**NOTES TO THE ABBREVIATED ACCOUNTS  
FOR THE YEAR ENDED 31 MAY 2014**

**1. ACCOUNTING POLICIES**

**Accounting convention**

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

**Turnover**

Turnover represents the fair value of rents receivable, excluding value added tax.

**Tangible fixed assets**

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Plant and machinery etc - 33% on cost

**Investment property**

Investment property is shown at most recent valuation. Any aggregate surplus or deficit arising from changes in market value is transferred to a revaluation reserve.

In accordance with Statement of Standard Accounting Practice No.19 :-

(i) investment properties are revalued annually and the aggregate surplus or deficit is transferred to a revaluation reserve; and

(ii) no depreciation or amortisation is provided in respect of freehold investment properties.

This treatment as regards to the company's investment properties, may be a departure from the requirement of the Companies Act concerning depreciation of fixed assets. However, these properties are not held for consumption but for investment and the directors consider that systematic annual depreciation would be inappropriate. The accounting policy adopted is therefore necessary for the accounts to give a true and fair view.

**Deferred tax**

The charge for taxation is based on the results for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. In accordance with Financial Reporting Standard 19, provision is made for deferred tax in respect of all timing differences that have originated but not reversed by the balance sheet date. Deferred tax assets are only recognised when it is more likely than not that the deferred tax asset will be recovered. Deferred tax is measured using rates of tax that have been enacted or substantially enacted by the balance sheet date. Deferred tax balances are not discounted. Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.
