## 1 | OVERVIEW

## **Group snapshot**

#### Revenue

Revenue has increased by over 12% in the last year from £712m in 2022 to £800m in 2023

#### **Carbon offsets**

Our renewable energy sites' carbon saving is over **681,101** carbon tonnes this year

## **Energy generation**

Our renewable energy assets produce enough energy to power over a million UK homes

## **Number of loans**

Over the year we provided financing to, on average **224** borrowers in the UK

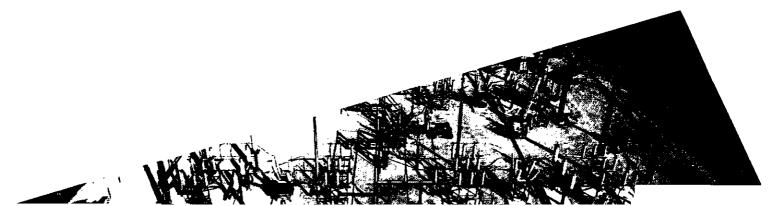

## **Number of employees**

We employ over **1,500** people

## **Number of sites**

We own **229**energy sites spread
predominantly across
the UK

## **Directors Report'**

Fern Trading Limited (the Company, or together). The Company's share price delivered \$10% growth with its subsidiaries the "Group") rargets consistent. growth for shareholders over the long-term, with a focusion steady and predictable prowth comprising more than 330 companies that operate across a range of industries. The Gircup has been tracing for 13 years successfully havigating the economic cycles and market votability over this period. Our Group has established a stable presence in its sectors. of operation and we expect to continue to perform predictably in these sectors

The UK faced a challenging economic backgropover the financial year. Our Group has continued to demonstrate resilience, though was not immune to the challenging marker conditions of the sectors it operates in The financial results for the period indicate an accounting loss, this is primarily due to capital deployment into newer asset intensive parts. of the Group, which are expected to deliver profit growth in the future. Extraordinary costs incurred in the year have a further impact on the Group results.

Our renewable energy business is now a mature and well-established sector for our Group, generating consistent revenues. Our growth strategy in our newer fibre and housebuilding divisions have contributed to an accounting loss this year, ahead of being able to deliver growth in profits in future years.

Our Group comprises energy property lending fibre. and housebuilding, which includes retirement living. We have grown to be a significant presence within our mature sectors, producing 4.2% of the UK's solar. energy and 2.7% of the UK's onshore windlenergy. outbut. We have built a property lending business, with a book of £4/4rn at year end which helps to support the construction and improvement of homes and commercial spaces throughout the UK. The businesses in durigrouping sectors, fibre and housebuilding, are establishing themselves as important placers in their markets and setting ambitious expansion tardet

over the past 12 months, a steadler increase when compared with the exceptional growth of 10% for the prior year. Over the longer term, we expect the Group to return to our target annual growth. The Tive year average annualised share price growth is 4.83%, ahead of our target 4.20% annual growth.

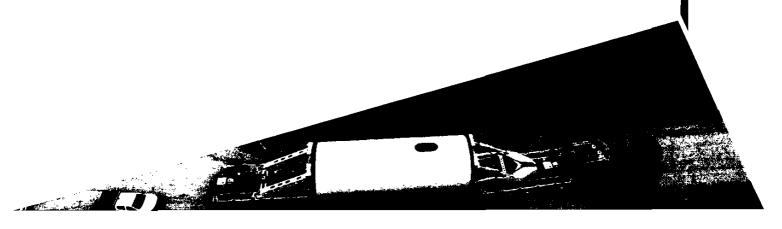

We remain a supportive employer, with an average of 1,500 full-time start across the businesses that we own and operate, and indirect employment provided for hundieds more people through contracts that we have in place.

#### A reflection on our year

Our Group delivered £800m of revenue (2022) E712m) while growing capital deployment, with net assets increasing to £2,366m at the end of the period (2022 E2,221m restated), led primarily by fixed asset expenditure in our energy and fibre divisions

Our more mature sectors operated robustly and we confinued to expand newer parts of the Group. As a result, our current year results reflect an EBITDA or £82m (2022, £195m), and an accounting loss before tax of £149m (2022) £56m restated profit) as these new sectors in particular fibre, are expected to be loss making in their early years of construction and operation, before becoming profitable in future

At the start of the period, long-term energy price. forecasts and energy forward rates remained highas the global economy continued to recover from the Covid-19 bandemic, together with seeking alternative sources of energy as a result of the conflict in Ukraine. Alongside nigh inflation, these factors had increased the value of the Group's energy assets in the prior period and in turn, the share price of the Group.

## **Directors Report'**

#### 1. Energy

Approximatively 50% of the Croub's net assets comprise energy generating assets such as solar energy sites and wind tarms. These assets provide tong term revenue streams, though their value can still be impacted by changes in pricing and demand. Our energy sector is intentionally diversified across a range of technologies to mitigate against less tayourable conditions in a specific asset class and contribute towards steady, predictable share price growth.

We expanded our solar portfolio with further additions in Zestec, which specialises in developing commercial solar rooftop sites in the UK. These sites are currently under construction, and we expect to retain and operate them once complete. The construction of Guardbridge, our wind farm in Poland remains on track and on budget, and well expect it to start generating electricity by December. 2023 Dulacca Wind Farm, our largescale construction project in Western Australia started generating electricity after year end and was subsequently solo in October 2023. At the bog nning of the financial year, in July 2022, we also completed the construction and sale of Darlington Point Solar Farm, one of the largest solar sites in Australia, with a capacity of 333MW.

Our successful and well-established biomass division continues to perform well, delivering stable returns since acquisition in 2015. We added a new site at Snetterton in East Anglia in April 2021, which has performed well since acquisition. Though it suffered some months of operational downtime following a gearbox fault, the insurance claim for replacement parts and loss of revenue was settled in full.

Construction at our Waste-to-Energy facility in Ayrshire has progressed as planned, with completion expected in 2025. The facility has been in development for four years and will be capable of processing over 185,600 tonnes per annum of non-recyclable, household, commercial, and industrial.

waste which would offierwise be sent to landfilt or exported. This will generate 12 MW of low carbon electricity, enough to power 30 000 hornes, and it will be the first large-scale subsidy free waste to energy project in western Scotland.

Our 26 reserve power sites have continued to perform whead of expectations, due to low generation from wind assets over the winter 2022/23, resulting in demand for adoitional generation to balance the grid

#### 2. Lending

Our property lending business continues to be a substantial part of the Group, representing around 15% of the Group's net assets, comprising short- and medium form secured loans to experienced property professionals. Our average loan book constituted over 224 loans this year to borrowers in the UK.

Our loans are written at conservative loan to value (".TV") levels (below 70%) to protect against a fall in property prices. At the end of the period, the average LTV for the loan book was 60%. The furbulent market this year, has reinforced, the importance of this strategy, which has served the Group well over its 13 year, history. We are naturally taking a cautious approach when assessing new lending opportunities considering the changing economic outlook.

Since inception in 2010, the Group has lent £2.49bh of property loans and has had a strong record of recovering its capital. However, the abrupt increase in interest rates in the current year has made it more difficult for some borrowers to refinance at the end of their loan term. This has contributed to a small increase in provisions and at year end, we recorded a provision of £30m against one commercial loan. Though we acknowledge this provision feels indeworthy, for context, it amounts to around 1% of the Group's net assets and is an cuttler compared to our track record. This does however serve to emphasise the importance of our experience and approach in the sector, including it sciplined duc

## **Directors Report'**

diligence, conservative loan-to-value ratios and an ability and willingness to flex activity in this sector during times of economic uncertainty. We will broadly in line with budget, despite challenging continue to adopt this approach throughout the committee way organicarly and via strategic.

#### 3. Fibre

In March, we successfully consolidated our regional fibro broadband businesses, by merging our four fibre to the premises (FETTP) businesses – Jurassic Fibro, Swish Fibro Giganet and AllFoints Fibre into a new business. Fern Fibre Trading Limited (FETT) Given wider market consolidation and opportunities in the market, it has made economic series to brind together these separate businesses now rather than later. As part of this post year end, we undertook a restructuring exercise to realise some operating efficiencies, including a reduction in FETLs overall headcount.

In the year we continued to rivest capital in expanding our ultrafast FTTP broadband networks. The geographic focus of our notworks is the Homo Counties, the South and South West of England, Yorkshire and the Midiands, nowcher we also provide connectivity to homes and businesses throughout the UK using networks cliving by other operators. The business is generating revenue from residential customers and small businesses who benefit from the superior connectivity offered by fibre, versus the old copper networks.

The intentional growth in our fibre division has resulted in a short term decrease in profitability of the Croup, as we invest into the infrastructure.

#### 4. Housebuilding

Cour nousebuilding division remains an important part of the Group, at approximately 8% of net assets, and is comprised of Elicia Homes ("Elica") the housebuilding business we accoured last lear and Pangeford Holdings Timited (Rangeford) our retirement is inglousness.

Elivia develops mid market family homes in South East commuter towns and allagos and is performing broadly in line with budget, despite challeriging conditions across the industry. We plan to grow it in a measured way organicarly and via strategic acquisitions over the next five years a strategy solidified by the acquisition of Millwood Designer Homes, which expanded Elivia's footorint to East Sussex and Kent, Its american remains to deliver 750 homes per year.

Rangeford continues to expand its portfolio with three villages fully open and additional villages under construction in Chertse, and Stapleford thear Cambridger, due to open in 2024 and 2025 respectively. We are excited by the opportunities for growth in this sector, with two further sites acquired in Dorking and East Grinstead. The design work for these villages is well underway.

#### Inflation and Interest rates

HM. Treasury forecasts that inflation is likely to surpass the Bank of England's target until 2025. A relatively short period of high inflation such as this does not tend to have a material impact on Group operations. For example, in our energy division, the value of our renewable energy assets is determined by discounting their projected future cashflows over the life or the respective assets itypically 20 plus years). If the outlook for long terminiflation were to increase the impact on our share price should be positive, as increased inflation, will increase the revenue cach operating site would expect to make, which increases their value.

The rise in interest rates is seen as a return to normal, after a long period of very low rates. The impact of this on our business has been broadly neutral as the Croup is intentionally structured such that it does not levecherice significant value erosion when interest rates change. An important part of this is a policy of taking out interest rate protection on the loans to the Group's energy assets giving us protection from interest rate increases. This has

## **Directors Report'**

resulted in our renewables assets loans continuing to incur low interest costs, at a rate fixed when interest rates were lower.

Rising interest rates are follower closely in our lending business and as such we continue to take a cautious approach in this sector. We can land do, reduce the number of loans we write or after the risk profile of our loans through reducing loan to value ratios, or pausing activity in certain parts of the market as appropriate.

#### Current trading and outlook

Since the year end the Group has continued to perform steadily from an operational perspective and in line with our expectations. Our growth targets for the Group over the medium and long-term remain unchanged, and we continue to focus on maintaining a diversified business that is capable of delivering predictable growth for shareholders.

In November 2022, the government announced the introduction of an Electricity Generator Levy (EGL), a temporary measure to charge exceptional receipts on high revenues for Groups generating electricity. The levy is in effect from 1 January 2023 unt I 31 March 2028 and applies to electricity generated from renewable, biomass, and energy from waste sources. The Group was not required to day EGL in the period, however we do expect to pay this in the next financial year. We had already anticipated the impact on the returns generated from our energy portfolio over the next five years.

Our property lending business continues to perform strongly with a diverse loan book comprising 224 loans on average. We focus on short-term loans (our current, loans average, term, is 20, months; which enables us to swiftly adapt to changes in cutlook. We consider this is particularly important in the current economic of mate.

Our recently consolidated regional fibro business. Fern Fibre Trading Limited (FFTL), continues to build out its network to accelerate full fibre delivery in the UK, whire also focusing on sales and marketing activity selling fibre products directly to customers. As it continues to grow and build out its infrastructure, we do not expect it to report an accounting profit in the coming three to five financial years.

We are pleased to report that in October 2023, the Group raised £217m from existing shareholders through an offer to sugscribe for further shares. The funds raised will allow the Group to grow slightly ahead of plans in certain sectors, however we do not expect this to materially change our business mix, which will continue to evolve in order to continue to target modest growth for shareholders in the years ahead.

"Our mix of business areas has developed over time, driven by the overarching importance we place on meeting the objectives of our shareholders."

## Our business at a glance

#### What we do

Fern Trading Limited is the parent company of nearly 330 subsidiaries itogether the "Group"). The Group operates across four key areas leneigy lending, fibre and houseoulding which includes retirement living. Over the past 13 years we have built a carofully diversified group of operating businesses that are well positioned to deliver long-term value and predictable growth for our shareholders.

#### 1. Energy division

We generate power primarily from sustainable sources and self the energy produced either directly to industrial consumers or to large networks. Many of our renewable energy sites qualify for government incentives, that represent an additional inflation-linked, source of income. We have also utilised our expertise in renewable energy to construct facilities for sale or engoing operation. At year end the Group had fourteen sites under construction.

#### 2. Lending division

We liend on a short- and medium term, sociared basis to a large number of property professionals, and our financing enable businesses to build and improve residential and commorcial properties.

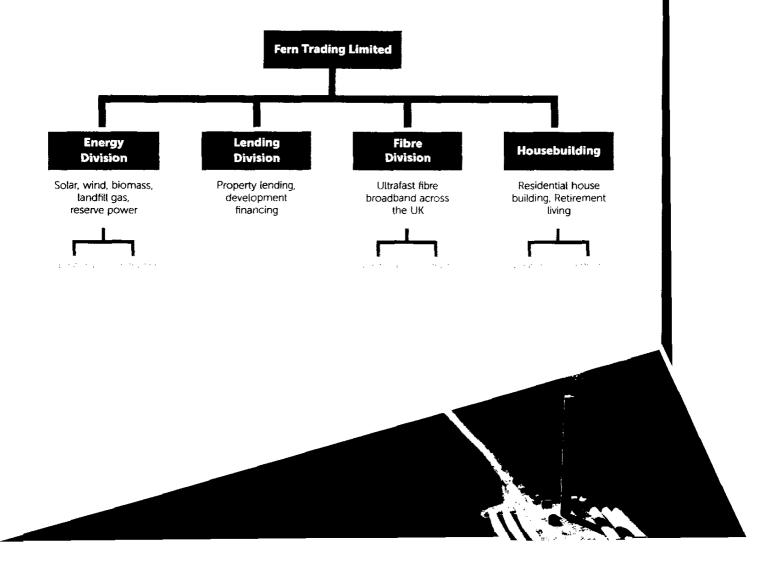

#### 3. Fibre division

We own and operate fibre broadband networks across various areas of the UK. We build the networks and connect them to homes and businesses to provide our customers with ultrafast fibre broadband.

