Revenue recognition

Turnover comprises management fees, exclusive of VAT. Management fees are recognised when they become receivable.

Income tax

The taxation charge for the year represents the sum of the tax currently payable and deferred tax. The charge is recognised in the statement of comprehensive income according to the accounting treatment of the related transaction.

Current tax payable or receivable is based on the taxable income for the period and any adjustment in respect of prior periods and is calculated using tax rates that have been enacted or substantively enacted at the end of the reporting period.

Tax payable upon the realisation of revaluation gains recognised in prior periods is recorded as a current tax charge with a release of the associated deferred tax.

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted at the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled. Deferred income tax assets are recognised only to the extent that it is probable that taxable profit will give rise to a future tax liability against which the deferred tax assets can be recovered.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same tax authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

Stocks

Development properties and development land are shown in the financial statements at the lower of cost and net realisable value. Cost includes legal and surveying charges incurred during the acquisition plus improvement costs. Net realisable value is calculated based on whether the land or property is to be sold in its current condition or whether it will be subject to further development. Where the land or property is to be further developed, net realisable value is based on the future expected value. Where the land or property is to be sold in its current condition, net realisable value is based on current market value.

Non-derivative financial instruments

Non- derivative financial instruments comprise amounts recoverable on contracts, cash and cash equivalents, loans and borrowings, and trade and other creditors.

Amounts recoverable on contracts are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

Trade and other creditors are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

Interest-bearing borrowings are recognised initially at fair value less attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are stated at amortised cost using the effective interest method, less any impairment losses.

2. Accounting policies (continued)

Judgements and key sources of estimation uncertainty

The preparation of the financial statements requires management to make significant judgements, estimates and assumptions that affect the amounts reported. The directors have considered whether there are any such sources of estimation or critical accounting judgements in preparing the financial statements and do not consider there to be any for the purposes of disclosure.

3. Turnover

Turnover arises from:

	2016 £	2015 £
Development management fees	<u>284,001</u>	<u>274,261</u>

The whole of the turnover is attributable to the principal activity of the company wholly undertaken in the United Kingdom.

4. Operating profit

Audit fees of £2,600 (2015: £1,500) are statutory audit fees only and are borne by another Group company.

There are no persons holding service contracts with the company. None of the directors received any remuneration from the company during the year, or in the previous year, in respect of their services to the company.

5. Interest receivable and similar income

7. Tax on loss on ordinary activities

Major components of tax income

	2016 £	2015 £
Current tax:		
UK current tax income	(39,258)	(53,663)
Tax on loss on ordinary activities	<u>(39,258)</u>	<u>(53,663)</u>

Reconciliation of tax income

The tax assessed on the loss on ordinary activities for the year is the same as (2015: the same as) the standard rate of corporation tax in the UK of 20% (2015: 20.50%).

	2016 £	2015 £
Loss on ordinary activities before taxation	(196,292)	(261,770)
Loss on ordinary activities by rate of tax	<u>(39,258)</u>	<u>(53,663)</u>

Factors that may affect future tax income

Reductions in the UK corporation tax rate from 20% to 19% (effective from 1 April 2017) and to 17% (effective 1 April 2020) have been substantively enacted. These will reduce the company's future current tax charge accordingly.

8. Stocks

	2016 £	2015 £
Stock	<u>201,095</u>	<u>–</u>

The replacement value of stock is £201,095 based on market value at 30 September 2016. In the opinion of the directors, there is no material difference between the replacement value and the carrying value.

The directors have reviewed the net realisable value of the development. They have concluded that the net realisable value exceeds the book cost of the properties and therefore no provision against carrying value of stock is required.
