#### STRATEGIC REPORT

The Directors present the Strategic Report and the Directors' Report, together with the financial statements and auditors' report of Milton Homes Properties Limited (the "Company") for the year ended 31 March 2020.

#### **Principal activities**

The principal activity of the Company is to own reversionary interests in residential property acquired as a provider of both traditional and innovative home reversion plans. It also owns residential property acquired through home reversion plans, but is not currently entering into new business. The Company is authorised by The Financial Conduct Authority ("FCA") as a Home Reversion Plan provider.

#### Results for the financial year

The financial statements show results for the year as follows:

	Year ended 31 March 2020 £	Year ended 31 March 2019 £
Income	3,644,273	4,556,246
Loss before tax Tax charge for the year	(1,931,601) (64,492)	(1,174,186) (60,293)
Loss attributable to equity shareholders	(1,996,093)	(1,234,479)

### Financial risk management objectives and policies

The City of London Group plc Board sets the overall risk appetite and philosophy of the Company. The City of London Group plc Board establishes the parameters for risk appetite through setting strategic direction, contributing to and ultimately approving annual business plans for the Company, and regularly reviewing and monitoring performance in relation to risk through half-yearly and ad hoc reports from Executive Committee meetings.

Risk appetite is defined in both qualitative and quantitative terms and is regularly assessed. It is an expression of the maximum level of residual risk that the Company is prepared to accept in order to deliver its business objectives.

The Company's activities expose it to a number of financial risks including interest rate risk, credit risk, property market risk, longevity risk and liquidity risk.

#### STRATEGIC REPORT (continued)

#### Financial risk management objectives and policies (continued)

#### Interest rate risk

Interest rate risk is the risk of adverse changes (effectively increases) in market interest rates and arises primarily from the mismatch between the Company's secured debt obligations and the fixed rate it earns on its long-term equity release plan financial assets and investment properties.

#### Credit risk

Credit risk is the risk that the Company will incur losses as a result of the failure of customers and counterparties to meet their obligations and arises from holdings of financial assets.

The Company is not subject to material levels of credit risk, as these assets revert fully to the Company on reversion.

#### Property market risk

Property market risk is the risk that the investment value of the Company's investment properties and equity release plan financial assets may experience lower than anticipated or indeed negative growth. The investment value of the Company's investment properties and equity release plan financial assets is determined by changes in investment yields, actuarial assumptions regarding mortality and morbidity rates and by changes in the market value of the underlying properties.

The Company seeks to mitigate the level of property risk to which it is exposed by maintaining a portfolio that is well diversified both geographically and in terms of individual property values, and by seeking to avoid holding lower-quality properties and equity release plan financial assets which are generally more adversely impacted by market downturns. The Company adheres to eligibility criteria regarding the type, condition and marketability of the underlying property when entering into property acquisitions and equity release plans.

The Company's property market risk is further mitigated by the 5-year floor in the Property Plan which protects the Company from negative house price inflation ("HPI") in the first five years of the Plan.

#### Longevity risk

Longevity risk is the risk that the Company will incur financial loss because of the later-thananticipated reversion of properties and equity release plan financial assets on account of experienced life expectancy improvements.

The Company seeks to mitigate this risk through the use of conservative mortality assumptions.

### STRATEGIC REPORT (continued)

#### Financial risk management objectives and policies (continued)

Liquidity risk

Liquidity risk is the risk that the Company is unable to meet its cash obligations as they fall due.

The Company monitors its liquidity risk by maintaining short-term and long-term cash flow forecasts which identify significant future cash flow requirements, primarily from debt repayment schedules, and anticipated property acquisitions and equity release plan originations. The refinancing agreement with Partnership Life Assurance Company Limited provides cashflow stability, as interest is rolled up into the loan, and the loan and accrued interest is repayable on the disposal of each residential property and financial asset. Marketing reports provided by selling agents provide insight into short-term cash inflows from the sale of investment properties and equity release plan financial assets.

On behalf of the Board

JDS Harrison Director

9 October 2020

Company Registration No. 07258478

#### **DIRECTORS' REPORT**

Some information is not shown in the Directors' report because it is shown in the Strategic report instead.

#### **Directors**

The Directors who served the company during the year and up to the date of this report were as follows:

JDS Harrison MH Goldstein CR Rumsey (resigned 10 May 2019)

In terms of section 234 of the Companies Act 2006, the Directors of the Company have been granted Qualifying Third Party Indemnity Provisions by the Company, which remain in force as at the date of approving the Strategic Report and the Directors' Report.

The Directors do not recommend the payment of a dividend in respect of the current financial year (2019: £nil).

