unsecured creditors	Creditors who are neither secured nor preferential

Why we've prepared this document

As we've explained previously, on 31 July 2019 the Company went into administration and Zelf Hussain and I were appointed as Administrators.

We tell you in this document why the Company was put into administration. We give you a brief history and set out our proposals for achieving the purpose of administration. We include details of the Company's assets and liabilities, and say how likely we are to be able to pay each class of creditor.

According to IA86, the purpose of an administration is to achieve one of these objectives:

- (a) rescuing the Company as a going concern, or if that is not possible or if (b) would achieve a better result for the creditors than (a)
- (b) achieving a better result for the Company's creditors as a whole than would be likely if the Company were wound up (without first being in administration), or finally, if that is not possible
- (c) realising the Company's assets to pay a dividend to secured or preferential creditors.

In this case, we're following objective (c), as it was not reasonably practical to rescue the Company as a going concern and/or achieve a better result for creditors than would be likely if the Company were wound up (vithout first being in administration).

Our job is to manage the Company until creditors agree our proposals for achieving the purpose of administration and we've implemented them so far as possible. After that the administration will end.

The whole of this document and its appendices form our statement of proposals for achieving the purpose of administration.

We're not seeking a decision from the creditors to approve our proposals because we think the Company doesn't have enough assets to pay a dividend to unsecured creditors other than from the prescribed part.

So, our proposals will be treated as approved unless enough creditors ask us to seek a decision to approve them. This would happen if at least 10% in value of the total creditors ask us to do so (in line with rule 15.18 IR16) within eight business days of the date we deliver the proposals to you.

If you've got any questions, please get in touch with my colleague Kate Whitham on 0113 289 4162.

Signed.....

David Robert Baxendale

Joint Administrator of the Company

David Robert Baxendale and Zelf Hussain have been appointed as Joint Administrators of the Company to manage its affairs, business and property as its agents without personal liability. They are licensed in the United Kingdom to act as Insolvency Practitioners by the Institute of Chartered Accountants in England and Wales.

The Joint Administrators are bound by the Insolvency Code of Ethics which can be found at: https://www.gov.uk/government/publications/insolvency-practitioner-code-of-ethics

Havelock International (in administration) - Joint Administrators' proposals for achieving the purpose of administration

The Joint Administrators may act as controllers of personal data as defined by UK data protection law depending upon the specific processing activities undertaken. PricewaterhouseCoopers I.J.P may act as a processor on the instructions of the joint administrators. Personal data will be kept secure and processed only for matters relating to the joint administrators' appointment. Further details are available in the privacy statement on the PwC.co.uk website or by contacting the joint administrators.

A summary of what you could recover

Estimated outcome for secured creditors

What secured creditors are owed:

IGF - c.£1m

Deasil - c.£5m

% Recovery

Forecast timing

What we think secured creditors could recover:

IGF - 100%

6 months

Deasil - Uncertain

N/A

Estimated dividend prospects

For preferential creditors:

Uncertain

Unknown

For unsecured creditors:

Uncertain

Unknown

This is a brief summary of the possible outcome for creditors based on what we know so far. You shouldn't use it as the main basis of any bad debt provision or debt trading. Please read the rest of this document.

Estimated outcome for creditors

Secured creditors

IGF's debt as of the date of appointment was c.£1m and is secured under an agreement dated 7 May 2019 in relation to invoice discounting facilities provided to the Company against a debtor ledger with a book value of £3.6m; made up of trade debtors of £925k, accrued income of £1.1m and retentions of £1.6m. Under the discounting facility, all book debts, both pre and post administration, are assigned to IGF. IGF is expected to be paid in full from book debt collections. IGF also has fixed and floating charges over all the Company's assets.

Deasil's lending as at the date of the appointment was c.£5m as is secured by a debenture dated 3 July 2018. This security gives Deasil fixed and floating charges over all of the Company's assets. Based on what we currently know, Deasil will suffer a significant shortfall on its lending.

