Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE PERIOD 8 OCTOBER 2013 TO 31 DECEMBER 2014**

1. GENERAL INFORMATION

GHG London Management Limited is a company incorporated in England and Wales with registered number 08723531.

The address of the registered office is disclosed on page 1 of these financial statements, and the principal activity of the company is described in the Directors report.

The functional and presentational currency of the company is £ sterling.

2. ACCOUNTING POLICIES

Basis of preparation

These financial statements have been prepared in accordance with International Financial Reporting Standards and IFRIC interpretations and with those parts of the Companies Act 2006 applicable to companies reporting under IFRS. The financial statements have been prepared under the historical cost convention.

Taxation

Current taxes are based on the results shown in the financial statements and are calculated according to local tax rules, using tax rates enacted or substantially enacted by the statement of financial position date.

Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less.

Trade and other receivables

Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less any provision for impairment. A provision for impairment is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables. Indicators that a trade receivable is impaired include significant financial difficulties of the debtor, the probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments.

Trade and other payables

Trade payables and other payables are classified as 'Trade and other payables'. These are measured at amortised cost and the interest expense is recognised by applying the appropriate interest rate of the contractual arrangement.

Interest-bearing loans and borrowings

Obligations for loans and borrowings are recognised when the Company becomes party to the related contract, and are measured initially at fair value, net of any attributable transaction costs incurred. Interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest method, with any differences between the proceeds, net of transaction cost, and the redemption value being recognised over the period of borrowings. Interest-bearing loans and borrowings are classified as current unless the Company has an unconditional right to defer payment for a period of at least twelve months from the end of the accounting period.

Interest

Interest costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial period of time to get ready for their intended use are added to the cost of that asset, until such time as the asset is substantially ready for its intended use.

All other interest costs are dealt with in the income statement for the period.

Share capital

Ordinary shares are classed as equity.

Financial risk management

The Company's financial risk management policy is to ensure that adequate financial resources are available for the development of the Company's operations whilst managing its financial risks, including interest rate risk, market risk, credit risk, liquidity risk, price risk and cash flow risk.

Interest rate risk

The Company's interest rate risk arises primarily from its borrowings. Borrowings at variable rate expose the Company to cash flow interest rate risk. Borrowings at fixed rates expose the Company to fair value interest rate risk.

NOTES TO THE FINANCIAL STATEMENTS - continued
FOR THE PERIOD 8 OCTOBER 2013 TO 31 DECEMBER 2014

2. ACCOUNTING POLICIES - continued**Credit risk**

The Company's exposure to credit risk arises mainly from cash holdings. The Company's cash holdings are all held with major financial institutions whose financial status is regularly reviewed. The Company's exposure to credit risk here is the remote possibility of default of the deposit taker, with a maximum exposure equal to the carrying value of these holdings as set out in note 16.

Currency Risk

Fluctuations in exchange rates can have an impact on the Company. Transactions in a currency other than the Company's functional currency can give rise to transactional currency exposure for the Company's financial assets and liabilities.

Liquidity and cash flow risks

The Company maintains a certain level of cash to meet working capital requirements on a day to day basis. Borrowing facilities and cash flow requirements are regularly reviewed to ensure sufficient funds are available.

Capital risk management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to raise further capital if required.