#### 4. Housebuilding division

Our residential householding operation develops sites from design stage to final construction to ensure the delivery of quality workmanship

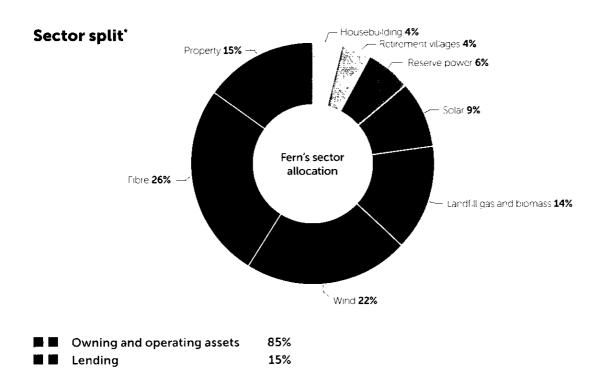

Our retirement villages provide high-quality confemporary living spaces with a friendly community at the heart of our villages.

We are proud that the pusinesses within our Group make a positive contribution to society from generating clean energy to the preation of homes and the provision of quality retirement rifrastructure

As we've grown our expertise in those sectors in the UK incide been able to use that industry knowledge to take our expertise to expiring opportunities oberseas line uding constructing solar and wind farms in Australia.

## Our business at a glance

## Making a difference

We are proud to operate a Croup that makes a positive contribution to society across the UK, generating renewable energy, providing quality retirement using and new homes, and delivering high-speed broadband to underserved areas of the country. This is aligned to our environmental, social and governance ("EsG") policy, which is drafted and approved by the Board of Directors.

#### Energy

We own 229 operational energy sites, producing 3,069GWh a year That's enough energy to power over a million homes.

Our combination of technologies across solar, wind, reserve power, biomass and landfill gas complement each other well, helping the UK to meet its energy targets irrespective of the weather.

The Fern Community Fund is a social enterprise run by the Group, which works to distribute community funds generated from our wind farms. This year, the Fern Community Fund has committee £1.4m to local community groups, supported 22 local university students through our Student Scholarship Fund, and provided a winter fuel subsidy to 740 residents who are local to the Group's sites.

#### Lending

The 191 new loans we advanced during the year have helped to fund the construction of much needed residential properties as well as commercial property creating valuable new employment.

#### Fibre

Within this division we are building full fibre connectivity to hundreds of thousands of properties in small towns and villages that do not currently have access to internet connectivity ensuring they are fit for modern ways of working and communicating

In Vorboss, we are building a ded-cated high-speed fibre network for businesses in London, providing the orgital infrastructure that the city needs and removing pandwidth constraints to ensure the economy remains competitive

#### Housebuilding

Our housebuilding division sources over 14% of the timber utilised for frames in a sustainable way and installs so an panels or air source heat pumps in all properties, leading the way in this sector and helping reduce carbon emissions.

Our retirement villages provide high-quality, contemporary Tving spaces, with close to 500 homes currently in place. We have nearly 400 further units in various stages of development, and our secured pipeline sites offer potential for another 300 plus units.

A friendly community is a key differentiator for our retirement villages, which is why our developments provide central facilities and a hub of social activity for our residents.

## Our strategy in focus

#### Our businesses

#### **Energy**

Through our energy arcsion, the Group owns and operates energy sites which supply gas and electricity into the network, as well as constructing renewable energy sites for future sale. Of the 229 energy sites that we own and operate, 203 provide renewable energy contributing to the Group's position as one of the largest producers of renewable energy from commercial scale solar sites in the UK. Renewable energy sites are typically expected to generate stable profits for many years, due to low operating costs and revenues being linked to inflation. As such owning and operating these businesses is attractive to the Group because of their potential to deliver predictable profits over the long term.

Renewable energy sites generate power from sustainable sources and sell energy produced either directly to large industrial consumers or to the network. Many of our renewable energy sites also qualify for government incentives, which means a portion of the generated energy benefits from rates that are locked inflor a specified period unce a qualifying site is operational and accreditation has been granted. This had reduced some of the inipact of the volatility in long term energy pince forecasts. As new sites built in the UK do not qualify for the same historic government incentives, we are seeing more interest in the market for sites like the ones we own and operate.

Owning and operating energy sites is a core part of our strategy and currently makes up approximately 50% of the Group's net assets. This part of the Group

has denorated high returns this year due to market conditions out crucially it has the potential to provide stable returns over the long term. This combination is key to our strategy to balance risk and return across the range of Group activities to generate target predictable returns for shareholders.

# "Our energy sites generated 3,069 GWh of power."

Due to the high-quality energy sites that we own, we are lable to secure long term financing from mainstream banks at competitive rates to onhance our returns, which helps us to deliver the level of returns our shareholders expect.

While our renewable energy business started its life in the solar energy sector, the Group has built expertise across other adjacent technologies including orishore wind, biomass and landfil, gas, supported by reserve power plants which provide backup power to the National Grid. The Group therefore benefits from diversification within this part of its business, since weaker conditions for energy production from one technology often result in stronger production elsewhere. The Group also gains significant benefit from its scale in this sector as our business is spread across 229 sites vasity reducing the risk to Group profitability if one site suffers an operational disruption.

Did you know?
If laid end to end, our solar
panels would stretch from
London to Mexico City.

## Our strategy in focus

In addition to our UK sites, the Group is developing sites overseas in jurisdictions that we unuerstand well. These present an attractive opportunity as they build on our sector experts on countries at an earlier stage of renewable development. Currently wo operate wind farms in Ireland and France and solar sites in France, in addition to a wind farm under construction in Poland.

During the year we acquired the rights to multiple commercial rooftop sites through our commercial rooftop solar developer, Zestec, on which we will build solar panels to generate electricity for the tenants of the building. Our sites under construction in Australia came to fruition this year, with Darlington Point, a large scale solar site sold at the start of the year, and Dulacca Wind Farm achieving commercial operation, shortly, after year end, and being subsequently sold in October 2023.

#### Lending

Lending continues to be a core part of our nusiness and has provided the Group with a profitable and cash generative sector over the bast 13 years. This well-established part of the Group mainly consists of property liending, which provides short term financing to experienced professional property developers buy-to-let landlords seeking bridging finance and development financing, which provides short, and medium-term financing to companies

A key benefit of the scate of the Group and of the business that we have built up in this sector is our ability to mitigate risk through having a large number of loans spread across relatively small projects to individual borrowers. We proactively manage counterpart, risks through undertaking careful borrower due diligence, taking security over assets typically on a first charge basis and maintaining conservative loan-to-value ratios. Not all loans will perform as expected and these measures help to minimise the impact of performance issues on an individual foan. This is further initigated through the value that we lend to individual borrowers, relative to our total loan book, which is spread on average across 224 loans.

#### **Fibre**

Our fibre division includes four strategic areas – fibre to the premise ("FTTP"), enterprise fibre, software and mobile

Through our FTTP dusiness we are building new physical fibre networks for communities in the UK and have completed new fibre infrastructure in underserved parts of Devon, Somerset, Dorset, Wiltshire, Hampshire, Worcestershire, Yorkshire and the Home Counties, spanning hundreds of thousands of properties.

Lending continues to be an important part of our business and has provided the Group with a profitable and cash generative sector over the past thirteen years.

## Our strategy in focus

Building a new network involves connecting large data centres and telephone exchanges in the UK. with nomes and businesses, effectively replacing the copper wires that were laid in the first half of the 20th century. To date curassic. Swish and Giganot have operated a vertically integrated model where they own the fibre, alongside the end customer relationship as the internet service provider (ISP1). Following the merger of our FTTP division (FFTL WIL) follow the kinolosale strategy of AllPoints Fibre. owning the fibre infrastructure and onboarding multiple ISPs. We will continue to develop our own. TSP service and brand (Cuckoo), which will selfconnectivity on our consolidated network to endcustomers alongside other ISPs in an increasingly. competitive market, a wholesale strategy increases the opportunity to generate revenue from the network as multiple counterparties can sell access to tilrather than just one ISP las per the vertically integrated model)

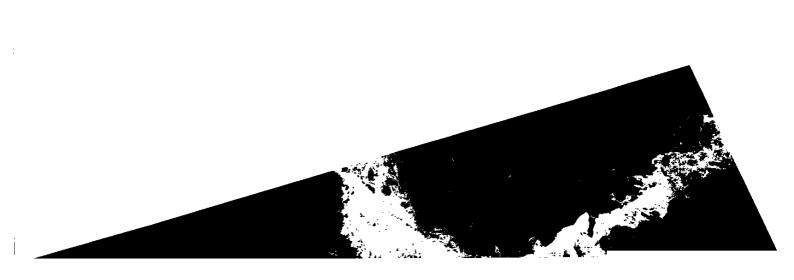

The merger of the FTTP companies took place in March, with the final three months of the year focused on bringing the operations of the four companies into one, increasing efficiencies and economies of scale. Separately the companies achieved a great deal, each building local networks, onboarding customers and delivering outstanding customer service. The benefits of bringing them together and launching a single wholesale offering across their networks will create greater opportunity for the business and potential customers in future.

The UK remains behind other European nations when it comes to households accessing fibre, and our FTTP business is now well positioned to be a key player in bringing ultrafast connectivity to communities around the UK.

Through vorboss we are building an enterprise network in London to supply business to business (1828") enterprise connectivity to business customers vorboss has installed over 500km of fibre uptic cables in London since 2020 and has spont the last year launching its products to large businesses, including market leading 10Gbps and 100Gbps products.

Our revolutionary software business, Vitrifi is building the orchestration systems that the next generation of fibre broadband companies need to run their networks efficiently in doing so, they are both supporting our own ETTP business in achieving its strategic goals and also enabling external customers to eliminate legacy constraints with autonomous connectivity and workflow management services

Mobile is our newest area of strategic development. During the year, Vitrifi Digital expanded into the mobile network market, becoming a Mobile Virtual Network Aggregator ("MVNA"). This will enable us to launch an imposative mobile platform to business and consumer facing companies to operate their own Mobile Virtual Network Operations in the UK.

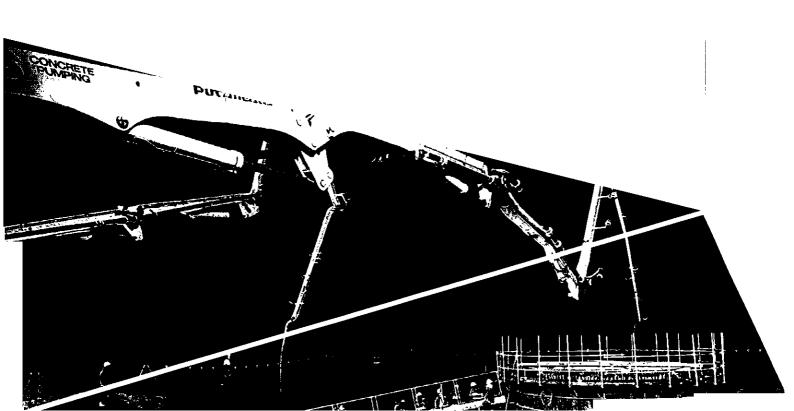

## Our strategy in focus

#### Housebuilding

Our residential building business, Flivia, is a full service housebuilder which acquires land and develops sites from design stage to final construction to ensure the delivery of quality workmanning Elivia strives to deliver high quality and design-led aspirational homes, comprising a mix of open market and affordable homes, with over 25 sites under construction. Flivia is headquartered near Beaconsfield with a geographical foctprint in Buckinghamshire. Berkshire, Hampshire, Surrey and West Sussex. In January 2023, we acquired Milliwood Designer Homes which has allowed expansion into the adjacent regions of Kent and East Sussex complementing Elivia's existing locations.

As part of our househullaing division, the Group operates in the retirement living sector. Our retirement living business Rangeford, owns and operates three retirement villages in Wiltshire. North Yorkshire, and Gloucestershire is currently constructing two sites for future operations, and has exchanged on two further rites, spread across the country, with the intention of developing these in the future.

#### **Directors**

The experienced Board of Directors for the Fern Group are responsible for determining the strategy of the business and for accounting for the Company's business activities to shareholders. They have a set of complementary commercial, energy sector-related and strategic skills.

#### Paul Latham (Both Fee Both Collector)

Paul was previously the Chief Executive of Fern. He has had various general management and internal consulting roles across a number of sectors and orings with him a wealth of industry and business experience, including building key elements of the infrastructure for Capital One Barik (Europe) plc as it grew from a start-up business to a company with 2,000 employees. Paul has worked at Octopus investments since 2005.

## Keith Willey Data Eventually Central of

Keith is an associate professor of strategy and entrepreneurship at London Business School, He also holds various non-executive directorships and advisory roles at high growth and more mature companies. In his role as non-executive chairman he is responsible for the effective operation of the Board, as well as its governance. He brings to the Fern business independent commercial experience gained from his time in academia, private equity investment, consulting and various hands-on operational roles.

## Peter Barlow Hom Two days Test the

Peter has over 50 years' experience in international financing of infrastructure and energy. As a senior executive for International Power, Peter was responsible for arranging over \$12bh of project and corporate funding, as well as banking relationships and treasury activities. He has spent over 20 years working internationally for HSBC, Bank of America and Nomural financing acquisitions and greenfield projects in the chorgy and infrastructure sectors. His combination of Board-level financing and energy experience over numerous energy sub-sectors, and his all-round knowledge of all the sectors in which Fern operates, adds significant value to the operation of the Board as well as its strategy formation and deployment.

## Sarah Grant

Sarah has worked at Octopus Investments since 2013, she has a particular focus on debt raising and relationships with banks and other lenders, which she coordinates across the Octopus group. She also chairs the Octopus Investments Investment. Committee and is a director of Octopus AIF Management 11d. Octopus Investments is a key supplier of resource and expertise to Ferri Sarah's dual role ensures that the relationship between Octopus and Ferri works, well and always operates in the best interests of Ferri schareholders. She has over 25 years' experience and previously held roles at Sociéte Generale and Pothschild.