Preferential creditors (mainly employees)

We think we'll be able to pay a dividend to preferential creditors, but, we do not know at this stage what the timing and quantum of any dividend might be. The outcome for preferential creditors is heavily dependent on retention realisations and any book debt realisations after IGF has been paid in full.

Unsecured creditors

The prescribed part is a fund that has to be made available for unsecured creditors. It's paid out of "net property". Net property is floating charge realisations after costs, and after paying - or setting aside enough to pay - preferential creditors in full. But it only has to be made available where the floating charge was created on or after 15 September 2003.

The amount of the prescribed part is:

- 50% of net property up to £10,000
- 20% of net property above £10,000
- subject to a maximum of £600,000.

Hayelock International (in administration) - Joint Administrators' proposals for achieving the purpose of administration

The prescribed part applies in this case as there is a floating charge created on or after 15 September 2003.

We think there will be a prescribed part dividend for unsecured creditors but this is heavily dependent on IGF being paid in full and there being surplus book debts to be assigned back to the Company sufficient to meet all costs of the administration and preferential claims. It also requires the prescribed part funds to exceed the costs of agreeing creditor claims and paying a dividend. This guidance is only an indication. You shouldn't use it as the main basis for any bad debt provisions or debt trading.

Based on what we know currently, we do not think there will be any dividend for unsecured creditors other than from the prescribed part.

Brief history of the Company and why it's in administration

Background

The Company was incorporated on 29 June 2016 and was dormant until the purchase of the business and assets from the administrators of Havelock Europa Plc in July 2018.

The Company was a UK based provider of interior fit-out specialists providing the full spectrum of services from design, through to manufacture and installation. Its head office and manufacturing facilities were based in Kirkcaldy, Fife, and the business employed over 250 staff. Its customers included major retailers, banks, construction companies and commercial organisations.

The circumstances leading to our appointment

Following the successful acquisition of the business and assets from Havelock Europa plc, the Company suffered from deteriorating market conditions in the sector. This created a challenging trading environment and reduced sales across major contracts, with the business unable to successfully win enough new work to be prefitable. In addition, the majority of suppliers were continuing to supply on a proforma basis, resulting in increased working capital requirements. These factors left the Company in significant financial stress.

The directors implemented a two-fold strategy to save the business. The Company firstly approached a number of parties to try and secure additional funding, and secondly sought to achieve a sale of the shares of the Company or its business and assets. Unfortunately, no transaction was able to be concluded in the time frame needed and, as the Company was unable to secure additional funding, the directors were left with no other option but to place the company into administration, with David Baxendale and Zelf Hussain appointed Administrators on 31 July 2019.

Sales Process

On 18 July 2019, the Company engaged PwC to assist the directors in exploring options to attract additional investment, market the business for sale, and to commence contingency planning for the appointment of Administrators should a solvent sale prove unsuccessful. A team from PwC, supported by the directors, undertook sale negotiations with a number of interested parties. From this, one conditional offer was received, but it was deemed undeliverable due to the length of time required by the offeror to complete its due diligence without additional funding being in place.

Pre-administration costs

The decision was taken by the directors on 28 July 2019 that the Company would move into administration. Our time costs from that date until our appointment totalled £58,208 (excluding VAT). We also incurred legal expenses of £3,166 (plus VAT).

PwC's initial role was to advise the Company on its options in relation to a sales process and contingency planning for administration. When it became clear that insolvency of the Company was inevitable, PwC additionally worked with the Company's directors and their legal advisers in preparing for administration.

We think that PwC's role in preparing and planning for our appointment made a significant contribution to achieving the purpose of the administration because it (a) explored whether there was potential for the business to continue as a going concern and (b) allowed time to effectively plan an administration strategy which is in the best interest of the creditors of the Company.

Havelock International (in administration) - Joint Administrators' proposals for achieving the purpose of administration

More details of these fees and expenses, including further information regarding the work undertaken, can be found at Appendix A.

To the best of our knowledge and belief, no fees or expenses were charged by any other insolvency practitioner.

