**1 Accounting policies**

**Basis of preparation**

The full financial statements, from which these abbreviated accounts have been extracted, have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (Effective April 2008).

**Turnover**

Turnover represents amounts chargeable in respect of the sale of goods and services to customers.

**Depreciation**

Depreciation is provided on tangible fixed assets so as to write off the cost or valuation, less any estimated residual value, over their expected useful economic life as follows:

<b>Asset class</b>	<b>Depreciation method and rate</b>
Fixtures and fittings	20% reducing balance

**Investment properties**

Investment properties are included as assets at their estimated Open Market Values. In accordance with accounting standards, no depreciation is provided in respect of freehold investment properties, including fixed plant, which is included in properties. The requirement of the Companies Act 2006 is to depreciate all properties, but that requirement conflicts with the generally accepted accounting principle set out in accounting standards. The directors consider that this accounting policy is necessary for the accounts to give a true and fair view. Depreciation or amortisation is only one of the factors reflected in the accounts valuation and the amount attributable to this factor cannot be separately identified or quantified. If this departure from the Act had not been made, the profit for the financial year would have been reduced by depreciation.

**Financial instruments**

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities. Where shares are issued, any component that creates a financial liability of the company is presented as a liability in the balance sheet. The corresponding dividends relating to the liability component are charged as interest expense in the profit and loss account.