#### Tim Arthur 1. Lieux 4 for the

Tim is a chartered accountant with more than 25 years international experience as a finance director of both public and private companies. Initially, he worked for Price Waterhouse in 8 mingham and Chicago. More recently nervas Chich Financial Officer of Lightsource Penewatin Energy Ltd. alglobal leader in the funding, dovelopment and long-term operation of solar prictopolitac projects. Tim brings oftensive financial and accountancy knowledge to the Board as well as an understanding of Jynamic technolog, businesses gained from his executive positions.

## Principal risks and uncertainties

#### Principal risks

Management identity assess and manage risks associated with the Group's business objectives and strategy. Risks arise from external sources, those which are inherent commercial risks in the market, and from operational risks contained within the systems and processes employed within the business. Overall risk exposure is managed across the Group through the diversification of activities, both by sector and geography.

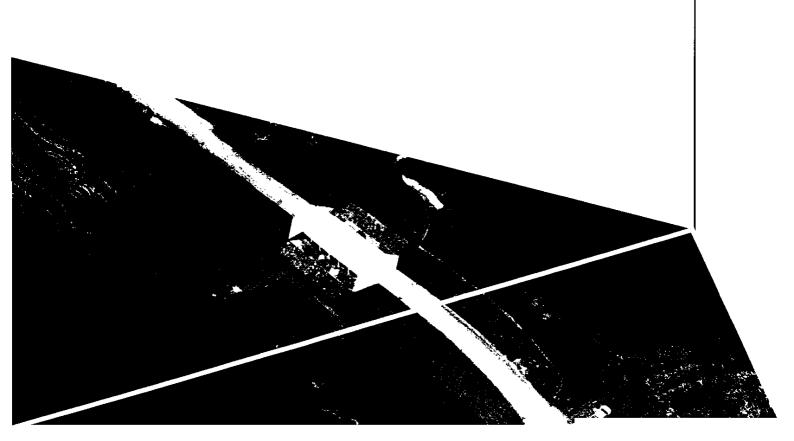

The principal risks that the Group are exposed to are described below along with the mitigating actions we take to reduce the potential impact of the risk. We also include our assessment of whether the kelihood of the risk has increased, decreased or remained the same.

#### Rick Mitigations Change · Contracts are entered into which fix the income for a Market risk: portion of the energy generated by curisites The energy sector is experiencing significant turbulence and there is · Long-term povernment backed offtake agreements are in place, such as the Renewable Obligation Certification airisk that forecast levels of income are not achieved due to changes in #ROC1 scheme 29% of our energy income was generated wholesale energy prices, off-take from ROC revenue · We engage with the government and the Office of Gas and Contracts on absenue entisussidies. ## Corporate governance

#### Section 172 (1) statement

The Board consider that they have adhered to the requirements of section 172 of the Companies Act 2006 (the 'Act') and have, in good faith acted in a way that would be most likely to promote the success of the Group for the benefit of its members as a whole (having regard to al. stakeholders and matters set out in section 1/2(1)(alf) of the Action the decisions taken during the year ended 30 June 2023

in the performance of its duty to promote the success of the Group, the Board has regard to a number of matters, including the likely consequence of any decisions in the long-term, and listens to the views of the Group's key stakeholders to build trust and ensure it fully understands the potential impacts of the decisions it makes. The Board fulfils these duties partly by delegation to committees and the Boards of subsidiary undertakings, who operate within a corporate governance framework across the Group.

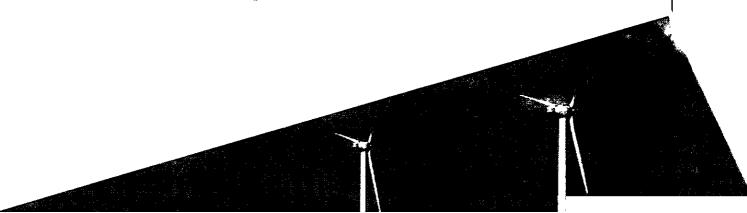

At every Board meeting a review of health and safety across the group, financial and operational performance, as well as legal and regulatory compliance, is undertaken. The Roard also review other areas over the nourse of the financial year including the Group's business strategy, key lisks, stakeholder-related matters, diversity and inclusivity, environmental matters, corporate responsibility, and governance, compliance and legal matters.

#### Principal decisions

We define principal decisions taken by the Board as those decisions that are of a strategic nature and that are significant to any of our key stakeholder groups. The Board consider that the following are examples of principal decisions it made in the year ended 30 June 2024.

 Evaluating and deciding to create a new strategic area of development by expanding into the mobile network market and becoming a Mobile Virtual Network Aggregator (MVNA). The Board considered this opportunity as well aligned and complementary to the existing fibro broadband operations, which would help to deliver long-term value.

- The Group decided to further expand its footprint in the housebuilding sector, by acquiring Milwood Designer Homes a company with values similar of those of Elivia and the Group Milwood is considered an award winning regional homebuilder based in Kent which built around 100 homes a year. This follows the decision made in May 2022 to diversify the Group's asset base and entering into this new sector has been well thought out with long-term growth in mind. The Board considered the opportunity and how if aligned with our objectives to make a positive contribution to the community and environment by building new homes to address the UK's shortage of properties.
- The Board decided to commence a group reorganisation which involved merging the four-FTTP business into one new business. Fern Fibre Trading Limited FFTL will focus on two separate strategies, while working closely together (1) wholesale strategy, owning the fibre intrastructure. and onboarding multiple ISPs in AllPoints Fibre Networks and (2) developing our own ISP service. and brand, through Cuckoo Limited. The Board evaluated the possible impact on stakeholders including shareholders and observed that the new structure would not change how the Board and Group engage with shareholders or their view of the Group, but would be seneficial in providing improved governance and oversight of the sector. as well as enhancing the future prospects.

## Corporate governance

#### **Business strategy**

Our business strategy is set out on pages 12 to 15 of the Strategic Report. Management prepares a detailed Group budget which is approved by the Board on an annual basis and forms the basis for the Group's resource planning and deployment decisions. In making decisions concerning the business plan, the Board has regard first and foremost to its strategic focus, but also to other matters, such as the interests of its various stakeholders and the long-term impact of its actions on the Group's future and reputation.

#### **Shareholders**

Shareholder relations and generating shareholder value is a key consideration when the Board is making strategic decisions. The prime medium by which the Group communicates with shareholders is through the annual report and financial statements, which aim to provide shareholders with a full understanding of the Group's activities and its results. This information is published on our website at www.ferntrading.com

#### **Employees**

The Group's employees are fundamental to the overall success of the business. The Directors fulfil their duty to employees by entrusting oversight to subsidiary Boards.

The directors of the subsidiary undertakings manage the day to day decision making, engagement and communications with employees and ensure that people are treated fairly and are valued with respect to pay, benefit and conditions. We fully realise that our employees wish to be informed and consulted on matters affecting their work and to be involved in problem-shying affecting their own areas of interest and responsibility. The Group is firmly committed to a policy of good communication at all, exelsiand we aim into lestablish a comate which constantly encourages the open flow of information and deas. Presently, this includes monthly team priefings at a local lievel, and the publication of monthly key.

performance indicators covering output, uperating costs, and nearth and safety

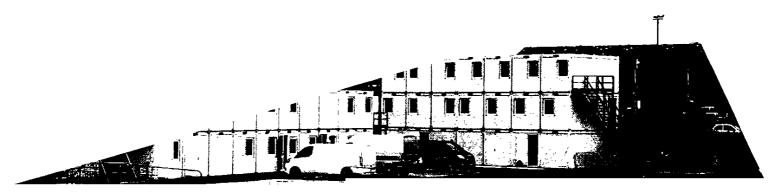

The health and safety of our employees in the workplace is a continual focus for the Group, given its broad operational business. The Directors review health and safety reporting at each board meeting to cusure appropriate policies and procedures are in place to protect the health and safety of our employees and contractors. Where there are potential deficiencies or issues, these are followed up and resolved on a firmely basis, with the Board having oversight of the actions taken.

The Group outsources activities and management of certain operational activities to external suppliers. Where activities are outsourced the Board ensures that they are managed by reputable suppliers who meet all the relevant industry and regulatory commitments as well as treating employees fairly expected standards are documented in all service contracts and adherence to these are continually monitored by Board through their service agreement with Octopus Investments Limited

#### Suppliers and customers

The Group acts in a fair manner with all suppliers and customers and seeks to maintain strong business relationships with them. This is achieved by all contracts being negotiated through a fair and transparent tender piocess which includes assessing the impact on the long-term dejectives of the Group. We review our payment processing times against contracts every six months to ensure suppliers are paid promptly and this information for the company is available on the www.gov.uk website.

The Group ensures it acts fairly and in a transparent manner to all customers across all divisions and services, and actively engages to resolve any disputes or defaults. The Board closely monitors customer metrics and engages with the management feam to understand the issues if business performance does not nieet customers expectations.

## Corporate governance

The Board considers Octobus Investments Limited to be a key business partner and supplier with responsibility for the provision of operational oversight financial administration and company secretarial services.

#### Community and environment

The provision and operation of sustainable infrastructure is at the centre of the Group's strategic goals. Through its pusiness activities the Group seeks to make a positive contribution to the community, environment and economy. Our renewable energy business is heiping the UK meet its renewable energy targets, our fibre network will give people in rural communities access to high speed broadband, and our retirement villages create communities of people in their later years, reducing the strain on our healthcare services. We are also building new homes to address the UKs shortage of properties.

#### **Business conduct**

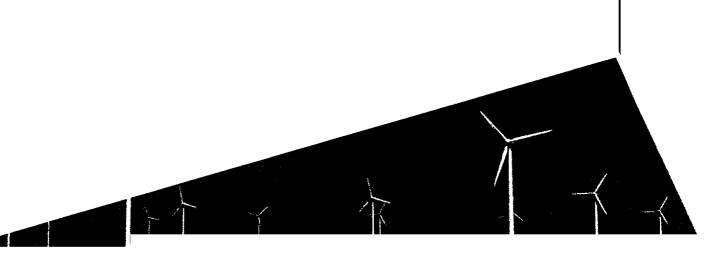

As Directors our intention is to behave responsibly, ensuring management operate the business with integrity and in accordance with the high standards of conduct and governance expected of a business such as ours. Our intention through our business strategy foutlined on pages 12 to 15 is to operate in sectors and work with other businesses that share our values.

#### **Business ethics and governance**

The Board is responsible for ensuring that the activities of the Group and its various businesses are conducted in compliance with the law and applicable governance, and regulatory regimes, and in adherence with prevailing best practice for the relevant industry. This includes reviewing internal controls, ensuring that there is an appropriate balance of skills and experience represented on the Board, and ensuring that the financial statements give a true and fair view of the state of affairs of the Group Further detail can be found in the statement of directors responsibilities on page 38. In the year to 30. June 2023, no areas of concern have been flagged in this regard.

# Employee, human rights, social and community issues, environment policy and anti-corruption and bribery matters

The Board's policy on employee, numan rights, social and community issues, environment policy and anti-corruption and bribery matters is discussed in the Directors' Report on page 58. The Board actively promotes a corporate culture that is based on ethical values and behaviours.

## Task force on Climate-related Financial Disclosures ("TCFD")

In December 2015, the TCFD was established by the financial. Stability Board ("FSB") to develop recommisendations and encourage companies to take account of bow they identity and manage climate related issues. The TCFD requires companies to produce climate related disclosures across four key piliars. Governance Strategy Risk Management and Metrics & Targets. The TCFD has noted eleven key recommendations, across these piliars that enable companies to provide information to shareholders and other stakeholders.

The Group's operations play an important role in the UK's long term transition to a not zero economy as renewable energy and the development of lower-carbon alternatives are critical to a move away from fossil fuels. Capital deployment in renewable energy assets, such as our 80 ground-mounted solar sites, chables our business and sharcholders to generate returns from this transition, whilst having an inherenity positive impact on climate change and the environment.

Of the Group's divisions, the Board considers the energy division to be most at risk to climate change and conversely most able to take advantage of the opportunities presented by a transition to a lower carbon economy. Whilst the Board considers the impact of climate-related issues across all our energy, lending, flore and nousebuilding (including retirement (virig) divisions, the disclosures set out below are mainly with reference to the Group's energy subsidiaries.

#### **Statement of Compliance**

The Board is pleased to confirm that it supports the ITCFD's laims, and objectives, and has included climate-related financial disclosures in line with the four key pillars and eleven recommendations in addition, to imagate the financial impact of sustainability risks, we apply Sustainability Accounting.

Standards Board (ISASBI) guidance on hiateriality, assessing whether, and to what citient, sustainability issues (including climate risks) could impart performance.

#### Governance

Disclose the organisation's governance around climate-related risks and opportunities

a) Describe the board's oversight of climate related risks and opportunities

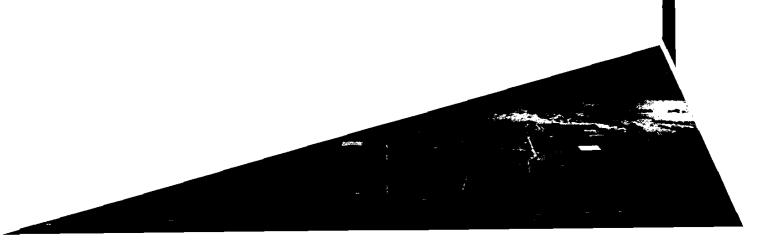

Climate-related risks and opportunities form part of the Board's strategy. A key aspect of the Group's business model determined by the Board, and adhered to by divisional management teams, is to deploy capital in renewable energy assets to benefit from the wider transition to a lower carbon econom,

The Roard is responsible for monitoring climate related government policy and physical climate changes to inform the deployment strategy and the materiality of risks faced by the Group's subsidiary companies. The Group Board monitors strategic risks and opportunities, financial performance, and any adverse or positive impacts on revenues or costs that could result from climate-related risks and opportunities.

