Tangible fixed assets

Tangible fixed assets are stated at historical cost less accumulated depreciation and accumulated impairment losses. Cost includes costs directly attributable to making the asset capable of operating as intended.

Depreciation is provided at the following annual rates so as to write off their cost less residual amounts over their estimated useful economic lives. Assets are also reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the assets carrying amount exceeds its recoverable amount.

Financial instruments

The following assets and liabilities are classified as financial instruments - trade debtors and trade creditors.

Trade debtors and trade creditors are measured at the discounted amount of the cash or other consideration expected to be paid or received.

Financial assets that are measured at amortised cost are assessed at the end of each reporting period for objective evidence of impairment. If objective evidence of impairment is found, an impairment loss is recognised in the Statement of Income and Retained Earnings.
