On a straight line basis

Plant & machinery	10 % per annum
Office equipment	10 % per annum

c. Stock and work in progress

Stock and work in progress, which have been valued by the director, are stated at the lower of cost or net realisable value. Where necessary provision is made for obsolete, slow moving and defective stocks.

d. Deferred taxation

e. Turnover

g. Finance and operating leases

Costs in respect of operating leases are charged on a straight line basis over the lease term. Where fixed assets are financed by leasing agreements, which transfer to the company substantially all the benefits and risks of ownership, the assets are treated as if they had been purchased outright and are included in tangible fixed assets. The capital element of the leasing commitments is shown as obligations under finance leases. The lease rentals are treated as consisting of capital and interest elements. The capital element is applied to reduce the outstanding obligations and the interest element is charged against profit on a straight line basis. Assets held under finance leases are depreciated over the shorter of the lease terms and the useful lives of equivalent owned assets.