On an annual basis, the Group Board review and approve an ESG Policy document that was first adopted in September 2020, with the latest version approved in April 2023. The Board therefore prisures that each new opportunity, and existing divisions on an on-going pasis, adheres to the Group's ESG policy.

b) Describe management's role in assessing and managing climate-related risks and opportunities

At a company level, transition and unjusical risks and apportunities are considered throughout

## Task force on Climate-related Financial Disclosures ("TCFD")

the acquisition, construction and due diligence process hight through to the un-going management The Board have reviewed and approved ESG criterial specific to the Group's business that are considered by commercial and management teams, including those operating in the fibre and housebuilding sectors. The day-to-day management and assessment of climate related hisks and opportunities is therefore undertaken by divisional management teams and reported to the Board where necessary

All of the above ensures the Board's oversight and management of climate-related risks and opportunities includes functions established to provide good governance over the Group's divisions. This enables the Board and subsidiary companies to all be aligned on approach to climate-related risks and opportunities.

#### Strategy

Disclose the actual and potential impacts of climate-related risks and opportunities on the organisation's businesses, strategy and financial planning where such information is material.

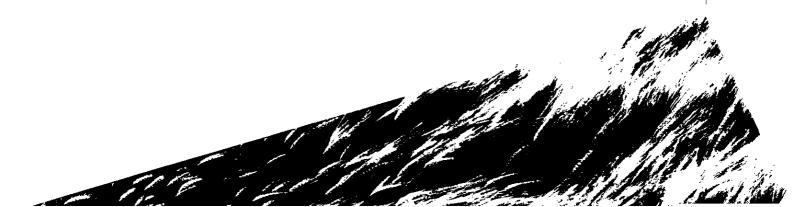

a) Describe the climate-related risks and opportunities the organisation has identified over the short, medium and long-term

Given the Group's long-term experience in its operating sectors and strong links to its suppliers particularly in the energy and neusebuilding sectors, the Group is well positioned to overcome risks and take advantage of opportunities arising from climate change. Climate-related risks and opportunities are also at the core of the Group's strategy and are discussed right the way through the business, from Board level to the individual subsidiary companies within the Group's long-term business, strategy and financial planning.

The Group's fibre division will remain in growth phase for the next three to five years, and management teams consider now to manage emissions and risks while achieving this rapid growth. Fibre has a positive long-term impact on the environment as once the infrastructure is in place and operating, it is seen as a low carbon technology. A well-constructed and operated fibre connection facilitates a reduction in carbon emissions in the long-term due to the potential for home working and smart cities.

In the Group's nousebuilding division, one major lisk is ensuring short- and long-term construction processes are managed in line with potential exposure to climate risks, such as flooding. The Group aims to mitigate this risk, as all developments within the housebuilding sector (including retirement living) have technical flood risk assessments carried out before land is purchased.

The Group is also subject to regulatory risk as all homes and developments must satisfy environmental planning conditions, may change as regulations are introduced to support the UK's transition to net zero. This presents the Group with the opportunity to go above and beyond applicable requiatory standards for energy efficiency of new build homes and become a loader in this regard. It is important for the housebuilding division to satisfy all environmental planning conditions and seek financially viable opportunities to exceed regulatory standards. The Group looks to develop strategies around progressive adoption. of Medern Methods of Construction (MMC) including timber frames, solar panels, air source heat pumps and electric vehicle charging points where appropriate. Where possible, the Group. moves operational assets onto renewable energy

## Task force on Climate-related Financial Disclosures ("TCFD")

tariffs and carefully chooses suppliers to reduce the impact of climate-related lisks.

Within the energy division, the Group is no strong position to take advantage of opportunities and mitigate risks that arise from the transition to a net zero economy. The main short-term risk arises from competition as competitors could identify gaps as they seek to doploy more capital into rene wable energies. The Group's succensful track record horps it seize opportunities derived from the need to tackle climate change and continue to acquire and build new large scale impact projects, such as our Waste-to-Energy or the expansion into commercial sciar rootlops.

The Group also faces risks from increased variability in weather patterns and potentially more extreme weather creating difficulty to accurately budget production and financial performance. The Group constantly assesses the risks and opportunities presented by variable weather as part of ongoing due diligence and performance management.

Over the longer term, regulatory changes could impact the Group and could lead to changes in government incentives for constructing and operating renewable energy assets. The Group could be more exposed to volatile power prices as renewable energy becomes an increasingly sizeable proportion of total energy produced by the UK market. To mitigate this risk, the Group. enters into short- and long-term contracts which fix the income for all, or a portion of the energy. denerated by a site isong-term government. backen agreements are also in place, such as the Penewable Ciplipation Certification (1900). scheme. This aligns with the Group's strategy. of continuing to develop predictable, long-term revenue streams, providing resilience against collative pricing changes in the UK energy market. As new technologies at renewable energy or housebuilding sites are developed and become more reliable, appointunities in all arise for the Group to integrate these as the technologies mature and become cheaper. However, there is a risk that deproyment into newer technologies could underperform compared to the business cases. Whilst representing a risk, it is expected that the negative impact would be immaterial to the Group's operations, due to diversification.

b) Describe the impact of climate-rotated risks and opportunities on the organisations business, strategy and financial planning.

Financial projections, including these that are utilised for the preparation of the financial statements and included for budget preparations. are pased on financial models. Each model, such as company valuations or business plans. will contain different underlying assumptions on key inputs such as power price curves, operating and maintenance costs or future revenues which are all impacted by transitioning to a lower carbon economy. The most material impact on the valuation of renewable energy assets is usually wholesale energy prices and operational performance The Octopus investments Valuation Committee is responsible for reviewing these assumptions and the sensitivities associated and is therefore considered as part of the valuation process

The above could impact financial returns positively if the shift towards renewable energy and sustainable homes is successful or negatively if the transition is slow. Extreme weather such as storms, flooding or fires could cause damage at the Groups wind and solar farms and nousebuilding sites, impacting any operating and maritenance costs, write offs or impairments and longer-term pudgets. Constructing our

#### Task force on Climate-related Financial Disclosures ("TCFD")

assets to the highest quality standard and going above, and beyond the relevant regulatory standards by adopting MMCs will impact the Group's operating and maintenance costs further. The Group's cost projections are captured at point of auguisition, and models are updated regularly with diversification of suppliers and appropriate levels of insurance obtained. The Group's biomass plants operate a diversified supply chain of feedstocks and strategy; stores to ensure sufficient fuel stores. In case of failed fuel supply from extremic weather conditions, there is contractual recourse obligations between the site and suppliers for protection against loss of revenues.

Climate-related risks also have an impact on accounting estimates and judgements within the financia, statements. The Group's balance sheer includes a decommissioning provision relating to the future obligation to return land on which there are operational biomass, wind and solar farms to their original condition. This accounting estimate is determined to a significant degree by the future dismanting and restoration costs, as well as the timing of the dismantlement, all of which will be impacted by physical climate risks and raw materials required for restoration. The Group engages with a third party to perform the assessment of costs to be incurred, including an assessment of future climate risks.

 c) Describe the resilience of the organisation's strategy taking into consideration different future climate scenarios. Including a 2°C or lower scenario.

The Group penefits from a quicker transition to a lower-carbon economy such as in a 2°C climate pathway (i.e. limiting global temperature increase to well below 2°C) whilst taking the steps to

ensure we remain resident to the risks associated with scenarios such as a  $4^6\mathrm{C}$  pathway

Under a 1.5°C scenario, the world will experience a significant shift away from traditional fessil fuels towards renewable energy sources as countries and businesses alike implement strong decaibon sation plans to reach net zero. Desvery on these ambitions requires a significant increase in the pace of capital deployment into renewable energy, also flight which leads to a growth in the Group's acquisition opportunities.

The main risk from a beneficial transition to renewable energies is from competition and the potential for price cannibalisation. The Groups strategy is resilient to this as they focus on being leaders in the market and seek firstmover advantages before any form of price erosion can take place. Increasing demand for the electrification of industries will provide vast deployment apportunities for renewable assets, with rising demand supporting the power price for electricity, mitigating price cannibalisation. The Group's housebonding sector could also benefit from such a transition by racing lower. costs on installation of solar panels or heat pumps as techniclogies advance and become cheaper to access

Under a 4°C scenario, it is assumed that the transition to a lower carbon economy has been slower and the incentives to construct and operate renewables have not been forthcoming. There is also the increased physical risk of more extreme, weather, delaying the introduction and operation of renewable assets. Whilst this could impact the Group's revenue potential, this would discourage competition and the Group would be well placed to take advantage of any opportunity, that arose. The Group's strategy

## Task force on Climate-related Financial Disclosures ("TCFD")

is further resident as the unprodictability of weather is mitigated through diversification of technologies and location of sites. The Group's increased deployment into the fibre, lending and housebuilding sectors is just one of the methods the Group is using to mitigate possible impacts of relying on a poorly supported renewable energy sector and lower carbon transition that would occur in a 4°C scenario.

When comparing the two scenarios, the Group is set to benefit more from a 2°C scenario than a 4°C scenario pathway. The Board believes the business strategy is resilient and flexible to either scenario enabling the Group to continue to provide returns whilst contributing to the transition to a lower carbon economy.

#### **Risk Management**

Disclose how the organisation identifies, assesses, and manages climate-related risks.

 a) Describe the organisations process for identifying and assessing climate related risks

Climate-rolated risks are considered by management teams at both a Croup and entity level with the specific climate-related risks largely identified, assessed and managed within the depictiment process.

The Group takes responsibility for understanding and assessing cach of its group companies against a consistent framework which includes climate-related risks. In our energy sector, to roentify climate-related risks in a subsidiary management teams use SASB tools as part of ongoing due origence, such as ThinkHazard and/or C, mate. Shale tools. Relevant climate-related risks are considered and identified ahead of capital deptorment for new apportunities.

is further resident as the unproductability of bit Describe the organisations process for managing weather is mitigated through diversification of climate-related risks

At a dissional level, transition and physical risks are considered throughout the acquisition process. Climate related risks are managed by incorporating questions into an ESG matrix to prompt additional due diligence on assers, requiring the review of natural hazards in the region the asset is located and any mitigation strategies can then be determined.

c) Describe how processes for identifying, assessing and managing climate-inlated risks are integrated into the organisations overall risk management

Where material risks have been identified, the Group implements an appropriate strategy to address the ones highlighted by the above processes. Strategies include diversification of the Groups operations in terms of assets and geography, appropriate levels of insurance, and sceking different opportunities in sustainability through homebuilders and diversified supply chains.

## Task force on Climate-related Financial Disclosures ("TCFD")

#### Metrics & Targets

Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.

 a) Disclose the metrics used by the organisation to assess of materielated risks and opportunities in line with its strategy and risk management process.

As mentioned under the Risk Management pillar, management teams assess the relevant climate-related risks and opportunities of potential acquisitions in relation to set criteria. The FSG Risk Matrix used for our energy assets has a total score of 15, with a score of 9 or more required to indicate compliance with ESG policy requirements.

b) Disclose scope 1, scope 2 and if appropriate scope 3 greenhouse gas (GHG) emissions and the related risks.

The Group's location-based scope 1, 2 and 3 emissions are disclosed in the table below. In accordance with SECR, the Group's scope 3 emissions include only those relating to business travel.

Throughout the year, we have continued to deploy capital in expanding the fibre division resulting in an increase in emissions as this is a function of growth and headcount increase. This is highlighted by the Group's Scope 2 cmissions rising by 5% in FY23, caused by increased energy consumption, despite the overall emissions.

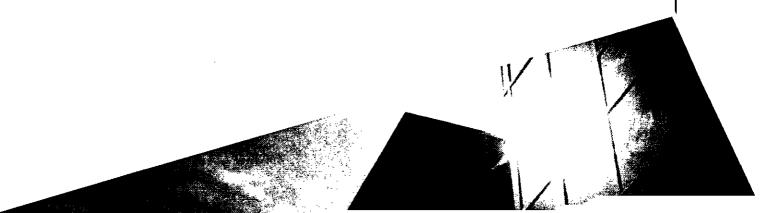

reduction across the business. While our fibre companies are focused on the end goal of building a network, the journey along the way is just as important.

The increase in emissions from our Fibre division has been fully offset by reductions in emissions from our reserve power sites, which account for 90% of reported emissions. Our 26 reserve power sites provide vital back-up power to the National Grid in times of peak demand, and emissions are expected to vary year on year, due to fluctuations in the energy generation required to balance the grid and supplement baseload power. We have thus seen a 5.2% reduction in emissions from the prior year in our reserve power sites alone, a function of the sites being called upon with less frequency.

The other primary driver of the Group's emissions are our biomass plants which account for a further 9% of the remaining emissions. Our biomass plants use a mix of straw, waste wood chips and other fuels of natural origins, which also have the capacity to regenerate, to produce electricity.

The Group has therefore seen a headline reduction in tennes of CO2 emitted in FY23 compared to FY22 of 5.8% primarily oriven by the lower use of fuel in the reserve power and biomass sites that the Group owns and operates as described above, only slightly offset by increases in Fibre emissions.

	FY23	FY22

#### Quality of data provided

The Group appointed Minimum, who are carbon accounting experts, to independently calculate its Greenhouse Gas ('GHG') emissions in accordance with the UK Government's 'Environmental Reporting Guidelines Including Streamlined Energy and Carbon Reporting Guidance'. The GHG emissions have been assessed following the ISO-14064 2018 standard and have used the 2022 emission conversion factors published by the Department for Business, Energy & Industrial Strategy (BE'S).

The emissions were categorised into location-based Scope 1, 2 and 3 emissions in alignment with the World Resources Institute's 'Creenhouse Gas' Protocol. A Corporate Accounting and Reporting Standard' guidelines with the below definitions.

- Scope 1: AT direct GHG emissions by the Group from sources under their control (e.g., burning fuer)
- Scope 2 Indirect GHG emissions from where the energy the Group purchases and uses is produced (e.g. when generating electricity used in the buildings)
- Scope 3. All indirect emissions not covered by scope 2 that occur up and down the value chain lieig from business travel, employee commuting, use of sold products, distribution).

Minimum used a survey-based approach to collect data, allowing subsidiary companies to submit total values for different activities or detailed consumption figures. Wherever possible, primary data was collected, be it kWhs of electricity consumed, m³ of natural gas hurrit and kilometres travelled by different modes for scope 3 emissions. We are pleased to report that of the data collected for the 1CFD and SECR disclosures, 99% is based on actual figures submitted by the subsidiary companies.

 c) Describe the targets used by the organisation to manage climate-related risks and opportunities and performance against targets

The Group, through the development and operation of primarily renewable energy assets inherently contributes to the UK achieving its net zero target and helps drive the transition away from fossil fuels. Although the majority of the Group's energy generating assets, such as wind and solar, are low-carbon by nature other Group divisions are more carbon intensive and drive higher emissions. For instance, the operation of the Group's reserve power plants, or the construction of our fibre, home and energy assets. Where possible, the Group moves operational assets onto renewable tariffs, and seeks to partner with suppliers and contractors that are like-minuted in their climate ambitions.

