.

We are committed to achieving net zero carbon operations by 2038. To bridge the gap towards our net zero target, we have set ambitious commitments that form part of our CSR Strategy Working together for a brighter future. By 2030, all our airport infrastructure will run on renewable energy, reducing our carbon footprint and contributing to a greener future. Additionally, we are transitioning our vehicle fleet to ultra-low emission vehicles. A process with a target completion date of 2030. We are also implementing a comprehensive charging infrastructure for electric vehicles across our airports.

furthermore, we recognise the importance of alternative heating solutions. We are actively exploring innovative technologies to reduce and ultimately eliminate our reliance on traditional gas-fired systems for heating and hot water. This commitment underscores our dedication to sustainable practices and reducing carbon emissions throughout our operations.

When assessing business cases, our considerations include climate-related costs such as those associated with utilities, carbon offsets and emission trading scheme compliance.

#### TRANSITIONING TO A LOW-CARBON AND CLIMATE-RESILIENT FUTURE

As we move forward, we remain committed to our ongoing efforts to address climate change. We are closely monitoring emerging interdependencies related to both physical and transitional climate risks and opportunities. Working closely with local authorities the Environment Agency, water supply companies, and transportation providers, we are striving to better understand and address these complex issues. Our engagement with local forums is ongoing, and we remain committed to exploring opportunities for partnership and collaboration both within and beyond the aviation sector.

At the same time, we are focused on assessing the financial risks associated with climate change and the transition to a low-carbon economy. We are determined to take proactive steps to mitigate these risks, and progress in this area will be closely monitored and reported to our Audit and CSR Committees. We are also working to measure our financial risk against the transition and physical climate-related risks to our business. Progress against these actions will be reported to the Audit Committee and CSR Committee and included in our next Annual Report.

<sup>1.</sup> A capy of the Report can be found in the following location on the MAG website https://www.magairports.com/respons.ble-business/csr-reports

### Directors' report

The directors present their Annual Report on the affairs of Manchester Airports Holdings Limited ('the Company'), together with the audited financial statements, for the year ended 31 March 2023

#### PRINCIPAL ACTIVITY

The principal activities of the Company and its subsidiaries (the Group') during the year were the ownership, operation and development of airport facilities in the UK and the operation of airport related activities in the UK and North America. The Group's revenues were derived from aircraft and passenger handling charges, oirport-based commercial and retail activities, and property.

### REVIEW OF BUSINESS AND FUTURE DEVELOPMENTS

The consolidated results for the year under review commence on page 123. The Company intends to continue its development of the Group as an operator of high-quality airports and airport facilities both within the UK and overseas. The Group has successfully navigated the Covid-19 pandemic and the operational challenges of the recovery phase starting in early 2022. With firm financial foundations due to prudent stewardship and the Group's operating model, MAG will look at new investment opportunities, and delivering new facilities and enhanced service levels. A more detailed review of the Group's principal activities results and future developments is provided in the Chair's and CEO's reviews, the overview of the period and finance statements sections of the Strategic report

### DIVIDENDS AND TRANSFERS TO RESERVES

The retained loss for the year of £159.5m (2022; loss of £321.3m) after dividends paid of £nil (2022; £nil) will be transferred to reserves. In addition, the retained loss reserves also included a gain of £137.9m relating to revision of actuarial assumptions on the Group's defined benefit pension schemes net of tax, £7.0m loss relating to effect of change in rate of corporation tax and a foreign exchange gain of £5.7m on MAG s US investments, net of tax.

#### **BOARD OF DIRECTORS**

The Company directors during the year are detailed on pages 56 to 61.

### COMPLIANCE WITH CORPORATE GOVERNANCE PRINCIPLES

This Annual Report and Financial Statements have been prepared in adherence with The Wates Governance Principles for Large Private Companies which can be found at https://www.frc.org.uk

#### CONFLICTS OF INTEREST

The Company has procedures in place for managing conflicts of interest. Should a director become aware that they, or their connected parties, have an interest in an existing or proposed transaction with the Group, they should notify the Board in writing as soon as reasonably practicable. Internal controls are in place to ensure that any related party transactions involving directors, or their connected parties, are conducted on a rorms length basis. Directors have a continuing duty to update any changes to these conflicts.

#### INDEMNITY AND INSURANCE

The Company's Articles of Association provide that, to the extent permitted by the Companies Act 2006, the Company may indemnify any director, or former director, of the Company or of any associated companies, against any liability. Directors' and officers' insurance has been established to provide cover for all Directors against their reasonable actions on behalf of the Company.

### STATEMENT OF DISCLOSURE OF INFORMATION TO THE AUDITOR

In accordance with section 418 of the Companies Act 2006, the directors who held office at the date of approval of this directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditor is unaware; and each director has taken all the s'eps that they ought to have taken as a director to make themselves aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

#### CONTRACTS OF SIGNIFICANCE

Details of contracts of significance with Manchester City Council are set out in note 37 to these financial statements.

#### **RISK MANAGEMENT**

The Board as a whole, including the Audit Committee members, cansider the nature and extent of the risk management framework, and the risk profile that is acceptable in order to achieve the Group's strategic objectives. The Audit Committee has reviewed the work done by internal audit, management, the Committee itself and the Board, on the assessment of the Group's principal risks, including their impact on the prospects of the Company. The most significant strategic, corporate and operational risks and uncertainties, and the prevailing approach to their management, are detailed on pages 82 to 87.

Horizon scanning regarding new and emerging risks takes place at relevant governance forums, Risk and Audit Boards and Board and Audit Committee meetings; where relevant, the risk detail and mitigation strategies have been included in the narrative below.

### STREAMLINED ENERGY AND CARBON REPORTING (SECR)

As detailed on page 38.

#### GOING CONCERN

The directors have prepared the Group and Company financial statements on a going concern basis. In assessing the going concern position of the Group, the directors have considered the cash flow and liquidity of the Group, for the period to 30 September 2024, and the corresponding impact of cash headroom and financial covenants associated with the Group's financing arrangements.

In assessing going concern the directors have considered:

- the Group's business plan forecast where passenger numbers increase to 95% of pre-Covid-19 levels in FY24 and include planned mitigating actions that are within management's control;
- the successful refinancing of a £360m bond due to mature on 2 April 2024; and
- a downside scenario where passenger numbers in FY24 are 88% of pre-Covid-19 levels.

The Group is expected to maintain positive cosh headroom in excess of  $\mathfrak{L}315m$  for the period to 30 September 2024 in the business plan case which reduces to  $\mathfrak{L}198m$  in the downside scenario. In all cases, the Group complies with its covenant testing throughout the going concern period.

The directors have concluded that the Group can maintain sufficient liquidity over the period to 30 September 2024 and will comply with the covenant financial testing at each reporting date. This, coupled with the successful securing of a commitment of a bridge to bond facility for the refinancing of the bond maturing in 2024, has resulted in the directors concluding that it is appropriate to continue to account for the Otoup us a going concern.

Further detail of the directors' assessment of going concern is detailed in the Basis of Preparation note in the accounting policies on page 109.

### Directors' report continued

#### THE GROUP'S PROSPECTS

The directors have included the following statement with regards to the Group's prospects to comply with the Wates Principle Six to provide a fair, balance and understandable statement of the Group's position and prospects.

The directors have assessed the prospects of the Group over a three-year period, taking into account the Group's current position and the potential impact of the principal risks and uncertainties set out on pages 82 to 87. These risks include mocroeconomic, political and geopolitical uncertainty (and their impact on the post-Covid-19 recovery), climate change and the delivery of its the major capital projects. Based on this assessment, the directors confirm that they have a reasonable expectation that the Group will be able to continue in operation and meet its liabilities as they fall due over the period to 31 March 2026

The directors have determined that a three-year period to 31 March 2026 constitutes an appropriate period over which it is to provide its prospects statement. This is the period focused on by the Board during the strategic planning process, is aligned to detailed passenger projections and contains the major refinancing actions required by the Group in the near term. The directors have no reason to believe the Group will not be viable over a longer period, however given the inherent uncertainty involved, it is believed that this presents users of the Annual Report with a reasonable degree of confidence while still providing a langer-term perspective.

In making this assessment the directors confirm that they have a reasonable expectation that the Group can confinue in operation and meet its liabilities throughout the period. The directors have considered the potential impact of the current macroeconomic climate on the cashflow and liquidity of the Group over the period, together with the corresponding impact on the covenants associated with the Group's financing arrangements, and the requirement of the Group to refinance a £360.0m band which matures in April 2024.

The Group is subject to financial covenants on its secured funding arrongements, being leverage (Net Debt/adjusted EBITDA1) and interest cover (adjusted EBITDA1 less tax/net finance charges). The covenants are tested half yearly on 31 March and 30 September.

The Group's committed facilities at 31 March 2023 comprised: £1,460.0m of bonds, £902.0m of shareholder loans, and a £500.0m Secured Revolving Credit Facility ('RCF'), of which £nil was drawn at the yearend. In addition, the Group also has access to a committed £90.0m Liquidity Facility In May 2022, the Group renegotiated the RCF and Liquidity Facilities with their maturity dates extending to May 2028, and subsequently exercised an option for a further 12 month maturity extension, taking these facilities to May 2028. Additionally, a committed bridge to bond facility secured by the Group provides assurance around the refinancing of the £360,0m band which matures in April 2024 The remaining  $\mathfrak{L}1,100.0m$  of Group bonds will mature between 2034 and 2044 These facilities provide a Group liquidity position with headroom as at 31 March 2023 amounting to £561.6m, comprising £676m net cash in hand, undrawn RCF of \$484 0m and a \$10.0m undrawn available overdraft facility.

The recovery from Covid-19 during FY23 saw passenger numbers increase overall from 33.0% of pre-Covid-19 levels experienced in FY22 to 86% in FY23. The impact of this bounce back in activity levels has been reflected in business performance which, when measured at the adjusted EBITDA1 level, increased by 229.8% from a £ 125.6m profit in FY22 to a profit of £412.0m in FY23. As a result of this recovery MAG has been able to relaunch the Group's Transformation Programmes and recommencement payment of shareholder loan interest. Management will continue to monitor the impact of the economic environment or aemand levels in order that mitigating cash and cost measures can be adapted to reflect

Based upon this strong trading position from FY23, the assessment of the Group's prospects undertaken by the directors considered industry expectations of demand levels in FY24 and beyond, Current expectations are that passenger levels will return to 95% of pre-Covid-19 levels in FY24 with pre-Covid-19 activity levels being attained in FY25 The forecasts estimate covenant compliance during the three year period and a liquidity headroom in excess of £100m throughout. The Bosis of Preparation on page 109 sets out the Group's going concern conclusion. The assessment has also considered the impact of climate change in a separate scenario which aligns with the Group's TCFD reporting on page 88. The impact has been considered in the Group's going concern viability and impairment assessments.

In addition the Group also recognised the risk that the rate of infrastructure spending to support the re-launched Transformation Programmes at Manchester and Stansted is partly funded by the raising of two additional c. £300m bonds within the three year period. Management's current expectation is that the Group will be able to obtain additional funding as required and the continued appetite to provide funding to the sector is supported by both MAG's recent raising of a committed bridge to bond facility, its RCF and Liquidity Facilities as well as other debt issuance by comparable UK and European peer airports.

The Group can, where necessary, also undertake potential mitigating actions within its control. This can include cutting of further discretionary expenditure and delaying of capital expenditure. Having considered all the relevant requirements, including MAG's financial position, forecast and reasonable downsides, together with actions available to mitigate impacts the directors deem it appropriate that the Group remain viable over the three year period to 31 March 2026.

#### **Employment policies**

The Group's employment policies are legally compliant, and a programme has commenced to review, modernise and simplify all our employment policies. The Group is committed to treating all employees and job applicants fairly and on merit, regardless of age. disability, gender and gender reassignment, marital and civil partnership status, pregnancy and maternity, race, religion or belief, and sexual orientation. The Group does not tolerate harassment, discrimination or victimisation of any kind. As part of MAG's commitment to creating an inclusive environment for all colleagues, several Colleague Resource Groups (Women's Network, Fly with Pride, Carers' Network, LGBTQIA+, Race & Ethnicity and Men's Mental Health) have been established to form communities of interest, help inform the business and support positive change in the organisation. If an employee becomes disabled, every effort is made to make appropriate reasonable adjustments to retain them in their current role or provide retraining or redeployment within the Group.

#### Apprentices and the National Living Wage

MAG remains fully supportive of opprenticeships. The impact of Covid-19 meant that recruitment into opprentice programmes was paused but we have now recommenced recruitment of apprentices, with the design of new programmes, and driven by a dedicated Early Talent Manager, with the view to building diverse talent pipelines as part of strategic workforce planning. MAG fully complies with all of its obligations under the National Living Wage.

#### Consultation and communication

Consultation with employees or their trade union/elected representatives has been critical through this period of uncertainty due to the business impacts of the pandemic and there has been a continuous dialogue at all levels, with the aim of ensuring that their views are taken into account when decisions are being made that may affect their interests. As part of the trade union recognition agreements various employee forums exist for each business area, and more information on consultation is provided in the annual CSR report.

It has been critical to ensure colleagues and leaders are kept updated through this period of change and there have been regular briefings in relation to key business and operational developments. These are cascaded throughout the organisation via multiple communication channels such as weekly newsletters and online forums.

As explained in Other Information of the financial statements on page 173

### Directors' report continued

### POLICY AND PRACTICE ON PAYMENT OF CREDITORS

The Group's current policy concerning the payment of the majority of its trade creditors is to follow the CBI's Prompt Payment Code, copies of which are available from the CBI, Cannon Place, 178 Cannon Street, London, EC4N 6HN. For other suppliers the Group's policy is to:

- settle the terms of payment with those suppliers when agreeing the terms of each transaction:
- ensure that those suppliers are made aware of the terms of payment by inclusion of the relevant terms in contracts; and
- pay in accordance with its contractual and other legal obligations

These payment practices apply to all payments to creditors for revenue and capital supplies of goods and services, without exception. The period of credit taken by the Group at 31 March 2023 was 27 days (2022: 21 days), reflecting the average number of days between receipt of the invoice and its subsequent payment

#### Modern Slavery Act 2015

Our principal reference point for slovery and human trafficking is the definitions set out in the Modern Slovery Act 2015. We recognise that slavery and human trafficking can occur in many forms such as forced labour, child labour, domestic servitude, sex trafficking and workplace abuse. We are also aware that forced labour as a form of slavery includes debt bondage and the restriction of a person's freedom of movement, whether that be physical or non-physical, for example, by the withholding of a worker's identity papers. We use the terms 'slavery' and 'human trafficking' to encompass all of these various forms of coerced labour.

We understand the important role that MAG has to play and as a socially responsible organisation, so we adopt the highest professional standards and comply with all laws, regulations and codes applicable to our business. No form of modern slavery is acceptable in our operations, or in those companies who work with us or on our behalf.

We continue to take steps to improve our practices to identify and eliminate modern slavery which may occur within our business. supply chains and across our airport operations. As our airports are a gateway for both entry into and exit from the United Kingdom, this presents additional challenges in our approach to preventing modern slavery Consequently we take our responsibilities very seriously and partner with Slave-Free Alliance, border and police forces who support us in our approach to tackling madern slavery and our progress is reviewed with our CSR Committee to ensure Board oversight Keeping everyone safe, treating everyone with respect and doing the right things are core to our values, which underpin everything we do All senior leaders have received enhanced training and awareness or the various types of Modern Slavery and Human Trafficking, how to spot the signs and the various routes to report concerns. All colleagues continue to receive annual education and training which continues to evolve and are expected to report concerns and management are expected to act upon them.

Further detailed information can be found using the link below:

https://www.magairports.com/media/1803/ modern-slavery-transparency-statement-2022final.pdf

### CHARITABLE AND POLITICAL DONATIONS

Charitable donations made by the Group during the year totalled £1.3m (2022: £0 3m). The donations were all made to recognised local and notional charities for a variety of purposes. It is the Group's policy not to make contributions to political parties.

#### AUDITOR

The Group assesses the effectiveness of the audit process and the independence of the auditor on an annual basis. The evaluation of audit effectiveness takes into account the views of both management and the Non-Executive Directors across a number of attributes. The independence of the external auditor considers both the quantum and the nature of non-audit services provided by the auditor during the year and ensures compliance with both the Group's policy and the FRC's ethical guidance.

The statutory auditor Ernst & Young LLP, was appointed in the year and has expressed their willingness to continue in office. A written resolution relating to the re-appointment for the year ending 31 March 2024 was put before the Company's Board on 27 June 2023 and was duly approved.

The report was approved and authorised by the Board and was issued on behalf of the Board

### Charlie Cornish Chief Executive MAG

For and on behalf of the Board of Directors of the Company 4 July 2023

## Statement of directors' responsibilities in respect of the Annual Report and the financial statements

GOVERNANCE

The directors are responsible for preparing the Annual Report and the Group und Parent Company financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare Group and Parent Company financial statements for each financial year. Under that law they have elected to prepare the Group financial statements in accordance with UK-adopted international occounting standards and applicable law and have elected to prepare the Parent Company financial statements in accordance with UK accounting standards and applicable law (UK Generally Accepted Accounting Practice), including FRS 102 the Financial Reporting Standard applicable in the UK and Republic of Ireland.

Under company law the directors must not approve the tinancial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Group and Parent Company and of the Group's profit or loss for that period. In preparing each of the Group and Parent Company financial statements, the directors are required to

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable, relevant, reliable and prudent;
- for the Group financial statements, state whether they have been prepared in occordance with UK adopted international accounting standards;
- for the Parent Company financial statements, state whether applicable UK accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements:
- assess the Group and Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Parent Company's transactions and disclose with reasonable accuracy at any time the financial position of the Parent Company and enable them to ensure that its financial statements comply with the Companies Act 2006.

They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement whether due to traud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to prevent and detect froud and other irregularities.

The directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

### Independent auditor's report

#### OPINION

We have audited the financial statements of Manchester Airports Holdings Limited ('the parent company') and its subsidiaries (the 'group') for the year ended 31 March 2023 which comprise the Consolidated Income Statement, Consolidated Statement of Financial Position, Consolidated Statement of Comprehensive Income, Consolidated Statement of Changes in Equity, Consolidated Statement of Cash Flows and the related notes 1 to 39, including a summary of significant accounting policies and the Company Statement of Financial Position, Company Statement of Changes in Equity and the related notes 1 to 9, including a summary of significant accounting policies. The financial reporting framework that has been applied in the preparation of the group financial statements is applicable law and UK adopted international accounting standards. The financial reporting framework that has been applied in the preparation of the parent company financial statements is applicable law and United Kingdom Accounting Standards, including FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" (United Kingdom Generally Accepted Accounting Practice).

#### In our opinion

- the financial statements give a true and fair view of the group's and of the parent company's affairs as at 31 March 2023 and of the group's loss for the year then ended,
- the group financial statements have been properly prepared in accordance with UK adopted international accounting standards;
- the parent company financial statements have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice: and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

#### BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the group in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard as applied to other entities of public interest, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### CONCLUSIONS RELATING TO GOING CONCERN

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the directors' assessment of the group and parent company's ability to continue to adopt the going concern basis of accounting included the following procedures

- We obtained management's Going Concern assessment including the cash forecast and forecast covenant calculation which covers the period to 30 September 2024. The Group has modelled a base scenario and downside scenario in their cash forecasts in order to incorporate unexpected changes to the forecasted liquidity of the Group. A reverse stress test was also modelled to demonstrate what factors would lead to the Group utilising all liquidity or breaching the financial covenant during the going concern period;
- We challenged the appropriateness of the methods used to calculate the cash forecasts and covenant calculations to determine they were
  appropriately sophisticated to be able to make an assessment on going concern.
- We assessed the appropriateness of the going concern assessment period and considered whether any events or conditions foreseeable after the
  period indicate a longer review period is required;
- We performed procedures over the integrity of the modelling, verifying the arithmetical accuracy of the cash flow forecast models and vouching the
  calculation of headroom in respect of the financial covenant test ratios;
- We analysed the Group's historical forecasting accuracy to evaluate potential optimism in future forecasts and compared the forecasts to post yearend actual results:
- We tested the assumptions included in each modelled scenario for the cash forecast and covenant calculation by comparing to historical actual
  results and third party industry forecasts;
- We inspected the financing agreements in place and understood the terms and conditions including those related to covenant test ratio requirements
- We involved EY Debt Advisory specialists to read and evaluate the Borclays bridge to bond commitment letter and facilities agreement in place to ensure that the £360m bond due to mature in April 2024 can be repoid
- We considered the mitigating factors identified by management, in particular, regarding the deferral of capital expenditure, to ensure that they are within control of the Group.
- We compared the forecasts used in the going concern assessment to those used for other purposes (i.e., impairment).
- We reviewed the company's going concern disclosures included in the annual report in order to assess that the disclosures were appropriate and in conformity with the reporting standards.

