Notes to the Statement of Affairs

Basis of preparation

The estimated book values are based on the management accounts of the company to 1st October 2014 rolled forward to 2nd October 2014

The realisable value in the Statement of Affairs have been prepared on the assumption that the administrator realises the assets by selling the assets of the business piecemeal rather than selling the business as a going concern

The estimates of realisable values in the statement do not include any costs of realising the assets, for example paying for the operation of the company during the administration period

No amounts have been included in relation to steps taken by the administrator to purchase more stock from new suppliers or from existing suppliers to sell at a profit during administration period

The Statement of Affairs has been prepared on the basis that the security granted to Swedbank is valid. The directors express no views on any legal issues there may be concerning the extent, character or validity of the security

Charge in favour of Swedbank

A charge was granted to Swedbank on 12 July 2013 in the form of first priority of the shares and assets of the company to secure amounts due under £15,997,500 Term Loan Facility

Total debt owed to Swedbank as at 2nd October 2014 amounts to £16,532,978 including interest. Swedbank terminated the Term Loan Facility on 26th September 2014 and recalled all outstanding amounts together with accrued interest which are immediately due and payable

Notes on material asset realisation assumptions

Stocks

The directors' assumption on the net realisable value of inventory is based on expected realisation percentages to the stock. The main assumption on realisable value is based on the directors' recent experience of closure of business

Notes to the Statement of Affairs

Trade Debtors and Rent Deposit

The directors assumption on net realisable value of Trade debtors is based on recent experience with respect to impact on completion and delivery of current as well as future projects

The directors have not included an estimated amount in relation to net realisable value of rent deposits. The amount to be realised will depend on the costs associated with the strategy of the administrator and there is a high level of uncertainty as to the outcome

Notes on material asset realisation assumptions

Employees

Preferential creditors mainly includes holiday pay due to employees as at 2nd October 2014. The directors have estimated unsecured employee claims and included the same under unsecured creditors

Accruals

Where invoices were subsequently received relating to goods/services received before appointment of administrators, these have been allocated to respective creditors listed. In the time available, the directors have been unable to fully estimate and hence, allocate all accruals and liabilities in respect of services provided to a specific supplier. Most of these liabilities will be payable to creditors already listed

Lease and other property obligations

In the time available, the directors have been unable to make an assessment of potential claims in relation to dilapidation and strip out costs to return the premises to their original condition. Further, the actual amount that will be claimed by landlord is unknown and will depend on future lettings