## **Group finance review**

#### Review of financial statements

The purpose of this report is to provide additional explanatory information on the financial statements. In measuring our performance, the financial measures that two use include those that have been derived from our reported results in order to eliminate factors that distort year on year comparisons. These are considered non-GAAP financial measures.

A reconciliation of these to the financial results can be found in note 28 of the notes to the financial statements.

The financial statements show assets at amortised cost, as such they do not reflect the future value that we expect to perive from these businesses. To that extent accounting performance may differ materially from the share price and may not reflect changes in the full market value of assets or businesses owned by the Group.

There were various changes to the operational auscis during the year including the sale of Darlington Point a large solar site in Australia and El valexpanding their south-eastern if ootprint with the auguisition of Millwood Designer Homes. In March, our ETTP businesses were successfully consolidated into one new business focusing on wholesale strategy and our own ISP brand. Subsequent to year end. Dulacca, a large, wind farm in Western Australia, hecame operational following a two-year construction process, and was sold for a profit of £22m in October 2023.

To support continued expansion, we built up cash reserves at year end of £15+m, which serve to fund the operational needs of our divisions.

## Financial performance

The Group has reported a loss before tax of £149m for the year ended 30 June 2022, which is a fall from profit of £59m (restated) in the prior year. This is driven primarily, by expansion in our fibre sector, as we continue to grow our assets and operational base, as detailed further in this report. Similarly, overall EBITDA' decreased by 58% to £82m (2022, £195m), which is mainly due to operational growth in our nower

divisions, particularly fibre, and a number of provisions recognised against specific property loans. Additionally, there are two instances of extraordinary costs included in the financial statements, which are not expected to reoccur. (1) restructuring costs of £13m associated with the morger of fibre-to-the-premises businesses, and (2) impairments costs of £22m, associated with trading assets which were sold subrequent to year and

## Group finance review

Revenue increased by £88m to £800m (2022\_£712m) : offset by the disposal of Danington Point in July which was driven by a steady increase across all our sectors. Following the acquisition of Elivia Homes in May 2022, revenue from homobuilding was included. for a full sear in the financial results for the first time. and contributed £50m of the £88m increase. The second most impactful increase, at fillibm, was in our energy division as power generation from our operating assets remained steady and energy prices stablised in the second part of the year

Retirement Jving savy a £9m increase (45%) in revenue, as we saw our sites reaching completion. and buyers taking residence. Additionally, revenue from our lending division saw an increase of 15% to E49m; (2022, £42m) due to an increase in the loan. book value to an average of £454m over the year.

Operating expenses for the year were in line with our expectations, with the increase primarily driven by reserve power due to gas procurement costs. Our fibre division continuing to grow its operational base, and the associated costs resulting from the addition of Eligia brought an associated increase in staff cost, and overall for the Group staff costs. increased by £35m.

A prior year restatement, due to hedge accounting. on interest rate swaps, prompted a reclassification between Other Comprehensive Income and Retained Earnings, this resulted in an accumulated reduction of £15m in financing costs and is reflected. in the restated accounts. However, interest costs increased in the year, as Etilia's external debt facility. was included in the Group results for the full year.

#### Financial position

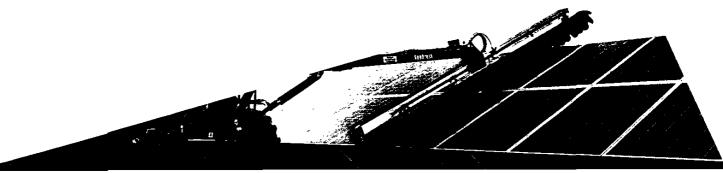

Continued shareholder interest and investment has seen net assets grow to £2,366m (2022, £2,221m). restated in the year ended 30 June 2023, we issued 142m shares (2022) 150m (for a total consideration) of £25 /m /2022 £205mi

Exed assets increased by £115m, as deployment in fibre network assets grew by £277m in the year and energy assets decreated by a net £108m, due to all compination of depto, ment in construction projects. 2022

Net current assets of £815m (2022, £807m restated). have increased by £8m iroflecting a £79m increase in stock in the homebuilding division, which in turn was offset by £99m decrease in cash due to accelerated cash deployment. Our loan book, gross of provisions, has increased by 27% to £474rr (2020) £3 '5m), and at 30 June 2023 represented 15% of net assets (2022-13%)

Cash and cash equivalents as at 30 June 2023 were £157m (2022 £256m) Cash generated from operating activities remained strong at £205m (2022) E346m), which has been utilised alongside external long-term financing and capital raised by new share issues to grow the business. We have invested substantially into the fibre and homebuilding sectors. which will require further capital expenditure over the next 12 months, increasing our diversification across sectors. Of the rash held at year end. £134m. was held in our energy, homebuilding and fibre subsidiaries, where there are a number of construction and infrastructure projects under way requiring cash to be readly available for stage payments due in the months after year end.

Goodwill, at £514m (2022, £541m), continues to be a significant number on the balance sheet and arises on the acquisition of some businesses. Acquired businesses for example renewable lenergy sites often have a market value in excess of the company's net assets reflecting their reliable future income streams. Put simply, the market value of our operation businesses reflects the laine of future expected profits inot the cost of simply buying tangible asseturuch as solar panels or wind turbines. ₩6 pay market value for the sites we acquire which may exceed the ratio of identifiable assets such as the solar panels and so denerates docaly It which essentially represents the value of the expected future income streams. Goodwill recognised a tested for impairment annually, and  $\pm$  l. gradually be written off typically over the life of the site as excepted returns are realised

## **Group finance review**

#### Sector performance

#### Energy

As economic activity and global demand continued to remain high throughout the year, so too did wholesale energy prices driven by movements in commodity prices. This resulted in the Group maintaining strong revenues from energy generation at a level similar to 2022 across our energy sites, with revenue of £606m (2022-£590m).

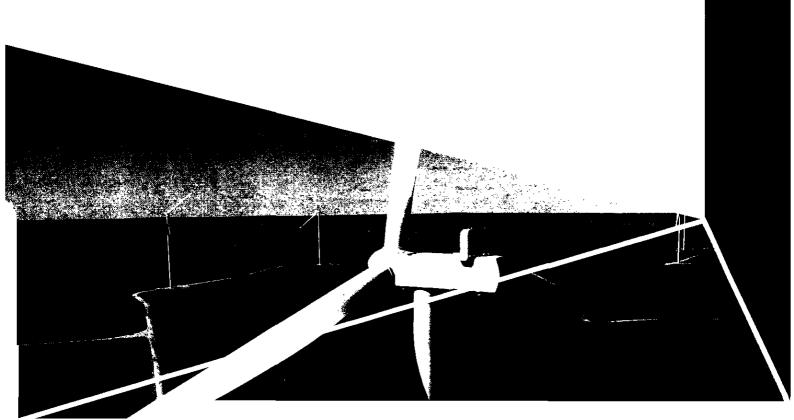

Our generation capacity remained consistent year on year, as there were no substantial changes to our energy generating assets. However, production was marginally reduced due to Shetterton, one of our biomass-fired power plants, suffering some months of operational downtime following a gearbox faut

The lassociated insurance claim for replacement parts and loss of revenue was settled in full.

The impact was offset by the increase in the average price per unit for the division as a whole, as it increased to £107.1 MWh from £97.5 MWh in the prior year, a movement of 10%

While total operating costs remained mostly consistent year on year at £377m (2022-£327m), the Group recorded a £30m increase in gas procurement costs for reserve power plans, driven by inflated gas prices in the first half of the year Correspondingly, EBITDA also decreased by 15% to £232m (2022-£258m)

	FY2023 Production (MWh)	FY2022 Production (MWh)	FY2023 External Availability	FY2022 External Availability

Total	3,068,792	3,099,690		

## **Group finance review**

The French government has announced it would revoke the measure introduced in November 2020 to retroactively modify FIT contracts which reduces uncertainty in our French solar portfolios. However this earlier ruling resulted in an £8m French solar Goodwill impairment in the prior year, which due to accounting convention cannot be reversed once recognised.

In November 2022, the UK government announced the introduction of an Electricity Generator Levy (FGL), a temporary measure to charge exceptional receipts on high revenues for Groups generating electricity. The levy is in effect from 1 January 2023 until 31 March 2028 and it enacts a 45% windfall levy on wholesale energy market revenues in excess of £75/MWh, specifically to electricity generated from renewable, biomass and energy from waste sources. The Group was not required to pay EGL in the period, however we do expect to pay this in the next financial year, and are assessing our position. We had already anticipated the impact on the returns generated from our energy portfolio over the next five years, which is reflected in the share price.

#### Lending

Revenue from lending increased by £7m to £49m. (15%) primarily due to a larger loan book for 2023, as property deprovment accelerated in the year. At year, end, the book had increased both in value (£474m). 2022, 375m), and in numbers of loans (219 loans) 2022 176 (bans). However, the UK's challenging. background was not without impact and throughout. the year, we recorded a provision of £30m against one commercial loan. This has highlighted the penefit of our diversification strategy as property. ending accounts for £470m of the total division. spread across 198 loans at year end. As a result-EBITDA for the lending division improved slightly to £8h less from £13m less in the prior year Within this midlement are provisions of E43m recognised against property loans during the year (2022, £39m)

#### Fibre

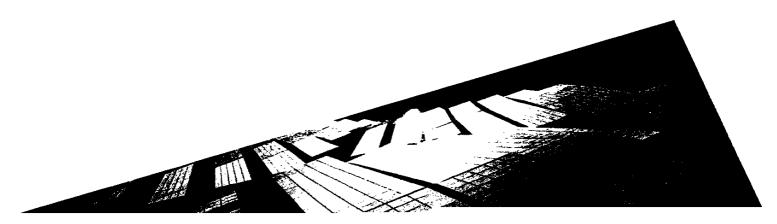

As a growing division, all our fibre businesses arc in the build phase and are starting to addicustomers to their networks. By 30 June 2023, the division was serving around 50,000 customers and building in over 100 locations in the UK. We are on track to be able to deliver tutt fibre connectivity to 500,000 properties in those towns and villages.

Overall, the division has almost doubted its revenue year on year, from F9m in 2022 to £16m in the current year. Although building a fibre network is capital intensive and leads to a physical asset on balance sheet, the division also incurs large operating expenses as the businesses scale their operations and develop market presence. This resulted in a reported FBITDA loss of £120m (2022, £56m loss), which is in line with expectations and reflects the development stage of the division. This includes extraordinary costs of £13m associated with the restructure.

As we build out these networks the assets will be recognised on the balance sheet at cost which cannot include future value which is expected to be generated as the assets have been internally generated.

#### Housebuilding

We have rebranded our Healthcare division to Housebuilding to reflect the change in business mix. Whereas lit incorporates primarily Eliva and Pangeford, this division continues to include the results of One Healthcare itwo private hospitals! for this manicial year. The One Healthcare trading assets and liabilities were sold subsequent to year end Extraordinary costs of £22m associated with these assets are recognised in the accounts and are not expected to reoccur in future periods.

## **Group finance review**

Housebuilding operations contributed £150m (2022 £11m) to Group revenues for the year reflecting the impact of increased revenue in Rangeford, as well as a full year of Elivia operations. Flivia sold 132 units in the year, and is performing in line with budget, while Rangeford increased its revenue by 45% to £29m and sold 44 units.

A change in accounting ordicly resulted in the cost of Rangeford communal areas being capitalised as fixed assets (furniture, fixtures and equipment) and amortised over the life of the site. Previously, these costs were immediately recognised to Cost of Sales in the P&E. The treatment has been agreed with our auditors, and has not resulted in a prior year icstatement, however, Rangerford fixed assets increased by £15m in the current year as a result.

#### **Funding and liquidity**

Our strategy within our renewable energy businesses is to secure long-term financing at conservative levels from mainstream banks to enhance returns. At year end we had drawn £1,160m of external debt in this part of the Group, with a further £175m available to be drawn.

This approach enables us to acquire businesses that have stable characteristics such as predictable cost base, revenue streams, government incentives or proven technology and as such have lower returns that without leverage would be insufficient for our shareholders. It also allows us flexibility in financing our businesses and managing cash flow. We believe that failing to adopt this strategy would have a negative impact on business return and shareholder value over the long-term 80% of our interest payable is fixed and therefore we are not significantly exposed to current interest rate volatility. The Group applies hedge acrounting for interest rate swaps

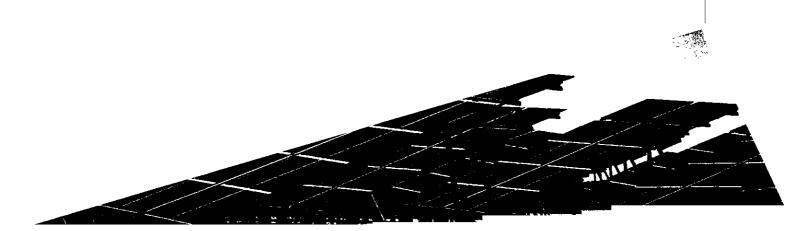

which means any changes in the fair value of the swap is recognised in reserves (cash flow hiedge reserve) with the ineffective portion of the hodge recognised in the P&L. The market value of the swaps is recognised on the balance sheet as an asset or a flability, depending on whether the swap is favourable compared to current rates.

We continually review financing arrangements to ensure that they are competitive and optimised for the needs of the business. To ensure cash is managed in an agile mariner, we maintain tlexible finance facilities which can be drawn or repaid to meet immediate business needs. Specifically, the Group has access to a Revolving Credit Facility of £290m, which is interlinked to the net assets of our energy division. The flexibility to draw and repay tunds at short notice facilitates effective management of short-term cash fluctuations, which can be driven by seasonality of operating working capital.

#### Looking ahead

At the end of the financial year, we continue to believe that the business is positioned well to take advantage of future growth opportunities across its core business areas. Energy and lending operations are well established in the market and continue to make excellent progress with robust performances in the new financial year Provisions taken against loans during the year in our lending sector have ring-fenced challenges which are not indicative of further problems across other loans in the sector

Deployment into fibre continues to roll out in line with expectations, while growing its revenue and operational base. Sales activity in our housebuilding division remain strong against a challenging market and are reporting profits in line with budget.