OVERVIEW STRATEGIC REPORT GOVERNANCE FINANCIAL STATEMENTS

107

#### CONCLUSIONS RELATING TO GOING CONCERN CONTINUED

Management have modelled a base case and downside scenario, neither of which indicate a liquidity or covenant breach. They have also modelled a reverse stress test which is considered remote based on current passenger levels and industry predictions. A bridge to bond facility is available and sufficient to ensure the £360m band maturing in April 2024 can be repaid if a new band issue should not take place in advance of that date.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the group and parent company's ability to continue as a going concern for the period to 30 September 2024.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the group's ability to continue as a going concern.

#### OTHER INFORMATION

The other information comprises the information included in the annual report set out on pages 1 to 188, other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements, or our knowledge obtained in the course of the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard

## OPINIONS ON OTHER MATTERS PRESCRIBED BY THE COMPANIES ACT 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the strategic report and the directors' report for the financial year for which the financial statements are prepared is consistent
  with the financial statements, and
- the strategic report and directors' report have been prepared in accordance with applicable legal requirements.

## MATTERS ON WHICH WE ARE REQUIRED TO REPORT BY EXCEPTION

In the light of the knowledge and understanding of the group and the parent company and its environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the parent company, or returns adequate for our audit have not been received from branches not visited by us; or
- the parent company financial statements are not in agreement with the accounting records and returns, or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

## **RESPONSIBILITIES OF DIRECTORS**

As explained more fully in the directors' responsibilities statement set out on page 103 the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error

In preparing the financial statements, the directors are responsible for assessing the group's and the parent company's obility to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the group or the parent company or to cease operations, or have no realistic alternative but to do so

## Independent auditor's report continued

#### AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

## Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the group and determined that the most significant are Companies Act 2006, Financial Conduct Authority Listing Rules, 2018 UK Corporate Governance Code, European Securities and Markets Authority regulations, UK taxation legislation, Civil Aviation Act 2012 and Air Navigation Order 2016.
- We understood how Manchester Airports Holdings Limited is complying with those frameworks by making enquiries with management, those
  charged with governance, internal audit and those responsible for legal and compliance matters and also reviewing the entity code of conduct and
  indicate blower hadron.
- We assessed the susceptibility of the Company's financial statements to material misstatement, including how fraud might occur by assessing the risk
  of fraud absent of controls, and then identifying the controls which are in place at the entity level and whether the design of these controls is sufficient
  for the prevention and detection of fraud. We also consider the risk of management override and consider the design and implementation of controls
  at the financial statement level to prevent this.
- Based on this understanding we designed our audit procedures to identify noncompliance with such laws and regulations. Our procedures included
  involving our forensics team to assess any potential areas of higher risk. We followed up on these areas to perform further procedures to assess if
  there was any risk of froud. We also read minutes of key boards and committees, read communications with regulators and legal advisors, inquired
  of management and those charged with governance, and performed targeted journal entry testing for journals with froudulent characteristics.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at https://www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report

#### USE OF OUR REPORT

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body; for our audit work, for this report, or for the opinions we have formed.

EINSTEYDING UP

Victoria Venning Tenning Community, 1997, 1997, 1997, for and on behalf of Ernst & Young LLP, Statutory Auditor Manchester

4 July 2023

OVERVIEW STRATEGIC REPORT GOVERNANCE

#### **GENERAL INFORMATION**

Manchester Airports Holdings Limited (the 'Company') is a private limited liability company incorporated and domiciled in England and Wales in the UK. The Company is the Parent Company and the ultimate holding company of the Group. The address of the registered office is Olympic House, Manchester Airport, Manchester, M90 1 QX.

The principal activities of the Group are set out within the Directors' Report. These consolidated financial statements were approved for issue by the Board of Directors on 4 July 2023.

MAG's principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to the current year and previous year unless otherwise stated. These accounting policies apply the historical cost convention modified to include certain items at fair value.

#### **BASIS OF PREPARATION**

The Group financial statements consolidate those of the Company and its subsidiaries (together referred to as the 'Group') and equity account the Group's interest in associates and Joint Ventures. The parent company financial statements present information about the Company as a separate entity and not about its group. The Group and Company financial statements are presented in sterling and are shown as millions rounded to the nearest one decimal place, except where otherwise stated.

The Group financial statements have been prepared and approved by the directors in accordance with UK-adopted international accounting standards ("UK-adopted IFRS"). The Company has elected to prepare its parent company financial statements in accordance with FRS 102; these are presented on pages 181 to 189.

The group has changed the format of the income statement presentation to include the operating expenses line and also present separately finance income and finance cost. The comparative information has been restated. There is no impact on the operating profit, profit after taxes, equity, cash flows and earnings per share.

#### GOING CONCERN

The directors have prepared the Group and Company financial statements on a going concern basis. In assessing the going concern position of the Group, the directors have considered macro-economic factors such as the impact of the present high inflationary economic environment (e.g. increased energy costs arising from the Ukraine conflict, wage inflation) and rising interest rates. The resultant impact on the Group's cash flow and liquidity, for the period to 30 September 2024 (being the going concern assessment period) has been assessed, as has the corresponding impact of cash headroom and financial covenants associated with the Group's financing arrangements.

The Group is subject to financial covenants on its secured funding arrangements, being leverage (Net Senior Debt/adjusted EBITDA on a frozen GAAP basis) and interest cover (adjusted EBITDA on a frozen GAAP basis less tax paid/net finance charges on net senior debt). The terms used in the covenant calculations, including 'frozen GAAP basis', have been defined and reconciled to GAAP measures in the Alternative Performance Measures note on page 173. The covenants are tested half yearly on 31 March and 30 September.

At 31 March 2023, the Group had available £67.6m of net cash and committed facilities comprised of. £1,460 0m of bands, £902 0m of shareholder loans, and a £500 0m Secured Revolving Credit Facility (RCF), of which £nil was drawn at the year-end. In addition, the Group also has access to a committed £90.0m Liquidity Facility. In May 2022, the Group renegotiated the RCF and Liquidity Facilities with their maturity dates extending to May 2027 and subsequently exercised an option for a further 12 month maturity extension, taking these facilities to May 2028. The Group's borrowing facilities, contain a £360.0m band which matures in April 2024. The directors' current expectation is that the Group will be able to successfully issue a replacement band in Q3 FY24 and the continued appetite of the market to provide funding to the sector is supported by both MAG's re-financing in the prior year as well as other debt issuance by comparable UK and European peer airports. However, since the band has not yet been issued at the date of signing of these financial statements the directors have secured a binding bridge to band commitment which provides assurance that the Group will be able to repay the £360.0m band when it falls due. The remaining £1,100.0m of Group bands will mature between 2034 and 2044.

Whilst the Annual Report for the year ended 31 March 2022 was prepared on a going concern basis it contained a material uncertainty as the Group, under a severe but plausible scenario, forecasted a potential breach of a financial covenant at 31 March 2023. The strong recovery in passenger numbers experienced by the Group over the past 12 months and the forecasts produced to cover the going concern assessment period have provided confidence that a material uncertainty no longer exists. The directors will continue to closely monitor the macro-economic factors to assess the impact upon demand levels and flex the business response accordingly.

109

# Accounting policies continued

#### GOING CONCERN CONTINUED

The directors' going concern assessment considers the Group forecasts for the period to 30 September 2024. The recovery from Covid-19 during FY23 saw passenger numbers increase overall from 33% of pre-Covid-19 levels experienced in FY22 to 86% in FY23 and 92% for the month of March 2023.

The impact of this bounce back in activity levels has been reflected in business performance, which, when measured at the adjusted EBITDA? level, increased by 229.8% from a £125.6m profit in FY22 to a profit of £412 0m in FY23. As a result of this recovery MAG has been able to relaunch the Group's Transformation Programmes and recommencement of payment of shareholder loan interest. The Group's base case forecast of passenger number projections include a business plan of 95% of pre-Covid-19 (defined as FY20) levels for FY24 and returning to pre-Covid-19 levels in FY25. The levels of passenger demand in the forecast reflects the directors' anticipated rate of recovery and is aligned with industry expectations.

The forecasts include the successful refinancing of the Group's £360.0m bond and result in a minimum liquidity headroom of £315.0m during the going concern assessment period and compliance with MAG's financial covenants when tested at September 2023; March 2024; and September 2024. The forecasts also include the raising of additional finance for discretionary expansionary capital expenditure. The directors expect to be able to access this finance, as described above. However, should the finance not be available, the expansionary capital expenditure would be deferred.

In addition to the Group's business plan forecast of 95% of pre-Covid passenger levels the directors have also considered a downside scenario:

#### Downside scenario.

In this scenario passenger numbers are restricted to 88% of pre-Covid-19 levels in FY24 (in line with the lower level of current industry forecasts), with partial recovery to 92% of pre-Covid-19 levels in FY25. In such a case the Group is expected to maintain positive liquidity headroom in excess of £ 198m for the going concern assessment period.

The forecast contains certain cash and cost mitigation measures to remove areas of discretionary spend but keeps key regulatory or infrostructure spend in place. The Group can, where necessary, also undertake potential mitigating actions within its control, including cutting of additional spend and delaying of further capital expenditure

Under the downside scenario all testing throughout the going concern assessment period is forecast to be compliant with the Group's covenants when tested at each reporting date.

In addition, a reverse stress test has been prepared by management which demonstrates the level of passenger numbers that would result in a covenant breach, this equates to a reduction in passenger numbers of 77% of pre-pandemic levels. A fall to this level is considered to be implausible based on current passenger levels and industry predictions

Based upon their assessments of the business plan case and the downside scenario detailed above, together with the bridge to bond commitment they have obtained to ensure that the  $\mathfrak{L}360.0$ m moruring in the going concern period can be repaid, the directors have concluded that the Group can meet its covenant requirements and maintain sufficient liquidity throughout the going concern period and as such, it is appropriate for the Group to continue to adopt the going concern basis for the preparation of these accounts.

## NEW STANDARDS, INTERPRETATIONS AND AMENDMENTS TO EXISTING STANDARDS AND CHANGES IN ACCOUNTING POLICIES

There are no new adopted IFRSs, interpretations issued by the International Accounting Standards Board (IASB) or by the IFRS Interpretations Committee (IFRIC) that are applicable for the period that have had a material impact on the Group's financial statements. During the year, the International Accounting Standards Board issued the following amendments to UK adopted international accounting standards:

- Onerous Contracts (amendments to IAS 37) clarification that the costs included in calculating an onerous contract should include the allocation of
  any costs directly attributable to completing the contract and not restricted to incremental expenditure.
- Clarification on definition of assets and liabilities when used in business combinations;
- Proceeds before Intended Use (Amendments to IAS 16) clarified that any income earned prior to Plant, Property & Equipment being brought into use should be recognised in the income statement as opposed to netted off against the cost of the asset: and
- Minor amendments to IFRS 1; IFRS 16, IFRS 9 (clarifying which fees can be included in the assessment of a financial instrument modification) and IAS 41.

None of the amendments had a material impact upon the Group's results

As explained in Other Information of the Financial statements on page 173

# NEW STANDARDS, INTERPRETATIONS AND AMENDMENTS TO EXISTING STANDARDS AND CHANGES IN ACCOUNTING POLICIES CONTINUED.

New accounting standards, interpretations and amendments that are not yet effective, and have not been adopted by the Group which are to be adopted on accounting periods commencing on or after 1 January 2023:

- IFRS 17 Insurance contracts;
- Disclosure of accounting policies changes requirement from disclosing significant to material policies,
- Clarification on the distinguishing changes of accounting policy to change of accounting estimates; and
- Treatment of deferred tax assets and liabilities arising from a single transaction.

The Group's financial reporting will be presented in compliance with the new standards, amendments and interpretations above, which are not expected to have a material impact on the financial statements, in the FY24 Annual Report. The Group has consistently applied its accounting policies for the current and prior year

#### **BASIS OF CONSOLIDATION**

These consolidated financial statements include the income statement, statement of comprehensive income, statement of changes in equity, statement of financial position, and statement of cash flows of the Company and all of its subsidiaries.

Subsidiaries are entities controlled directly or indirectly by the Company. Control exists when the Company has the power (directly or indirectly) to direct relevant activities of an entity so as to impact variable returns to which they have rights or are exposed. Subsidiaries have been consolidated from the date that control commences until the date that control ceases. At such time, any resulting gain or loss is recognised in the profit and loss.

Where a Company's interest in a subsidiary is not 100% attributable to the shareholders of the Group then in accordance with the requirements of IFRS 10, 100% of the income, expenses, assets and flabilities are reflected in the primary financial statements. The split of the profit and net assets attributable to the Group's shareholders and the non-controlling interest are detailed in the statement of comprehensive income and the Group's equity and reserves

## Interests in associate

Entities, other than subsidiaries, over which the Company (directly) exerts significant influence, but not control or joint control, are associates. The Group's investments in its associates are accounted for using the equity method.

Under the equity method, the investment in an associate is initially recognised at cost. The corrying amount of the investment is adjusted to recognise changes in the Group's share of net associate since the acquisition date.

A joint venture is an arrangement in which the Group has joint control, whereby the Group has rights to the net assets of the arrangement, rather than rights to its assets and obligations for its liabilities. The Group's investments in its associates and joint ventures are accounted for using the equity method.

## Transactions eliminated on consolidation

Intra-group balances and transactions, income and expenses and all profits and losses arising from intra-group transactions, are eliminated in preparing the Group financial statements.

### FOREIGN TRANSACTIONS

The results and financial position of foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency os follows.

- Assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- Income and expenses for each statement of profit or loss and statement of comprehensive income are translated at average exchange rates (unless
  this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses
  are translated at the dates of the transactions); and
- · The resulting exchange differences are recognised in the statement of other comprehensive income; and
- Any exchange differences arising from other than the translation of the results and financial position of foreign operations are recognised through the
  uncome statement.

## Accounting policies continued

#### DEVENUE

The Group operates a number of revenue streams and accordingly applies methods for revenue recognition, based on the principles set out in IFRS 15. The revenue recognised in any period is based on the satisfaction of performance obligations and an assessment of when control is transferred to the customer. Revenue is recognised either when the performance obligation in the contract has been satisfied (so 'point in time' recognition) or 'over time' as control of the goods or services is transferred to the customer.

The following revenue recognition criteria apply to the Group's main income streams.

#### **Aviation income:**

- Various passenger charges for handling and security, based upon the number of departing passengers, are recognised at point of departure.
- Aircraft departure and arrival charges levied according to weight and time of departure/arrival, are recognised at point of departure/arrival.
- Aircraft parking charges based upon a combination of weight and time parked, are recognised at point of departure. The contracts entered into
  are complex in nature including the breadth of discounts and rebates that the Group offers Judgement is applied to assess the impact any contract
  amendments have when determining the appropriate contract term

#### Retail and commercial concession income:

- Concession income from retail and commercial concessions is recognised in the period to which it relates on an accruals basis. The contracts
  entered into are long-term income-sharing concession agreements with the concession fee based on turnover. The Group has considered whether
  IFRS 15 or 16 applies to retail income but have determined that MAG controls the retail unit space and as a result applies IFRS 15.
- · Income from airport lounges is recognised at the point of usage.

#### Car park income:

- Contract parking, pre-book parking and turn-up parking is recognised over the period to which it relates on a straight-line basis. The Group considers the performance obligation is satisfied through the provision of a car park space for each day the car is parked.
- Where car parking is booked through a third party and MAG own airport parking, income and related commissions are accounted for on a gioss
  basis as the Group is acting as a principal, rather than an agent, as MAG maintain control over how the performance obligation to the customer is
  extricted.
- · Income and related commissions from the CAVU businesses
- Where sales are made on behalf of a third party, they are accounted for on a net basis, as the Group does not obtain control over how the
  performance obligation is satisfied to the customer. Revenue is recognised at the point of booking as CAVU's performance obligation has been
  completed in full at that point in time; and
- . Where CAVU is selling on behalf of the Group's car parks the revenue is recognised on a gross basis, straight-line over the booking period

## Property income (IFRS 16):

Rental income arising on investment properties is accounted for on a straight-line basis over the lease term. The contracts being entered into are long-term lease arrangements. Inter-company revenue arising from rental between the Group's operating segments has been eliminated.

#### Other income:

- Passenger-related activities, such as travel services, check-in desks and in-flight catering:
- · Utilities recovery (electricity, gas water) from tenants recognised on an incurred basis under the terms of recharge agreements with customers, and
- Income from refuelling activity.

Revenue is disaggregated at the income stream level, the three airport segments generate revenue from all of the Group's income streams, CAVU generates only car parking retail and other income, and the Group, consolidation and other segment generates property and other income. For the purposes of the Group financial statements, all inter-company turnover is eliminated upon consolidation, whereas inter-company turnover is recognised in the revenue of individual company financial statements.

All revenue from the Group's income streams is generated in the UK other than some lounge and car park income which is generated in North America and Australia by the CAVU segment

OVERVIEW STRATEGIC REPORT GOVERNANCE

#### REVENUE CONTINUED

At contract inception the total transaction price is estimated, being the amount to which the Group expects to be entitled. This includes an assessment of any variable consideration where the Group's performance may result in additional revenues based on the achievement of certain performance measures or discounts/rebates upon achieving certain pre-determined volumes. Revenue is only recognised to the extent it is not highly probable to reverse.

The Group's customer contracts include a diverse range of payment schedules dependent on the nature and type of services being provided. The Group agrees payment schedules at the beginning of contracts under which it receives payments throughout the term of the contracts. These payment schedules may include performance-based payments or progress payments as well as regular monthly or quarterly payments for angoing service delivery. Payments for transactional goods and services may be at delivery date, in arrears or part payment in advance. Where payments made are greater than the revenue recognised at the period end date, the Group recognises a deferred income liability for this difference. Where payments made are less than the revenue recognised at the period end date, the Group recognises an accrued income asset for this difference. All performance obligations are largely satisfied within the financial year with most contracts being coterminous with the Group's year end. This reduces the amount of judgements or assumptions required to estimate transaction price or allocate revenue to performance obligations.

#### **BUSINESS COMBINATIONS AND GOODWILL**

Business combinations are accounted for using the acquisition method as at the acquisition date, i.e. when the Group assumes control. Control exists when the Group has the power to direct relevant activities of an entity so as to obtain benefits from its activities. For acquisitions completed before 1 April 2010, attributable costs of the acquisition formed part of goodwill. For acquisitions completed on or after 1 April 2010, attributable costs of acquisition are expensed in the income statement in the period incurred.

For business combinations with acquisition dates on or after 1 April 2020, the Company has determined whether a particular set of activities and assets is a business by assessing whether the set of assets and activities acquired includes at a minimum, an input and substantive process and whether the acquired set has the obility to produce outputs.

Goodwill arising on acquisitions represents the difference between the fair value of the consideration given over the fair value of the assets, liabilities and contingent liabilities of an acquired entity. Positive goodwill is capitalised as an asset in the consolidated statement of financial position and is stated at cost less any accumulated impairment losses and is allocated to cash-generating units and is not amortised. It is tested annually for impairment, or more frequently if events or changes in circumstances indicate a potential impairment. Any impairment is recognised immediately in the Group's consolidated income statement and is not subsequently reversed.

### CONTINGENT CONSIDERATION

The Group evaluates any contingent consideration payable and applies the application guidance set out in IFRS 3 to the particular circumstances of the transaction. The contingent consideration will accordingly be categorised as part of the consideration of the acquisition or as post-acquisition remuneration. In all instances where the contingent consideration is dependent upon the continuing employment of the recipients, the Group will treat the amount as post-acquisition remuneration.

Contingent consideration is initially recognised at fair value at the acquisition date. If the contingent consideration is classified as equity, it is not remeasured and settlement is accounted for within equity. Otherwise, subsequent changes to the fair value of the contingent consideration are recognised in profit or loss.

## INTANGIBLE ASSETS

Internally generated intangible assets

Development expenditure incurred in respect of individual projects is capitalised where the asset is identifiable and only when the future economic benefit of the project is probable. It is recognised only if all of the following conditions are met.

- the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale
- the Group can demonstrate how the intangible asset created will generate future economic benefits;
- the Group has available the resources to complete the asset,
- the Group intends to complete that asset and has the future ability to sell or use the asset; and
- the development cost of the intangible asset can be measured reliably.

