COMPANIES HOUSE

Director's Report

The director presents the Director's Report and the financial statements for the period ended 31 May 2014.

Principal activities and business review

The company was incorporated on 27 June 2013 as a wholly-owned subsidiary of The Scottish Coal Company Limited (a company incorporated in Scotland).

The Scottish Coal Company Limited went into liquidation on 7 May 2013. Pursuant to certain permissions granted to its liquidators by the High Court of Justice, The Scottish Coal Company Limited's open cast coal works at Chalmerston were sold to the company.

The company's principal activity is the management of the former open cast working at Chalmerston whilst mining and restoration planning is undertaken. The activity has preserved employment opportunities at the site, and is being carried out in a manner designed to mitigate the outstanding restoration liabilities resulting from the prior workings of the site.

The results for the company show turnover of £18k and a profit before tax for the year of £18k.

Risks and uncertainties

The risks and uncertainties facing the company are inherently linked to those of the group. The principal risks and uncertainties of the group which includes those of this company are discussed in detail in the 'Statement of risks relating to the group's business' in the financial review in the group financial statements.

Those that have particular importance for this company are:

- Human resources and operations;
- Environmental; and
- Health and safety.

Current trading and outlook

The company was incorporated on 27 June 2013 and this is the company's first Director's Report and financial statements. The initial trading period has been in line with managements expectations.

The Board is also pleased to report that steady progress is being made in designing and delivering a mining plan that mitigates the outstanding restoration liabilities at the site, enabling it ultimately to be restored more effectively than would have been possible upon the liquidation of The Scottish Coal Company Limited, the previous owner and operator of the site.

Proposed dividend

The director does not recommend the payment of a dividend.

Director's Report *(continued)*

Director

The directors who held office during the period and up to the date of this report was as follows:

IM Crosland (appointed 27 June 2013)

Employees

Applications for employment by disabled persons are always fully considered. Employment policies are designed to provide opportunities irrespective of colour, ethnic or national origin, nationality, sex or marital status. In the event of employees becoming disabled every effort is made, including appropriate training, to ensure that their employment with the company continues.

The directors recognise the importance of good communications and good relations with employees.

Exemption from audit

For the period to 31 May 2014 the company qualified as small under section 477 of the Companies Act 2006 ("the Act"). The ultimate parent company, The Scottish Coal Company Limited, is in liquidation and has not been required to submit audited financial statements in the last two years, as such the Director is satisfied that these financial statements are entitled to an exemption from audit.

The members have not required the company to obtain an audit of its accounts for the period in question in accordance with section 476. The Director acknowledges his responsibilities for complying with the requirements of the Act with respect to accounting records and the preparation of accounts.

These accounts have been prepared in accordance with the provisions applicable to companies subject to the small companies' regime.

On behalf of the board

IM Crosland
Director

Statement of Directors' Responsibilities in Respect of the Directors' Report and the Financial Statements

The directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with UK Accounting Standards and applicable law (UK Generally Accepted Accounting Practice).

Under Company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that year.

In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company and to prevent and detect fraud and other irregularities.

Profit and loss account
for the period ended 31 May 2014

	<i>Note</i>	2014 £000
Turnover	<i>1,2</i>	18

Notes

(forming part of the financial statements)

1 Accounting policies

The following accounting policies have been applied consistently, in dealing with items which are considered material in relation to the company's financial statements.

Basis of preparation

The financial statements have been prepared in accordance with applicable accounting standards under Financial Reporting Standard for Smaller Entities, and under the historical cost accounting rules.

The current economic conditions create an element of uncertainty over demand for the company's products but the company's forecasts and projections, taking account of reasonably possible changes in trading performance, show that the company is expected to have a sufficient level of financial resources available through current banking and other facilities and therefore the directors believe that the company is well placed to manage its business risks successfully despite the economic uncertainty. After making enquiries, the directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to prepare the financial statements on a going concern basis.

Under Financial Reporting Standards for Smaller Entities the company is exempt from the requirement to prepare a cashflow statement.

