## **DIRECTORS' RESPONSIBILITIES STATEMENT FOR THE YEAR ENDED 31 DECEMBER 2020**

---

The directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors of the company have elected not to include a copy of the income statement within the financial statements.

These financial statements have been prepared and delivered in accordance with the provisions applicable to companies subject to the small companies' regime.

The financial statements were approved by the board of directors and authorised for issue on 21 June 2021 and are signed on its behalf by:

S Ho  
Director

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2020

---

### 1 Accounting policies

#### Company information

CEG Technology UK Limited is a private company limited by shares and is registered and incorporated in England. The registered office is Rivermead House, 7 Lewis Court, Grove Park, Enderby, Leicestershire, LE19 1SD.

#### Accounting convention

These financial statements have been prepared in accordance with FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" including the adoption of the amendments issued in December 2017 ("FRS 102") and the requirements of the Companies Act 2006 as applicable to companies subject to the small companies regime and under the historical cost convention. The disclosure requirements of section 1A of FRS 102 have been applied other than where additional disclosure is required to show a true and fair view.

The financial statements are prepared in sterling, which is the functional currency of the company. Monetary amounts in these financial statements are rounded to the nearest £.

The financial statements have been prepared under the historical cost convention. The principal accounting policies adopted are set out below.

#### Going concern

These financial statements are prepared on the going concern basis.

At 31 December 2020 the company had net liabilities of £6.6m and net current liabilities of £10.9m, including £12.2m of intra group debt with no scheduled repayment date.

The company, which is in the early stages of its development, continues to trade at a loss and relies on the financial support of its parent undertakings, Clean Electricity Generation B.V. and Momentum Capital B.V. to meet its funding needs.

Momentum Capital B.V. has funded the company to date through intermediate holding companies and has confirmed, in a letter of support, its intention to continue to fund the company for a period of at least 12 months from the date of approval of these financial statements. The relevant group undertakings have also confirmed that they will not demand repayment of the existing intra group debt unless the company has been provided with the funds to allow this to be settled.

Momentum Technology Holding B.V. is raising additional funds from its investor base to provide the forecast funding needs of the next 12 months of the company and its other investments. This process has been delayed by the Covid-19 outbreak but it shows recovery in the course of 2021.

Having reviewed the projections of the company and taking into account the continued support of its ultimate holding company, and its ability to raise further finance, even though the future fund raising represents a material uncertainty, the directors of this company believe they have reasonable grounds to conclude that the company has adequate resources to continue in operational existence for the foreseeable future and that it is appropriate to prepare the financial statements on a going concern basis.

The financial statements do not include any adjustments that would result if the company was unable to continue as a going concern.

# CEG TECHNOLOGY UK LIMITED

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2020

---

### 1 Accounting policies (Continued)

#### Turnover

Turnover is recognised to the extent that it is probable that the economic benefit will flow to the company and the revenue can be reliably measured. Turnover is measured as the fair value of the consideration received or receivable, excluding discounts, value added tax and other sales taxes.

Turnover in respect of sales of goods is recognised when the sale and associated costs can be measured reliably, future economic benefits are probable and the risks and rewards of ownership have been transferred to the customer. Sale of goods are recognised when goods are delivered and legal title has been passed and the company has no continuing managerial involvement associated with ownership or effective control of the goods sold.

#### Intangible fixed assets other than goodwill

The company capitalises development expenditure as an intangible asset when it is able to demonstrate all of the following:

- a) The technical feasibility of completing the development so the intangible asset will be available for use or sale.
- b) The intention to complete the development and to use or sell the intangible asset.
- c) The ability to use or sell the intangible asset.
- d) How the intangible asset will generate probable future economic benefits.
- e) The availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset.
- f) The ability to measure reliably the expenditure attributable to the intangible asset during its development.

Capitalised development expenditure is initially recognised at cost and subsequently measured at cost less accumulated amortisation and accumulated impairment losses.