## Accounting policies continued

#### INTANGIBLE ASSETS CONTINUED

After recognition, the cost model is applied requiring the asset to be held at cost less accumulated amortisation and impairment. Amortisation begins when the asset is ready for use. This type of expenditure primarily relates to internally developed software booking systems and website projects for the Group.

Purchased intangible assets (software costs)

The capitalised computer software costs principally relate to operating and financial software. There are no software as a service related assets included. Where the software is integral to the hardware the software will be recognised within property, plant and equipment Customisation/configuration costs of software are recognised as an intengible asset only where the Group can demonstrate control of the asset.

Useful economic lives

The useful economic lives of the Group's intangible assets are finite and are detailed below:

	Years
Metrolink	30
Customer and operator relationships	5 – 10
Brands	4 - 10
Software & intellectual property	5 – 10

Intangible assets are amortised on a straight-line basis over the asset's useful economic life. If there are indications of impairment in the carrying value of the asset, then the recoverable amount is estimated and compared to the carrying amount.

#### PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment constitutes the Group's operational asset base, and includes terminal, airfield, car parking, land, plant, and owner-occupied property assets, Investment properties held to earn rentals or for capital growth are accounted for separately under IAS 40 'Investment Properties'.

The Group has elected to use the cost model under IAS 16 'Property, plant and equipment', as modified by the transitional exemption to account for assets at deemed cost that were revalued previously under UK GAAP. Deemed cost is the cost or valuation of assets as at 1 April 2005. Consequently, property, plant and equipment is stated at cost or deemed cost, less accumulated depreciation. Cost includes directly attributable own labour. Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Group. The Group capitalises borrowing costs into the cost of property, plant and equipment, if the criteria under IAS 23 are met. Depreciation is provided to write off the cost of an asset on a straight-line basis over the expected useful economic life of the relevant asset

Expected useful lives are set out below:

	Years
Other land and buildings*	10-50
Airport infrastructure	
Runway base course	50
Steelwork, civils and earthworks	30-50
Main apron and taxiway assets	25-50
Utility lighting and pipework	5-20
Runway, taxiway and apron surfacing	5-15
Airfield lighting and equipment	5-15
Plant, fixtures and equipment	
Escalators, elevators and substations	15-30
Baggage systems, IT equipment and X-ray scanners	5-15
Fixtures, fittings, tools and equipment	5-10
Motor vehicles	3-10

<sup>\*</sup> No depreciation is charged on freezola iana

Useful economic lives are reviewed on an annual basis, to ensure the carrying amount remains relevant and appropriate. Depreciation is charged on a straight-line basis over the asset's useful economic life. No depreciation is provided on freehold land. Repairs and maintenance costs are written off as incurred. Assets under construction, which principally relate to airport infrastructure, are not depreciated until such time as they are available for use and any relevant regulatory approvals relating to their bringing into use have been obtained. If there are indications of impairment in the carrying value, then the recoverable amount is estimated and compared to the carrying amount in accordance with the requirements of IAS 36. Carrying amounts are also assessed for impairment as part of the carrying value of the assets at each cash generating unit 'CGU' by comparison with the value in use generated by the CGU from its net cashflows.

GOVERNANCE

When the use of a property changes from owner-occupied to investment property, the property is remeasured to fair value and reclassified accordingly.

#### INVESTMENT PROPERTIES

The Group accounts for investment properties in accordance with IAS 40. Investment Properties. An investment property is one held to either earn rental income or for capital growth. The Group has elected to use the fair value model, and therefore investment properties are initially recognised at cost and their revalued to fair value at the reporting date by an independent property valuer.

Investment properties are not depreciated. Gains or losses in the fair value of investment properties are recognised in the income statement for the period in which they arise. Gains or losses on the disposal of an investment property are recognised in the income statement on completion.

If an investment property becomes owner-occupied, it is reclassified as property, plant and equipment and its fair value at the date of reclassification becomes its cost for subsequent accounting purposes. If an investment property is partially owner-occupied and the non-owner-occupied component can be separately sold or leased out under a finance lease then the relevant proportions will be classified as investment property and property, plant and equipment. If the non-owner-occupied portion cannot be sold separately then the property will only continue to be classified as an investment property if the owner-occupied portion is immaterial

#### IMPAIRMENT

The carrying amounts of the Group's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. An impairment loss is recognised if the carrying amount of an asset, or cash-generating unit, exceeds its recoverable amount.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Management are satisfied that this methodology results in a materially similar value in use quantification as would have been arrived at if calculated under a pre-tax discount rate basis as required by IAS 38. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the 'cash-generating unit'). The goodwill acquired in a business combination, for the purpose of impairment testing, is allocated to cash-generating units, or 'CGU'.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined net of depreciation or amortisation, if no impairment loss had been recognised

#### LEASES

## Review of contracts for leases

At the inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to direct the use of an identified asset for a period of time, in exchange for consideration.

At the point of transition to IFRS 16 the Group opted to apply the practical expedient not to reassess whether contracts contain a lease

## Accounting policies continued

#### LEASES CONTINUES

#### **Initial measurement**

MAG initially recognise lease liabilities measured at the present value of lease payments, discounting by applying the Group's incremental borrowing rate wherever the interest rate implicit in the lease cannot be determined. Lease payments included in the measurement of the lease liability include

- · Fixed payments, including in-substance fixed payments
- Variable lease payments that depend on an index or rate, initially measured using the prevailing index or rate as at the adoption date
- Amounts expected to be payable under a residual value guarantee
- The exercise price under a purchase option that the Group is reasonably certain to exercise
- · Lease payments in an optional renewal period if the Group is reasonably certain to exercise an extension option, and
- Penalties for early termination of a lease, unless the Group is reasonably certain not to terminate early.

The right-of-use asset is measured at the amount of the lease liability, adjusted for any prepayments made, plus any direct costs incurred to dismontle and remove the underlying asset or restore the underlying asset on the site on which it is located, less any lease incentives received.

#### Subsequent measurement

The lease liability is subsequently measured at amortised cost, using the effective interest method, whilst the right-of-use asset is depreciated straight line over the remaining lease term as at the date of adoption.

The liability is remeasured when

- there is a change in future lease payments arising from a change in index or rate,
- there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee
- if the Group changes its assessment of whether it will exercise a purchase, extension or termination option or
- if there is a revised in-substance fixed lease payment

When such a remeasurement occurs, a corresponding adjustment is made to the carrying amount of the right-of-use asset, with any further adjustment required from remeasurement being recorded in the income statement

#### Low value and short lease exemption

MAG has elected to not recognise right-of-use assets and lease liabilities under feases of a duration of under one year; and low-value leases. The expense recognised in the income statement relating to such leases is below the £ 100,000 used for rounding in these financial statements, and therefore is not disclosed.

#### Covid-19 related rent concessions

MAG has elected to not apply the practical expedient to recognise Covid-19 related rent concessions as a variable lease payment, instead opting to account for these as a lease modification in the year. Refer to note 31 to the financial statements where this is discussed in further detail.

#### Lease as lessor

When the Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

To classify each lease, the Group makes an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease, if not, then it is an operating lease. As part of this assessment, the Group considers certain indicators such as whether the lease is for the major part of the economic life of the asset

When the Group is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short-term lease to which the Group applies the exemption described above, then it classifies the sub-lease as an operating lease. If an arrangement contains lease and non-lease components, then the Group applies IFRS 15 to allocate the consideration in the contract

The Group recognises lease payments received under operating leases as income on a straight-line basis over the lease term as part of property and property-related income

For finance leases, the Group accrues finance income over the lease term based on the interest rate implicit in the lease, with payments received reducing the lease receivable

#### INVENTORIES

Inventories are measured at the lower of cost and net realisable value with cost being purchase cost on a first in/first out basis.

#### **GRANTS**

Gronts received and receivable relating to property, plant and equipment are shown as a deferred credit in current and non-current liabilities on the statement of financial position. An annual transfer to the income statement is made on a straight-line basis over the expected useful life of the asset for which the grant was received.

Government grants related to income are recognised when there is reasonable assurance that the grant will be received, and all the grant conditions have been complied with. Grant income related to expense items are recognised on a systematic basis over the period matching the recognition of the expense in the financial statements. The Group has chosen to present grants related to an expense item as net deductions against the related expense.

#### FINANCIAL INSTRUMENTS

Financial instruments are classified at: initially at fair value, and then subsequently measured at amortised cost; fair Value through Profit or Loss (FVPL); or Fair Value through Other Comprehensive Income (FVOCI).

The Group's treatment of financial assets and liabilities:

- trade receivables are recognised initially at their transaction price with a loss allowance provided based upon the estimated credit loss. Subsequent
  measurement reflects any revisions to the estimated credit loss allowance with any gains or losses being recognised in the income statement; and
- all financial liabilities (corporate bonds, bank loans and overdrafts and trade and other payables) within the scope of IFRS 9 are initially measured
  at fair value and then subsequently measured at amortised cost. Any gains or losses arising are recognised in the income statement.

## Expected credit loss

The Group applies IFRS 9 to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables. To measure the expected credit losses, the Group has grouped trade receivables based on shared credit risk characteristics, including the customer's industry and the days past due. The Group's historical loss rates are considered alongside current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables and reasonable forecasts.

The Group's definition of default is based on the ageing of the debts and will also consider the financial status of the customer.

## FINANCE INCOME AND EXPENSES

Financing expenses include: interest payable, finance charges calculated under IAS 19 and finance charges on lease liabilities recognised in profit or loss using the effective interest method, and unwinding of the discount on provisions, and net foreign exchange losses that are recognised in the income statement (see foreign transactions policy). Borrowing costs that are directly attributable to the acquisition construction or production of an asset that takes a substantial time to be prepared for use are capitalised as part of the cost of that asset.

Financing income: comprise interest receivable on funds invested, dividend income, interest income on lease receivables and net foreign exchange gains that are recognised in the income statement (see foreign transactions policy). Interest income and interest poyable is recognised in profit or loss as it accrues, using the effective interest method. Dividend income is recognised in the income statement on the date the entity's right to receive payments is established. Foreign currency gains and losses are reported on a net basis.

## CONTINGENT ASSETS

Contingent assets are primarily insurance related, and mitigate losses caused by claims against the Company. Contingent assets are only recognised when they are virtually certain and are presented in other debtors, separate from the associated provision amount. However, they are presented net in the profit and loss account

## Accounting policies continued

#### ASSETS HELD FOR SALE AND DISCONTINUED OPERATIONS

The Group accounts for assets held for sale if their corrying amount will be recovered through a sale transaction rather than through continuing use and a sale is considered highly probable. They are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax and investment property that are carried at fair value.

Non-current assets (including those that are part of a disposal group) are not depreciated or amortised whilst they are classified as held for sale and equity-accounted investee is no longer equity accounted. The assets and liabilities of a disposal group classified as held for sale are presented separately from the other assets in the balance sheet.

A discontinued operation is a component of the Group that has been disposed of or is classified as held for sale and that represents a separate major line of business, is part of a single coordinated plan to disposal of such a line of business. When an operation is classified as a discontinued operation, the comparative statement is profit or loss and OCI is presented as if the operation had been discontinued from the start of the comparative year.

#### CASH AND CASH EQUIVALENTS

For the purposes of the statement of cash flows, cash and cash equivalents comprise cash in hand, bank deposits and short-term deposits, which have an original maturity of three months or less.

#### BORROWINGS

Borrowings are recognised initially at fair value, net of transaction costs. Borrowings are subsequently stated at amortised cost. Any difference between the amount initially recognised (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

Transaction costs are considered as incurred, for the unit of account to which they relate, on new borrowings or a re-financing. If the costs relate to the borrowing/ loan then they are recognised in accordance with IFRS 9 as part of the net effective interest rate. However, if they relate to the facility itself then it is regarded as an executory contract, and as such, outside the scope of IFRS 9, and are capitalised and amortised over the facility term.

#### **BORROWING COSTS**

The Group does not capitalise borrowing costs directly attributable to the acquisition, construction or production of qualifying assets into the cost of property, plant and equipment, unless the criteria under IAS 23 are met. Where the criteria is met, borrowing costs are calculated by applying an average interest rate in the period to the expenditure incurred on qualifying assets

All other borrowing costs are recognised in the income statement over the period of the borrowings using the effective interest method.

#### PROVISIONS

A provision is recognised in the statement of financial position when the Group has a legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects the current market assessments of the time value of money, and where appropriate, the risks specific to the liability.

Where the Group has entered a contract where the unavoidable attributable costs of fulfilling the contract exceed the economic benefit derived from it then the Group will book an onerous contract provision. The calculation of the provision will reflect the least cost approach of exiting the contract.

## TAXATION

The tax charge for the year comprises current and deferred tax.

The charge for taxation is based on the loss for the year and takes into account deferred tax due to temporary differences between the tax bases of assets and liabilities, and the accounting carrying value of assets and liabilities in the financial statements. The principal constituents of the deferred tax liability in the Group financial statements are temporary differences on property, plant and equipment, where the carrying value in the financial statements is in excess of the tax base due to accelerate acquital allowances, and the previous effects of revaluations under UK GAAP.

STRATEGIC REPORT

#### TAXATION CONTINUED

Deferred tax assets are recognised to the extent that it is regarded as probable that the temporary difference can be utilised against taxable profit in the future. Current tax and deferred tax relating to items recognised directly in equity, are also recognised directly in equity. Deferred tax is based on the tax laws and rates that have been substantively enacted at the statement of financial position date and which are expected to apply when the relevant deferred tax item is realised or settled. Current tax has been calculated at the rate of 19% applicable to accounting periods ending 31 March 2023 (2022: 19%). Deferred tax assets and liabilities reflect the 25% tax rate that will become effective from 1 April 2023. Deferred tax assets and liabilities are shown separately in the accounts.

#### **EMPLOYEE BENEFIT COSTS**

The Group still participates in three defined benefit schemes, following MAG's exit from the Greater Manchester Pension Fund (GMPF) as detailed in note 30 at page 158, which are contracted out of the state scheme, as well as one defined contribution scheme. The costs of the defined contribution scheme are charged to the income statement in the year in which they are incurred. Defined benefit schemes are accounted for as an asset or liability on the statement of financial position, with treatment detailed below. The amount reported in the income statement for employee benefit costs includes past service costs, current service costs, interest costs and return on assets income. Past service costs are charged to the income statement for the period to which they relate.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets.

Actuarial gains and losses are recognised in the statement of comprehensive income in the period in which they arise. The defined benefit asset or liability, together with the current and past service costs, are calculated at the reporting date by an independent actuary using the projected unit credit method.

Under IFRIC 14 'IAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction', surpluses on pension schemes are not recognised unless there is an unconditional right to recover or realise them at some point during the life of the plan. If no such unconditional right exists an asset ceiling is applied and no asset surplus is recognised in the occounts. An unconditional right would not exist when the availability of the refund or the reduction in future contribution would be contingent upon factors beyond the entity's control (for example, approval by third parties such as plan trustees). To the extent that a right is contingent no asset would be recognised.

In the event of a settlement of a defined benefit pension scheme, the profit or loss on settlement is calculated with reference to the net scheme assets/liabilities without the impact of the asset ceiling (i.e. the unrecognised surplus). This settlement profit or loss is recognised in the income statement. The resultant reduction in asset ceiling as a result of the settlement is recognised in the statement of comprehensive income.

## DIVIDENDS

A dividend to the Company's shareholders is recognised as a liability in the consolidated financial statements during the period in which the right to receive a payment is established via the declaration of a dividend approved by the Company's Board of Directors or, as the case may be, voting shareholders

## **ALTERNATIVE PERFORMANCE MEASURES (APMS)**

The Group uses APMs, which are not defined in IFRS, throughout the Annual Report and Accounts. The Group's APMs are defined internally, and therefore may not be comparable to similar APMs in other companies, but provide additional information useful to both management and the investor community to assess the Group's performance and liquidity. The key APMs used by the Board to assess the Group's performance are detailed below.

- Adjusted EBITDA<sup>1</sup>
- Results from operations;
- Adjusted net cash generated from operations,
- Net debt; and
- Net cash and cash equivalents
- Net senior Debt/adjusted frozen GAAP

Many of MAG's APMs are defined as 'adjusted' (such as adjusted EBITDA) signifying that they are calculated before transactions that are deemed to be adjusted items. The definition of MAG's accounting policies is also detailed below. Other Information on page 173 provides a definition of each of all APMs; the purpose for which it is used; and a reconciliation to the nearest IFRS equivalent.

<sup>1</sup> Adjusted Fartings before Interest. To Depreciation (including any importment) and amortisation

## Accounting policies continued

#### ADJUSTED ITEMS

Applied consistently over time, adjusted items (formerly Significant Items) are items of income and expense that, because of their size, unusual nature, or frequency of the events giving rise to them, merit separate presentation, as these are incremental and to allow an understanding of the Group's underlying financial performance from its trading activities. Such items include:

## Impairment of assets

Impairment charges related to non-current assets are non-cash items and tend to be significant in size. The presentation of these as other items further enhances the understanding of the ongoing performance of the Group. Impairments of property, intangible assets and other tangible fixed assets are included in adjusted items if related to a significant write off of paused or discontinued projects, a fundamental transformation project or if infrequent or significant in size. Other impairments are included in underlying results.

## Major reorganisation of businesses and costs associated with acquisitions

Restructuring costs are classified as adjusted items if they relate to a fundamental change in the organisational structure of the Group or a fundamental change in the operating model of a business within the Group. Costs may include redundancy, property closure costs and consultancy costs, which are significant in size and will not be incurred under the organisation of businesses will be classified as adjusted

#### Costs associated with the modification of financial instruments, close out of previous financing arrangements upon refinancina

Costs associated with the refinancing and changes to debt facility agreements during the current and prior year are included within adjusted items as they are significant in size, do not form part of the underlying trading activities.

#### Curtailment gain or loss

Curtailment gain or loss are recorded in adjusted items where they do not form part of the underlying trading activities of the Group or are infrequent in occurrence in order to enhance the understanding of the underlying financial performance of the Group. Such examples would include early termination of a lease and the curtailment gain due to the closure of the pension schemes and offsetting costs associated with this

#### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

In preparing these Consolidated Financial Statements the Group has made estimates and judgements and assumptions that impact the application of the Group accounting policies and the reported amount of assets, liabilities income and expenses. Actual results may, however, differ from the estimates calculated.

## A. Judgements

In applying the Group's accounting policies, the Group has made key judgements. Management believes that the assessment of going concern, the treatment of the Group's defined benefit pension schemes and the impact of recommencing the transformation programmes on the Group's fixed asset balances contain the more significant judgements impacting these financial statements.

#### i. Going concern

The impact of, the ability of the Group to refinance a £360m bond due to mature in April 2024; and the impact upon activity levels of current macroeconomic considerations (including the cost of fiving crisis and the Ukraine conflict) have been considered in the Basis of Preparation.

The directors have evaluated whether the actions already undertaken to secure a credit facility and the mitigating actions that the Group can undertake against any reductions in activity levels are sufficient to ensure that MAG will continue as a going concern for plausible future trading scenarios.

Based upon this assessment outlined at page 109 the directors have concluded to regard MAG as a going concern for the purpose of these financial statements.

As part of its IAS 19 assessment MAG has had to consider whether it has the right to the accounting surplus for the STAL and EMA defined benefit schemes and the timing of a surplus under the exit basis of the GMPF scheme which would permit the recognition of the accounting surplus on that scheme in determining the settlement loss.

#### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS CONTINUED

#### A. Judgements : or trived

The Group's exit from its deferred debt arrangement with GMPF on 2 September 2022 constituted a settlement of the defined benefit scheme. The exit only occurred once the scheme was no longer in deficit when calculated on a prudent 'exit basis'. Prior to settlement, the accounting basis of calculation, under IAS 19, demonstrated a surplus. However, the asset ceiling requirements of IFRIC 14 resulted in this surplus not being shown in the accounts as no right to refund existed.

Under the requirements of IAS 19, the settlement loss is calculated based upon the accounting surplus at the time of settlement, without accounting for the impact of the asset ceiling, and presented in the income statement. The compensating reduction in asset ceiling impact is shown as a credit to reserves.

For the surpluses on the Group's STAL and EMA defined benefit pension schemes, management has concluded that there exists a right to a refund of such a surplus and consequently, under IFRIC 14 there would be no asset ceiling impact and an accounting surplus can be presented in the financial statements.

#### iii. Impact of transformation recommencement on fixed asset balances

As part of the recovery from Covid-19, MAG has recommenced its transformation programmes at both Manchester and Stansted airports. MAG has considered how the revised programmes going forward impact upon the fixed asset balances held relating to impacted assets.