As the company is a wholly owned subsidiary of The Scottish Coal Company Limited (in liquidation), the company has taken advantage of the exemption contained in FRS 8 and has therefore not disclosed transactions or balances with wholly owned entities which form part of the group.

Taxation

The charge for taxation is based on the result for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Deferred tax is recognised without discounting, in respect of all timing differences between the treatment of certain items for taxation and accounting purposes, which have arisen but not reversed by the balance sheet date, except as otherwise required by FRS 19.

Classification of financial instruments issued by the Company

Following the adoption of FRS 25, financial instruments issued by the Company are treated as equity (i.e. forming part of shareholders' funds) only to the extent that they meet the following two conditions:

- a) they include no contractual obligations upon the Company to deliver cash or other financial assets or to exchange financial assets or financial liabilities with another party under conditions that are potentially unfavourable to the Company; and
- b) where the instrument will or may be settled in the Company's own equity instruments, it is either a non-derivative that includes no obligation to deliver a variable number of the Company's own equity instruments or is a derivative that will be settled by the Company's exchanging a fixed amount of cash or other financial assets for a fixed number of its own equity instruments.

To the extent that this definition is not met, the proceeds of issue are classified as a financial liability. Where the instrument so classified takes the legal form of the Company's own shares, the amounts presented in these financial statements for called up share capital and share premium account exclude amounts in relation to those shares.

Finance payments associated with financial liabilities are dealt with as part of interest payable and similar charges. Finance payments associated with financial instruments that are classified as part of shareholders' funds, are dealt with as appropriations in the reconciliation of movements in shareholders' funds.

Financial instruments

Where the company enters into financial guarantee contracts to guarantee the indebtedness of other companies within its group, the company considers these to be insurance arrangements and accounts for them as such. In this respect, the company treats the guarantee contract as a contingent liability until such time as it becomes probable that the company will be required to make a payment under the guarantee.

Notes (continued)

1 Accounting policies (continued)

Turnover

Turnover represents amounts receivable for goods and services net of VAT and trade discounts. Turnover is recognised when services are delivered and title has passed.

2 Turnover

The total turnover of the company for the period has been derived from its principal activity, wholly undertaken in the United Kingdom.

3 Staff numbers and costs

The average number of persons employed by the company (including directors) during the period, analysed by category, was as follows:

	Number of employees
	2014
Directors	1

The directors received no remuneration in respect of their services to the company during the current period.

4 Taxation

Analysis of charge in period

	2014 £000
<i>UK Corporation tax</i>	
Current tax expense	4
Tax on profit on ordinary activities	4

Factors affecting the tax charge for the current year

The current tax charge for the year is equal to the standard rate of corporation tax in the UK of 22.64%.

	2014 £000
<i>Current tax reconciliation</i>	
Profit on ordinary activities before tax	18
Current tax at 22.64%	4
Total current tax charge (see above)	4

Notes (continued)

4 Taxation (continued)

Factors that may affect future tax expenses

The March 2013 budget announced that the main rate of corporation tax will further reduce to 20% by 1 April 2015 in addition to the planned reduction to 21% by 2014 previously announced in the December 2012 Autumn Statement. These changes were substantively enacted during the year and are therefore included within the figure above.

	<hr/>

Notes *(continued)*

9 Contingent liability

The Company is subject to certain restoration obligations due to its ownership of the land at the Chalmerston open cast coal works. The cost of fulfilling such obligations has been variously estimated as potentially ranging from £23,374,000 (as estimated by The Independent Mining Engineers report to East Ayrshire Council) and £32,000,000 (as estimated by Hargreaves Surface Mining Limited).

The Director has assessed the likelihood of incurring such expenses as remote due to certain mitigating factors. These mitigating factors include the ongoing process of mitigating the outstanding restoration liabilities, including ongoing negotiations with local government.

10 Ultimate parent company and parent undertaking of larger group

The company is a subsidiary undertaking of The Scottish Coal Company Limited (in liquidation). The Scottish Coal Company Limited (acting by its liquidators) is the company's ultimate controlling party.

The only group in which the results of the company would be consolidated is that headed by The Scottish Coal Company Limited (in liquidation). However, as the parent company is in liquidation no such consolidated accounts have been prepared.