#### **Employees**

Details of the number of employees and related costs can be found in note 3 to the financial statements.

#### Disabled persons

It is the Company's policy to give full consideration to suitable applications for employment of disabled persons. Disabled employees are eligible to participate in all career development opportunities available to staff. Opportunities also exist for employees of the Company who become disabled to continue in their employment or to be retrained for other positions in the Company.

#### **Employee involvement**

The Company is committed to involving all employees in the performance and development of the Company. Its approach to employee development offers continual challenges in the job, learning opportunities and personal development.

The Company encourages all its employees to participate fully in the business through open dialogue. Employees receive news of the Company through frequent email notices, internal notices and Board statements. The Company maintains a strong communications network and employees are encouraged, through its open-door policy, to discuss with management matters of interest to the employee and subjects affecting day-to-day operations of the Company.

#### **Ethical Standards**

The Directors and the Company are committed to high ethical standards in all their dealings. The group company, Retirement Plus Limited, as an FCA authorised arranger and administrator of home reversion plans is reliant upon its ability to build a long-term relationship of trust and high-quality service with elderly homeowners, and also with all our trusted suppliers.

### **DIRECTORS' REPORT (continued)**

#### Statement of Directors' responsibilities

The Directors are responsible for preparing the Strategic Report, the Directors' Report, and the financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have elected to prepare the financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union. Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state they have been prepared in accordance with IFRSs as adopted by the European Union, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The Directors confirm that they have complied with these requirements.

#### Business review and future developments

The Company has managed its business activities in the face of a fluctuating property market and extremely challenging lending conditions.

With the focus on cash conservation, there has been a decision to postpone any new equity release plan financial asset originations and property acquisitions. The Directors believe that this strategy has satisfied the somewhat conflicting objectives of conserving cash whilst maintaining the business presence of the Company.

The Company's strong brand, flexible and scalable infrastructure and established relationships with key intermediaries, continue to position it well to enjoy further significant growth.

### **DIRECTORS' REPORT (continued)**

#### Going concern statement

Having made appropriate enquiries and reviewing the Company's forecast cashflows over the next 13 months, in particular regarding the ability of the Company to meet its liabilities as and when they fall due, the Directors are satisfied that the Company has adequate resources to continue its operations for the foreseeable future. The financing agreement with Partnership Life Assurance Company Limited provides cashflow stability, as interest is rolled up into the loan, and the loan and accrued interest is repayable on the disposal of each financial asset. Furthermore, Retirement Plus Limited and Retirement Plus Property Plans Limited have confirmed in a letter that they will not demand repayment of their loans until the Company is in a position to make such a repayment, without jeopardizing the continued operations of the Company.. We have assessed the impact of COVID-19. During the year the business was adversely affected by the slowdown in the housing market even before COVID-19 but did see a rise in the number of property reversions. However, the Directors believe the national spread of the portfolio and the limited number of higher value properties is a positive feature of the portfolio in these circumstances, with a positive cash flow arising from these sales. Given this, as well as the cashflow stability from the financing agreement, the Directors continue to adopt the going concern basis in preparing the financial statements.

#### **Auditor**

In the case of each of the persons who are directors at the time when the Strategic Report and the Directors' Report are approved, the following apply:

- so far as each Director is aware, there is no relevant audit information of which the Company's auditors are unaware; and
- each Director has taken all the steps that he ought to have taken as a director in order to make himself aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of s418 of the Companies Act 2006.

BDO LLP have expressed their willingness to continue in office as auditor and a resolution to reappoint them will be proposed at the forthcoming Annual General Meeting.

On behalf of the Board

JDS Harrison Director

## INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MILTON HOMES PROPERTIES LIMITED

#### **Opinion**

We have audited the financial statements of Milton Homes Properties Limited ("the Company") for the year ended 31 March 2020 which comprise Statement of Comprehensive Income, Statement of Changes in Equity, Statement of Financial Position, Cash Flow Statement and the notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union.

In our opinion the financial statements:

- give a true and fair view of the state of the Company's affairs as at 31 March 2020 and
  of its loss for the year then ended;
- have been properly prepared in accordance with IFRSs as adopted by the European Union; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which the ISAs (UK) require us to report to you where:

- the Directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the Directors have not disclosed in the financial statements any identified material
  uncertainties that may cast significant doubt about the Company's ability to continue to
  adopt the going concern basis of accounting for a period of at least twelve months from
  the date when the financial statements are authorised for issue.