The key considerations have related to:

- the decision to moth-ball Terminal 1 at Manchester following the Board approval to proceed with MAN-TP phase 2 in December 2022 with the
  resultant accelerated depreciation and provision recognition relating to the closure of Terminal 1; and
- . the judgement on the likely route to be pursued for expanding the Terminal infrastructure at Stansted and the impact on design costs already incurred.

Both of these items are commented upon in more detail at the property, plant and equipment note at page 139.

#### B. Assumptions and estimation uncertainty

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised in the period in which the estimate is revised. The directors regard that the critical accounting estimates arise in the areas of: valuation of investment properties; valuation of the Group's net pension liability; modification of shareholder loans; and the impairment of the Group's non-financial assets. Information about assumptions and estimation uncertainty at the reporting date is detailed below:

#### i. Investment properties

Investment properties were valued at fair value at 31 March 2023 by JLL, for the Group's commercial property portfolio and Fisher German for the Group's residential portfolio. The valuations were prepared in accordance with IFRS and the appraisal and valuation manual issued by the Royal Institution of Chartered Surveyors. Valuations were carried out having regard to comparable market evidence of transaction prices for similar properties, land valuations and discounted cash flow methods. The value of the Group's Investment Properties has been included at the values advised by its professional advisers. Further details of the basis of estimation for the valuation of the Group's investment properties is detailed on note 15.

## ii. Pensions

Certain assumptions have been adopted for factors that determine the valuation of the Group's liability for pension obligations at year end future returns on pension scheme assets and charges to the income statement. The factors have been determined in consultation with the Group's independent actuary taking into account market and economic conditions. Changes in assumptions can vary from year to year as a result of changing conditions and other determinants which may cause increases or decreases in the valuation of the Group's liability for pension obligations. The objective of setting pension scheme assumptions for future years is to reflect the expected actual outcomes. The impact of the change in assumptions on the valuation of the net financial position for pension schemes is reflected in the statement of recognised gains and losses. Further details are available in note 30.

## Accounting policies continued

#### CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS CONTINUES.

### B. Assumptions and estimation uncertainty correct

#### iii. Modification of financial instruments

The carrying value of the Group's shareholder loan liabilities are calculated by management's estimate of the future cashflows (see financial instruments note 26). As a result of MAG's strategic finance response in to the pandemic, the payment of interest on the shareholder loans has been deferred until the Group is in compliance with its loan covenant requirements.

Consequently, management's estimate of the date that deferred interest will be repaid is an accounting estimate that will impact the quantification of the shareholder loan liability. Any revisions in the cashflow estimates will result in a modification gain or loss which is recognised in the income statement at the time that the revision takes place

The repayment of shareholder loan deferred interest has now commenced on 31 March 2023 and is estimated to conclude in March 2030.

#### iv. Impairment of non-financial assets

Estimates have been made in respect of the amounts of future operating cash flows to be generated by certain of the Group's cash-generating units (CGUs), in order to assess whether there has been any impairment of the amounts of the Group's assets included in the statement of financial position.

The directors have viewed that the current macroeconomic position has acted as an impairment trigger of its long-term assets and consequently have assessed the recoverable amounts of its CGUs. The assessment of recoverable amounts is based upon Value in Use projections of future operating cashflows of the businesses which are based upon a range of assumptions of the rate of economic growth and the resultant impact upon the Group's trading levels

The Group has considered future traffic levels projections issued by other industry participants in arriving at its own projections which were used for both the impairment review and the Group's going concern assessment. These projections considered the timing and rate of growth in the post-Covid-19 environment considering the current economic headwinds and the impact of climate change on longer-term growth.

For impairment purposes, long-term projections beyond the 5-year business plan time horizon were based upon long-term growth rates. Downside scenarios included low-growth assumptions in considering risks around recoverability of the assets carrying value and the reduction in terminal value growth rate/increase in discount rate that would be required in order to bring a CGU into impairment. Further details of these scenarios are detailed at note 16

## Notes to the financial statements

for the year ended 31 March 2023

### 1. REVENUE

An analysis of the Group's revenue is as follows:

2023 £m	2022 £m
355.9	1799
234.5	812
325.1	126 <i>7</i>
20.2	21.1
93.3	53.2
673.1	282 2
1,029.0	462.1
	£m 355.9 234.5 325.1 20.2 93.3 673.1

Revenue from all income streams is recognised in line with IFRS 15.

Standard payment terms for MAG's revenue streams are typically 28 days.

Other income includes utilities recovery £28 1 m {2022 £19.3 m}, refuelling £11 2m {2022: £6  $\pm$ 6 m} and retail travel services income £14.2m {2022 £4.3 m}

As at 31 March 2023 there was no revenue recognised relating to performance obligations that were unsatisfied as at the year end. Any revenue where performance obligations were not satisfied is held in deferred income.

The amount of accrued income at 31 March 2023 was £40.4m (2022: £26.1m) and the amount of deferred income at 31 March 2023 was £35.7m (2022: £28.2m). Both of these balances have increased significantly due to the return in passenger demand, and balances are expected to settle within the next 12 months.

Significant movements in accrued and deferred income are discussed in notes 20 and 28 respectively.

### 2. BUSINESS AND GFOGRAPHICAL SEGMENTS

For management purposes, the Group is organised into four main operating divisions: Manchester Airport, London Stansted Airport, East Midlands Airport and CAVU.

The reportable segments are consistent with how information is presented to the Group Chief Executive Officer (Chief Operating Decision Maker) to report its primary information for the purpose of assessment of performance and allocation of resources, with information primarily presented at a segmental operating profit level.

With the exception of CAVU, the primary business of all of these Operating Divisions is the operation and development of airport facilities in the UK. CAVU's US revenue is less than 10% of total Group revenue. Consequently, no geographical split of performance has been included.

Total (credit)/charge recorded in profit before tax from discontinued operations <sup>3</sup>	(5.8)	17
Total (charge)/credit before tax	141.1	10 0

- 1 Adjusted items recorded in operating profit. The Group has recognised an overall cost of £141.2m in adjusted items for the year ended 31 March 2023 (2022, rost of £171m). This is made up of the following
  - An expense of £119 / has been recognised following the extinguishment of the Group's deferred debt agreement (DDA) for the exit from the GMPF pens on scheme
- During the year management have undertaken a review of the lives of certain fixed and intangible assets in addition to the annual impairment reviews in line with IAS36 with review of artifield asset useful economic lives and US contract assets. This exercise has resulted in a total expense of £15 9m being recognised, £11 4m in relation to impairment of assets and £4.5m accelerated depreciation relating to the decision to motifibe. This are result of the announcement to launch MAN-TP Phase 2. All impairments depreciation and write offs are non-cash in nature.
- Expenditure on other operational transformation schemes of \$4.1m has been recognised in relation to initiatives to improve the pirport environment
- tegal fees that are in tine with nur occriming policy on adjusted items of £1.3m and foreign exchange differences of £0.2m have been recognised in the period

During the year ended 31 March 2022 management carried out an impairment review of the fixed assets and as a result on impairment of £9.2m was recognised, restricturing costs name that in the year of £2.2m across the Group was recognised and acquisition costs of £0.9m for the purchase of the three online aggregator and distriction businesses acquired in £721 Incl. ded in 31 March 2022 was a £10.4m curtailment gon one to the cause of GMPP. STAL and EMMA and a settlement of Bioblines in the GMPP offset by costs of £12.0m. Additional costs of £1.8m were recognised in relations to a locality contract, in the US which is no longer operated by the Group. Legal costs of £1.0m were recognised.

- <sup>2</sup> Adjusted trans from continuing operations finance costs A charge of £5.7m (2022, £8.8m income) relating to finance costs arose during the period due to the deferred of shareholder loan interest owed including the impact of the rise in UK interest rates on the deferred interest balance and the corresponding modification loss which has arisen in the repayment profile of the deferred balance (see note 7).
- 2. Adjusted items from a scontinued operations for the year ended 31. March 2023 is income of £5.8m. excluding tax. (2022) nosts of £1.7m) relating to a further update to the escribing investigation to the sale of non-core property.

All adjusted items are made in line with our accounting policy which can be found on page 123

FINANCIAL STATEMENTS

### 4. RESULT FROM CONTINUING OPERATIONS BEFORE ADJUSTED ITEMS

	2023 £m	2022 £m
Turnover	1,029.0	4621
Wages and salaries	(257.2)	(156.6)
Social security costs	(22.0)	(14.7)
Pension costs	(12.5)	(116)
Coronavirus Job Refention Scheme	<u> </u>	18.2
Employee benefit costs	(291.7)	(164.7)
Depreciation and amortisation	(242.2)	(238 8)
Profit on disposal of property, plant and equipment	-	0.3
Other operating charges'	(325.3)	(1899)
Airport and Ground Operations Support Scheme	<del>-</del>	17.8
Result from continuing operations before adjusted items	169.8	(113.2)
Result from operations before adjusted items – total business	169.8	(113.2)

<sup>1.</sup> Other operating charges includes maintenance, variable rent, rates, utility costs and other operating expenses

The increase in wages and solaries is directly linked to an increase in headcount as trading levels start to return to pre-Covid levels. During FY23 the Group has received  $\mathfrak{L}_{\mathrm{nil}}$  (2022:  $\mathfrak{L}_{\mathrm{nil}}$  18.2m) of government support from the Coronavirus Job Retention Scheme and utilised  $\mathfrak{L}_{\mathrm{nil}}$  (2022:  $\mathfrak{L}_{\mathrm{nil}}$  17.8m) from the Airport and Ground Operations Support Scheme.

## 5. EMPLOYEE INFORMATION

The average number of persons (including executive directors) employed by the Group during the year was

	2023 Number of FTEs	2022 Number of FTEs
By location	-	
Manchester Airport	2,716	2,148
London Stansted Airport	1,759	1,479
East Midlands Airport	601	516
CAVU	533	153
	5,609	4,296

Manchester Airport includes Head Office, Looking4Parking and SkyParkSecure as well as operational employees, based on where these employees are geographically located. Group employees are allocated proportionately across the three airports based on headcount. The calculation for the average number of employees for both 2023 and 2022 reflects full-time equivalent (FTEs) employees.

### 6. DIRECTORS' EMOLUMENTS

Further details of directors' emoluments and a description of the Group's remuneration policy are ser out on pages 68 to 71 in the Remuneration Report.

	2023 £m	2022 £m
Directors' emoluments		
Number of directors (not in £m)	9.0	9.0
Aggregate emoluments	6.0	4.1

Consistent with the treatment in prior years the amounts above include STIP payments during the year of  $\mathfrak L$  1.4m paid relating to prior periods and LTIP amounts accrued of  $\mathfrak L$  2.6m. The LTIP amount accrued in the financial statements driven by the Group's FY21 – FY24 LTIP scheme, which was introduced to closely align participants to key recovery metrics following Covid-19 over the period to FY24, and the introduction of the Group's FY23 – FY25 LTIP scheme.

	2023 £m	2022 £m
Key management compensation		
Number of key management (not in £m)	12.0	9.0
Aggregate emoluments	11.5	74

Key management for the Group are the Board of Directors and members of the Executive Committee who control and direct the Group's operational activities and resources. Consistent with the treatment in prior years the amounts above include STIP payments during the year of £0.9m paid relating to prior periods. The LTIP amounts included in the current year are amounts accrued in the financial statements driven by the Group's FY21 – FY24 LTIP scheme which was introduced to closely align participants to key recovery metrics following Covid-19 over the period to FY24 and the Group's FY23 – FY25 scheme, amounting to £1.8m

The key management compensation for the current year comprised: Short term employee benefits £7.2m (2022: £4.5m), Other long-term benefits £4.3m (2022: £2.5m).

	2023 £m	2022 £m
Highest paid director		
Aggregate emoluments	2.4	1.9

The \$2.4m (2022: \$1.9m) includes salary, benefits, STIP payment of \$0.2m during the year relating to a prior period, and an accrued LTIP under the Group's FY21 - FY24 LTIP scheme

STRATEGIC REPORT

FINANCIAL STATEMENTS

#### 7. FINANCE COSTS

	Note	2023 £m	2022 £m
Interest receivable on deposits		(5.6)	-
Interest income on long-term lease receivable		(1.4)	
Finance income		(7.0)	-
Interest payable on bank loans and overdrafts		10.9	7.6
Interest payable on bonds		56.8	56.8
Interest payable on other borrowings		115.0	103.2
Interest cost on defined benefit pension schemes	30	(0.5)	0.9
Interest expense on lease liabilities	31	23.8	22 1
Capitalisation of borrowing costs	13	(4.9)	(0.6)
Unwind of deferred consideration		-	0.1
Total finance costs		201.1	190.1
Adjusted items		5.7	(8 8)
Total finance costs after adjusted items		206.8	181.3

As part of MAG's strategic financial response to the Covid-19 pandemic, the Group agreed with its shareholders to a deferral of interest charges in relation to the shareholder loans. At the end of FY23, the Group recommenced the payment of shareholder loans interest on 31 March 2023, and, paid £47.6m of regular SHL interest payments as well as £2.5m of deferred interest payment.

Under IFRS 9, the change in estimated cashflows of shareholder loans, as a result of the deferral of interest payments, gave rise to a £5.3m modification loss in FY23. The modification loss was calculated by the change in amortised cost of the shareholder loans which discount the estimated cashflows at the effective interest rate of the loans (between 10% and 12%). As the interest accruing on the deferred interest payments is 3% over the bank deposit rate, and the Bank of England base rate has increased over the year, interest accrues at a higher rate than in the prior year and the corrying value of the liability has increased, giving rise to a modification loss.

In FY23, the directors have calculated a modification loss of £5.3m at the reporting date based upon the projected repayment profile of the shareholder loan interest in the FY24 business plan. This is not deemed a substantial modification and as such, the change in timing and amount is reflected in the increased carrying value of the loan in the period with the corresponding loss being recognised in the income statement. To remain consistent with the treatment in FY22 and in line with accounting policy, management have presented the modification loss within adjusted items (note 3). The directors are currently expecting the deferred interest to be repaid between 31 March 2024 and 31 March 2030. The key inputs into the calculation of the loss/ (aain) are:

- the timing of the payments of the loan the payments vary depending upon the period of time that shareholder loan interest is accrued and the period of time that the deferred shareholder loon interest is repaid. Shareholder toan interest can only be paid when, and to the extent that, the Group are in compliance with its financial covenants. Accordingly, the timing of the payments are ultimately dependent upon the trading performance of the Group as it recovered from the Covid-19 pandemic. For the purposes of the estimation the Group has used the business projections from its approved business plan which are consistent with those used for both going concern and impairment purposes.
- the effective rate of interest of the loan, and;
- the interest rate chargeable on deferred interest payments.

If the trading performance of the Group improved and the Board decided to pay the deferred interest payments six months earlier, then the modification lass would increase by £5.5m (2022: gain would decrease by £16.7m).

If the prevailing interest rate due on the deferred interest payments increased by 1%, then the modification loss would increase by £7.8m (2022: gain would decrease by £5 4m)

MAG capitalises borrowing costs in accordance with IAS 23. FY23 saw higher capitalisation of borrowing costs of £4.9m (2022: £0.6m) following the relaunch of the Group Transformation Programme at Manchester Airport.

An expense of £0.4m (2022: £nii) was charged to adjusted finance costs during the period due to reversal of capitalised interest on impaired capital projects. Including the £5.3m modification loss during the year (2022: £8.8m modification gain), the total adjusted finance costs in the year was a charge of £5.7m (2022: a credit of £8.8m)

# Notes to the financial statements continued for the year ended 31 March 2023

#### 10. DISCONTINUED OPERATIONS

The results of the discontinued operation, which have been included in the consolidated income statement, were as follows

Year ended 31 March 2023 £m	Year ended 31 March 2022 £m
5.8	(1.7)
(1.1)	-
4.7	(1.7)
4.7	(1 7)
	31 March 2023 £m 5.8 (1.1) 4.7

The Group commenced a sales process for its non-core property portfolio during the year ended 31 March 2021 with the sale completing on 7 August 2020. Non-core property represented a major line of business for the Group, consequently the trading performance of the portfolio has been classified as a discontinued operation since 1 April 2019. Adjusted items of £5.8m for the year ended 31 March 2023 relates to movements in the estimate relating to the post sale receivable. The receivable, net of discounting, is £10.1m (2022: £4.3m). In 2023 the balance is disclosed in other receivables, within current assets as all amounts fall due within 12 months (whereas in 2022 the balances were non-current and disclosed as. Other long term asset in the statement of financial position).

During the year, a tax charge of  $\mathfrak L$  1.1 m was attributable to discontinued operations.

#### 11. DIVIDENDS

No ordinary dividends were paid or proposed in either the current or prior year.

#### 12. EARNINGS PER SHARE

Earnings per share is calculated by dividing the earnings attributable to ordinary shareholders by the weighted average number of ordinary shares in issue during the year. The Group does not have any dilutive equity instruments in issue, therefore diluted earnings per share is the same as basic earnings per share

Carrying amount						
At 31 March 2022	113.8	614.0	1,8491	426.2	1378	3,1409
At 31 March 2021	1140	453.8	1,630 <i>7</i>	197.5	900.5	3,296 5

The carrying amount of land not depreciated as at 31 March 2023 is £215.1 m (2022; £215.6 m).

During the year the Group's carrying value of property plant and equipment increased by £0.9m as a result of foreign exchange rate changes upon translation of the Group's US operations into GBP. The impact of the foreign exchange adjustment is included within the additions and depreciation categories. In addition during the year certain investment properties became occupied by the Group, these properties were transferred into property, plant and equipment from investment properties (note 15) and certain property, plant and equipment assets were moved into right of use assets (note 14).

#### Capitalised barrowing costs

During the year ended 31 March 2023 borrowing costs of £4 9m were capitalised (2022, £0.6m) relating to borrowing costs incurred in FY23. Capitalised borrowing costs were calculated on a monthly basis by applying the rate of interest for the relevant month to expenditure incurred in that month. The average rate of interest applied in the year ending 31 March 2023 was 6.11% (2022-5.58%). Capitalised borrowing costs of £0.4m (3) March 2022, £nil) were reversed during the year, relating to capitalised interest on impaired capital projects.

Borrowing costs are capitalised on significant capital projects, such as the Manchester Transformation Programme and large-scale implementation of future security requirements

The value of borrowing costs capitalised during the year has increased substantially in comparison to prior year due to ramp-up of the next phase of the Manchester Transformation Programme, and increases in underlying interest rates.

The cumulative balance of interest capitalised at 31 March 2023 is £71.9m (2022, £674m), which includes additions of £4.9m and a write-off of £0.4m as included in adjusted items in note 3, At 31 March 2023, the net book value of the capitalised interest is £64.1m (2022, £63.1m).

#### 13. PROPERTY, PLANT AND EQUIPMENT CORTESTED

#### Specific impairment review

During the year ended 31 March 2023, management have carried out an impairment review of the fixed assets, including the useful economic lives of assets. A total charge of  $\mathfrak L$  14.5m has been recognised in the year within adjusted items:

- £10.0m within 'impairment', comprised of £2.4m of design costs capitalised in relation to the Stansted Transformation Programme, and £7.6m relating to write-down of airfield assets at Manchester Airport (£6.4m) and East Midlands Airport (£1.2m)
- £4.5m within 'charge for the period' comprised of accelerated depreciation following the decision to mothball T1 as a result of the announcement to launch MAN-TP phase 2

The decision to mothball T1 and consequently revise the useful economic lives (UEL) of these assets has resulted in a change of accounting estimate to bring the UEL in line with the expected closure of T1. The impact of this change of estimate in future periods is expected to be additional depreciation of £29.3m.

#### Assets in the course of construction

Assets in the course of construction is  $\pounds 254.0m$  at 31 March 2023 (2022,  $\pounds 137.8m$ ). The increase in the year is primarily due to the movement into the second phase of the Manchester Transformation Programme. Key capital projects held within this balance are: capital expenditure in relation to the next phase of the Manchester Transformation Programme ( $\pounds 103.5m$ ), projects relating to airfield expansion, refurbishment and associated planning costs ( $\pounds 48.4m$ ), implementation of future security regulations ( $\pounds 28.5m$ ), capital expenditure in relation to Stansted Transformation Programme ( $\pounds 21.6m$ ), enhancement of IT infrastructure ( $\pounds 16.5m$ ), buildings refurbishment and renewals ( $\pounds 8.3m$ ) and fit-out of lounges in the US operated by MAG ( $\pounds 3.5m$ ).