The payment of unpaid pre-administration costs as an expense of the administration is subject to approval under rule 3.52 IR16 and doesn't form part of our proposals, which are subject to approval under paragraph 53 Sch B1 IA86. If you elect a creditors' committee, it will be up to the committee to give this approval under rule 3.52 IR16.

But if there's no committee, then because we've said we think the Company doesn't have enough assets to pay anything to unsecured creditors, other than via the prescribed part, it will be for the secured creditors and preferential creditors if applicable to do so instead.

What we've done so far and what's next if our proposals are approved

Management and financing of the Company's affairs and business

Strategy and immediate actions

David Baxendale and Zelf Hussain were appointed Administrators on 31 July 2019. Having completed contingency planning prior to our appointment, our objectives on appointment were:

- To contact key customers and contractors on major projects to ascertain interest in completing the work;
- To contact all debtors, seeking to realise value from the Company's debtors book;
- To continue with a sales process of the business, facilitating site visits and conversations with interested
 parties. Failing this, we would engage parties interested in purchasing the plant & machinery of the
 Company; and
- To maximise value from realising stock; selling finished goods to key customers, contractors and competitors.

Immediately on appointment, we attended the Company's premises and took control of the assets. 247 employees were made redundant immediately, with 18 employees retained to assist in implementing the administration strategy. Arrangements were put in place with IGF to use funds that were payable to it under its assignment rights, including £100,000 of the pre-administration bank balance, to fund the administration.

In the days immediately following the administration it became clear that the Company's customers had already taken steps to mitigate their exposure by engaging alternative contractors to complete unfinished contracts. We therefore decided that the Company would not undertake to complete outstanding contracts, but would focus on stock realisations through the sale of finished goods as described below.

Exploring interest in the business

Contact was made with parties who had previously expressed interest in the business and assets. Despite some well progressed conversations, no formal offers were received for the business and assets, and we have therefore proceeded with a strategy to realise the assets on a piecemeal basis.

Stock sales

As part of the process of liaising with customers on our appointment, we identified certain customers with interest in the Company's finished goods stock.

Under the terms of IGF's invoice discounting facility, all post appointment book debts are assigned to IGF. Sales of most finished goods stock to date is therefore shown as post appointment book debts and as fixed charge receipts in the attached receipts and payments account. In order to facilitate more complex stock sales, we negotiated with IGF to exclude sales to one major customer from the facility. Sales of these stocks therefore are shown as floating charge receipts in the receipts and payments account. In addition, we agreed that funds from stock sales could be utilised to meet the administration operating costs. We also saw an opportunity to source additional stock from a third party for a major customer. These sales are shown as trading sales in the receipts and payments account, with the associated supplier payments being shown as costs of trading sales.

We will continue to make stock sales to existing customers. We are also speaking to other parties interested in acquiring the residual stock in due course.

Book debts

The book debts are assigned to IGF under the invoice discounting facility under which it was owed approximately £1m on administration. The trade debtor ledger and accrued income ledger have a combined book debt value of £3.6m with an estimated to realise value of £750,000 as per the director's statement of affairs. To date the sum of c.£838K has been realised against these ledgers exceeding the estimated realisable value. Some c.£303k has been collected directly by IGF. Where monies have been paid to the Administrators directly, we have been monitoring and liaising with IGF to transfer funds and enable them to reconcile their accounts. The Administrators are continuing to pursue the outstanding trade debts and accrued income balances and have appointed a firm of independent Quantity Surveyors to review the contracts in greater detail and pursue the customers and contractors accordingly to maximise realisations.

We anticipate that collections will shortly be sufficient to repay IGF its lending in full and that subsequently, the remaining book debt ledger will be reassigned to the Company.

Plant and machinery

We are currently negotiating a sale of the plant and machinery to a third party having previously instructed agents to provide an independent valuation. We hope to conclude this transaction shortly, failing which we will work with our agents to initiate an alternative realisation strategy.