#### Emphasis of matter - Valuation of interests in property portfolio

We draw attention to note 8 and note 9, which explains that as a result of the impact of the outbreak of the Novel Coronavirus (COVID-19) on the market, the Company's property valuer has advised that less certainty, and a higher degree of caution, should be attached to their valuation than would normally be the case. Our opinion is not modified in respect of this matter.

#### Other information

The Directors are responsible for the other information. The other information comprises the information included in the Annual Report, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

## INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MILTON HOMES PROPERTIES LIMITED

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

#### Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

- the information given in the Strategic report and Directors' report for the financial year
  for which the financial statements are prepared is consistent with the financial
  statements; and
- the Strategic report and Directors' report have been prepared in accordance with applicable legal requirements.

#### Matters on which we are required to report by exception

In the light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Strategic report and Directors' report.

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns;
- · certain disclosures of Directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

#### **Responsibilities of Directors**

As explained more fully in the Statement of Directors' Responsibilities, the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

## INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MILTON HOMES PROPERTIES LIMITED

#### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at:

https://www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

#### Use of our report

This report is made solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

The repayments to the group companies of £810,000 (2019: £1,105,000) is in relation to the asset management fees payable to Retirement Plus Limited during financial year ended 31 March 2020.

#### 1. Accounting policies

The Company's financial statements are prepared in accordance with International Financial Reporting Standards issued by the International Accounting Standards Board ("IASB") and interpretations issued by the International Financial Reporting Interpretations Committee of IASB (together "IFRS") as adopted by the European Union, and comply with the Companies Act 2006.

The Company's financial statements are prepared in Sterling and all values are rounded to the nearest pound except where otherwise indicated.

The Company is registered in England and Wales under the Companies Act 2006.

#### Changes in accounting policies

New standards, interpretations and amendments effective for periods beginning on or after 1 January 2019 and which have given rise to changes in the Company's accounting policies are:

- IFRS 16 Leases
- IFRIC 23 Uncertainty over Income Tax Positions

IFRS 16 'Leases' – Provides a single lessee accounting model, specifying how leases are recognised, measured, presented and disclosed. The Company has completed an assessment of the impact of IFRS 16. Lessor accounting under IFRS 16 is similar to existing IAS 17 accounting and the adoption of IFRS 16 will not have a material impact on the financial statements.

IFRS 16 changes the basis of accounting for leases previously classified as operating leases under IAS 17.

IFRIC 23 requires the assessment of uncertainty over Income Tax Positions, which for this company is outside the scope of this standard as there are no uncertain tax treatments.

### New standards and standards issued but not yet effective

There are a number of standards, amendments to standards, and interpretations which have been issued by the IASB that are effective in future accounting periods that the company has decided not to adopt early. The most significant of these is:

- IFRS 3 Business Combinations (effective 1 January 2020)
- IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors (effective 1 January 2020).

### **Going Concern**

Having made appropriate enquiries and reviewing the Company's forecast cashflows over the next 13 months, in particular regarding the ability of the Company to meet its liabilities as and when they fall due, the Directors are satisfied that the Company has adequate resources to continue its operations for the foreseeable future. The financing agreement with Partnership Life Assurance Company Limited provides cashflow stability, as interest is rolled up into the loan, and the loan and accrued interest is repayable on the disposal of each financial asset. Furthermore, Retirement Plus Limited and Retirement Plus Property Plans Limited have confirmed in a letter that they will not demand repayment of their loans until the Company is in a position to make such a repayment, without jeopardizing the continued operations of the Company. We have assessed the impact of COVID-19. During the year the business was adversely affected by the slowdown in the housing

### 1. Accounting policies (continued)

market even before COVID-19 but did see a rise in the number of property reversions. However, the Directors believe the national spread of the portfolio and the limited number of higher value properties is a positive feature of the portfolio in these circumstances, with a positive cash flow arising from these sales. Given this, as well as the cashflow stability from the financing agreement, the Directors continue to adopt the going concern basis in preparing the financial statements.

#### **Investment Property**

Freehold and leasehold property held for capital appreciation that is not occupied by the Company is classified as investment property.

Investment property is measured initially at cost, including directly attributable transaction costs, and is thereafter reported at fair value, which reflects market conditions at the year end date.

Gains or losses arising from a change in the fair values of the investment properties are included in the statement of comprehensive income in the period in which they arise.

An investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future benefits can be expected.

Gains or losses arising from the retirement or disposal of investment property are determined as the difference between the net disposal proceeds and the carrying amount of the asset, and are recognised in the statement of comprehensive income.

#### Financial Assets - equity release plans

Through the Property Plan agreement the Company owns rights to increasing beneficial interests in residential properties in the United Kingdom. The values of these interests are measured at fair value with changes recognised in the statement of comprehensive income.