Amortisation is recognised so as to write off the cost of each asset less their residual values over their expected useful lives on a straight line basis, as follows:

Torrefaction development	20 years
--------------------------	----------

For the ongoing projects which are still being developed the period which the costs are to be amortised over has not yet been determined by the directors. The directors will carry out a full impairment review at the end of each accounting period to ascertain whether there is any indication that the circumstances which have justified the deferral of the expenditure no longer apply, or are considered doubtful. The expenditure which is considered to be irrecoverable are recognised as impairment losses and recognised in profit or loss.

All research expenditure and other development expenditure that does not meet the above conditions is expensed as incurred.

#### Tangible fixed assets

Tangible fixed assets are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

Depreciation is recognised so as to write off the cost of each asset less their residual values over their expected useful lives on a straight line basis, as follows:

Plant and machinery	4 years
Fixtures, fittings and equipment	3 years

# CEG TECHNOLOGY UK LIMITED

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2020

---

### 1 Accounting policies (Continued)

#### **Tangible fixed assets (continued)**

The gain or loss arising on the disposal of an asset is determined as the difference between the sale proceeds and the carrying value of the asset, and is credited or charged to the statement of income.

#### **Impairment of fixed assets**

At each reporting period end date, the company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Shortfalls between the carrying value of fixed assets and their recoverable amounts, being the higher of fair value less costs to sell and value-in-use, are recognised as impairment losses. Impairment losses are recognised in profit or loss.

Recognised impairment losses are reversed if, and only if, the reasons for the impairment loss have ceased to apply. Reversals of impairment losses are recognised in profit or loss. On reversal of an impairment loss, the depreciation or amortisation is adjusted to allocate the asset's revised carrying amount (less any residual value) over its remaining useful life.

#### **Stocks**

Stocks are stated at the lower of cost and estimated selling price less costs to complete and sell. Cost comprises direct materials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the stocks to their present location and condition.

At each reporting date, an assessment is made for impairment. Any excess of the carrying amount of stocks over its estimated selling price less costs to complete and sell is recognised as an impairment loss in the statement of income. Reversals of impairment losses are also recognised in profit or loss.

#### **Cash and cash equivalents**

Cash and cash equivalents are basic financial instruments and include cash in hand, deposits held at call with banks, other short-term liquid investments with original maturities of three months or less.

#### **Financial instruments**

The company has elected to apply the provisions of Section 11 'Basic Financial Instruments' and Section 12 'Other Financial Instruments Issues' of FRS 102 to all of its financial instruments.

Financial assets and liabilities are recognised when the company becomes party to the contractual provisions of the instrument and are offset only when the company currently has a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise the asset and settle the liability simultaneously.

#### **Basic financial assets**

Basic financial assets, which include trade and other debtors, amounts owed by group undertakings and cash and bank balances, are initially measured at transaction price including transaction costs and are subsequently carried at amortised cost using the effective interest method unless the arrangement constitutes a financing transaction, where the financial asset is measured at the present value of the future receipts discounted at a market rate of interest.

# CEG TECHNOLOGY UK LIMITED

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2020

---

### 1 Accounting policies (Continued)

#### ***Classification of financial liabilities***

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.

#### ***Basic financial liabilities***

Basic financial liabilities, including trade and other creditors and amounts due to group undertakings that are classified as debt, are initially recognised at transaction price unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future payments discounted at a market rate of interest.

#### ***Equity instruments***

Equity instruments issued by the company are recorded at the fair value of proceeds received, net of transaction costs. Dividends payable on equity instruments are recognised as liabilities once they are no longer at the discretion of the company.

#### ***Taxation***

The tax expense represents the sum of the current tax expense and deferred tax expense. Current tax assets are recognised when tax paid exceeds the tax payable.

Current and deferred tax is charged or credited to the statement of income, except when it relates to items charged or credited to other comprehensive income or equity, when the tax follows the transaction or event it relates to and is also charged or credited to other comprehensive income, or equity.

Current tax assets and current tax liabilities and deferred tax assets and deferred tax liabilities are offset, if and only if, there is a legally enforceable right to set off the amounts and the entity intends either to settle on the net basis or to realise the asset and settle the liability simultaneously.