#### Assets pledged as security

The bonds and bank loans are secured by a fixed and floating charge over substantially all of the Group's property, plant and equipment.

## Restatement of 1 April 2021 cost and accumulated depreciation

A restatement has been made to cost and accumulated depreciation at 1 April 2021 to correct an error relating to fair value uplifts arising from the acquisitions of the Stansted and East Midlands airports. These fair value uplifts were incorrectly recorded as a debit to accumulated depreciation at the time of the acquisitions. The impact of this adjustment increases cost and accumulated depreciation by £471.3m. There is no impact on net assets, result for the year or cash flows.

<sup>1</sup> Modifications Relating to lounges leased and operated by MAG in the US - see note 31 for more detail

#### Key lease arrangements

Key lease arrangements are detailed in note 31.

## Income from subleasing right-of-use assets

During the year to 31 March 2023, the income generated from subleasing right-of-use assets was £1.0m (2022: £1.3m), generated solely from sublets of land and buildings

## Long-term lease receivable

As a result of the sale of the non-core partfolio on 7 August 2020, a rent review was triggered on an existing lease between MAG and Manchester City Council (MCC). The rent increased from £nil to £0.6m per annum from this date, and the lease is in place until 31 August 2288. Further details are disclosed in note 30.

The £0.6m per annum rental charge is passed on to the purchasers of the ron-core property portfolio under identical terms to the arrangement with MCC. This represents a sale of the right of use asset arising from the rent review. Therefore management have ceased to recognise the right of use asset and replaced it with a long-term lease receivable. The present value of amounts receivable as at 31 March 2023 is £11.2m (2022. £11.2m). The closing asset would be £9.5m if the discount rate were to increase by 1% and £13 7m if the discount rate decreased by 1%. The pass through of rental income is recognised as interest income on the long-term lease receivable.

<sup>🗄</sup> Disposais Disposal of lease asset due to lease termination at Manchester by landfold at break date

Impairment review. The corrying value of their girl of-use ascets for each cash generating unit (CGU) was assested by management as part of the year end impairment exercise. As part of this review, leased plant fixtures and equipment was identified to have no future value in use and therefore the remaining net book value of £1.4m was charged to adjusted items – operating casts.

<sup>4.</sup> Transfer from PPE. During the period certain assets were transferred from property plant and equipment into right of use assets (note 13)

#### 14. RIGHT-OF-USE ASSETS CONTINUED

### Notes to the financial statements continued

for the year ended 31 March 2023

#### 15. INVESTMENT PROPERTIES CONTINUED

#### Investment properties

The fair value of the Group's commercial and residential investment property at 31 March 2023 has been attived at an the basis of a valuation carried out at that date by JLL Ltd. The valuers are independent and have appropriate recognised professional qualifications, and recent experience in the tocations and categories of the locations being valued. The valuations, which conform to International Valuation Standards, were arrived at by reference to market evidence of transaction prices for similar properties, land valuations and analysis of demand within the vicinity of the relevant properties. During the year certain investment properties became occupied by the Group, these properties were transferred into property, plant and equipment (note 13), under IAS 40 a fair value method has been adopted to revalue investment properties that become occupied by the Group and are transferred to property, plant and equipment.

The fair value measurement for all of MAG's investment properties has been categorised as a Level 3 fair value based upon the inputs to the valuation technique used. The valuers have used the following bases of valuation:

#### **Commercial Property**

Valuation Technique	Significant Unobservable Inputs Investment property	fair value measurements
<ul> <li>Investment property – the investment property valuations as having been carried out using the comparative and investment methods. The valuation of the commercial property has been assessed using analysis of appropriate comparable investment and rental transactions, together with evidence of demand within the vicinity of the property and taking into account size, location, terms and other factors.</li> </ul>	Yields Finterprise rental values	The estimated fair value would increase if  • Yields were lower
	• Ullerprise remol voices	<ul> <li>Enterprise rental values were higher</li> </ul>
		Management have deemed enterprise rental values and yields to be key inputs into the investment property valuation. Sensitivity analysis
<ul> <li>Land under development – residual valuation approach estimates the Gross Development Value (GDV) of the proposed development (usually the market value using the investment method and making an appropriate deduction for development costs, finance and</li> </ul>		on trese inputs has determined the following.  • A 5% increase/decrease in enterprise rental value gives rise to an increase/decrease of £5.3m and £5.2m respectively, and
Other Development land – valuation was based upon the net price per acre in the current market.		<ul> <li>A 0 25% increase/decrease in yield gives</li> </ul>
		rise to a decrease/increase of £39m and £42m respectively.

#### **Residential Property**

Valuation Technique	Significant Unobservable Inputs	fair value measurements
Va'uation is completed on a comparable basis of similar properties in the vicinity.	Where comparable evidence is hard to obtain, adjusted information is used to reflect differences in location, size, aspect and condition.	The estimated fair value would increase if the property was.  • larger  • in a preferred location  • in a better condition

The rental income earned by the Group from its investment properly amounted to £6.5m (2022, £8.5m) of which £nd was attributable to discontinued operations (2022, £nd). Direct operating expenses arising on the investment property in the year amounted to £1.5m (2022, £1.9m) of relating to income generating investment property.

The Group disposed of two properties from the investment property portfolio in the year, the combined value of which was £0.7m.

Gains and losses on sale and valuation of investment properties reported in the consolidated income statement of £26.3m in the year {2022: £22.6m} includes £26.7m of valuation losses on investment property {2022; £22.4m}, £ril of valuation gains on assets held for sale {2022: £0.1m} and £0.4m of gains on sale of properties {2022: £0.1m}.

#### 16. INTANGIBLE ASSETS CONTINUED

#### Goodwill

Goodwill is allocated to cash generating units based on the benefits to the Group that arise from each business combination. For the purposes of impairment testing goodwill is allocated to the lowest cash generating unit at which management monitor goodwill. The lowest level of cash generating unit is considered to be: Manchester Airport, London Stansted Airport, East Midlands Airport, MAG US's legacy lounge and car parking business: Looking4parking.com; SkyParkSecure and each of the three US based online car-parking aggregator businesses.

Of the goodwill total of £210.1m that has been allocated to each of the Group's CGUs, £166.3m is attributable to the acquisition of London Stansted Airport, £4.5m is attributable to the acquisition of the UK distribution companies, with the remaining £39.3m attributable to goodwill from the acquisitions of airportparkingreservations.com LLC, ParkSleepFly.com and its subsidiary shuttlefinder.net. The goodwill relating to the acquisitions of the three US based entities is denominated in US dollars and as a consequence of the USD\*GBP exchange rate at the year end, the goodwill attributable to these entities in the year end accounts has increased from £36.9m to £39.3m

#### Other intangible assets

Other intangible assets with carrying value of £46.2m are attributable to Metrolink £30.5m, (discussed in more detail below), airspace redesign £5.1m, the acquisition of the UK distribution companies £2.0m and the remaining £8.6m relates to the operator and trade names acquired in FY21 from airportparking reservations.com LEC (APR), ParkSleepFly.com (PSF) and shuttlefinder.net (SF).

#### Software costs

 $\mathfrak{L}42.1$  m of capitalised computer software costs relate to operating systems throughout the airports  $\mathfrak{L}21.2$ m, ERP systems  $\mathfrak{L}13.3$ m and car parking booking systems  $\mathfrak{L}7.6$ m. During the year, assets with cost and accumulated amortisation of  $\mathfrak{L}2.7$ m were disposed of, relating to legacy ERP systems assets no langer in use.

#### Impairment

The principloi CCL using a time Circlinia importeer assessment (casine a in-

- Manchester Airport where the recoverable amount provided a £711.8m headroom over the assets carrying value of £1,8276m;
- London Stansted Airport where the recoverable amount provided £430.2m of headroom over the assets carrying value of £1,541.2m;
- East Midlands International Airport where the recoverable amount provided £154.9m of headroom over the assets carrying value of £194.7m.
- CAVU AMER, where each lounge and car park constitutes a CGU, the overall recoverable amount exceeded the carrying value of £ 18.8m by £ 19.7 m.
- MAG s UK Distribution Companies (where the CGU's are the Looking4Parking and SkyParkSecure businesses) where the recoverable amount for
  each business is £42 Om in excess of the asset carrying values (combined carrying value for both businesses (£10.5m)); and
- The online US based car parking aggregator companies constitute a separate CGU. The recoverable amount assessment is based upon
  the approved budget from April 2022 but management have also considered a downside scenario that excludes post-acquisition operating
  improvements and limited growth in the operator relationship base. The impairment assessment for each CGU consisted of:
  - Airportparkingreservations.com where the recoverable amount provided a £38.7m headroom over the asset carrying value of £17.7m (Downside scenarios analysed would not give rise to impairment):
  - Parksleepfly.com where the recoverable amount provided a £29.8m headroom over the asset carrying value of £16.1 m (Downside scenarios
    analysed would not give rise to impairment), and
  - Shuttlefinder.net where the recoverable amount provided a £0.6m headroom over the asset carrying value of £0.4m (Downside scenarios
    analysed would not give rise to impairment).

The impairment testing calculated the recoverable amount of the goodwill, intangible assers. PPE and right-of-use assert in each cash generating unit by comparing the carrying value to the calculated value-in-use. Key assumptions for these calculations are those regarding discount rates, terminal value growth rates, expected changes to passenger and revenue growth rates, EBITDA margin and the level of capital expenditure required to maintain the assets

The Group prepared cash flow forecasts derived from the most recent financial budgets approved by the Board in March 2023 covering five years. Climate change considerations have been accounted for when arriving at the underlying costs in forecast cashflows. Management have also considered a downside scenario with FY24 passenger levels at 88% of pre-Covid-19 levels, which is lower than the low end of industry expectations. The business plan estimates UK passenger levels in FY24 at 95% of pre-Covid-19 levels. No additional impairments arose as a result of considering this downside

#### 16. INTANGIBLE ASSETS COMPANIET

These projections and downside sensitivities for the timing and rate of passenger volume recoveries are in line with the projections used for going concern. For the purposes of the impairment assessment the business reflected the budget for the first five years and considered a terminal value for each CGU based upon a long-term growth reflecting estimated rates of inflation of 2%. The business has used a period of five years as recommended under IAS 36 but appreciates that an additional forecast period could be merited to reflect the business's return to normal trading levels post Covid-19 recovery. If an additional forecast period was applied in the impairment assessments this would give rise to an increase in the headroom to those quoted.

The discount rates used in the cash flow forecasts have been estimated based on pre-tax rates that reflect the market participant's assessment of the time value of money and the risks specific to the cash generating unit. In determining the discount rates, the Group has sought to arrive at a Weighted Average Cost of Capital (WACC) using the cupital asset pricing model for a market participant. The discount and long-term growth rates used in the forecast discounted cash flows were calculated as:

- UK Airport CGUs: Post-tax: 8.85% (2022: 7.36%), Long-term growth rate: 2.00% (2022: 2.00%),
   Looking4Parking and SkyParkSecure: Post-tax: 13.02% (2022: 12.22%), Long-term growth rate: 2.00% (2022: 2.00%),
- US legacy lounge & car parking business: Post-tax: 13.00% (2022: 13.00%), Long-term growth rate: N/A due to contracts having a finite life (2022: N/A); and
- US previously acquired online car parking aggregator businesses Post-tax: 13.00% (2022: 13.00%), Long-term growth rate. 2.00% (2022: 2.00%).

The discount rates applied still deliver a substantial headroom for each business segment, requiring a significant increase in the discount rate for the headroom to be removed. The discount rates required to remove the headrooms are os follows: - UK Airport CGU's: Manchester Airport (11 21%), Stansted Airport (10.6%), and East Midlands Airport (12 65%); Looking4Parking (60.86%); SkyParkSecure (38.21%)- and - US legacy lounge & corparking business: Airportparkingreservations.com (36.21%), and Parksleepfly.com (33.33%).

Discount and long-term growth rates are not considered materially sensitive.

#### Disposal of nil net book value assets no longer in use

During the year, a review of the intangible fixed asset records was carried out to identify fully depreciated assets no longer in use by MAG with material historical cost. Therefore, the fixed asset balances disclosed above better reflect assets still actively operated by MAG. The results of the review is a disposal of £ 12.7m of cost and £ 12.7m accumulated depreciation for assets no longer in use

#### 17. INVESTMENT IN ASSOCIATE

	2023 £m
Cost and carrying value	
At 1 April 2022	11.8
Investment in associate	0.1
Distributions from associate <sup>1</sup>	(4.9)
Group's share of associate's result	0.1
At 31 March 2023	7.1

Following completion of a major construction contract in the year the Airport City joint vertice was poid a completion payment of \$24.8m which was subsequently distributed to the joint vertice Patriers with MAG receiving \$4.9m, a 20% share of the proceeds

The investment in associate relates to the Group's 20% investment in Airport City. Included within the investment in associate balance is an amount of £0.6m (31 March 2022, £0.7m) relating to MAG's own costs incurred in the setting up of its share in Airport City. These costs are released to the consolidated income statement on a proportional basis on the sale of plots within the Airport City development.

Airport City, a partnership with three other partners to develop part of the land around Manchester Airport for hotels, offices and logistics and advanced manufacturing, was formally constituted on 8 October 2014.

#### 17. INVESTMENT IN ASSOCIATE CONCLEQUED.

Airport City's year end date is coterminous with the Group's year end, and the financial information detailed below is consistent with the Airport City financial statements prepared to the same date. Summarised financial information of the Group's investment in Airport City is as follows.

	2023 £m	2022 £m
Current assets	43.2	61.4
Current liabilities	(10.5)	(6 2)
Net assets	32.7	55 2
Group's share of associate's net assets	6.5	110
Revenue	25.1	36.1
Result for the period	1.2	20
Share of result for the period	0.2	0.4
Amortisation of set up costs	(0.1)	-
Group's share of associate's result for the period	0.1	0.4

As part of its investment in Airport City, the Group has agreed to pay an equity contribution up to a maximum of  $\mathfrak{L}$  12 Om if required, of which  $\mathfrak{L}$ 3.4m was drawn down at 31 March 2023 {2022:  $\mathfrak{L}$ 8.2m}

Airport City has no significant contingent liabilities to which the Group is exposed, and there are no restrictions that would prevent the transfer of funds to the Group (2022: none).

#### 18, ASSETS AND LIABILITIES HELD FOR SALE

	2023 £m	2022 £m
Assets held for sale		
Current assets		
Investment properties	<del>_</del>	21
Total	-	2.1
	2023 £m	2022 £m
Associated liabilities		
Associated liabilities Current liabilities		

No assets were held for sale at 31 March 2023 (2022: £0.5m).

#### 19. INVENTORIES

	2023 £m	2022 £m
Consumobles	4.1	4.0
	4.1	40

Amount of inventory charged to operating costs in the year amounted to £12 % m (2022: £2.0m).

FINANCIAL STATEMENTS

#### 20. TRADE AND OTHER RECEIVABLES

	2023 £m	2022 £m
Trade receivables	53.8	47 5
Other receivables	13.3	3.8
Corporation tax recoverable	5.3	_
Prepayments	9.9	89
Accrued income	40.4	26.1
	122.7	86.3

The overage credit period taken on sales is 19 days (2022: 38 days). Provisions for expected credit losses within trade receivables have been made, totalling £6.0m (2022: £5.8m). This includes reserves against specific debts estimated as irrecoverable, and an additional provision of £0.5m (2022: £0.5m).

The significant increase in accrued income versus 2022 is attributable to the significant increase in passenger volumes.

STRATEGIC REPORT

The directors consider that the carrying amount of trade and other receivables approximates to fair value. Trade receivables are non-interest bearing and are generally on 30 day terms. The level of past due debt over 90 days old based on due date:

	2023 £m	2022 £m
Debt due over 90 days	5.9	0.7
Total	5.9	0 <i>7</i>
Movement in the provision for impairment of trade receivables is as follows:		£m
Balance at 1 April 2022		5.8
Decrease in allowance for impaired receivables		(1.2)
Additional provision during the year		
, as a provider going to job		1.4

The creation and release of provisions for impaired receivables have been included in 'operating expenses' in the consolidated income statement Amounts charged to the provision account are generally written off when there is no expectation of recovery. The ageing of these receivables is as follows:

	2023 £m	2022 £m
Less than 60 days	1.7	06
60 to 90 days	0.3	0.3
Over 90 days	4.0	4.9
Total	6.0	58

The Group has limited exposure to foreign currency exchange risk with trade and other receivables including £16.6m held in US dollars by the MAG US business. All other receivables amounts are denominated in pounds sterling. There are no credit quality issues with receivables that are not past their due date. Additional disclosure on financial risk is included in note 26.

#### 21. CASH AND CASH EQUIVALENTS

	2023 £m	2022 £m
Cash at bank and in hand	172.8	488 6
	172.8	4886

The directors consider that the carrying value of cash and cash equivalents approximates to their fair value. Balances above exclude overdraft balances, and the Consolidated Statement of Cash Flows presents the movement in net cash, inclusive of overdrafts. Overdraft balances can be found in note 23 to the financial statements.

#### 22. BORROWINGS

FINANCIAL STATEMENTS

#### 22. BORROWINGS CONTINUED

The Group is party to a Common Terms Agreement (CTA) where bank and bond creditors benefit from the same suite of representations, warranties and covenants. The CTA was signed on 14 February 2014.

The CTA together with a Master Definitions Agreement covers, inter alia, The Amended and Restated Initial Authorised Credit Facility Agreement (ACF), The Amended and Restated Liquidity Facility Agreement (LF), and the Group's issue of publicly listed fixed rate secured bonds in February 2014 and April 2014 respectively

The Amended and Restated LF Agreement has total facilities of £90.0m and is sized to cover 12 months interest on secured debt. The LF Agreement is a 364-day revolving facility with a five year term on each annual renewal. The LF, along with the RCF, were refinanced in May 2022 with the revised maturity date of May 2027.

The Group issued a £450.0m publicly listed fixed rate secured bond on 14 February 2014 with a scheduled and legal maturity of 2034 1

The Group issued a £360.0m publicly listed fixed rate secured bond on 16 April 2014 with a scheduled and legal maturity of 2024. All proceeds from the issue of the bonds (net of certain issuance fees) were used to repay a large portion of the Secured Senior Term Facility.

The Group issued a £300.0m publicly listed fixed rate secured bond on 15 November 2017 with a scheduled and legal maturity of 2039. All proceeds from the issue of the bonds (net of certain issuance fees) were used to repay the Revolving Credit Facility.1

The Group issued a \$350.0m publicly listed fixed rate secured bond on 9 May 2019 with a scheduled and legal maturity of 31 March 2044. All proceeds from the issue of the bonds (net of certain issuance fees) were used to repay the Revolving Credit Facility.1

The Amended and Restated LF Agreement has total facilities of £90.0m and is sized to cover 12 months interest on secured debt. The LF Agreement is a 364-day revolving facility with a five year term on each annual renewal.

The Group's borrowings are all secured via a fixed and floating charge over substantially all of the assets of the Group.

STRATEGIC REPORT

#### 23. BANK LOANS AND OVERDRAFTS

	2023 £m	2022 £m
Bank loans and overdrafts	105.2	25.7
Bank loans and overdrafts – current	105.2	25.7
Secured Revolving Credit Facility		4840
Less, unamortised debt issue costs <sup>2</sup>	(3.7)	(0.8)
Bank loans and overdrafts – non-current	(3.7)	483.2
Bank loans and overdrafts – total	101.5	508.9

<sup>2</sup> Issue costs arising in relation to obtaining finance are amortised over the duration of the financing as part of the effective interest rate.

At 31 March 2023 the Group had £484.0m (2022: £nil) undrawn committed borrowing facilities in respect of which all conditions precedent had been met at that date. The undrawn committed borrowing facilities consist of a £500.0m Secured Revolving Credit Facility. less certain carve-outs in respect of ancillary facilities of £ 16.0m. The Group also had access to £ 10.0m of overdialt facilities.

Interest on the Secured Revolving Credit Facility is linked to SONIA plus a margin,

See note 26 for further information on financial liabilities, including maturity analysis.

All bonds are listed on the London Stock Exchange (LSE).

<sup>1</sup> lesue Costs arising in relation to obtaining finance are amortised over the duration of the financing as part of the effective interest icite

#### **24. BONDS**

	2023 £m	2022 £m
Repayable other than by instalments		
MAG bond 4.125% £360 0m due 2024	360.0	360.0
MAG bond 4.75% £450.0m due 2034	450.0	4500
MAG bond 2.875% £300.0m due 2039	300.0	3000
MAG bond 2.875% £350.0m due 2045	350.0	3500
Less: discount on issue	(9.3)	(9.8)
Less: unamortised debt issue costs	(10.9)	(12.2)
	1,439.8	1,4380

See note 26 for further information on financial liabilities, including maturity analysis.