Gains or losses arising from a change in the fair values of the financial assets are recognised in the statement of comprehensive income in the period in which they arise.

A financial asset is derecognised on disposal or when the financial asset is permanently withdrawn from use and no future benefits can be expected. The gain or loss arising from the retirement or disposal of financial assets is determined as the difference between the net disposal proceeds and the carrying amount of the asset, and is recognised in the statement of comprehensive income.

#### Leases

Leases taken by the Company are assessed individually as to whether they are finance leases or operating leases. Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Properties leased out to tenants under operating leases are included in investment properties in the balance sheet and accounted for in accordance with the accounting policy on investment property. Operating lease payments net of lease incentives are recognised as an expense in the Income Statement on a straight line basis over the lease term.

#### 1. Accounting policies (continued)

#### Impairment of receivables

Impairment provisions for receivables are recognised based on a forward looking expected credit loss model. The methodology used to determine the amount of the provision is based on whether there has been a significant increase in credit risk since initial recognition of the financial asset. For those where the credit risk has not increased significantly since initial recognition of the financial asset, twelve month expected credit losses along with gross interest income are recognised. For those for which credit risk has increased significantly, lifetime expected credit losses along with the gross interest income are recognised. For those that are determined to be credit impaired, lifetime expected credit losses with interest income on а net basis are

#### Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand, demand deposits, and are subject to an insignificant risk of changes in value.

For the purpose of the cash flow statement, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts.

#### Trade and other payables

Trade and other payables are stated at cost.

#### Interest-bearing loans and borrowings

Obligations for loans and borrowings are recognised when the Company becomes party to the related contracts and are measured initially at fair value less directly attributable transaction costs. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method.

Gains and losses on the repurchase, settlement or cancellation of liabilities are recognised in the statement of comprehensive income in finance income and finance expense, respectively.

#### Intra-group balances

Intra-group loans and similar balances between group companies are held at amortised cost. As these are financial instruments which come within the scope of IFRS 9, an assessment is made regularly to determine whether any provision for expected credit losses is required. The Company has applied the simplified approach to recognise lifetime expected credit losses on these intra group balances. It was determined that, having regard to the terms of each loan, no provisions were required.

## Deferred purchase consideration on acquisition of reversionary interests in investment property

The Company has entered into loan agreements with tenants which are repaid by way of monthly instalments over the term of the agreement. The loans are recognised when the Company becomes party to the related contract and are measured initially at fair value less directly attributable transaction costs. After initial recognition, deferred purchase consideration is measured at amortised cost using the effective interest rate method.

#### 1. Accounting policies (continued)

The loans are repaid in the event of death, vacation from the property or at the Company's request, generally in response to receipt of a request for repayment from the tenant.

#### Financial instruments

Apart from the property plans, the Company's principal financial instruments comprise cash, the Partnership loan, deferred purchase consideration, trade and other receivables, and trade and other payables. Cash and cash equivalents are considered to be cash at bank and cash in hand. The main purpose of these instruments is to finance the acquisition of investment property and to meet operating, administrative and finance costs. It is the Company's policy that no speculative trading in financial instruments shall be undertaken. The Directors consider that there are no material differences between the carrying values and fair values of the Company's financial assets and liabilities at each year end.

#### **Current tax**

The tax expense represents the sum of the tax currently payable and deferred tax. The tax currently payable is based on taxable profit for the period. Taxable profit differs from net profit as reported in the statement of comprehensive income because it excludes items of income or expense that are taxable or deductible in other periods and it further excludes items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

#### Deferred tax

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the tax profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised based on tax rates and laws enacted or substantively enacted at the balance sheet date. Deferred tax is charged or credited in the statement of comprehensive income, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

#### 1. Accounting policies (continued)

#### Revenue recognition

Profits or losses on the sale of financial assets and reverted properties are recognised on completion of the sale and are calculated as net sales proceeds less the carrying value of the Company's beneficial interest in the financial assets, or the interest in the properties, determined by the most recent valuation.

Equity Transfer Rate ("ETR") income represents the recognition in the statement of comprehensive income of the increase in the Company's beneficial interest in the properties underlying the equity release plan financial asset portfolio in accordance with the contractual terms of the Property Plan. ETR income is recognised on a monthly basis over the term of the plan until the Company's beneficial interest reaches the maximum set out in each individual Property Plan. This increase in value is recognised as part of revenue in the statement of comprehensive income.

The unrealised gain or loss on the revaluation of investment properties and equity release plan financial assets to fair value, is recognised in the statement of comprehensive income in the year in which it arises.