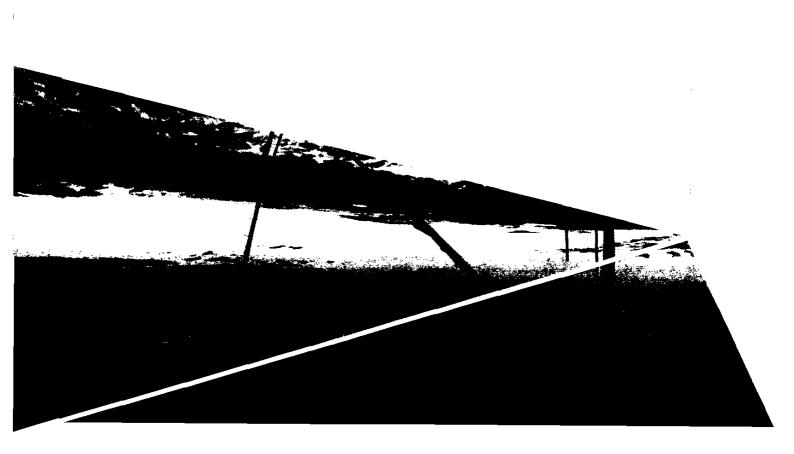

## **Group finance review**

We expect to generate strong operating learns from our established divisions for the corning years, in addition to the anticipated outflows for our construction phase assets while at the same time growing our fibre and housebuilding divisions to inaturity.

### Independent auditors' report to the members of Fern Trading Limited

#### **Opinion**

We have audited the financial statements of Fern Trading Limited (the Parent Company) and its subsidiaries (the Group) for the year ended 30 June 2023, which comprise the Group Statement of Comprehensive incomes the Group and Parent Company Balance Sheet, the Group Statement of Cash Flows, the Group and Parent Statement of Changes in Equity and the related notes, 1 to 29, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standard applicable in the UK and Republic of Ireland" (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the financial statements

- give a true and fair view of the Group's and of the Parcht Company's affairs as at 30 June 2023 and of the Groups loss for the year then ended
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Fractice, and
- have been prepared in accordance with the requirements of the Companies Act 2006.

#### Basis for opinion

We conducted our audit in accordance with international Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further bescribed in the Auditor's resconsibilities for the audit of the financial statements section of our report. We are independent of the Group in appointance with the ethical requirements that are role and to our audit of the financial statements in the UK including the EPC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the probaration of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that individually or collectively, may cast significant doubt on the Group and Parent Company's abuty to continue as a going concern for a period of twelve months from when the financial statements are authorised for issue

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report However because not all future events or conditions can be predicted, this statement is not a guarantee as to the Group's ability to continue as a going concern

#### Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditors report theroon. The directors are responsible for the other information contained within the annual report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report. We do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and imposing so coursion whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit in otherwise appears to be materially misstated if we dentify such material

### Independent auditors' report to the members of Fern Trading Limited

inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard

# Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit

- the information given in the Strategic report and the Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements, and
- the Strategic report and Directors report have been prepared in accordance with applicable legal requirements.

# Matters on which we are required to report by exception

In the light of the knowledge and understanding of the Group and the Parent Company and its environment obtained in the course of the audit we have not identified material misstatements in the Strategic report or Directors' report

We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion

- adequate accounting records have not been kept or returns adequate for our audit have not been received from branches not visited by us or
- the Parent Company financial statements are not in agreement with the accounting records and returns, or
- certain disclosures of Directors remuneration specified by law are not made, or

 we have not received all the information and explanations we require for our audit

#### Responsibilities of directors

As explained more rully in the Directors responsibilities statement set out on pages 38 and 39 the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error

In preparing the financial statements, the Directors are responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing as applicable matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so

# Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

### Independent auditors' report to the members of Fern Trading Limited

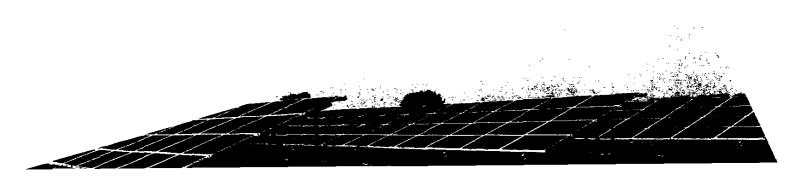

# Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularries including fraud are instancer of non-combliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error as fraud may involve dollherate concealment by, for example, forgery or infentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the critity and management.

Our approach was as follows

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Group and determined that the most significant are those that relate to reporting framework (FRS 102 and the Companies Act 2006)
- We understood how Fern Trading Limited is complying with those frameworks by making enquiries of management those charged with governance and those responsible for legat and compliance procedures as to any fraud risk framework within the entity, including whether a formal frauditisk assessment is completed. We comboriated our enquiries through review of the following documentation or performance of the following procedures.
  - obtaining an understanding of entity level control and considering the influence of the control environment;

- obtaining an understanding of policies and procedures in place regarding comptiance with laws and regulations, including how compliance with such policies is monitored and enforced, obtaining an understanding of managements process for identifying and responding to fraud risks including programs and controls established to address risks dentified or otherwise prevent, deter and detect fraud, and how senior management monitors those programs and controls.
- review of board mileting minutes in the period and up to date of signing
- We assessed the susceptibility of the Groups tinancial statements to material misstatement including how fraud might occur by holding a discussion within the audit team which included
  - identification of related parties,
  - understanding the Group's business, the control
    environment and assessing the inherent risk for
    relevant assertions at the significant account
    level including discussions with management
    to gain an understanding of those areas of the
    financial statements which were susceptible to
    fraud as identified by management, and
  - considered the controls that the Group has established to address risks identified by the entity or that otherwise seek to prevent deterior detect frauding uding gaining an understanding of the entity level controls and policies that the Group applies.
- Based on this understanding we designed our audit procedures to identify non-combinance with such awy and regulations. Our procedures involved testing of journal entries through journal analytics torils with focus on marical.

### Independent auditors' report to the members of Fern Trading Limited

journals, large or unusual transactions, or journals meeting our defined risk criteria based on our understanding of the business, tested accounting estimates for evidence of management bias, enquiring of members of senior management and those charged with governance regarding their knowledge of any non-compliance or potential non-compliance with laws and regulations that could affect the financial statements, and inspecting correspondence, if any, with the relevant licensing or regulatory authorities.

A further description of our responsibilities for the audit of the financial statements is located on the

Financial Reporting Council's website at www.frc.org.uk/auditorsresponsibilities This description forms part of our auditor's report.

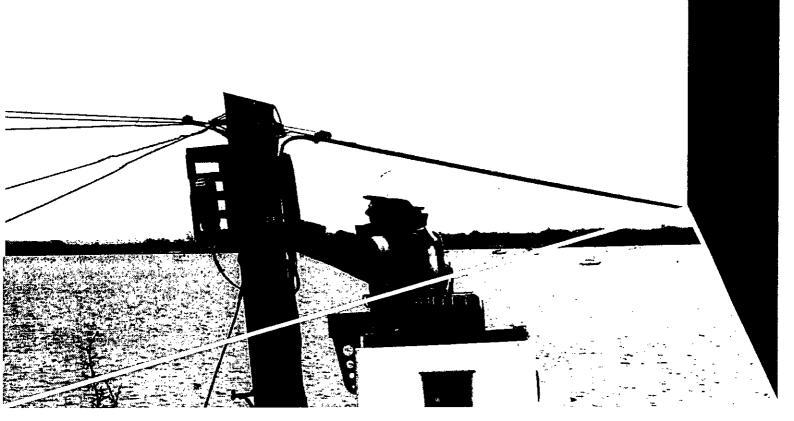

#### Use of our report

This report is rnade solely to the Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are

required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

### Statement of accounting policies

#### Company information

Fern Trading Limited (the Company) is a private company limited by shares and incorporated on 14 May 2020. The company is domiciled in Fingland, the United Kingdom and registered under company number 12603636. The address of the registered office is at 6th Floor, 53 Holborn, London, England, ECIN 2HT.

#### Statement of compliance

The Group and individual financial statements of Fern Trading Limited have been propared in compliance with the United Kingdom Accounting Standards, including Financial Reporting Standard 102, "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland (FRS 102) and the Companies Act 2006

#### Basis of preparation of financial statements

The financial statements have been prepared on a going concern basis, under the historical cost convention, as modified by the recognition of certain financial assets and liabilities measured at fair value, and in accordance with the Companies Act 2006 and applicable accounting standards in the united Kingdom. The principal accounting policies, which have been applied consistently throughout the year, are set out below.

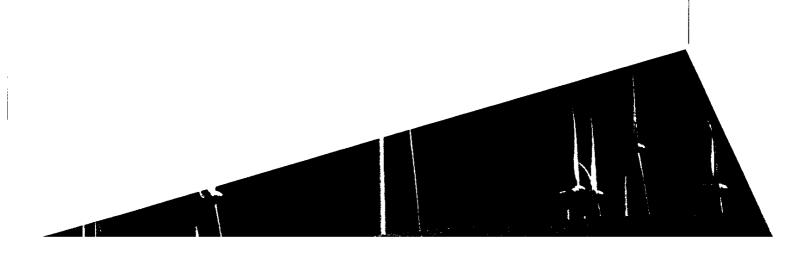

The consolidated financial statements include the results of all subsidiaries owned by Fern Traoring Limited as listed in note 29 of the annual financial statements. Certain companies of these subsidiaries, which are listed in note 29, have taken the exemption from an audit for the year ended 30 June 2023 permitted by section 479A of Companies Act 2006. In order to allow these subsidiaries to take the audit exemption, the parent company has given a statutory guarantee, in line with section 479C or Companies Act 2006, of all the outstanding net liabilities as at 30 June 2023.

#### Going concern

The Group's and the Company's business activities, together with the factors likely to affect its future development, performance and position are set out the Strategic Report on pages 4 to 15. The financial position of the Group its cash flows, aduldity position and borrowing facilities are described in the financial review on pages 31 to 36. The principal risks of the Group are set out on pages 17 to 20.

The Directors perform an annual going concern review that considers the Group's ability to meet its financial obligations as they fall due, for a period of twelve months after the date that the financial statements have been signed.

Due to the challenging market conditions management have performed an assessment to determine whether there are any material uncertainties arising that could cast significant doubt on the ability of the Group to continue as a going concern. No significant issues have been noted and as a consequence, the directors believe that the Group is well, blaced to manage its business risks successfully despite the current uncertain economic outlook.

### Statement of accounting policies

In reaching this conclusion the Directors have reviewed the financial impact of the uncertainty on the Group's balance sheet, profit and loss and cash figure with specific consideration given to the following

A reverse stress test was performed on the base case forecast to ascertain what scenarios would result in risks to the Group's liquidity position. The test showed even in an unlikely scenario of a significant reduction of revenue of 46%, the Group is able to sustain its current operational costs and moet all liabilities as they fall que for at least a year from the date of signing these financial statements when utilizing the available facilities within the Group.

The Group has a number of financing facilities that contain covenants requiring the Group to maintain specified financial ratios and comply with certain other financial covenants. These financial covenants are tested at least biannually, and, at the date of this report, the Group is in compliance with all its financial covenants. Stress tests on reasonably plausible scenarios such as a significant reduction in EBITDA of 84% over time have been used to assess the covenant requirements for the at least the next twelve months and all covenants have been forecast to be met even under the stress test scenario, in the going concern period

At 30 June 2023, the Group had available cash of £157m and headroom available of £175m including a revolving credit facility of £290m. Debt of £217m is due to mature in less than one year, with the remainder of £941m payable in more than one year. The Group's facilities, repayment dates and undrawn amounts are set out in Note 16 Loans and Borrowings.

Key accounting judgement and estimates have been made with consideration given to the current economic outlook. Key estimates include loan recoverability valuation of work in progress, decommissioning provisions impairment of goodwill and investments, business combinations and heage accounting. Details are set out on pages 50 to 60.

Based on the above assessment of current economic conditions and the impact on the Group's financial position, liquidity and financial covenants, the directors have concluded that the Group and the Company has adequate resources to continue in operational existence for the next 12 months. Thus, they continue to adopt the going concern basis of accounting in preparing the annual financial statements.

#### Exemptions for qualifying entities under FRS 102

FRS 102 allows a qualifying entity certain disclosure exemptions, subject to certain conditions, which have been compiled with, including notification of and no objection to, the use of exemptions by the Company's shareholders.

The Company has taken advantage of the following exemptions

- from preparing a statement of cash flows, on the basis that it is a qualifying entity and the consolidated statement of cash flows, included in these financial statements, included the Company's cash flows,
- irrom the financial instrument disclosures irrequired under FRS 102 paragraphs 11,39 to 11,48A and paragraphs 12,26 to 12,29, as the information is provided in the consolidated financial statement disclosures.
- iii from disclosing the Company key management personnel compensation, as required by FRS 102 paragraph 33.7

### Statement of accounting policies

#### Basis of consolidation

The monsolidated financial statements include the results of Fern Trading Limited and all its subsidiary undertakings made up to the same accounting date. All intra-group balances, transactions, income and expenses are eliminated in full on consolidation. The results of subsidiary undertakings acquired or disposed of during the period are included or excluded from the income statement from the effective date of acquisition or disposal.

All undertakings over which the Group exercises control, being the power to govern the financial and operating policies so as to obtain penetic from their activities, are consolidated as subsidiary undertakings. Where a subsidiary has different accounting policies to the Group, adjustments are made to those subsidiary financial statements to apply the Group's accounting policies when preparing the consolidated financial statements.

Any subsidiary undertakings or associates sold or acquired during the year are included up to, or from, the dates of change of control or change of significant influence respectively.

Where the Group has written a put option over shares held by a non-controlling interest, the Group derecognises the non-controlling interest and instead recognised contingent deferred consideration liability within other payables for the estimated amount likely to be paid to the non-controlling interest on exercise of those options. The residual amount interesting the difference between any consideration paid/payable and the non-controlling interest's share of not assets is recognised as goodwill. Movements in the estimated liability after initial recognition are recognised as goodwill.