#### 25. OTHER BORROWINGS

	2023	2022
	£m	£m
Repayable other than by instalments		
Shareholders' loan at an interest rate of 12% expiring on 9 February 2055	324.9	303 5
Shareholders' loan at an interestrate of 10% expiring on 30 September 2056	221.3	207.9
Shareholders' loan at an interest rate of 10% expiring on 30 September 2057	221.3	207.9
Shareholders loan at an interest rate of 10% expiring on 30 September 2058	364.9	343.1
Less unamortised debt issue costs	(0.4)	(0.4)
	1,132.0	1,062 0

The Shareholders' loans are unsecured. The table above includes the modification gain recognised in FY22 and modification loss recognised in FY23. The principal values of the loans equate to £901.9m (2022; £901.9m) with accrued interest of £277.4m as at 31 March 2023 (2022; £221.7m).

As part of MAG's strategic financial response to the Covid-19 pandemic, the Group agreed with its shareholders to a deferral of interest charges in relation to the shoreholder loans. Deferred interest incurs an interest rate of 3% over the bank deposit rate and the directors currently estimate that the deferred interest will be repaid between 31 March 2024 and 31 March 2030. Under IFRS 9, the change has resulted in a modification of the estimated cashflows, however this is not deemed a substantial modification. As such, the change in timing and amount of the estimated future cashflow has been adjusted in the period of charge, with the corresponding charge being recognised in the income statement. The modification loss of £5.3m (2022; gain of £8.8m) has been reflected in the interest payable on other borrowings.

#### **26. FINANCIAL INSTRUMENTS**

#### Risk management

The Group's activities expose it to a variety of financial risks. The Group's funding, liquidity and exposure to interest rate risks are managed by the Group's treasury function.

Treasury operations are conducted within a framework of policies, which are approved and subsequently monitored by the Board. These include guidelines on funding, interest rate risk management and counterparty risk management

#### Interest rate risk

The Group actively manages its exposure to interest rate risk through determining the optimum profile and mix of funding between fixed and floating rates that is most appropriate to the Group's cashflows, up to a maximum of 90% fixed.

#### 26 FINANCIAL INSTRUMENTS (COMPULED)

#### Liquidity risk

The principal sources of the Group's liquidity risk are the ability to refinance debt facilities as they fall due, ensuring cosh and cash equivalents are accessible as and when required and borrowing facilities are sufficient for the future needs of the Group. Although there can be no certainty that financing markets will remain open for issuance at all times, debt maturities are spread over a range of dates, thereby ensuring that the Group is not exposed to excessive refinancing risk in any one year. The Group's key guideline in managing liquidity risk is to limit the amount of borrowings maturing within 12 months to 35% of gross borrowings less cash and cash equivalents. All cash and cash equivalents are held on short-term deposit within term limits set by the Board. Moreover, debt facilities are maintained at a level that is sufficient to provide a reasonable surplus beyond the future needs of the Group.

At the year ended 31 March 2023, MAG had £2.845.9m (2022: £2.845.9m) of committed facilities (excluding the Initial LF Agreement) and a net debt position of £2,500.5m (2022: £2.520.3m), each including deferred interest on shareholder loans and related modification gains. MAG had financial headroom of £561.6m (2022: £472.9m) at the year end, a level comfortably in excess of the internal compliance target. Under existing facilities and based on the Board approved business plan MAG is forecast to have financial headroom in excess of the minimum Treasury Policy target of £100m throughout 2023-24.

#### Foreign exchange risk

The Group is not materially exposed to foreign exchange risk as all material transactions and financial instruments are in pounds sterling. As we look to grow operations in the USA in the future, where the income and expenditure do not naturally offset, we may consider the use of currency hedges to manage any exposure to foreign exchange.

#### Capital management

The Group's objectives when managing capital are to safeguard the Group's oblity to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure.

#### Credit risk

Credit risk arises from cash and cash equivalents, derivative financial instruments and trade receivables. The Group has no significant concentrations of credit risk. The Group's exposure to credit-related losses, in the event of non-performance by counterparties to financial instruments, is mitigated by limiting exposure to any one party or instrument and ensuring only counterparties within defined credit risk parameters are used

The Group maintains a prudent split of cash and cash equivalents across a range of market counterparties in order to mitigate counterparty credit risk. Board-approved investment policies provide counterparty investment limits, based on credit ratings. Investment activity is reviewed on a regular basis and no cash or cash equivalents are placed with counterparties with short-term credit ratings lower than the prescribed limits. The Group monitors the credit rating of market counterparties on a regular basis.

The Group's exposure to credit risk on trade receivables is mitigated by limiting exposure to any one counterparty. Risk reports and available aviation and financial information updates used by the Group provide valuable information in relation to any changes in the credit risk profile of its customers, or within the market, and allow the Group to take a flexible approach to the management of risk. Credit exposures in relation to ad hoc customers are mitigated, where necessary, using prepayments or the request of deposits

An analysis of trade receivables, including the value of those past their due dates and the provision for impairment, is included in note 20 Trade and Other Receivables.

#### Financial liabilities

#### (a) Interest rate profile of financial liabilities

The interest rate profile of the Group's financial liabilities as at 31 March 2023 was as follows:

	2023 £m	2022 £m
Fixed rate financial liabilities	2,571.8	2,500 0
Floating rate financial liabilities	101.5	508.9
	2,673.3	3,008.9

#### 26. FINANCIAL INSTRUMENTS CONCINUED

The Revolving Credit Facility bears an interest rate based on Sterling Overnight Index Average (SONIA) at the Group's discretion, between one week and six months, plus a credit margin. The overdrafts bear interest at Bank of England Base Rate plus a credit margin.

The Group has prepared an analysis on the impact of potential, likely changes in interest rates.

The result of an increase in interest rates of 1% per annum would be to increase/(decrease) income and equity for the year by the following amounts.

	2023 £m	2022 £m
Impact on income statement and equity	0.7	(0.2)
	0.7	(0.2)
b) Fixed rate and non-interest bearing financial liabilities	2023 £m	2022
———————————————————————————————————————		£m
Weighted average annual interest rate	6.36%	£m 6.36%

The weighted average period for non-interest bearing liabilities as at 31 March 2023 was one year (2022: one year).

#### (c) Maturity analysis of financial liabilities

The table below shows the gross undiscounted contractual cash outflows in relation to the Group's financial liabilities as at 31 March 2023 to the contract maturity date.

_	2023 £m	2022 £m
In one year or less, or on demand	155.1	634 1
In more than one year but not more than two years	505.3	150 1
In more than two years but not more than five years	610.9	9875
In more than five years	5,278.0	5,257.5
	6,549.3	70292

This maturity profile represents the fair value of all financial liabilities, as denoted in table (d) on the next page.

#### Undrawn committed borrowing facilities

As at 31 March 2023, the Group had an undrawn committed borrowing facility available amounting to £484.0m (2022; £nii).

	2023 Floating rate £m	2022 Floating rate £m
Expring in more than two years	484.0	
	484.0	

#### 26. FINANCIAL INSTRUMENTS (CONTINUED)

#### (d) Fair values versus carrying amounts of financial statements

The following table provides a comparison, by category, of the carrying amounts and the fair values of the Group's financial instruments as at 31 March 2023 and 2022. Fair value is defined as the amount at which a financial instrument could be exchanged in an arm's length transaction between informed and willing parties, other than in a forced or liquidation sale, and excludes accrued interest. Where available, market values have been used to determine fair values. Where market values are not available, fair values have been calculated by discounting expected cash flows at prevailing interest rates.

Financial liabilities:	Note	2023 Carrying amount £m	2023 Fair value £m	2022 Cerrying amount £m	2022 Fair value £m

Investment properties	15	155.1	155.1	188.9	188.9
Other long-term asset	20	10.1	10.1	4 3	4 3
		391.8	391.8	731 4	731.4
Net financial liabilities		(2,335.4)	(2,015.3)	(2.321.0)	(2,280.6)

#### Fair value hierarchy

Financial instruments carried at fair value are required to be measured by reference to the following levels.

- level 1 quoted prices in active markets for identical assets or liabilities;
- level 2 inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- level 3 inputs for the asset or liability that are not based on observable market data (unobservable inputs)

All financial instruments carried at fair value have been measured by a level 2 valuation method. Investment properties carried at fair value have been measured by a level 3 valuation method.

### Notes to the financial statements continued

for the year ended 31 March 2023

#### 26. FINANCIAL INSTRUMENTS COTOTINUED

#### Summary of methods and assumptions used for determining fair values

Bonds	The fair value of publicly listed bonds is based on market prices or, if not available, brokers' quotes. The carrying value is net of unamortised issue costs
Bank loans  The fair value of the bank loans approximates to the carrying value given their floating rate basi frequency. The carrying value is net of unamortised issue costs	
Other borrowings	The lair value of other barrowings is based on a discounted cash flow methodology that reflects movements in underlying market rates.
Cash at bank and in hand	The fair value of cash at bank and in hand approximates to the carrying value as all deposits have same day access.
Trade receivables and payables	The fair value of trade receivables and trade payables approximates to the carrying value given their short-lerm nature.
Investment properties	The fair values of investment properties are based on an income capitalisation methodology.

#### (e) Credit risk exposure

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

	2023 Carrying amount £m	2022 Carrying amount £m
Trade receivables	53.8	47.5
Cash at bank and in hand	172.8	4886
Credit exposure	226.6	536.1

Further analysis on the credit risk ageing and impairment of trade receivables can be found in note 20.

#### 27. TRADE AND OTHER PAYABLES

	2023 £m	2022 £m
Trade payables	53.9	35 7
Other taxation and social security	1.2	10 3
Other payables	4.6	20
Accruals	193.9	133 0
Contingerit consideration	-	78
Capital-based grants	0.8	06
	254.4	189.4

The directors consider that the carrying value of trade and other payables approximates to their fair value.

Contingent consideration in FY22 related to amounts payable to the vendors of the acquired businesses AirportParkingReservations. ParkSleepFly and ShuttleFinder. Under the share purchase agreements, all three acquisitions had contingent consideration due in April 2022. The contingent consideration payment of £7.8m was made on 20 April 2022, classified within 'Payment of contingent consideration on prior acquisitions' in the consolidated statement of cash flows, reducing the contingent consideration balance to £nil in FY23.

#### 28. DEFERRED INCOME

	2023 £m	2022 £m
Deferred income	35.7	28.2
Total	35.7	28.2

Deferred income primarily relates to cash receipts for car park bookings not yet consumed, and cash receipts on property income billed in advance.

The significunt increase in deferred income versus 2022 is attributable to a large increase in car park bookings, following a significant increase in passenger volumes.

#### 29. PROVISIONS

	Post sale commitments £m	Other provisions £m	Total £m
1 April 2022	2.1	16.8	18.9
Arising during the year	-	5.1	5.1
Utilised .	-	(1.9)	(1.9)
31 March 2023	2.1	20.0	22.1
Current		20.0	20.0
Non-cuttent	2.1	_	2.1
31 March 2023	2.1	20.0	22.1

#### Post sale commitments

As part of the Group's disposal of its non-core property portfolio in August 2020, the Group entered into commitments to third parties as a result of the sale, relating to post completion under the sale and purchase agreement. Management has estimated the cost of providing these services to be £2.1m Management anticipate that the satisfaction of the provision will be achieved within the next two to four years, as such the provision has been disclosed as being non-current. The estimated cashflows have been discounted based upon initial estimated cash outlay less future income stream discounted at 10%, based on the Group cost of capital.

#### Other provisions

The other provisions balance includes a provision in relation to insurance claims liabilities from incidents which have occurred at either Manchester Airport. Stansted Airport or East Midlands International Airport, and provisions relating to potential litigation across the Group including legal fees. Management anticipate that the satisfaction of the provision will be achieved within the next 12 months, as such the provision has been disclosed as being current. Management has estimated the cost of satisfying the provisions within this category to be £20.0m.

None of the provisions are materially sensitive

#### 30. RETIREMENT BENEFITS

The accounting position is calculated by the directors and supported by independent actuaries, PwC, who incorporate data taken from a number of sources in calculating the closing position at the year-end across the defined benefit schemes. The net surplus included in the financial statements under IAS 19 increased from £22.1 m at 31 March 2022 to £86.6 m at 31 March 2023.

Summary of changes in aggregate pension scheme deficit	£m_
Net surplus as at 31 March 2022	22.1
Administration expenses	(1.1)
Other financial incomes	0.5
Contributions	7.4
Curtailment gain	-
Settlement loss	(119.7)
Actuarial gain due to release of asset ceiling due to settlement	116.7
Other actuarial gain	33.3
Impact of change in asset ceiling	27.4
Net surplus as at 31 March 2023	86.6

#### Pension:

All of MAG's defined benefit pension schemes were closed to future accrual after a period of consultation in year ended 31 March 2022. The Stansted and East Midlands scheme surpluses increased from a combined £23.7m to £90.7m over the period. The surplus has increased over the period due to large actuarial gains recognised in the SOCI mainly due to the significant increase in the discount rate assumption partially offset by a small cost recognised in the income statement. Based on the Group's understanding of the scheme rules for the two schemes, it is the Group's view that MAG is provided a right to a refund of any surplus in the schemes and consequently the surplus has been recognised in the financial statements.

During FY22 MAG also entered into a Deferred Debt Arrangement (DDA) with the Greater Manchester Pension Fund ("GMPF") as part of the Group's exit from the scheme. This resulted in MAG continuing to fund its obligations in the GMPF without crystallising a significant exit debt at that time. The DDA provided that, should the GMPF develop a surplus on an exit basis' of calculation then the Group's obligations under the DDA would cease, other than the angoing financing of any unfunded liabilities.

At 31 March 2022 the GMPF was in an tAS 39 accounting surplus of £25.0m. This included an allowance to reflect committed cash contributions at 31 March 2022 of £1.6m. As this surplus did not comprise a surplus under the exit basis. MAG did not have a right to a refund. Consequently, an asset ceiling, as required by IFRIC 14 resulted in the accounting surplus not being recognised in the accounts. During the 12 months ended 31 March 2023, changes in market conditions resulted in an increase in discount rates such that by 2 September 2022, the GMPF were able to confirm that there was no longer a deficit in the GMPF in respect of MAG's obligations on the exit basis. At that point in time MAG's obligations to the GMPF ceased other than the ongoing commitment of unfunded liabilities of £3.9m.

Whilst overall the GMPF liability in the accounts has increased by £2 3m to £3 9m at 31 March 2023 (31 March 2022: £16m) IAS 19 requires that the loss on settlement in the income statement is calculated without the impact of the accounting basis asset ceiling with the asset ceiling movement itself being taken through reserves. Consequently, MAG has recognised a settlement loss of £119.7m in the income statement, reflecting the difference between the GMPF's assets and liabilities as at 2 September 2022. This has been classified as an adjusted item. The offsetting impact of removal of the asset ceiling has been recognised directly to reserves in accordance with IAS 19. This along with other actuatial adjustments for the GMPF amounts to a £16.4m credit.

The net surplus of £86 6m in the accounts reflects a net liability of £4.1m in the AVPS and GMPF and a net surplus of £90.7m in the EMIA and STAL schemes. The total of £86.6m shows the net position across the Group, however the net surplus in the EMIA and STAL schemes cannot be affset against the net liability of the AVPS and GMPF schemes, so these are presented separately in the financial statements.

#### Settlement - Deferred Debt Agreement on GMPF

On 2 September 2022, MAG was discharged from its obligations and liabilities to the GMPF in line with the Deferred Debt Agreement (\*DDA\*) signed on 22 March 2022. The impact of this has been recognised as a settlement. This has resulted in a net settlement loss of £119.7 m. This is offset by an OCI credit equal to the value of the surplus restriction as at 2 September 2022 (£120.6 m). The difference in the two numbers (£0.9 m) represents the value of the future deficit contributions that were expected at the point immediately prior to the settlement. MAG has retained an obligation to make payments in respect of the unfunded liabilities related to the GMPF.

GOVERNANCE

#### Defined contribution schemes

The Croup operates a defined contribution scheme for all qualifying employees. The assets of the scheme are held separately from those of the Group in funds under the control of trustees. Where there are employees who leave the scheme prior to vesting fully the contributions payable by the Group are reduced by the amount of forfeited contributions.

The total cost charged to the income statement of £12.5m {2022, £9.9m} represents contributions payable to the scheme by the Group at rates in the pension scheme's contribution schedule. As at 31 March 2023, there was £nil {2022; £nil} of contributions due in respect of the current reporting period that had not been paid over to the scheme

#### Defined benefit schemes

During the year, the Group operated four defined benefit pension schemes as follows:

- · The Greater Manchester Pension Fund (GMPF).
- . M.A.G (STAL) Pension Scheme (STAL).
- E.M.I.A. Pension Scheme (EMIA).
- Airport Ventures Pension Scheme (AVPS).

collectively the 'Schemes'

Under the Schemes, the employees are entitled to retirement benefits based on salary and length of service at the time of leaving the Schemes, payable on attainment of retirement age (or earlier withdrawal or death). No other post-retirement benefits are provided. All Schemes are closed to new entrants. AVPS was previously closed to future accrual of benefits, and the GMPF, STAL and EMIA were closed to future accrual of benefits during the year to 31 March 2022.

The Group operates the Schemes under the UK regulatory framework. Benefits are paid to members from trustee-administered funds, and the trustees of each scheme are responsible for ensuring that each respective scheme is sufficiently funded to meet current and future benefit payments. Scheme assets are held in trusts separate to the Group. If investment experience is worse than expected, the Group's obligations are increased.

The nature of the relationship between the Group and the trustees of each scheme is also governed by UK regulation. The trustees must agree a funding plan with the Group such that any funding shortfall is expected to be met by additional contributions and investment performance. In order to assess the level of contributions required, triennial valuations are carried out, with each scheme's obligations being measured using prudent assumptions (relative to those used to measure accounting liabilities).

The trustees' other duties include managing the investment of scheme assets, administration of scheme benefits and exercising of discretionary benefits. The Group works closely with the trustees to manage each scheme

Total regular employer's pension contributions for the Schemes across the Group during the year ended 31 March 2023 amounted to \$7.4m (2022, \$8.9m) and there were no one-off contributions during this period (2022, \$6.3m)

Total employees' pension contributions for the Schemes across the Group during the year ended 31 March 2023 amounted to \$ril (2022: \$0.6m) and there were no one-off contributions during this period (2022. \$nil).

Actuarial gains or losses are recognised immediately in the statement of comprehensive income, included within remeasurements.

#### 30. RETIREMENT BENEFITS CONTINUED

#### The Greater Manchester Pension Fund (GMPF)

During FY22 MAG also entered into a deferred debt arrangement (DDA) with the GMPF as part of the Group's exit from the GMPF. This resulted in MAG continuing to fund its obligations in the GMPF without crystallising a significant exit debt at that time. The DDA provided that should the Group's obligation to the GMPF develop a surplus on an 'exit basis' of calculation then the Group's obligations under the DDA would cease, other than the ongoing financing of any unfunded liabilities.

During the 12 months ended 31 March 2023, changes in market conditions resulted in an increase in discount rates such that by 2 September 2022 a small surplus existed when measured on an exit basis. At that point in time MAG's obligations to the GMPF ceased other than the ongoing commitment of unfunded liabilities of £3.9m.

#### M.A.G (STAL) Pension Scheme (STAL)

On 28 February 2013, the Group acquired the entire share copital of Stansted Airport Limited. A condition of the purchase was that a new defined benefit pension scheme was set up to provide comparable benefits to those employees who had previously participated in the BAA pension scheme prior to the acquisition. Current employees transferred their accrued benefits to STAL, but no liability for pensioners or deferred members was transferred. STAL was closed to future accrual during FY22.

The last full actuarial valuation of STAL was carried out by the Scheme Actuary on 30 September 2022. The aggregate market value of the assets was updated by a full valuation and at the date of that actuarial valuation was £ 197.9m (previous valuation £ 198.8m), which represented approximately 124% (previous valuation 89.3%) of the present value of the liabilities. STAL was valued using the projected unit method. There are no expected future contributions for the year-ending 31. March 2024

#### Other schemes

Full actuarial valuations were carried out on the other defined benefit schemes as follows:

- E.M.I.A. Pension Scheme (EMIA) 6 April 2020 and
- Airport Ventures Pension Scheme 1 August 2019

The aggregate market value of the assets in EMIA at the date of the actuarial valuation was £60 6m (previous valuation £59 8m), which represented approximately 67.0% (previous valuation 74.0%) of the present value of the liabilities. EMIA was valued using the projected unit method. The expected future contributions for the year-ended 31 March 2024 for EMIA is £3.0m.

