Tethra Energy Limited
Notes to the Abbreviated Accounts
for the year ended 31 December 2014

1 Accounting policies

Basis of preparation

The accounts have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2015).

The directors, having regard to the nature, size and complexity of the business, have assessed the financial risks affecting the company and its operations for the 12 months from the approval of the financial statements and considers it appropriate to prepare the financial statements on a going concern basis.

Turnover

Turnover represents the value, net of value added tax and discounts, of services provided to customers.

Turnover is recognised as earned when, and to the extent that, the business obtains the right to consideration for its performance. It is measured at the fair value of the right to consideration, which represents amounts chargeable to clients, including expenses.

Deferred taxation

Full provision is made for deferred taxation resulting from timing differences between the recognition of gains and losses in the accounts and their recognition for tax purposes. Deferred taxation is calculated on an un-discounted basis at the tax rates which are expected to apply in the periods when the timing differences will reverse.