#### Foreign currency

#### i. Functional and presentation currency

The Group financial statements are presented in pound sterling and rounded to thousands

The Company's functional and presentation currency is pound sterling and rounded to thousands

#### ii. Transactions and balances

Foreign currency transactions are translated into the functional currency using the spot exchange rates at the dates of the transactions. At each period end foreign currency monetary items are translated using the closing rate. Non-monetary items measured at historical cost are translated using the exchange rate at the date of the transaction and non-monetary items measured at fair value are measured using the exchange rate when fair value was determined. Foreign exchange gains and losses resulting from the rettlement of transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss account.

All foreign exchange gains and losses are presented in the profit and loss account within administrative expenses.

#### iii. Translation

Inditracing results of Group uncertakings are translated into pounds stering at the average exchange rates for the year. The assets and liabilities of overseas undertakings including good will and fair value adjustments arising on acquisition, arc translated at the exchange rates ruling at the year-end. Exchange adjustments arising from the retranslation of opening net investments and from the translation of the profits or lossed at average rates are recognised in Other compronensive income and allocated to non-controlling interest as appropriate.

### Statement of accounting policies

#### Turnover

The Group operates a number of classes of business. Revenue is derived by the following

#### Energy

Turnover from the sale of electricity generated by solar farms, wind generating assets inserve power plants and biomass and landfill sites is recognised on an accruals basis in the period in which it is generated. Revenue from long term government backed offtake agreements, such as the Renewable Obligation Certification (IROC) scheme are accrued in the period in which it relates to Turnover from the sale of fertiliser by biomass and landfill businesses is recognised on physical dispatch.

#### Lending

Turnover represents arrangement fees and interest on loans provided to customers, riet of any value added tax. Loan interest is recognised on an accrual basis in line with contractual terms of the loan agreement. Arrangement fees are spread over the life of the loan to which they relate.

#### Fibre

Turnover is recognised at the fair value of the consideration received for internet connectivity and related II services provided in the normal course of business, and is shown net or VAT. Turnover is recognised based on the date this service is provided.

#### House building

Turnover is recognised on legal completion of the sale of property, land and commercial spaces. Turnover from housing association contracts is recognised by reference to the value of work completed as a proportion of the total contract value. Turnover for retirement living is recognised when the significant risks and rewards of ownership of retirement properties have passed to the buyer (on legal completion), the amount of revenue can be recognised reliably, and it is probable that the economic benefits associated with the transaction will flow to the entity.

### **Employee** benefits

The Group provides a range of benefits to employees, including annual bonus arrangements, paid holiday arrangements and defined contribution pension plans

#### i. Short-term benefits

Short term benefits including holiday pay and other similar non-monetary benefits, are recognised as an expense in the period in which the service is received.

#### ii. Defined contribution pension plan

A defined contribution plan is a pension plan under which the Group pays fixed contributions into a separate entity. Once the contributions have been paid the Group has no further payment obligations. The contributions are recognised as an expense when they are due. Amounts not paid are shown in accruals in the balance sheet. The assets of the plan are held separately from the Group in independently administered funds.

### Statement of accounting policies

#### iii. Share-based payments

Cash settled share, based payments are measured at rail value at the balance sheet date. The Group recognises a rability at the balance sheet date based on those fair values, taking into account the estimated number of units that will actually yest and the nurrent proportion of the sesting period. Changes in the value of this liability are recognised in the income statement

The Group has no equity settled arrangements

#### **Finance costs**

Finance costs are charged to the profit and loss account over the term of the debt using the effective interest method so that the amount charged is at a constant rate on the carrying amount. Issue costs are initially recognised as a reduction in the proceeds of the associated capital instrument and released to the profit and loss account over the term of the debt

#### Current and deferred tax

Tax is recognised in the statement of income and retained carnings, except that a change attributable to an tern of income and expense recognised as other comprehensive income or to anotem recognised directly in equity is also recognised in other comprehensive income or directly in equity respectively.

The current income tax charge is calculated on the basis of tax rafes and faws that have been enacted or substantively enacted by the balance sheet date in the countries where the Company operates and generates

Deferred balances are recognised in respect of all timing differences that have originated but not reversed by the Balarice sheet date, except that

- The recognition of deterred tax assets is limited to the extent that it is probable that they will be recovered against the reversal of deterred tax liabilities or other future taxable profits, and
- Any deferred tax balarices are reversed if and when all conditions for retaining associated tax allowances. have been met

Deferred tax balances are not recognised in respect of permanent differences except in respect of business combinations, when deferred tax is recognised on the differences between the fair values of assets acquired and the future tax deductions available for them and the differences between the fair values of liabilities acquired and the amount that will be assessed for fax. Deferred tax is defermined using tax rafes and laws that have been enacted or substantively enacted by the balance sheet date

#### Business combinations and goodwill

Business combinations are accounted for by applying the purchase method

The cost of a business combination is the fair value of the consideration given, liabilities incurred or assumed and the educt, instruments issued plus the crisis directly attributable to the business combination. Where control is achieved in stages the cost is the consideration at the date of each transaction.

On acquisition of a husiness, fair values are attributed to the identifiable assets, liabilities and contingent papilities unless the fair value cannot be measured reliably, in which case the value is incorporated as good will

### Statement of accounting policies

Goddwill recognised represents the excess of the fair value and directly attributable costs of the purchase consideration over the fair values to the Group's interest in the identifiable net assets, liabilities and contingent liabilities adquired.

On acquisition, goodwill is allocated to cash-generating units (CGUs) that are expected to beriefit from the combination

Goodwill is amortised over its expected useful life which is determined based on the estimated lifespan of the assets acquired. Where the Group is unable to make a reliable estimate of useful life, goodwill is amortised over a period not exceeding ten years. Goodwill is reviewed and assessed for impairment indicators on an annual basis and any impairment is charged to the profit and loss.

#### Tangible fixed assets

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets, less their estimated residual value, over their expected useful lives. Depreciation commences from the date an asset is brought into service is and and assets in the course of construction are not depreciated. Tangible assets are depreciated over their estimated useful lives, as follows.

Land and buildings	2% to 4% straight inc
Power stations	3% to 5% straight line
Plant and machinery	4% to 33% straight line
Network assets	4% to 6% straight line

Assets in the course of construction are stated at cost. These assets are not depreciated until they are available for use.

Where factors, such as technological advancement or changes in market price, indicate that residual value or useful life have changed, the residual value, useful life or depreciation rate are amended prospectively to reflect the new circumstances. The assets are reviewed for impairment if the above factors indicate that the carrying amount may be impaired.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised within profit or loss.

#### Intangible assets

Intangible assets are stated at cost less accumulated amortisation and accumulated impairment losses. Amortisation is calculated, using the straight line method, to allocate the depreciable amount of the assets to their residual values over their estimated useful lives, as follows.

Development rights	25 and 30 years
Software	2 to 10 years

Amortisation expenses are included in administrative expenses. Development rights relate to planning consent to build a solar farm and a wind farm acquired on acquisition.

Whore factors, such as changes in market price indicate that residual value or useful life have changed, the residual value, useful life or amortisation rate are amended prospectively to reflect the new circumstances.

The assets are reviewed for impairment if the above factors indicate that the carrying amount may be impaired.

### Statement of accounting policies

#### Leases

At inception the Group assesses agreements that transfer the right to use assets. The assessment considers whether the arrangement is, or contains ia lease based on the substance of the arrangement and whether the lease should be classified as either a finance lease or an operating lease.

Leases of assets that transfer substantially all the risks and rewards incidental to ownership are classified as finance leases. Finance leases are capitalised at the commencement of the lease at the fair value of the leaset asset and depreciated over the shorter of the lease term and the estimated useful life of the asset. Assets are assessed for impairment at each reporting date.

Leases that do not transfer all the risks and rewards of ownership are classified as operating leases. Payments under operating leases are charged to the profit and loss account on a straight-line basis over the period of the lease.

#### investments

The Company holds investments in a subsidiary at cost less accumulated impairment losses of an impairment loss is subsequently reversed, the carrying amount of the investment is increased to the revised estimate of its recoverable amount, but only to the extent that the revised carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised in prior periods. A reversal of an impairment loss is recognised in the profit and loss account.

#### Cash

Cash inhades cash in hand and deposits repayable on demand. Restricted cash represents cash for which the Group does not have immediate and direct access or for which regulatory or legal requirements restrict the use of the cash.

#### Stocks

Raw materials, spare parts and consumables are valued at the lower of cost and not real sable value. Where necessary a provision is made for obsolete, slow-moving and defective stock. Cost is determined on the first-in, first-but (EFC) method.

Fuel stocks (MBM and litter) are valued on an average cost basis ever one to two months and provision for unusable litter is reviewed monthly and applied to off-site stock.

Fuel stock of straw has been valued at the historical cost per tonne of straw. A provision for unusable straw is identified on an individual stack basis and is reviewed monthly. Stocks are used on a first in first out (FIEO) basis by age of straw.

Stocks of ash at Figroph by are valued at the lower of cost and het realisable value to the Group

Stocks of property development work in progress (WP), are stated at the lower of cost and net rearsable value. Cost corribrises prectimaterials and, where applicable, direct labour costs and those overheads that have been incurred in bringing the stocks to their present locations and condition.

At each recorning date, an assessment is made for impairment. An, exposs of the carrying arricumt of stocks over its estimated selling price loss costs to complete and soll is recognised as an impairment loss through the profit and loss account. Reversals of impairment losses are also recognised in the profit and lost account.

### Statement of accounting policies

#### Accrued income

Accrued income on loans is calculated at the rate of interest set out in the loan contracts. Energy income is accrued over the period in which it has been generated.

#### **Deferred income**

Deferred income is recognised in accordance with the terms set out in the contact. Deferred income is released to the profit and loss account in the period to which it relates.

#### Financial instruments

The Group has chosen to adopt Sections 11 and 12 of FRS 102 in respect of financia: instruments

#### Financial assets

Basic financial assets including trade and other receivables and cash and bank balances are initially recognised at transaction price unless the arrangement constitutes a financing transaction where the transaction is measured at the present value of the future receipts discounted at a market rate of interest Such assets are subsequently carried at amortised cost using the effective interest method.

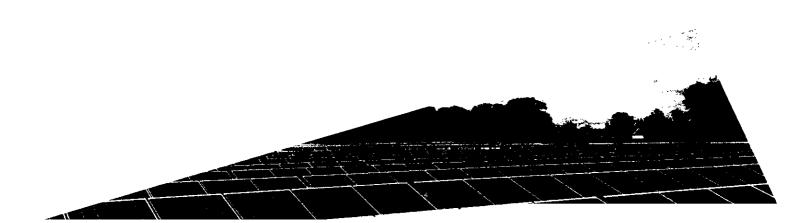

At the end of each reporting period financial assets measured at amortised cost are assessed for objective evidence of impairment. If an asset is impaired the impairment loss is the difference between the carrying amount and the present value of the estimated cash flows discounted at the asset's original effective interest rate. The impairment loss is recognised in profit or loss.

Other financial assets, including investments in equity instruments which are not subsidiaries, associates or joint ventures, are initially measured at fair value, which is normally the transaction price. Such assets are subsequently carried at fair value and the changes in fair value are recognised in profit or loss, except that investments in equity instruments that are not publicly traded and whose fair values cannot be measured reliably are measured at cost less impairment.

Financial assets are derecognised when (a) the contractual rights to the cash flows from the asset expire or are settled, or (b) substantially all the risks and rewards of the ownership of the asset are transferred to another party or (c) control of the asset has been transferred to another party who has the practical ability to unilaterally sell the asset to an unrelated third party without imposing additional restrictions.

#### Financial liabilities

Basic financial liabilities, including trade and other payables, bank loans, loans from fellow Group companies and preference shares are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at a market rate of interest.

### Statement of accounting policies

Debt instruments are subsequently carried at amortised cost, using the effective interest rate method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the exterit that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the drawn down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

Frade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less. If not ithey are presented as non-current liabilities. Trade payables are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.

Financial liabilities are derecognised when the liability is extinguished, that is when the contractual obligation is discharged, cancelled or expires

#### **Provisions**

Provisions are made where an event has taken place that gives the Group a legal or constructive obligation that probably requires settlement by a transfer of economic benefit, and a reliable estimate can be made of the amount of the obligation.

Provisions are charged as an expense to the profit and loss account in the year that the Group becomes aware of the obligation, and are measured at the best estimate at the balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties.

#### Hedging

The Croup applies heage accounting for transactions entered into to manage the cash flow exposures of borrowings. Interest rate swaps are held to manage the interest rate exposures and are designated as hash flow hedges of floating rate borrowings. Changes in the fair values of derivatives designated as cash flow hedges, and which are effective are recognised directly in equity. Any ineffectiveness in the needing relationship (being the excess of the cumulative change in fair value of the hedging instrument since inception of the hedge over the cumulative change in the fair value of the hedged term since inception of the hedgel is recognised in the profit and loss.

The gain or loss recognised in other comprehensive income is reclassified to the profit and loss in accordance with the cash flows of the hedged item. Hedge accounting is discontinued when the hedging instrument expires indillonger meets the hedging criteria, the forecast transaction is no longer highly probable, the needed debt instrument is derecognised or the hedging instrument is terminated.

#### Share capital

Ordinary shares issued by the Group are recognised in equity at the value of the proceeds received, with the excess over nominal value being credited to share premium.

#### Non-controlling interests

Non-controlling interests are measured at their pictrioritionate share of the acquired's identifiable net assets at the date of acquisition.

### Statement of accounting policies

#### Key accounting judgements and estimates

The preparation of financial statements in compliance with FRS 192 requires the uso of contain critical accounting estimates. It also requires management to exercise judgement in applying the Company's accounting policies. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The key estimates and judgements in preparity these financial statements are

#### i. Recoverability of loans and advances to customers (estimate)

Loans and advances to customers, including associated accrued income balances, are reviewed for imparment on a biannual basis. In considering the need for a provision, management determine their best estimate of the expected future cash flows on a case by case basis. As this estimate relies on a certain number of assumptions about future events which may differ from actual outcomes, including the porrower's ability to repay interest and capital due in future periods, this gives rise to judgement as to whether there is a shortfall between the carrying value and the fair value of the debter balance.