The other schemes are not significant to the Group and details of their valuation are included in the relevant entity's financial statements.

The numerical disclosure provided below for the Schemes is based on the most recent actuarial valuations disclosed above, which have been updated by independent qualified actuaries to take account of the requirements of IAS 19.

#### 30. RETIREMENT BENEFITS CONTINUED

The key assumptions used are as follows:

	MAG	STAL)	EM	IA	AV	S GMP		MPF	
	2023	2022	2023	2022	2023	2022	2023	2022	
Discount rate	4.80%	2 60%	4.85%	2.60%	4.85%	2.65%	4.85%	2.65%	
Future salary increases	n/a*	n/a*	n/a**	n/a*	n/a	n/a	n/a**	n/a*	
RPI inflation	3.20%	3.30%	3.25%	3.45%	3.25%	3.50%	3.25%	3 50%	
CPI inflation	2.60%	2 60%	2.50%	2 75%	2.65%	295%	2.70%	3.00%	
Increases to pensions in payment									
RPI (max 5%)	3.10%	3.20%	3.15%	3.30%	n/a	n/a	n/a	n/a	
RPI (max 2 5%)	2.20%	2 20%	2.20%	2 25%	n/a	n/a	n/a	n/a	
CPI	n/a	n/a	n/a	n/a	n/a	n/a	2.70%	3.00%	
CPI (max 3%)	2.20%	2.20%	2.15%	2.25%	2.20%	2 35%	n/a	n/a	
RPI	3.20%	3.30%	n/a	n/a	3.25%	3.50%	n/a	n/a	
Life expectancy from 65									
Longevity at age 65 for current pensioners									
Males	21.6 years	21.6 years	22.2 years	220 years	22.2 years	220 years	20.4 years	20.1 years	
Females	23.7 years	23 6 years	24.0 years	23.7 years	24.6 years	24.3 years	23.3 years	23.1 years	
Longevity at age 45 for current members									
Males	23.0 years	22.6 years	23.6 years	23 O years	23.5 years	23.0 years	21.5 years	21.0 years	
Females	25.2 years	24.8 years	25.4 years	24.9 years	26.0 years	25 5 years	24.9 years	24.4 years	

The RPI inflation assumption is set by extrapolating the Bank of England implied inflation curve out to longer terms and using the same projected cashflows to derive a single equivalent RPI inflation assumption. CPI inflation is set by reference to RPI inflation as no CPI-linked bonds exist.

Management have continued to use the revised basis for the estimation of the inflation assumptions following the Government's announcement in 2020 to align RPI and CPI-H from February 2030.

#### Risk and risk management

Through its defined benefit pension schemes the Group is exposed to a number of risks, the most significant of which are detailed below.

Asset volatility	For the purpose of setting the contribution requirements, the calculation uses a discount rate set with reference to government bond yields, with allowance for additional return to be generated from the investment portfolio – whereas under IAS 19, the defined benefit obligation is calculated using a discount rate set with reference to corporate bond yields. Each of the Schemes' assets invested in a range of asset classes, including government bonds and indirect lending.
Changes in bond yields	A fall in bond yields increases the value placed on the liabilities for reporting purposes and for setting the Group's contribution requirements. However, in this scenario, the Schemes' investment in government bonds is expected to increase and therefore offset some of the increase in the value placed on the liabilities
Inflation risk	The majority of the Schemes' benefit obligations are linked to inflation and higher out-turn inflation will lead to a higher benefit obligation (although in most cases caps on the level of inflationary increases are in place to protect the plan against extreme inflation). The majority of the Schemes' assets do not provide a direct hedge against changes in inflation as they are either fixed-interest in nature e.g. corporate bonds and government bonds, or have an indirect link to inflation e.g. equities.
Life expectancy	The majority of the Schemes' obligations are to provide a pension for the life of the member, so increases in life expectancy will result in an increase in the Schemes' habilities. This is particularly significant where the longer duration and inflation-linked nature of the payments result in higher sensitivity to changes in life expectancy. The Schemes do not contain a hedge against increases in future life expectancy

<sup>\*</sup>Schemes closed to future accrual during FY22

### Notes to the financial statements continued

for the year ended 31 March 2023

#### 30. RETIREMENT BENEFITS CONTINUES.

#### Details of the net pension liability by scheme are as follows:

	Fair value of scheme assets £m	Present value of defined benefit obligation £m	(Deficit)/ Surplus in the scheme £m		Fair value of scheme assets £m	Present value of defined benefit obligation £m	(Deficit)/ Surplus in the scheme £m

#### NOTES

EMIA and STAL have a symples of \$90.7m which would be in the form of rerunds. The Group's assessment is that it has air got to a refund of symples under the IPPIC 14 requirements based on the rules of the restrictive schemes. Since these schemes have closed to accrual the surpluses con unity be recognised as a right to refund.

<sup>2</sup> AVPS has a deficit of £0.2m (2022, surplus of £0.5m). In prior years, a surplus has not been recognised in line with IFRIC 14, as any surplus cannot be recovered by reducing future score out on.

<sup>&</sup>lt;sup>4</sup> The figures as shown up to FY22 represent the proportion of GMPF that is attributable to the Group FY23 shows the value of the liabilities that are unlunded \$3.9m (2022-\$5.0m) as this has remained as an obtigation to MAG in respect of the GMPF to loving the conclusion of the DDA on 2 September 2022.

<sup>4</sup> The total of \$86 cm shows the net position across the Group Incorporate surplus in the MAG (STAL) and EMIA schemes cannot be offset against the deficit of the other schemes, so these air crecented securate's

 $<sup>^{5}</sup>$  . There have been no other adjustments made in line with IFRIC  $^{-4}$

STRATEGIC REPORT

Both EMIA and GMPF (FY22) contain Level 3 assets where valuation is not based upon observable market data. The valuations, which conform to International Valuation Standards, were arrived at by reference to market evidence of transaction prices for similar assets and discounted cash flow methods

The valuation techniques applied to the Level 3 assets within the Group's pension schemes are:

- GMPF pooled investment vehicles (FY22) as determined by relevant fund managers including market prices; quotations; discounted cashflows; comparable transaction pricing or industry multiples; or other pricing methodology;
- . GMPF investment properties (FY22)- estimates of open market value reflecting assumptions on: rental growth; void rates; and discount rates;
- EMIA Annuities (to discharge liability relating to specific scheme members) valued at the corresponding amount of the relevant scheme member's scheme obligation

<sup>\*</sup>MAG is chacking that to present these here as the settlement means that these in sciences to all FY23, would give evagatioated percentage values

FINANCIAL STATEMENTS

#### 30. RETIREMENT BENEFITS CONTRIBUTE

#### Sensitivity analysis

The sensitivities regarding the principal assumptions used to measure the scheme liabilities are set out below:

STRATEGIC REPORT

	MAG (STAL) 2023 £m	EMIA 2023 £m	AVP5 2023 £m	GMPF 2023 £m	Total 2023 £m
0.5% p.a increase in real discount rate	(11.1)	(3.4)	(0.2)	(0.2)	(14.9)
0.5% p.a decrease in real discount rate	12.5	4.4	0.2	0.2	17.3
0.5% p.a. increase in RPI inflation*	10.7	2.9	0.2	0.2	14.0
0.5% p.a. decrease in RPI inflation*	(10.0)	(3.1)	(0.2)	(0.2)	(13.5)
) yr increase in life expectancy	2.9	1.7	0.1	0.2	4.9
1 yr decrease in life expectancy	(2.9)	(1.7)	(0.1)	(0.2)	(4.9)

<sup>\*</sup> Including other inflation linked assumptions such as CPI inflation and pension increases. Please note that a 0.1% p.a. increase in RPI may have a lower impact due to rounding and the effect of the caps and floors on pension increases.

For the Schemes, for the mortality assumption for the future improvements to life expectancy, the actuaries have used the CMI 2021 projections model, a 1.25% p.a. long-term trend rate, an initial addition parameter of 0.25% and default smoothing, 2020 and 2021 weight parameters.

Mortality base tables have been set as follows: GMPF: Fund-specific Club Vita curves; STAL: 104%/110% of the SAPS Series 3 tables (males/females); EMIA: 96%/106% of the SAPS Series 3 tables (males/females); AVPS. 100% of the SAPS Series 3 tables (males/females)

#### 31. LEASE LIABILITIES

#### Maturity analysis of principal balances on lease liabilities:

Within Iwo to five years After five years	22.2 206.0	3.5 212.2	4.9	30.6 418.2
Within one year	6.5	0.8	2.1	9.4
	Land and buildings £m	Airport infrastructure £m	Plant, fixtures and equipment £m	Total £m

#### 31. LEASE LIABILITIES CONFINUES

#### Undiscounted maturity analysis of lease liabilities:

The table below shows the gross undiscounted contractual cash outflows in relation to the Group's lease liabilities at 31 March 2023 to the contract maturity date.

	Land and buildings £m	Airport infrastructure £m	Plant, fixtures and equipment £m	Total £m
In one year or less, or on demand	19.0	11.9	2.4	33.3
In more than one year, but not more than two years	18.3	11.9	2.1	32.3
In more than two years but not more than five years	49.9	35.6	3.2	88.7
In more than five years	731.0	636.6	-	1,367.6
Total	818.2	696.0	7.7	1,521.9

The expense relating to variable lease payments not included in the measurement of lease liabilities is £2.7m (2022, £0.7m). Expenses relating to both short-term leases and low-value leases is £nil (2022: £nil)

#### Key lease arrangements

#### Manchester City Council (held within land and buildings):

The Group has a commitment in respect of a land lease with Manchester City Council (MCC), a related party as described in note 36. Ground rent leases are a base fee of £2 8m, and this element of the lease contributed £52.2m to the closing lease liability in land and buildings.

Further minimum amounts are payable under the main lease agreement with MCC, one element variable based on turnover and one element based on rental value of a number of properties at Manchester Airport. The minimum amounts due on the turnover element are based on a percentage of the prior rent paid. Management have concluded that these minimum percentage payments qualify as an in-substance fixed lease payment, contributing \$52.0m to the closing lease liability. These payments are variable depending on an index or rate and contribute \$86.1m to the closing lease liability. The discount rate implicit in the lease is 5.29%.

In 2021 the sale of the non-core property portfolio represented a trigger event on additional supplementary lease to the main agreements. As at the year end this contributes £11.2m (2022 £11.2m) to the closing lease liability.

In total, all arrangements with MCC contributes £201 5m of the closing lease liability in land and buildings, and no element of the annual rent is excluded from the measurement of the lease liability.

#### UK Power Networks (held within airport infrastructure):

A significant portion of the airport infrastructure lease liability relates to an electricity distribution agreement with UK Power Networks. Included in the measurement of the lease liability are minimum amounts payable under the agreement, relating to a base fee of \$9.3m, and \$2.6m for capital investment in the network, contributing \$216.5m to the closing lease liability. Remaining amounts of \$0.6m are due relating to a volume and recharge element. These are variable in nature with no minimum commitment, and therefore excluded in measurement of the lease liability.

#### Aberdeen Standard (held within land and buildings):

The Group has a commitment in relation to a lease of office property at Manchester Airport with Aberdeen Standard. Included in the measurement of the lease liability is fixed rent due under the lease, currently £1,1 m and reviewed five-yearly to reflect prevailing market rates. The obligations under this lease have contributed £14.3 m to the closing lease kability

#### MAG US Lounges (held within land and buildings):

During the year, the Group was eligible for rent relief on a number of lounges leased and operated by MAG in the US-under the American Rescue Plan. Act. The impact of these changes was accounted for as a lease modification in the year and the lease liability was decreased by £0.1 m as a result of the change. We have not applied the practical expedient in FY22 and FY23.

#### 32. DEFERRED TAXATION

The following are the major deferred tax liabilities and assets recognised by the Group and movements in relation to them during the current and prior years

	Accelerated capital allowances £m	Investment properties	Retirement benefit obligations £m	Tax losses £m	Fair value acquisition adjustment £m	Short term timing differences £m	Total £m
At 1 April 2022	168.3	47.1	5.3	(35.5)	40.7	12.4	238.3
Charge/(credit) to income	(40.0)	(6.8)	(30.1)	28.9	(4.1)	1.7	(50.4)
Charge to equity	-	-	46.5	-	0.3	-	46.8
Reclassification from liabilities associated with assets held for sale	-	0.5	_	-	-	-	0.5
Other reclassifications	2.2	(2.2)	-	-	-		-
At 31 March 2023	130.5	38.6	21.7	(6.6)	36.9	14.1	235.2
At I April 2021	132.8	32.0	(10.6)	(8.7)	35.8	9.3	190.6
Charge/(credit) to income	35.5	15.1	_	(26.8)	4.8	3.1	31.7
Charge to equity	-	-	15.9	-	0.1	-	16.0
At 31 March 2022	168.3	47.1	5.3	(35.5)	40.7	12.4	238.3

Deferred lax assets and liabilities have been offset in the disclosure above. The following is the analysis of the deferred tax balance for financial reporting purposes:

	2023 £m	2022 £m
Deferred tax liabilities	(246.7)	(273 8)
Deferred tax assets	11.5	35.5
	(235.2)	(238 3)

#### 33. OTHER NON-CURRENT LIABILITIES

	2023 £m	2022 £m
Accruals and deferred income	3.4	39
Capital-based grants	16.9	:64
	20.3	20.3

Capital based grants relate to funding provided towards airport infrastructure and airspace research at Manchester and Stansted Airports. Amortisation of these grants begins when the underlying asset they relate to is brought into use, with the amortisation period aligning to the useful life of the asset. At 31 March 2023, the remaining amortisation period for the amortising capital based grants, as a weighted average, is approximately 25 years.

The foreign currency reserve reflects exchange rate differences arising when covering the Group US operations results into the reporting presentation currency using the average rate to translate the income statement and the spot rate to translate the statement of financial position

Total reserves attractable to equity no detail of the Group

FINANCIAL STATEMENTS

#### 36. CAPITAL COMMITMENTS AND CONTINGENT LIABILITIES

	2023 £m	2022 £m
Capital expenditure that has been contracted for but has not been provided for in the financial statements	129.3	21.8

The Group has performance bonds and other items arising in the normal course of business amounting to \$3.0m at 31 March 2023 (2022; \$2.9m). As part of its investment in Airport City the Group has agreed to pay a further equity contribution up to a maximum of \$12m if required.

Additionally, as part of the Group's net zero 2038 commitment, the Group has committed to provide £10m of funding for a sustainable transport fund.

#### 37. RELATED PARTY TRANSACTIONS

The ultimate parent entity is Manchester Airports Holdings Limited, a company registered in England and Wales. The ultimate controlling entity is Manchester Airports Holdings Limited

#### Transactions involving The Council of the City of Manchester and the other council shareholders

The Council of the City of Manchester ('MCC') is a related party to Manchester Airports Holdings Limited as MCC owns 35.5% of the share capital of the Company.

As at 31 March 2023 the amount of loans outstanding owed to MCC by the Group was £313 9m (2022: £313 9m). Manchester Airport Finance Holdings Limited made loan repayments of £nil (2022: £nil) to MCC during the year and poid interest of £17.4m (2022: £nil).

As at 31 March 2023 the amount of loans outstanding owed to the other nine councils (each of which is a related party to Manchester Airports Holdings Limited by virtue of its shareholding) by the Group was £2679m (2022, £267.9m) Manchester Airport Finance Holdings Limited made loan repayments of £nil (2022; £nil) to the other nine councils during the year and paid interest of £14.9m (2022, £nil).

Interest during the year has been accrued on the shareholder loans to the value of  $\mathfrak L$  19 3m (2022:  $\mathfrak L$ 34.6m) for MCC and  $\mathfrak L$  16 7m (2022:  $\mathfrak L$ 29.7m) for the other nine councils. The cumulative interest accrual on the shareholder loans is  $\mathfrak L$ 96 1m as at 31 March 2023 (2022:  $\mathfrak L$ 76.8m) for MCC and  $\mathfrak L$ 82.9m (2022:  $\mathfrak L$ 66.2m) for the other nine councils.

Included in external charges are charges for rent and rates amounting to £37.3m (2022; £36.5m) and other sundry charges of £0.1m (2022; £1.0m). The year-end balance for these values is £0.3m (2022; £0.4m). The majority of these amounts are due to MCC. The remainder are collected by MCC and distributed to other local authorities.

#### Transactions involving IFM

Industry Funds Management (IFM), through its subsidiary is a related party to Manchester Airports Holdings Limited as IFM owns 35.5% of the share capital of the Company During the year, the Group was party to the following transactions with IFM.

As at 31 March 2023 the amount of loans outstanding owed to IFM by the Group was  $£320.1 \,\mathrm{m}$  (2022:  $£320.1 \,\mathrm{m}$ ). Manchester Airport Finance Holdings Limited made loan repayments of £nel (2022: £nil) to IFM during the year and paid interest of £17.8 m (2022: £nil).

Interest during the year has been accrued on the shareholder loans to the value of £ 19.7m (2022 £35.4m). The cumulative interest accrual on the loan as at 31 March 2023 is £98.4m (2022 £78.7m).

#### Transactions involving associate (airport city limited partnership)

As at 31 March 2023 the amounts owing were £nil (2022: £nil) and amounts owed were £nil (2022: £nil).

During the year, transactions amounting to £6.7m (2022: £1 3m) were mode with MAG's associate. As part of its investment in Airport City, the Group has agreed to pay an equity contribution up to a maximum of £12 0m if required, of which £3.4m was drawn down at 31 March 2023 (2022: £8.2m).

#### Transactions involving other parties

As at 31 March 2023 the amounts owing to Mott MacDonald were £nil (2022: £0 4m), amounts owed were £nil (2022: £nil) and transactions during the year amounted to £4.5m (2022: £0.2m).

172

### 37. RELATED PARTIES TRANSACTIONS CORE NUMBER

As at 31 March 2023 the amounts owing to Manchester Central Convention Complex Ltd were £nil (2022: £nil), amounts owed by were £nil (2022: £nil) and transactions during the year amounted to £10m (2022: £nil).

#### 39. POST BALANCE SHEET EVENTS

On 12 May 2023 MAG secured a bridge to bond facility that provides the Group with assurance that it will be able to refinance its bond for £360.0m by providing the facility to drawdown £360.0m up to 12 May 2024 with options to extend to 12 May 2025.

On 31 May 2023, MAG acquired 100% of the share capital of ParkCloud Holdings Limited, trading as ParkVia, a Manchester based ecommerce airport parking aggregator in the UK and EU market. Initial cash consideration of £8.4m was paid, subject to finalisation of the completion accounts, with further contingent consideration payable depending on financial performance in the first year following acquisition. As the completion accounts are yet to be finalised, no information has been disclosed at this time on the fair value of assets and liabilities acquired, and goodwill arising.

OVERVIEW STRATEGIC REPORT GOVERNANCE

#### OTHER INFORMATION

#### Overview

The Annual Report contains certain alternative performance measures ('APMs') that are not required under International Financial Reporting Standards (IFRS) which represents the GAAP under which MAG presents its Group Financial Statements. The Group believes that these APMs, which are not considered to be a substitute for or superior to IFRS measures, provide stakeholders with additional helpful information and enable an alternative comparison of performance over time. APMs may not be considered comparable to other similarly titled measures used by other companies

These APMs are primarily used to:

- · Provide management with a basis of planning and assessing Group performance,
- Set levels of management performance based remuneration,
- Calculate covenant compliance; and
- Explain Group performance with MAG's investor base.

#### Adjusted items

Many of the Group's APMs are measures prior to the impact of adjusted items.

Applied consistently over time, adjusted items are items of income and expense that, because of their size, unusual nature, or frequency of the events giving rise to them, merit separate presentation, as these are incremental and to allow an understanding of the Group's underlying financial performance from its trading activities. Such items include.

#### Impairment of assets

Impairment charges related to non-current assets are non-cash items and tend to be significant in size. The presentation of these as adjusted items further enhances the understanding of the ongoing performance of the Group. Impairments of property, intangible assets and other tangible fixed assets are included in adjusted items if related to a fundamental transformation project or if significant in size. Other impairments are included in underlying results.

#### Major reorganisation of businesses and costs associated with acquisitions

Restructuring costs are classified as adjusted items if they relate to a fundamental change in the organisational structure of the Group or a fundamental change in the operating model of a business within the Group. Costs may include redundancy, property closure costs and consultancy costs, which are significant in size and will not be incurred under the ongoing structure or operating model of the Group. All costs related to the acquisition of businesses will be classified as adjusted.