#### 2. Critical accounting judgements and key sources of estimation uncertainty

In the process of applying the Company's accounting policies, which are described in note 1, management has made the following judgements and estimations that have the most significant effect on the amounts recognised in the financial statements.

The fair value of the Company's investment properties and equity release plan assets is determined by independent real estate valuation experts Allsop LLP using recognised valuation techniques. See note 8 and 9. This is a critical estimate.

#### 3. Information regarding directors and employees

The Directors have not received any emoluments for their services from the Company during the year (2019: £nil). The directors' emoluments for the group of £149,678 (2019: £334,419) where borne by a group undertaking, Retirement Plus Limited. There were no other employees (2019: £nil).

#### 4. Income

Year ended 31 March 2020	Year ended 31 March 2019
£	£

### 7. Taxation

The effective rate of corporation tax for the previous year is the same as the standard rate in the United Kingdom (19%) as applied to the Company's pre-tax result for the reasons below.

	Year ended 31 March 2020	Year ended 31 March 2019
Analysis of tax charge for the year	£	£
Deferred tax charge	64,492	60,293
Tax charge for the year	64,492	60,293
Reconciliation of total tax charge		
(Loss) / Profit on ordinary activities before tax	(1,931,601)	(1,174,186)
(Loss) / Profit on ordinary activities multiplied by the standard rate of Corporation tax in the United Kingdom (19%) (2019: 19%)	(367,004)	(223,095)
Factors affecting the tax charge / (credit) for the year:		
Group relief surrendered	-	93,566
Non-deductible expenses	5,247	10,193
Movement in deferred tax	64,492	60,293
Profit on revaluation of investment properties	(216,122)	(331,375)
Non- taxable income Unutilised losses carried forward	145,140 432,739	284,064 166,647
Officialised losses carried follward		100,047
	64,492	60,293

#### 7. Taxation (continued)

The Company had an unrecognised deferred tax asset in 2020 of £5,618,578 (2019: £4,269,478).

#### **Deferred** tax

The deferred tax liabilities are analysed below:

Year ended	Year ended
31 March	31 March
2020	2019
£	£
1,548,966	1,416,739
(739,711)	(671,976)
809,255	744,763
	31 March 2020 £ 1,548,966 (739,711)

Although the Finance Act 2016 was enacted to introduce a reduction of the headline rate of corporation tax to 17% from 1 April 2020, on 11 March 2020 the Chancellor confirmed that the rate for corporation tax will remain at 19%. This change will be made under a Budget resolution, which has statutory effect under the provisions of the Provisional Collection of Taxes Act 1968. As such, it is substantially enacted for UK GAAP and IFRS on the passing of the resolution, which was passed in March 2020. Deferred tax is calculated at 19% as the temporary differences are expected to unwind after April 2020.

### 8. Investment property

s. Investment property	No.	31 March 2020 £	No.	31 <b>M</b> arch 2019 £
At beginning of year Additions Further Releases Disposals Revaluations	271 - (23)	41,040,252 - 11,699 (3,580,722) 1,137,485	302 - (31) -	44,926,358 - 11,519 (5,641,705) 1,744,080
Valuation at end of year	248	38,608,714	271	41,040,252

There are currently 25 properties held for sale with a value of £5,104,390.

#### Fair value hierarchy

The valuation of the investment properties is a Level 3 valuation in the fair value hierarchy.

#### Valuation method

The Company owns beneficial interests in residential properties in the United Kingdom. The fair values of these interests are based on the equity owned percentage of the properties upon the Company taking vacant possession, the fair value of the properties at the balance sheet date, assuming vacant possession, less a discount to take account of the risk of the realisation of those interests. The board of directors is responsible for determining the company's valuation policies and procedures and appoints an external valuer to perform the valuation. The selection criteria used to select that valuer include their market knowledge & expertise, independence and demonstrable compliance with professional standards. The fair value of the properties is determined on a market value

#### 8. Investment property (continued)

basis with an assumption of vacant possession. One third of the properties each year are inspected externally to arrive at this value using a conventional approach of comparable analysis. In some cases, the fair values are determined based on recent real estate transactions with similar characteristics and location to those of the Company's assets, including those properties which have become vacant and are in the process of being sold. Where the company has taken vacant possession of property an allowance has been made against the full market value to take account of necessary refurbishment costs. Where properties are not inspected by the valuers a composite average of relevant house price indices are applied to the value estimated when previously inspected by the valuers. The discount percentage is based upon a number of factors over which judgements are made. These judgements include:

- Investment term the length of time until vacant possession becomes due.
- Investment rate also known as a discount rate and this includes a judgement of current marketability and condition of the property.
- Cost saving rate the potential cost saving of acquiring already existing life tenancy investments.

