In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent; and

The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements comply with the Companies Act 2006. 2. Accounting policies (continued)

2.3 Going concern

At the time of approving the financial statements, the directors have a reasonable expectation that the Group, headed by Kernel Limited (formerly Granite Topco Limited), has adequate resources to continue to support the Company and ensure operational existence for the foreseeable future.

The directors have reviewed cash flow forecasts for at least the 12 month period from the date of signing and assessed the current and potential impact of the COVID-19 pandemic and other macroeconomic factors, to ensure the Group can maintain the Company's day-to-day services, fulfil its statutory obligations and meet future obligations to funders and other stakeholders.

At 31 December 2021, the Group had sufficient cash balances to maintain a positive cash position and meet the Company's liabilities as they fall due for at least 12 months from the balance sheet date, based upon current expectations. The Company is reliant on continued support by the Group.

2.4 Financial instruments

The Company recognises financial instruments when it becomes a party to the contractual arrangements of the instrument. Financial instruments are de-recognised when they are discharged or when the contractual terms expire. The Company's accounting policies in respect of financial instruments transactions are explained below:

Financial assets and financial liabilities are initially measured at fair value.

Financial assets

All recognised financial assets are subsequently measured in their entirety at either fair value or amortised cost, depending on the classification of the financial assets.

Fair value through profit or loss

All of the Company's financial assets are subsequently measured at fair value at the end of each reporting period, with any fair value gains or losses being recognised in profit or loss to the extent they are not part of a designated hedging relationship. The net gain or loss recognised in profit or loss includes any dividend or interest earned on the financial asset.

Financial liabilities

Fair value through profit or loss

Financial liabilities are classified as at fair value through profit or loss, when the financial liability is held for trading, or is designated as at fair value through profit or loss. This designation may be made if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise, or the financial liability forms part of a group of financial instruments which is managed and its performance is evaluated on a fair value basis, or the financial liability forms part of a contract containing one or more embedded derivatives, and IFRS 9 permits the entire combined contract to be designated as at fair value through profit or loss. Any gains or losses arising on changes in fair value are recognised in profit or loss to the extent that they are not part of a designated hedging relationship.

The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The judgements, estimates and assumptions are evaluated at each reporting date and are based on historical experience as adjusted for current market conditions and other factors. Management makes estimates and assumptions concerning the future in preparing the financial statements and the actual results will not always reflect the accounting estimates made.

The directors do not believe there to be any material estimates or judgements in the financial statements.