### Costs associated with the modification of financial instruments, close out of previous financing arrangements upon refinancing

Costs associated with the refinancing and changes to debt facility agreements during the current and prior year are included within adjusted items as they are significant in size, do not form part of the underlying trading activities.

#### Other specific items

Other specific items are recorded in adjusted items where they do not form part of the underlying trading activities of the Group in order to enhance the understanding of the financial performance of the Group

#### OTHER INFORMATION COOL NIPED

### Table of definitions for Alternative Performance Measures (APMs) used by MAG

An explanation of the relevance of each APM, and their limitations, is presented in the table below.

АРМ	Closest Equivalent Statutory Measure	Purpose	Definition
Income statement mea Adjusted EBITDA	SUITOS Operating profit	The Group's adjusted EBITDA measure is consistent with the way that Executive Management and the	Earnings before interest, tax, depreciation and amortisation prior to the impact of adjusted items.
		Board assess the Group's financial performance.  Additionally, it is a key metric used by the investor community to assess performance of the Group's	Reconciled to GAAP from operating profit measured in accordance with IFRS excluding:  Depreciation and amortisation (note 4), and;  The impact of adjusted items (note 3).
Adjusted EBITDA on a frozen GAAP basis	Result from operations	operations.  Adjusted EBITDA on a frozen GAAP basis is a core component of the Group's leverage and interest cover banking covenants.	Earnings before interest, tox, depreciation, amortisation and impairment prior to the impact of adjusted items and the adoption of IFRS 16
			Reconciled to GAAP from Result from operations measured in accordance with IFRS excluding:  Depreciation and amortisation (note 4):  The impact of adjusted items (note 3), and
			<ul> <li>Add back lease charges excluded from operating expenses as a result of the adoption of IFRS 16 (note 39).</li> </ul>
Adjusted Operating profit	Operating profit	Adjusted result from operations is a measure of the GAAP metric whilst adjusting for adjusted items.	Operating profit measured in accordance with IFRS excluding the impact of adjusted items (note 3).
Cashflow measures			
Adjusted cash generated from operations	Net cash from operating activities	This is a measure of the Group's cash generation from operation and working capital efficiency after adjusting for the impact of adjusted items.	Net cash from operating activities before the cash impact of adjusted items.
Other measures			
Net Debt	Borrowings	Net debt is a prominent metric used by credit rating agencies and investors to assess the strength of a company's balance sheet.	Borrowings less cash and cash equivalents. The measure excludes financial lease liabilitie calculated under IFRS 16
			Where the Annual Report references 'Net Debt (including IFRS 16)' this aggregates the Net Debt amount and the carrying value of lease liabilities

STRATEGIC REPORT

#### OFFICE INFORMATION COME NAMED

АРМ	Closest Equivalent Statutory Measure	Purpose	Definition
Other measures contin	nued		
Net Finance Charges on Net Senior Debt	Finance costs	Net finance charges on net senior debt is a core component of the Group's interest cover covenant.	Net finance costs from the Group's bonds and RCF less any finance income from cash and cash equivalents.
			Reconciled to GAAP measure Finance costs by excluding: interest on shareholder loans; pension interest; IFRS 16 interest (see note 30)
Net Senior Debt	Borrowings	Net Senior Debt is used in the calculation of the Group's leverage covenant.	Comprising the Group's Secured funding arrangements (Bonds and drawn down RCF) less cash and cash equivalents.
			Reconciled to GAAP measure Borrowings (by excluding the carrying value of shareholder loans) less cash and cash equivalents.

The following analysis provides a reconciliation of each APM to their nearest equivalent statutory measure.

# Company Financial Statements Accounting policies

Manchester Airports Holdings Limited (the 'Company') is a company limited by shores and incorporated and domiciled in England and Wales in the UK. The address of the registered office is Olympic House, Manchester Airport, Manchester, M90 1QX.

These financial statements present information about the Company as an individual undertaking and not about its Group.

These financial statements were prepared in accordance with Financial Reporting Standard 102. The Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102') as issued in August 2014. The amendments to FRS 102 issued in 2018 and effective immediately have been applied. The presentation currency of these financial statements is sterling. All amounts in the financial statements have been rounded to the nearest £million.

In these financial statements, the Company is considered to be a qualifying entity for the purposes of FRS 102, and has applied the exemptions available under this FRS in respect of the following disclosures:

- Total adjusted items recorded in result from operations
- · statement of cash flows and related notes;
- · key management personnel compensation,

Total adjusted items recorded in result are from continuing operations.

Furthermore, as the consolidated financial statements of Manchester Airports Holdings Limited include the equivalent disclosures, the Company has also taken the exemptions under FRS 102 available in respect of the following disclosures:

• The disclosures required by FRS 102.11 Basic Financial Instruments and FRS 102.12 Other Financial Instrument Issues in respect of financial instruments not falling within the fair value accounting rules of Paragraph 36(4) of Schedule 1.

The accounting policies set out, unless otherwise stated, have been applied consistently to all periods presented in these financial statements.

#### MEASUREMENT CONVENTION

The financial statements are prepared on the historical cost basis.

## FUNCTIONAL CURRENCY

The Company's functional and presentation currency is the pound sterling.

#### INVESTMENTS IN SUBSIDIARIES

These are separate financial statements of the Company. Investments in subsidiaries are carried at cost less impairment.

#### AMOUNTS OWED TO SUBSIDIARY UNDERTAKINGS

Intercompany balances are stated at historic cost.

#### CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise cash in hand-bank deposits and short-term deposits net of bank overdrafts, which have an original maturity of three months or less

#### INTEREST PAYABLE

Interest payable is recognised in the income statement as it accrues, using the effective interest method.

## Notes to the financial statements

for the year ended 31 March 2023

#### 1 NOTES TO THE INCOME STATEMENT

Amounts receivable by the Company's auditor and the auditor's associates in respect of services to the Company and the Company's subsidiaries, have not been disclosed as the information has been disclosed on a consolidated basis as noted on page 138. The Directors of Manchester Airports Holding Limited during the year and their aggregate remuneration is disclosed on a consolidated basis in note 6 to the consolidated financial statements, on page 136. The highest paid director disclosed within this note is the highest paid director of the Company.

#### 2. PROFIT ON ORDINARY ACTIVITIES AFTER TAXATION OF THE COMPANY

As permitted by Section 408 of the Companies Act, the Company is exempt from the requirement to present its own profit and loss account. As shown in the statement of changes in equity, the result attributable to the Company is a loss of £5.9m (2022: £2.4m) which is mainly due to interest payable {Note 3}, offset with a tax credit of £3.6m.

The average number of employees employed by the Company in the year was £nil (2022: £nil).

#### 3. FINANCE COSTS

	2023 £m	2022 £m
Intercompany interest payable	9.5	3.2
Total finance costs	9.5	3.2

Interest payable on intercompany loans was £9.5m (2022: £3.2m), with the increase from the prior year being as a result of an increase in the base rate.

#### 4. INVESTMENTS

	Subsidiary undertakings £m
Cost and net book value	
At 1 April 2022	2,352.7
At 31 March 2023	2,352.7

#### 5. TRADE AND OTHER RECEIVABLES

	2023 £m	2022 £m
Amounts due from subsidiaries – non-current	495.5	245.6
Amounts due from subsidiaries - current	-	247.0
	495.5	492 6

Settlement terms on all amounts due to subsidiaries are at a date mutually agreed by both parties to the balance. Based on the exercise performed by the Board of Directors in the prior year, and as at the date of signing all balances are classified as non-current since receipt is not probable within 12 months.

The directors consider that the carrying value of cash and cash equivalents approximates to their fair value

## Notes to the financial statements continued for the year ended 31 March 2023

#### 6. TRADE AND OTHER PAYABLES

	2023 £m	2022 £m
Amounts awed to subsidiary undertakings	260.8	2520
	260.8	2.52.0

Amounts owed to subsidiary undertakings include an interest-bearing loan of £260.8m at 31 March 2023 {2022: £252.0m}, with interest charged at an annual rate of 1.5% (2022: 1.5%) above the Bank of England base rate, all other retriaining balances are interest free. All balances are repayable on demand.

#### 7. CALLED UP SHARE CAPITAL

	Number of shares m	Share capital £m	Share premium £m	Total £m
Issued, called up and fully paid				
At 31 March 2023	316.6	316.6	743.3	1,059.9
At 31 March 2022	316.6	316.6	743.3	1,059.9

Details of shares are given below:

Share type	Total nominal value £	Premium £
204,280,000 Ordinary Non-Voting Shares, issued at £1 nominal value	204,280,000	-
112,354,000 Ordinary Non-Voting Shares, issued at premium	112,354,000	687,157,064
10 x 'A' shares, issued at £1 nominal value	10	
10 x 'B' shares, issued at £1 nominal value	10	
30 x °C′ shares, issued at premium	30	56,099,970

#### Particulars of each class of share:

**Voting** – each holder of A shares shall be entitled to receive notice of, to attend, speak at and vote at general meetings of the Company. All other classes of shares do not carry voting rights.

Capital – on a winding up or other return of capital the available assets of the Company shall be applied in the following order of priority:

(A) first, in paying to each holder of A shares, B shares, and non-voting ordinary shares the nominal amount of the aggregate of such shares held by each such holder pro-rate to their holdings of shares; and

(B) second, in paying the balance to the holders of non-voting ordinary shares pro-rata to their holdings of non-voting ordinary shares.

**Income –** C shareholders and ordinary shareholders shall be entitled to dividends, which shall be payable to the holders pro-rata to their holdings of C shares/ordinary shares respectively.

## Directors' report (continued)

#### Key performance indicators ('KPIs')

Management haven't identified any key performance indicator for the Company to be profit before taxation. For the group consolidated key performance indicators please refer to the Annual Report and accounts for MAHL pages 22-25. The directors have not used any additional KPIs for the Company.

#### Directors

The directors who held office during the year and up to the date of signing the financial statements were as follows:

C Cornish (resigned 2 October 2023)

K O'Toole

J Bramall

#### Going concern

The financial statements have been prepared on a going concern basis which the directors consider to be appropriate for the following reasons.

The directors have prepared a going concern assessment for the period to 30 September 2024 which indicate that, the Company will have sufficient funds, through funding from its ultimate parent company, Manchester Airports Holdings Limited, to meet its liabilities as they fall due for that period. Further detail of the directors' assessment of going concern is detailed in the basis of preparation section of the accounting policies on page 6, within note 1 to the financial statements.

#### Post balance sheet event

Subsequent to the year end, on 12 May 2023 the Group secured a bridge to bond facility that provides the Group with assurance that it will be able to refinance its bond for £360,000,000, details of which can be found in note 5 to the financial statements.

## Statement of directors' responsibilities relating to the Directors' report and the financial statements

The directors are responsible for preparing the Directors' report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with UK accounting standards and applicable law (UK Generally Accepted Accounting Practice), including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland.

Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable UK accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company and to prevent and detect fraud and other irregularities.

For the year ended 31 March 2022 the Company was entitled to exemption from audit under section 480 of the Companies Act 2006 relating to dormant companies. Members have not required the Company to obtain an audit of its accounts for the year in question in accordance with section 476. The directors acknowledge their responsibilities for complying with the requirements of the Act with respect to accounting records and the preparation of accounts.

#### The directors:

- confirm that the Company was entitled to exemption under subsections (1) and (2) of section 480 of the Companies Act 2006 relating to dormant companies from the requirement to have its financial statements for the financial year ended 31 March 2023 audited;
- confirm that members have not required the Company to obtain an audit of its financial statements for that financial year in accordance with section 476 of the Companies Act 2006; and
- acknowledge their responsibilities for:
  - i. ensuring that the Company keeps adequate accounting records which comply with section 386 of the Companies Act 2006, and
  - ii. preparing financial statements which give a true and fair view of the state of affairs of the Company as at the end of the financial year and of its surplus or deficit for the financial year in accordance with the requirements of sections 393 and 394 of the Companies Act 2006, and which otherwise comply with the requirements of that Act relating to financial statements, so far as applicable to the company.

These financial statements have been prepared in accordance with the provisions applicable to companies subject to the small companies' regime.

The Company did not trade during the current or preceding year and has made neither a profit nor a loss, nor any other recognised gain or loss.

These financial statements of Ringway Handling Limited, registered number 03602934, were approved by the Board of directors on 4 October 2023 and were signed on its behalf by:

#### Notes to the financial statements

#### 1 Accounting policies

Ringway Handling Limited (the 'Company') is a private company limited by shares and incorporated, registered and domiciled in England and Wales in the UK. The registered number is 03602934 and the registered address is Manchester Professional Services Limited, PO Box 532, Town Hall, Albert Square, Manchester, M60 2LA.

These financial statements were prepared in accordance with Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland ('FRS 102'). The presentation currency of these financial statements is sterling. All amounts in the financial statements have been rounded to the nearest £1.

The Company's ultimate parent undertaking, Manchester Airports Holdings Limited, includes the Company in its consolidated financial statements. The consolidated financial statements of Manchester Airports Holdings Limited, prepared in accordance with international accounting standards in conformity with the requirements of the Companies Act 2006, are available to the public, and may be obtained from Olympic House, Manchester Airport, M90 1QX.

In these financial statements, the Company is considered to be a qualifying entity (for the purposes of this FRS) and has applied the exemptions available under FRS 102 relating to the following disclosures:

- Cash Flow Statement and related notes; and
- Key Management Personnel compensation.

The Company has taken advantage of section 33.1A of FRS 102 Related Party Disclosures and not disclosed transactions with wholly-owned subsidiaries within the same group.

As the consolidated financial statements of Manchester Airports Holdings Limited include the equivalent disclosures, the Company has also taken the exemptions under FRS 102 available relating to the following disclosures:

The disclosures required by FRS 102.11 Basic Financial Instruments and FRS 102.12 Other Financial Instrument Issues relating to financial instruments not falling within the fair value accounting rules of Paragraph 36(4) of Schedule 1

The accounting policies set out over the page have, unless otherwise stated, been applied consistently to all years presented in these financial statements.

#### Basis of preparation and going concern

The financial statements have been prepared on a going concern basis which the directors consider to be appropriate for the following reasons.

The directors have prepared a going concern assessment for the period to 30 September 2024 which indicate that, the Company will have sufficient funds, through funding from its ultimate parent company, Manchester Airports Holdings Limited, to meet its liabilities as they fall due for that period.

The directors have prepared a going concern assessment for the period to 30 September 2024 which indicate that, the Company will have sufficient funds, through funding from its ultimate parent Company, Manchester Airports Holdings Limited, to meet its liabilities as they fall due for that period.

This assessment is dependent on Manchester Airports Holdings Limited providing financial support during the period as the funding requirements for the Group are managed centrally. Manchester Airports Holdings Limited has indicated its intention to continue to make available such funds as are needed by the Company.

#### Group assessment

At 31 March 2023, the Group had liquidity headroom of £561,600,000 comprised of: £67,600,000 of net cash, undrawn committed facilities of £484,000,000 (Secured Revolving Credit Facility (RCF)) and an available overdraft facility of £10,000,000.

Group management have modelled a base case and downside scenario for the Group, neither of which indicate a liquidity or covenant breach. They have also modelled a reverse stress test which is considered remote based on current passenger levels and industry predictions.

#### Notes to the financial statements

#### 1 Accounting policies

#### Basis of preparation and going concern (continued)

#### Group assessment (continued)

Whilst the MAHL Annual Report for the year ended 31 March 2022 was prepared on a going concern basis it contained a material uncertainty as the Group, under a severe but plausible scenario, forecasted a potential breach of a financial covenant at 31 March 2023. The strong recovery in passenger numbers experienced by the Group over the past 12 months and the forecasts produced to cover the going concern assessment period have provided confidence that a material uncertainty no longer exists.

The Group's base case forecast of passenger number projections include a business plan of 95% of pre-Covid-19 (defined as FY20) levels for FY24 and returning to pre-Covid-19 levels in FY25. The levels of passenger demand in the forecast reflects the directors' anticipated rate of recovery and is aligned with industry expectations.

The forecasts include the successful refinancing of the Group's £360,000,000 bond and result in a minimum liquidity headroom of £315,000,000 during the going concern assessment period and compliance with MAG's financial covenants when tested at September 2023; March 2024; and September 2024. The forecasts also include the raising of additional finance for discretionary expansionary capital expenditure. The directors expect to be able to access this finance, as described above. However, should the finance not be available, the expansionary capital expenditure would be deferred.

In addition to the Group's business plan forecast of 95% of pre-Covid passenger levels the directors have also considered a downside scenario.

#### Downside scenario

In this scenario passenger numbers are restricted to 88% of pre-Covid-19 levels in FY24 (in line with the lower level of current industry forecasts), with partial recovery to 92% of pre-Covid-19 levels in FY25. In such a case the Group is expected to maintain positive liquidity headroom in excess of £198,000,000 for the going concern assessment period.

The forecast contains certain cash and cost mitigation measures to remove areas of discretionary spend but keeps key regulatory or infrastructure spend in place. The Group can, where necessary, also undertake potential mitigating actions within its control, including cutting of additional spend and delaying of further capital expenditure.

In addition, a reverse stress test has been prepared by management which demonstrates the level of passenger numbers that would result in a covenant breach, this equates to a reduction in passenger numbers of 77% of pre-pandemic levels. A fall to this level is considered to be implausible, based on current passenger levels and industry predictions.

A bridge to bond facility is available and sufficient to ensure the £360,000,000 bond maturing in April 2024 can be repaid if a new bond issue should not take place in advance of that date. The remaining £1,100,000,000 of Group bonds will mature between 2034 and 2044.

Based on the work performed to assess the Group forecasts, and that the Directors are satisfied that Manchester Airport Holdings Limited has agreed to support the Company as required, the directors have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for the period to 30 September 2024.

### Trade and other receivables/payables

Trade and other receivables are recognised initially at transaction price less attributable transaction costs. Trade and other payables are recognised initially at transaction price plus attributable transaction costs. Subsequent to initial recognition they are measured at amortised cost using the effective interest method, less any impairment losses in the case of trade receivables. If the arrangement constitutes a financing transaction, for example if payment is deferred beyond normal business terms, then it is measured at the present value of future payments, discounted at a market rate of interest for a similar debt instrument.

#### Notes to the financial statements (continued)

#### Accounting policies (continued)

#### Critical accounting estimates and judgements

In applying the Company's accounting policies, the Company has made estimates and judgements concerning the future. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Actual results may, however, differ from the estimates calculated and management believe that the following are the more significant judgements affecting these financial statements.

#### Judgements

In applying the Group's accounting policies, the Group has made key judgements. Management believe that going concern contains the more significant judgements impacting these financial statements.

#### Going concern

The directors have prepared a going concern assessment for the period to 30 September 2024 which indicate that, the Company will have sufficient funds, through funding from its ultimate parent company, Manchester Airports Holdings Limited, to meet its liabilities as they fall due for that period.

The impact of the ability of the Group to refinance a £360,000,000 bond due to mature in April 2024; and the impact upon activity levels of current macroeconomic considerations (including the cost of living crisis and the Ukraine conflict) have been considered in the Basis of Preparation. The directors have evaluated whether the actions already undertaken to secure a credit facility and the mitigating actions that the Group can undertake against any reductions in activity levels are sufficient to ensure that MAG will continue as a going concern for plausible future trading scenarios.

Based on the work performed at the MAHL level, the directors have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for the period to 30 September 2024.

### Notes to the financial statements (continued)

#### 4 Ultimate parent company and parent undertaking of larger group of which the Company is a member

The Company is a subsidiary undertaking of Ringway Handling Services Limited. The smallest group in which the results of the Company are consolidated is that headed by Manchester Airport Group Investments Limited. The Company's ultimate parent is Manchester Airports Holdings Limited. The consolidated financial statements of these groups are available to the public and may be obtained from the Company Secretary at Olympic House, Manchester Airport, Manchester, M90 1QX, or via the website at <a href="https://www.magairports.com">www.magairports.com</a>.

#### 5 Post balance sheet event

Subsequent to the year end, on 12 May 2023 the Group secured a bridge to bond facility that provides the Group with assurance that it will be able to refinance its bond for £360,000,000 by providing the facility to drawdown £360,000,000 up to 12 May 2024, with options to extend to 12 May 2025. These new facilities ensure sufficient headroom throughout the business plan period to ensure compliance with the Group's internal treasury policy. The bridge to bond facility is held within fellow group undertaking Manchester Airport Group Finance Limited. As required, drawings from the facility will be transferred within the Group in line with the Group's internal treasury policy.