There were no changes in valuation techniques during the year.

#### Valuation assumptions

Investment term – the investment term is the period until the Company obtains vacant possession. This is based on the age of the tenant occupying the property and published life expectancy tables from the Office for National Statistics for the period 2016-18 (2019: for the period 2015-2017). Where there is joint tenancy, the life expectancy of the tenant with the longest life expectancy has been used.

The length of the investment term is modified by applying a "speed up" rate to the life expectancy figures, as this reflects market evidence that the lower the age of the youngest tenant, the more likely it is that the Company will be able to access vacant possession before the end of the tenant's life, through the tenant entering into a care home or living with other family members.

The speed up rate applied ranges from 10% for younger tenants to 2.5% for older tenants. This remains unchanged from the prior year.

Investment rate – this input reflects the risk and opportunity which includes the growth prospects and marketability prospects of the property. Guidance is taken from the yield rates used by Valuation Tribunals for residential property.

The investment rates applied range from 5.25% to 7.5% (2019: 5.5% to 7.75%).

Cost saving rate – In determining the discount percentage, an adjustment is made for each property to take into account the potential cost saving of acquiring already existing life tenancy investments. It is estimated that the initial set up cost per property of acquiring life tenancy investments is approximately 5% of the value of the vacant possession equity being acquired.

A 1.25% (2019: 1.25%) uplift has been applied to account for the potential cost savings of acquiring already existing life tenancy investments.

The sensitivity analysis to changes in unobservable inputs for investment properties is:

- increases in estimated investment terms and rates would result in a lower fair value: and
- decreases in estimated investment terms and rates would result in a higher fair value.

Due to the aggregated nature of the investment property portfolio it is not possible to accurately quantify sensitivity of an individual input.

#### 8. Investment property (continued)

In the course of preparing the valuation as at 31 March 2020, the external valuer has considered the potential impact of COVID-19. In accordance with the mandatory requirement introduced by RICS on 17 March 2020, his valuation includes a material uncertainty clause which encapsulates the difficulty that valuers have of accurately reflecting market circumstances at a valuation date where there is an absence of contemporaneous evidence and a degree of uncertainly going forward. Some adjustments have been made to the marketability ratings of properties to reflect the anticipated increase in the length of time before a sale can be completed during the COVID-19 pandemic. The external valuer stated that less certainty — and a higher degree of caution — should be attached to the valuation than would normally be the case. However, it was concluded that it would be inappropriate to make what would at this stage be arbitrary adjustments to vacant possession values or deviate from the established methodology.

#### 9. Financial assets - equity release plans

	No.	31 March 2020 £	No.	31 March 2019 £
Valuation at beginning of year Transfers / additions	239	30,485,137	250 1	30,212,729 67,433
Further releases Equity transfer rate	-	30,000 1,367,177	-	3,585 1,496,860
Cancellations Revaluations	(14) -	(1,982,327) 443,428	(12) -	(1,833,295) 537,825
Valuation at end of year	225	30,343,415	239	30,485,137

There are currently 18 properties held for sale with a value of £2,356,099.

#### Fair value hierarchy

The valuation of the financial assets is a Level 3 valuation in the fair value hierarchy.

#### Valuation method

The Company owns beneficial interests in residential properties in the United Kingdom. The fair values of these interests are based on the estimated equity owned percentage of the properties upon the Company taking vacant possession, the fair value of the properties at the balance sheet date, assuming vacant possession, less a discount to take account of the risk of the realisation of those interests.

The board of directors is responsible for determining the Company's valuation policies and procedures and appoints an external valuer to perform the valuation. The selection criteria used to select that valuer include their market knowledge & expertise, independence and demonstrable compliance with professional standards.

The fair value of the properties is determined on a market value basis with an assumption of vacant possession. One third of the properties each year are inspected externally to arrive at this value using a conventional approach of comparable analysis. In some cases, the fair values are determined based on recent real estate transactions with similar characteristics and location to those of the Company's assets, including those properties which have become vacant and are in the process of being sold. Where properties are not inspected by the valuers a composite average of relevant house price indices are applied to the value estimated when previously inspected by the valuers.

#### 9. Financial assets - equity release plans (continued)

The discount percentage is based upon a number of factors over which judgements are made. These judgements include:

- Investment term the length of time until vacant possession becomes due.
- Investment rate also known as a discount rate and this includes a judgement of current marketability and condition of the property.
- Equity interest upon the Company taking vacant possession the anticipated equity percentage expected to be held by the Company upon taking vacant possession

The resultant valuations are capped at the estimated value of the Company's interest in the vacant possession value of the property should it have been obtained at the balance sheet date.

