## NOTES TO THE ABBREVIATED ACCOUNTS FOR THE PERIOD ENDED 31 MARCH 2014

### 1. GOING CONCERN

At the balance sheet date, the company reported a shareholders deficit and net current liabilities. Creditors include balances due to the parent company and the director totalling £ 15,936. Both parties have agreed that they will not draw down on their respective loan balances to the detriment of other creditors. On this basis, the director, having made due and careful enquiry, is of the opinion that the company has adequate working capital to execute its operations over the next 12 months. The director, therefore, has made an informed judgement, at the time of approving the financial statements, that there is a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. As a result, the director has continued to adopt the going concern basis of accounting in preparing the annual financial statements.

### 2. ACCOUNTING POLICIES

#### 2.1 Basis of preparation of financial statements

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

#### 2.2 Taxation

Current tax, including UK corporation tax and foreign tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

Full provision is made for deferred tax assets and liabilities arising from all timing differences between the recognition of gains and losses in the financial statements and recognition in the tax computation.

A net deferred tax asset is recognised only if it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax assets and liabilities are calculated at the tax rates expected to be effective at the time the timing differences are expected to reverse.

Deferred tax assets and liabilities are not discounted.
