Financial instruments

The Company only enters into basic financial instruments transactions that result in the recognition of financial assets and liabilities like other debtors and creditors, loans from third parties, and loans to and from group undertakings.

Debt instruments (other than those wholly repayable or receivable within one year), including loans payable, are initially measured at present value of the future cash flows and subsequently at amortised cost using the effective interest method.

Creditors

Short term creditors are measured at transaction price.

Finance cost on intercompany loans

Interest on intercompany loans is charged annually in arrears at a bank base rate plus 3.25%. However where this would result in a loss arising in the subsidiary company's accounts the amount of interest charged is constrained to the funds available in that subsidiary company such that neither a gain or a loss arises in its financial statements.