Cash

A total of £230,485.86 has been realised in respect of monies held in a pre-appointment bank account. The cash balance represented collections from book debts which were assigned to IGF. We took legal advice, which concluded that this balance was trust monies held on behalf of IGF. As a result, we paid a total of £130,485.86 to IGF as shown on the enclosed receipts and payments account, with the balance retained for provide some funding for the administration, as noted above.

Employees

At the date of our appointment, the Company employed 265 people. Of these employees, 247 were made redundant with immediate effect on the date of our appointment and a small workforce was retained to assist with the administration. We have liaised with all employees so they can recover some monies owed from the RPS.

Work still to be done

We will continue the asset realisation strategy as set out above. We will seek to accelerate the sale of finished goods as well as plant and machinery. We will also monitor the collection of book debts, liaise with IGF in this regard and ensure any surplus debtor collections are paid to the estate.

While the Company does not appear to own any other assets known to have any material value, we have a duty to investigate what other assets there may be (including potential claims against third parties) and what recoveries can be made.

We will use surplus funds after meeting the costs of the administration to make distributions to the various classes of creditors, potentially including a dividend to unsecured creditors from the prescribed part.

During the course of the administration, we will be winding-down the Company's affairs, including any necessary final tax and VAT matters and dealing with the Company's books and records. We must also comply with all relevant insolvency legislation and regulatory obligations arising as a result of the insolvency of the Company and our appointment as Administrators. These typically include periodic reports to creditors, obtaining approval for our remuneration and internal controls to ensure the administration strategy continues to be appropriate and outstanding matters are being progressed on a timely basis.

The administration will be brought to an end as soon as it is appropriate to do so.

Connected party transactions

There have been no transactions to connected parties to date. Should this position change we will update creditors in our next report.

Directors' conduct and investigations

As outlined in our initial letter to creditors, we have a duty to form a view on the actions of anybody who has been a director of the Company in the three years before our appointment. We will submit our findings to BEIS within three months of our appointment.

We will also decide whether any action should be taken against anyone to recover or contribute to the Company's assets. If you think there is something we should know about and you haven't yet told us, please complete the relevant section of the proof of debt attached to this document. This is part of our normal work and doesn't necessarily imply any criticism of the directors' actions.

Objective of the administration

We are pursuing objective (c) which is to realise the Company's assets to pay a dividend to secured or preferential creditors, as it was not practical to rescue the Company as a going concern and/or achieve a better result for creditors as a whole than would be likely if the Company was wound up (without first being in administration).

The Administrators concluded that administration was the best insolvency route for the Company. In particular in relation to the project work and engaging with major contractors as administration allowed for greater flexibility for the Company to operate or make commercial arrangements in order to maximise value for creditors. It also allowed a better chance of exploring the sales process and inviting offers for the sale of the business, even if the prospects of a sale were low.

Creditors' committee

We're asking you to decide whether you wish to elect a creditors' committee to help us in discharging our duties. If the creditors do wish to do so, there will be a creditors' committee if enough creditors want to be on it. Please see Appendix B for a guide to creditors' committees.

Our fees and disbursements

It will be up to the creditors' committee to fix the basis of our fees and Category 2 disbursements. But if there's no committee, because we've said we think the Company doesn't have enough assets to pay anything to unsecured creditors other than via the prescribed part, we'll ask the secured creditors and preferential creditors, if applicable, to do so instead. If creditors or the committee do not fix the basis of our fees and Category 2 disbursements, we may apply to the court to fix them no later than 18 months after the date of our appointment.

Ending the administration

Our exit route will depend on the outcome of the administration. As we've said above, we think there may be a dividend for unsecured creditors from the prescribed part. Assuming that's the case, once we've paid any prescribed part dividend and finished our other work, we'll file a notice with the Registrar of Companies and the Company will be dissolved three months later. But if we think that there are matters that should be conducted in a liquidation rather than in the administration, we may instead apply for a court order ending the administration and for the Company to be wound up.

If we don't :hink any of the objectives of administration are achievable, we'll apply for a court order ending the administration and for the Company to be dissolved.