Management note that provisions against toans and advances is a critical estimate and have therefore performed sensitivity analysis on the provision. The results of the sensitivity analysis conclude that a change of +7 one per cent in the amount provided against the estimated balance at risk would have resulted in £3.6m less/more expenditure being charged to the income statement during the period. See note 13 for the carrying amount of the debtors and provisions at 30 June 2023.

#### ii. Value of property development work in progress ('WIP') (estimate)

Property development WIP is reviewed for impairment on a periodic basis on considering the need for a provision, management determine their best estimate of the recoverable value. Management engage an expert external valuer to provide key assumptions about future events which may differ from actual outcomes including property valuations, rate of sales and development costs.

These estimates give rise to judgement as to whether there is a shortfall between the carrying value and the fair value of the balance as at the 30 June 2023. Post year end, management have reviewed the assumptions used to determine the value of property development WIP and have observed no changes in performance that would impact the valuation as at the 30 June 2023. See note 12 for the carrying amount of the property development WIP.

#### iii. Purchase price agreement (Australian entities) (judgement)

The Group owns one energy generating subsidiary in Australia which has entered into purchase price agreements (PPA's) in 2019 and 2021. The FPA's include a contract for differences "CfD" whereby the subsidiaries pay/receive amounts from the customer based on the differences between a fixed selling price and the actual price for electricity sold to the Australian energy market. The directors believe the contract is outside the scope of FRS 102 section 12 as it is for the sale of a non-financial item and the CfD is typical for such arrangements. Therefore it is being accounted for under FRS 102 section 23 as a revenue contract with variable consideration, rather than revaluing the entire contract to fair value.

#### iv. Business combinations (estimate)

The cost of a business combination is the fair value of the consideration given, rabilities incurred plus the costs directly attributable to the business coir bination. Fair value of these combinations is a key estimate and more details are provided on pages 54 to 55.

### Statement of accounting policies

#### v. Decommissioning provision (estimate)

The provision for decommissioning costs is measured at management's best estimate or the present value of the expenditure required to settle the future obligation to return land on which there are operational wind and solar farms, to its original condition. The recel of the provisions is determined to a significant degree by the estimation of future dismantling and restoration costs, as well as the timing or dismantlement.

#### Wind Farms (estimate):

Management note that decommissioning provisions is a critical estimate and have therefore performed sensitivity analysis. The results of the sensitivity analysis conclude that a change of +/- one per cent in the discount rate would have resulted in £2.2m increase/decrease in the provision. See note £8 for the provision recognised at 30 June 2023. Management utilise external expertise to provide an estimated lost to dismantle and have used a discount rate of 4.5% to reflect the time in value of money and the risks specific to the obligation.

#### UK Solar (estimate):

Management note that decommissioning provisions is a critical estimate and have therefore performed sensitivity analysis. The results of the sensitivity analysis conclude that a change of +/- one per cent in the discount rate would have resulted in 6.5 Gm increase/decrease in the provision. See note 18 for the provision recognised at 30 June 2023. Management utilise external expertise to provide an estimated cost to dismantle and have used a discount rate of 4.2% to reflect the time in value of money and the risks specific to the obligation.

#### French Solar (judgment):

Management believe that given the nature of these particular assets, the lessor may wish to either take title of the assets for either continued use or to realise value through solving the assets and as such do not believe that an outflow is probable to settle this restoration obligation. Management will continue to monitor the situation at each balance sheet date.

#### vi. Impairment of goodwill and investments (estimate)

The value of goodwill held by the Group and investments in subsidiary undertakings held by the Compariy is reviewed annually for impairment. The recoverability of these balances is considered with reference to the present value of the estimated future cash flows. These calculations use cash flow projections which extend forward forecast business performance together with assumptions surrounding the expected life of the asset externally propared forecasts and valuations, and any adjustments required to the discount rate to take account of business risk. The estimated present value of these future cash flows is sensitive to the discount rate and growth rate used in the calculation, all of which require management's judgement. Testing of the carrying value has been performed ouring the year, which has include several scenarios being modeled. Based on this testing and the resulting impairment recognised on investments, management believes there is sufficient headroom to curpoon the value of populvill and investments in subsidiar, entities

Management instellination pairment of godon Mand investments is a critical extincte and have therefore performed sensitivity analysis on the provision. The results of the sensitivity analysis conduce that a change of 10 one per cent in the amount provided against the estimated balancs at 154 would have resulted in £5.14m fetsiment expenditure being charged to the income statement during the period. See note 8 for the carrying amount of the good will and investments at 30 June 2023.

The Group has no other key management (2022) nonel.

#### **5** Fm) is a model of con-

A number of subsidiaries of the Group operate a cash-settled LTIP to qualifying employees, whereby employees render services in exchange for cash, the amount of which is determined by reference to the valuation of the underlying subsidiary. The fair value of the liability for the awards made is measured at each reporting date and at the settlement date. The fair value is recognised over the vesting period. The amount of expense recognised takes into account the best available estimate of the number of units expected to vest under the service and performance conditions underlying each award granted.

#### Cash-settled share-based payment transactions with employees

Details of related undertakings are shown in note 29

Unlisted investments comprise the Group's holding of the members' capital of Terido LLP, a lending business, and its shareholding in Bracken Trading Limited. Fern co-founded Terido LLP in October 2012 with the intention of conducting a proportion of its future trade through the partnership. Additions and disposals of unlisted investments relate to investments and divestments in Terido it P in line with Fern's cash requirements and to utilise surplus funds. Fern has a small shareholding in Bracken Trading Limited from time for time. Fern's investment in Bracken Trading Limited at 30 Junie 2023 was ENil (30 June 2022. Enil). The directors do not consider Terido LLP or Bracken Trading Limited to be subsidiary undertakings of Fern Trading Limited.

Note 26 details the prior period adjustments

### Notes to the financial statements for the year ended 30 June 2023

#### Derivative financial instruments

The Group's financial risk management seeks to minimise the exposure to market risk, credit risk, equipity and cash flow risk, and energy market risk.

#### a) Market risk

#### Energy market risk

The energy sector is experiencing significant turbulence and there is a risk that forecast levels of income are not achieved due to changes in wholesale energy prices off-take contracts or government subsidies. Changes in Government policy, or regulator intervention may result in reduced income streams within the group due to additional leves.

### Currency risk

The Group presents its consolidated financial statements in sterling and conducts business in a number of other currencies, principally Euro and Australian doilar. Consequently, the Group is exposed to foreign exchange risk due to exchange rate movements, which affect the Group's transactional expenses and the translation of earning and net assets of its non-sterling operations.

#### Transactional exposures

Transactional exposures arise from administrative and other expense in currencies other than the Group's presentational currency (Sterling). The Group enters in to forward foreign exchange contracts and foreign exchange swaps to mitigate the exchange rate risk for certain foreign currency payables and receipts. The forward currency contracts and swaps are measured at fair value, which is determined using valuation techniques that utilise observable inputs. The key inputs used in valuing the derivatives are the forward exchange rates for GBP AUD and GBP EUR. On 30 June 2023 the fair value of the foreign currency contracts was an asset of finil (2022, finil ) and a liability of finil (2022, finil).

### Translational exposures

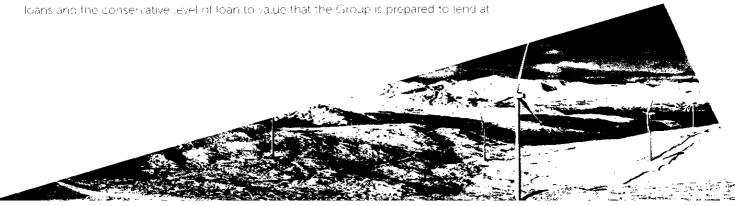

Balance sheet translational exposures arise or consolidation on the retranslation of the balance sheet of non-sterling operations into sterling the Group's presentational currency. The level of exposure is reviewed by management and the potential foreign exchange movement is within an acceptable level of risk and therefore, typically, the Group's policy to not to actively hodge these exposures.

### Interest rate risk

The Group has exposure to fluctuations in interest rates on is borrowings. Where the Group enters into borrowing arrangements with floating rate interest, a swap arrangement is entered into to fix a portion of the interest in order to mitigate against an increase in interest rates. The portion of interest to be fixed is assessed on a case by case basis. Management can elect whether to hedge account for these arrangements on an individual transaction basis and have elected to apply hedge accounting for interest rate swaps. The swaps are based on a principal amount of the loan facility and mature on the same date. On 30 June 2023, the outstanding interest rate swaps have a maturity in excess of five years and the fair value is in an asset position of £105,691,000 (2022) liability of £54,409,000).

#### Price risk

The Group is a short- to medium term lender to the residential property market. To the extent that there is deterioration in the level of house prices that affects the properties that the Group's loans are secured against, there is a lisk that the Group may not recouplits full exposure. This is mitigated by the short-term nature of the loans and the conservative, evel of loan to salue that the Group is prepared to lend at

### Notes to the financial statements for the year ended 30 June 2023

#### b) Credit risk

Customer credit risk is mitipated through the Group's credit control policies, which are in place to ensure that our customers have an appropriate credit history and are monitored on an ongoing basis.

#### c) Liquidity risk

Equidity risk are managed by ensuring that sufficient cash is available to fund continuing and future operations

Liquidity risk arises on Each loans in place across the Group and is managed through careful monitoring of covenants and sensible levels of debt. Borrowing is on a long-term basis, whereas our revenue is received throughout the year, as well as interest and redemptions on our short-term loan book. Cash flow risk is managed through ongoing cash flow forecasting to ensure receipts are sufficient to meet liabilities as they fail due.

### 22 optoble that constraint

At the year end the Group had capital commitments as follows

2023	2022
£'000	£.000

The Group had no other off-calance sheet arrangements (2022) hone:

Under sections 3944 and 4794 of the Companies Act 2006, the parent company Ferri Trading illimited has guaranteed at outstanding liabilities on those companies taking the exemption to which the subsidiaries list on pages 82 to 92 were subject to at the 30 June 2023 until they are satisfied in full. Those liabilities total £935m. Such guarantees are enforceable against Ferri Trading Limited by any person to whom any such tability is due.

The Company, had no capital or other homostments at 30 June 2023.

### Notes to the financial statements for the year ended 30 June 2023

### 23 of the the discharge of collective

On 24 October 2023. Fern Trading Development Limited (1FTDL), a subsidiary of the Group successfully solo Dulacca HoldCo Pty Ltd and its subsidiaries to Octopus Australia Master Trust. A profit of £22m was made on the sale.

in October 2023, the Group raised £21/m from existing shareholders through an offer to subscribe for further shares.

### 24 File Levis etc. hassuit light

Under FRS 102-33-1A disclosures need not be given of transactions entered into between two or more members of a Group, provided that any subsidiary which is a party to the transaction is wholly owned by such a member

During the year, fees of £90,490,000 (2022: £77,934,000) were charged to the Group by Octopus investments similarly a related party due to its significant influence over the entity. Octopus investments Limited was recharged legal and professional fees totalling £75,000 (2022: £10,155) by the Group. At the year end, an amount of £Nil (2022: £5,500) was outstanding which is included in trade creditors.

The Group is entitled to a profit share as a result of its investment in Tericlo LLP a related party due to key management personnel in common in 2023 a share of profit equal to £955,000 (2022 if 5,249 (00)) has been recognised by the Group. At the year end, the Group has an interest in the member's capital of £13,742,000 (2022 if 35,452,000) and accrued income due of £2,812,000 (2022 if 5,276,000).

The Group engages in lending activities which include balances provided to related parties. Regarding entities with key management personnel in commen, loans of £65,070,000 (2022 £63,490,000), accrued income of £28,896,000 (2022 £19,789,000) and deferred income of £Nii (2022 £Nii) were outstanding at year end During the year interest income of £9,162,000 (2022 £7,160,000) and fees of £214,000 (2022 £394,000) were recognised in relation to these loans.

As at 30 June 2023 ENII (2022, ENII) was owed to the Company by Bracken Tracing Limited, a related party by key management personnel in common

Other than the transactions disclosed above, the Company's other related party transactions were with its who'ly owned subsidiary members of the Group

### 25 (東) our partition upon time control no rest.

In the opinion of the directors, there is no ultimate controlling party or parent company

### Notes to the financial statements for the year ended 30 June 2023

#### 26 For a report of the said

#### a) Derivative adjustment

We have conducted a review of prior years accounting treatment of other comprehensive income, in relation to derivative recognition. We have identified an error relating to all financial years from 2017 relating to the amortisation of loss associated with a specific cash flow hedge. The loss was the result of a refinancing exercise undertaken in 2010, and the Group has received professional advice in relation to the accounting treatment. Upon review, it was discovered the amortisation of the loss was already reflected in the upoated fair value of the cash flow hedges, and the amortisation loss had incorrectly been recognised twice, over the life of the cash flow hedge. This also has a consequence on the calculation of heage ineffectiveness. The cumulative impact was a £15-5m reduction in historical interest cost, and an equal and opposite reduction in other comprehensive income. A summary of the impact of the correction is provided below, which includes the associated tax adjustments.

	Year ended 30 June 2021 (as stated)	Accumulated adjustments	Year ended 30 June 2021 (restated)

Goodwill resulting from the business combination was £6,565,000 and has an estimated useful life of 10 years, reflecting the lifespan of the assets acquired

The consolidated statement of comprehensive moome for the year includes £12,604,000 revenue and a loss before tax of £469,000 in respect of this acquisition

### Notes to the financial statements for the year ended 30 June 2023

Contreported results are prepared in accordance with United Kingdom Accounting Standards including financial Reporting Standard 102, as detailed in the Financial Statements starting on page 44 of the Armual Report. In impassing our performance, the financial measures that we use include those that have been derived from our reported results in order to eliminate factors that distort year-on-year comparisons. These are considered non-GAAP financial measures.

#### Net debt

We provide net debt in addition to cash and gloss dept as a way of assessing our overall cash position and it is computed as follows:

Net debt		1,001,265	793,167
Cash at hors and in card	11	(156,919)	(256,415)
Gross debt		1,158,184	1,049,582

		2023	2022

## Notes to the financial statements for the year ended 30 June 2023

### **EBITDA**

Earnings before interest, tax, depreciation and amort sation (FBITDA') is calculated by adjusting profit after tax for interest, tax, depreciation and amortisation, in addition to income and expenses that do not relate to the day operations of the Group. We provide LBITDA in addition to profit after tax as it allows us to assess our performance without the effects of financing and capital expenditures.

The following table details the adjustments made to the reported results