There were no changes in valuation techniques during the year.

#### Valuation assumptions

Investment term – the investment term is the period until the Company obtains vacant possession. This is based on the age of the tenant occupying the property and published life expectancy tables from the Office for National Statistics for the period 2016-18 (2019: for the period 2015-17). Where there is joint tenancy, the life expectancy of the tenant with the longest life expectancy has been used.

The length of the investment term is modified by applying a "speed up" rate to the life expectancy figures, as this reflects market evidence that the lower the age of the youngest tenant, the more likely it is that the Company will be able to access vacant possession before the end of the tenant's life, through the tenant entering into a care home or living with other family members.

The speed up rate applied ranges from 10% for younger tenants to 2.5% for older tenants. This remains unchanged from the prior year.

Equity interest upon the Company taking vacant possession – the anticipated equity percentage expected to be held by the Company upon taking vacant possession is calculated with reference to the expected investment term, the equity interest owned by the Company at the balance sheet date and the additional slices of equity in each property that will accrue under the terms of the equity release plans.

Investment rate – this input reflects the risk and opportunity which includes the growth prospects and marketability prospects of the property. Guidance is taken from the yield rates used by Valuation Tribunals for residential property.

The investment rates applied range from 5.25% to 7.5% (2019: 5.5% to 7.75%).

The sensitivity analysis to changes in unobservable inputs for financial assets – equity release plans is:

- increases in estimated investment terms and rates would result in a lower fair value; and
- decreases in estimated investment terms and rates would result in a higher fair value.

Due to the aggregated nature of the financial asset portfolio it is not possible to accurately quantify sensitivity of an individual input.

#### 9. Financial assets – equity release plans (continued)

In the course of preparing the valuation as at 31 March 2020, the external valuer has considered the potential impact of COVID-19. In accordance with the mandatory requirement introduced by RICS on 17 March 2020, his valuation includes a material uncertainty clause which encapsulates the difficulty that valuers have of accurately reflecting market circumstances at a valuation date where there is an absence of contemporaneous evidence and a degree of uncertainly going forward. Some adjustments have been made to the marketability ratings of properties to reflect the anticipated increase in the length of time before a sale can be completed during the COVID-19 pandemic. The external valuer stated that less certainty — and a higher degree of caution — should be attached to the valuation than would normally be the case. However, it was concluded that it would be inappropriate to make what would at this stage be arbitrary adjustments to vacant possession values or deviate from the established methodology.

#### 10. Trade and other receivables

	31 March 2020 £	31 March 2019 £
Amounts owed by immediate parent company Amounts owed by group companies Other receivables	17,226,033 366,837 544	15,632,475 385,768 10,202
	17,593,414	16,028,445

Under IAS 7, the current loan owed by the immediate parent company has moved by £1,593,558 from £15,632,475 to £17,226,033 due to payments made of £1,600,000 for repayment to COLG, less overheads paid of £6,442.

### 11. Trade and other payables

	31 March	31 March
	2020	2019
	£	£
Trade creditors	9,428	3,895
Amounts owed to group companies	3,210,283	2,683,837
Deferred purchase consideration	22,765	42,835
Deferred tax liability	809,255	744,763
Accruals and deferred income	51,541	39,088
	4,103,272	3,514,418

Under IAS 7, current loans and borrowings owed to group companies have moved by £526,446 from £2,683,837 to £3,210,283 due to net payments made of £725,000 for working capital, offset by administration fees charged of £1,276,523 and overheads paid of £25,077 by and on behalf of another group company, Retirement Plus Limited.

interest bearing loans and borrowings	31 March	31 March
	2020	2019
	£	£
Non-current		
Partnership loan	57,086,713	57,111,387
Deferred purchase consideration	31,523	54,283
	57,118,236	57,165,670

#### Partnership Ioan

The Partnership loan facility bears interest at 7.15% per annum and is now secured on the investment properties and equity release plan assets held by the Company. The interest is rolled up into the loan, and a proportion of the loan and accumulated interest is repayable on disposal of each property and/or equity release plan asset, with the balance repayable in full on the earlier of 8 November 2065 and the date when the last property or equity release plan asset is disposed of.

Under IAS 7, non-current loans and borrowings owed to Partnership have moved by £24,674 from £57,111,387 to £57,086,713 due to repayments made of £3,952,149, offset by interest charges of £3,927,475 in the year.