Statement of affairs

We were given a statement of affairs of the Company on 20 August 2019. It was signed by Christopher Campbell.

A copy of the statement of affairs and our comments on it are attached at Appendix D. As required by law, it includes details of the names, addresses and debts of creditors (including details of any security held), other than, if applicable, employees and former employees of the Company and consumers claiming amounts paid in advance for the supply of goods and services.

Our fees as Administrators-in-waiting

This work entailed:

- Drafting and reviewing communications to employees and gathering employee information in preparation for the wind-down of the Company;
- Reviewing operational needs and value within the Company's contracts and stock;
- · Liaising with the Company directors in preparation for the appointment; and
- Liaising with the Secured Creditors regarding the appointment and securing funding for the administration.

Please note the following:

- Our work for the administration commenced on 28 July 2019 following meetings with the directors after we concluded that a sales process could not be completed.
- The Company entered administration at 3:52pm on 31 July 2019.
- · All of our pre-administration fees and expenses remain unpaid
- We included details earlier in this report on the work done with a view to the Company entering administration.

Approval of pre-administration costs

The payment of unpaid pre-administration costs as an expense of the administration is subject to approval under Rule 3.52 IR16 and doesn't form part of our Proposals, which are subject to approval under Paragraph 53

Havelock International (in administration) - Joint Administrators' proposals for achieving the purpose of administration

Sch B1 IA86. We expect the secured and preferential (if applicable) creditors will be the relevant class of creditor to renew and approve these costs for payment.

Appendix B: Creditors' committee guidance

Please follow the link below to access to the creditors' committee guidance:

Appendix C: Proof of debt

The proof of debt may be found at www.pwc.co.uk/havelockinternational.

Please follow the link below to access the proof of debt:

https://www.pwc.co.uk/business-recovery/administrations/assets/have lock-international-limited-proof-of-debt.pdf

Appendix D: Copy of the Statement of affairs

A copy of the director's statement of affairs as at the date of administration is provided over the page. Here are our comments on it:

- As is normal in a statement of affairs, there is no provision for the costs of realising the Company's assets or the costs of the administration.
- As required by law, the Statement lists the names and address of creditors other than employees.
- We haven't audited the information.
- The directors have reported that the estimated realisable value of trade debtors is £750,000 and the Administrators think this this estimate is reasonable.
- Retentions have been classified as floating charge but following a security review we know they are subject to a fixed charge.
- The directors have reported potential realisable values of £150,000 for plant and equipment and £100,000 for stock. The Administrators hope to exceed these realisable values.
- Deferred consideration has an estimated realisable value of £250,000. The Administrators are uncertain whether this value can be realised as the deferred consideration is contingent on the trading performance over the next 12 months of a subsidiary sold by the Company prior to the administration.
- The directors estimated cash of £259,000 to be realised, to date £230,486 has been realised. This is shown
 as a floating charge asset in the Statement of Affairs, but the Administrators have received legal advice that
 these were trust monies held for the benefit of IGF and therefore this should be shown as a fixed charge
 asset or deduction from the amount owed to IGF.

Issued and called up share capital	£1	
Estimated total deficiency / surplus as regards members	£	(7,537,942)

Signature C : Date: 20 August 2019

B - Company creditors

Note: You must include all creditors, other than employees, former employees and consumer creditors claiming amounts paid in advance of the supply of goods or services ("consumer deposit creditors"), and identify all creditors under hire-purchase, chattel leasing or conditional sale agreements and creditors claiming retention of title over property in the company's possession.

Include in this schedule the number of employees and former employees and the total of the debts owed to them and the number of consumer deposit creditors and the total of the debts owed to them. Full details of their claims must be set out in separate schedules. The employee and consumer deposit creditor schedules are NOT delivered to the Registrar of Companies.

If more convenient, a list of the company's creditors may be attached to this page as long as it contains all the same information as in this table.

Name of excelor or claimant		Amount of	Amount of Details of any sectainty held by debit a	Date security given	Value of security
Trade and other creditors	See schedule attached	1,822,273	None	N/A	Nil
