The directors present their strategic report for Kyiv Finance plc (the “Company”) for the year ended 28 February 2015.

Activity, Objective, Business Model and Review of the Year

The Company was incorporated in England and Wales on 25 February 2011 as a public limited company. The principal activity of the Company is to carry on the business of a finance and investment company. In that capacity it has undertaken the following transactions:

- Issued \$300,000,000 Fixed Rate 9.375% Loan Participation Notes (“LPN”) due July 2016, listed on the Irish Stock Exchange;
- Granted a loan of \$300,000,000 to The Kyiv City Council (“The City”), a legal entity under the laws of Ukraine and the Company’s ultimate controlling party (see note 14).

Going Concern

The directors have reviewed expenses and cash flows and are satisfied that for the foreseeable future there are sufficient funds available to meet expenses as and when they fall due.

The directors consider the financial position of the Company to be satisfactory.

Should the political and social unrest escalate and in the event of a delay or default in the payment of interest by The City, the directors would seek advice on the most appropriate next course of action.

Results

The Company’s loss before tax for the year was \$13,834 (2014: profit \$8,876) and the directors do not recommend the payment of a dividend (2014: nil).

The Company had shareholders’ funds of \$70,263 at the year end (2014: \$84,597).

Key Performance Indicators

Financial KPIs - The key performance indicators of the business is considered to be the payment and receipt of interest and the shareholders’ funds, which at the year end was \$70,263.

The directors have monitored the actual receipts and payments of interest to and from the Company through the bank statements to ensure the payment obligations are met. The directors believe that all conditions of the transaction documents have been met.

Non-financial KPIs – as the purpose of the business is entirely finance related, the directors are of the view that there are no meaningful non-financial KPIs that could be adopted.

Principal Risks and Uncertainties

The principal risks and uncertainties for the Company are primarily credit, interest rate and foreign exchange risks. This includes the correct and timely receipt of interest and principal on the loan due from The City and, to that effect during the year under review, all amounts were paid completely and timely when they were due.

The City is the only client of Kyiv Finance plc. The directors are aware of the heightened political and social unrest in the Ukraine. The principal risk factors to Loan Note holders are set out in the prospectus of the Note issue, dated 4 July 2011. However, the directors note that the City has performed all its obligations under the agreements and the directors are satisfied that The City will continue to fulfil its obligations to repay principal and interest on the loan when they fall due. In the event of a delay or default in the payment of interest by The City, the terms of the 9.375% LPN due 2016 make it clear that the Company is only obligated to pay interest and capital to Loan Note holders to the extent that amounts have been received from The City.

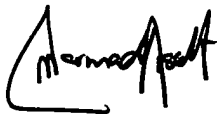

The directors have considered the nature and structure of the Company and are satisfied that there is sufficient capital in relation to the business activities of the Company and levels of planned financial performance.

Future Developments

The directors consider the financial position of the Company to be satisfactory and that the Company will continue to be in existence for the foreseeable future. However, following the repayment of the loan by The City, and the redemption of the Loan Participation Notes in July 2016, and in the absence of any new issuances, the Company may consider filing for voluntary wind up more than 3 months after the last interest payment date.

As at the date of signing, the directors have not agreed any formal plans for the wind up of the Company and therefore the accounts have been prepared on a going concern basis.

Going Concern

The directors consider that the Company has adequate capital and liquid resources, an appropriate business model and financial structure and suitable arrangements in place for it to be able to continue in operational existence for the foreseeable future. Therefore the directors believe it appropriate for the financial statements to be prepared on a going concern basis.

Should the political and social unrest escalate and in the event of a delay or default in the payment of interest by The City, the directors would seek advice on the most appropriate next course of action.

A discussion of the Company's objectives, policies, strategies and risks with regard to financial instruments can be found in Note 9 to the financial statements.