#### Deferred purchase consideration

Deferred purchase consideration represents annuities payable to tenants where consideration for a property has taken the form, in some part, of a commitment by the Group to pay monthly cash instalments over a set period. The last of these instalments is payable in 2025. The effective interest rate is 5.95%.

#### Undrawn committed borrowings

As at 31 March 2020, the Company had £nil (2019: £nil) of undrawn committed borrowing facilities from Partnership Life Assurance Company Limited for asset purchases, as the fifth year commitment of £50m has now expired.

#### 13. Financial Instruments

The main risks arising from the Company's financial instruments are liquidity risk, credit risk, capital management risk and market risk. There is no currency risk as all financial instruments are held in Sterling.

#### Classification and measurement

A single classification and measurement model is to be used for financial assets, which is dependent on the entity's business model for managing financial assets and the contractual cash flow characteristics of those financial assets.

Financial assets fall into one of three principal classification categories: (i) amortised cost, (ii) fair value through profit and loss or (iii) fair value through other comprehensive income. Equity investments in scope of IFRS 9 are measured at fair value with gains and losses recognised in profit or loss unless an irrevocable election is made to recognise gains or losses in other comprehensive income.

#### 13. Financial Instruments (continued)

The financial assets and liabilities of the Company and the basis of measurement are set out below.

Financial assets – equity release plans: the Company owns rights to increasing beneficial interests in residential properties in the UK through Property Plan agreements. The values of these interests are, subsequent to initial recognition at cost, measured at fair value with changes recognised in the consolidated income statement. Directly attributable transaction costs are excluded from the initial cost of financial assets which are fair valued through profit or loss. These assets continue to be measured at fair value through profit and loss ('FVTPL') under IFRS 9.

Loans and trade receivables are held solely for the collection of contractual cash flows, being interest, fees and repayments of principal. These assets continue to be held at amortised cost.

Financial liabilities are held solely for the collection and payment of contractual cash flows, being payments of principal and interest where applicable. These continue to be held at amortised cost. There is no credit risk as intercompany loans are not demanded.

#### Liquidity risk

Liquidity risk is the risk that the Company is unable to meet its cash obligations. The Company obtains financing from the sale of its properties to fund overheads and the financing requirements of the other subsidiary companies and its parent company. There is no risk to capital at the year end as property sales are frequent.

#### Commitments and contingencies

The table below summarises the maturity profile of the company's financial liabilities at 31 March 2020 and 31 March 2019 based on contractual undiscounted payments:

	Interest rate (%)	Within 1 year	1-5years	More than 5 years	Total
31 March 2020		£'000	£'000	£'000	£'000
Amounts due to group undertakings Deferred purchase	-	3,210	-	· -	3,210
consideration	5.95	23	31	_	54
Partnership Loan	7.15	-	-	57,087	57,087
31 March 2019					
Amounts due to group undertakings Deferred purchase	-	2,684	-	-	2,684
consideration	5.95	47	52	8	107
Partnership Loan	7.15	-	-	57,111	57,111

The above table shows the outstanding loan balance and accrued interest on the Partnership loan as at 31 March 2020 and 31 March 2019. The Partnership loan bears interest at 7.15% per annum. The interest is rolled up into the loan, and a proportion of

### 13. Financial Instruments (continued)

the loan and accumulated interest is repayable on disposal of each property and/or equity release plan asset; with the balance repayable in full on the earlier of 8 November 2065 and the date when the last property or equity release plan asset is disposed of.

#### Credit risk

The Company's exposure to credit risk on cash and cash equivalents arises from potential default of the counterparty, with a maximum exposure equal to the carrying amount of these instruments. There is no risk at the year end (see Directors' Report).

#### Capital management

Through efficient capital management, the Company aims to maximise corporate value whilst reducing the financial risks to which it is exposed. Investment Properties and Equity Release plan assets are individually reviewed for consistency with the Company's acceptable eligible plan criteria. The Company funds investment activity and operations through cash from proceeds from reverted properties, shareholder equity and debt. The mix of financing between equity and debt is generally reviewed when debt facilities are renegotiated or when significant property plan activity is forecast.

#### Fair values of financial assets and financial liabilities

The Directors consider that there are no material differences between the carrying values and the fair values of financial assets and liabilities at each year end under IFRS 9.

#### 14. Share capital

31 March 2020 £	2019
Authorised:	_
50,000,000 (2019: 50,000,000) ordinary shares of £1 each <b>50,000,000</b>	50,000,000
Allotted, issued and fully paid: 20,900,000 (2019: 20,900,000) ordinary shares of £1 each 20,900,000	20,900,000