Current tax is based on taxable profit for the year. Current tax assets and liabilities are measured using tax rates that have been enacted or substantively enacted by the reporting date.

Deferred tax is calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled based on tax rates that have been enacted or substantively enacted by the reporting date.

Deferred tax liabilities are recognised in respect of all timing differences that exist at the reporting date. Timing differences are differences between taxable profits and total comprehensive income that arise from the inclusion of income and expenses in tax assessments in different periods from their recognition in the financial statements. Deferred tax assets are recognised only to the extent that it is probable that they will be recovered by the reversal of deferred tax liabilities or other future taxable profits.

#### ***Employee benefits***

The costs of short-term employee benefits are recognised as a liability and an expense, unless those costs are required to be recognised as part of the cost of stock or fixed assets.

The cost of any unused holiday entitlement is recognised in the period in which the employee's services are received.

Termination benefits are recognised immediately as an expense when the company is demonstrably committed to terminate the employment of an employee or to provide termination benefits.

# CEG TECHNOLOGY UK LIMITED

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2020

### 1 Accounting policies (Continued)

#### Retirement benefits

For defined contribution schemes the amount charged to the statement of income is the contributions payable in the year. Differences between contributions payable in the year and contributions actually paid are shown as either accruals or prepayments.

#### Foreign exchange

Transactions in currencies other than the functional currency (foreign currency) are initially recorded at the exchange rate prevailing on the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the reporting date. Non-monetary assets and liabilities denominated in foreign currencies are translated at the rate ruling at the date of the transaction, or, if the asset or liability is measured at fair value, the rate when that fair value was determined.

All translation differences are taken to statement of income, except to the extent that they relate to gains or losses on non-monetary items recognised in other comprehensive income, when the related translation gain or loss is also recognised in other comprehensive income.

### 2 Employees

The average monthly number of persons (including directors) employed by the company during the year was as follows:

	2020 Number	2019 Number
Total	3	3

### 3 Intangible fixed assets

	Torrefaction Development £	Dust Burner Development £	Total £
<b>Cost</b>			
At 1 January 2020	3,548,032	731,328	4,279,360
Additions	611,828	-	611,828
At 31 December 2020	4,159,860	731,328	4,891,188
<b>Amortisation and impairment</b>

# CEG TECHNOLOGY UK LIMITED

## NOTES TO THE FINANCIAL STATEMENTS (CONTINUED) FOR THE YEAR ENDED 31 DECEMBER 2020

### 3 Intangible fixed assets (Continued)

The costs that have been capitalised are in respect of the development of the proprietary torrefaction technology and related projects. In accordance with the accounting policies in note 1, the directors carried out an impairment review of the value of the dust burner development which resulted in an impairment provision of £365,664, which is included in amortisation and impairment charge in the year (see note 6). The directors are of the opinion that the remaining expenditure on the dust burner development is fully recoverable, and should be deferred and written off against future income generated from this intellectual property.

### 4 Tangible fixed assets

	Plant and machinery	Fixtures, fittings and equipment	Total
	£	£	£
<b>Cost</b>			
At 1 January 2020	217,772	9,014	226,786

## **NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)**

### **FOR THE YEAR ENDED 31 DECEMBER 2020**

---

#### **10 Audit report information**

As the income statement has been omitted from the filing copy of the financial statements, the following information in relation to the audit report on the statutory financial statements is provided in accordance with s444(5B) of the Companies Act 2006:

The auditor's report was unqualified but we draw attention to note 1 in the financial statements concerning the company's ability to continue as a going concern. The conditions in note 1 relate to the continued availability of the funding from parent undertakings Clean Electricity Generation B.V. and Momentum Capital B.V. and their ability to raise further finance to continue to be able to support this company, to enable it to meet its liabilities as they fall due.

As stated in note 1, these events or conditions, along with the other matters set out in note 1, indicate that a material uncertainty exists that may cast significant doubt on the company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

The senior statutory auditor was Mitul Raja FCA.  
The auditor was RSM UK Audit LLP.
