2 Accounting policies

Summary of significant accounting policies and key accounting estimates

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Statement of compliance

These financial statements have been prepared in accordance with Financial Reporting Standard 102 – 'The Financial Reporting Standard applicable in the UK and Republic of Ireland', including Section 1A, and the Companies Act 2006. There are no material departures from FRS 102.

Basis of preparation

These financial statements have been prepared using the historical cost convention.

The functional currency of Littleham 2010 Limited is considered to be pounds sterling because it is the currency of the primary economic environment in which the company operates.

Going concern

The directors are satisfied that the company has adequate resources available to discharge its obligations as they fall due for a period of at least 12 months from the date of approval of these financial statements. In making their assessment, the directors have fully considered the impact of the current uncertain economic environment and its potential impact on cash flow and working capital requirements. The company therefore continues to adopt the going concern basis in preparing its financial statements.

Notes to the Financial Statements

Year Ended 31 March 2023

Revenue recognition

Turnover comprises the fair value of the consideration received or receivable for the sale of goods and provision of services in the ordinary course of the company's activities. Turnover is shown net of value added tax, returns, rebates and discounts and after eliminating sales within the company.

The company recognises revenue on plot sales upon legal completion of the transfer of land to the company's joint venture partner.

Tax

Tax is recognised in profit or loss, except that a change attributable to an item of income or expense recognised as other comprehensive income is also recognised directly in other comprehensive income.

The current corporation tax charge is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the reporting date in the countries where the company operates and generates taxable income.

Stocks

Stocks comprise development property which is valued at the lower of cost and net realisable value. Cost comprises the costs attributable to land and property and other direct costs incurred in the development process, excluding finance costs. Net realisable value is based on estimated selling price, less further costs expected to be incurred to completion and disposal.

Deferred Income

Monies received from a development partner to fund development are treated as deferred income and will be released as developed properties are sold.

Notes to the Financial Statements

Year Ended 31 March 2023

Financial instruments

Financial instruments are recognised when the company becomes party to the contractual provisions of the instrument and derecognised when in the case of assets, the contractual rights to cash flows from the assets expire or substantially all the risks and rewards of ownership are transferred to another party, or in the case of liabilities, when the company's obligations are discharged, expire or are cancelled.

The company holds the following financial instruments:

- Short term trade and other debtors and creditors;
- Preference shares classified as debt; and
- Cash and bank balances

All financial instruments are classified as basic.

Trade and other debtors and creditors are initially measured at transaction price, including transaction costs, and are subsequently carried at the undiscounted amount of the cash or other consideration expected to be paid or received, after taking account of impairment adjustments. Where consideration to be paid or received is deferred for more than 12 months, consideration is recorded at present value to the extent that any discount is material.

Preference shares classified as debt are initially measured at transaction price, including transaction costs, and are subsequently carried at amortised cost using the effective interest method.

Preference shares are classified as debt where the holder has the right to require the issuer to redeem the instrument at or after a particular date for a fixed or determinable amount. The cumulative preference share dividends are recorded within interest payable and similar charges.

3 Staff numbers

The average number of persons employed by the company (including directors) during the year, was 0 (2022: 0).
