The financial statements were approved and authorised for issue by the board and were signed on its behalf on

Mr C M Lowe

Director 07 July 2021

The notes on pages 2 to 6 form part of these financial statements.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 OCTOBER 2020

#### 1. General information

Mansfield Leisure Vehicles Limited is a limited liability company incorporated in England and Wales. It's registered head office is located at Eastwood Road, Kimberley, Nottingham, Nottinghamshire, NG16 2HX.

#### 2. Accounting policies

#### 2.1 Basis of preparation of financial statements

The financial statements are prepared in Sterling (£), which is the functional currency of the entity and are for the year ended 31 October 2020 (2019: 11 month period ended 31 October 2019).

The financial statements have been prepared under the historical cost convention unless otherwise specified within these accounting policies and in accordance with Section 1A of Financial Reporting Standard 102, the Financial Reporting Standard applicable in the UK and the Republic of Ireland and the Companies Act 2006.

The following principal accounting policies have been applied:

## 2.2 Coronavirus and going concern

At 31 October 2020 the company has net liabilities of £48,747 and is therefore reliant on the ongoing support of its ultimate parent company, Kimberley Caravan Centre Limited. The directors of Kimberley Caravan Centre Limited have confirmed that it is their intention to provide ongoing support to the company to ensure the company can meet its liabilities as they fall due.

At the time of signing these accounts, the directors have considered the effect of the Coronavirus on the going concern position, and consider that this does indicate that the company will continue to trade for a period of at least 12 months from the date of signing these accounts.

Since the start of the pandemic, has seen increased demand in the caravan sector due to the uncertainty surrounding overseas travel. The company has made use of the UK Government support available to businesses during this difficult time.

The directors have prepared detailed forecasts based on the easing of lockdown continuing which show strong demand for the caranvans consistent with current trends. Using these assumptions and the support available from the parent entity, the company will be able to meet its liabilities as they fall due.

On that basis, the directors have prepared these financial statements on a going concern basis.

#### 2.3 Turnover

Turnover is recognised to the extent that it is probable that the economic benefits will flow to the company and the turnover can be reliably measured. Turnover is measured as the fair value of the consideration received or receivable, excluding discounts, rebates, value added tax and other sales taxes. The following criteria must also be met before turnover is recognised:

#### Sale of goods

Turnover from the sale of goods is recognised when all of the following conditions are satisfied:

- the company has transferred the significant risks and rewards of ownership to the buyer;
- the company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of turnover can be measured reliably;
- it is probable that the company will receive the consideration due under the transaction; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 OCTOBER 2020

#### 2. Accounting policies (continued)

## 2.4 Tangible fixed assets

Tangible fixed assets under the cost model are stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

The company adds to the carrying amount of an item of fixed assets the cost of replacing part of such an item when that cost is incurred, if the replacement part is expected to provide incremental future benefits to the company. The carrying amount of the replaced part is derecognised. Repairs and maintenance are charged to profit or loss during the period in which they are incurred.

Depreciation is charged so as to allocate the cost of assets less their residual value over their estimated useful lives.

Depreciation is provided on the following basis:

Motor vehicles - 25% reducing balance Computer equipment - 33% straight line

The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted prospectively if appropriate, or if there is an indication of a significant change since the last reporting date.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in profit or loss.

#### 2.5 Stocks

Stocks are stated at the lower of cost and net realisable value, being the estimated selling price less costs to complete and sell. Cost is based on the cost of purchase on a first in, first out basis.

At each balance sheet date, stocks are assessed for impairment. If stock is impaired, the carrying amount is reduced to its selling price less costs to complete and sell. The impairment loss is recognised immediately in profit or loss.

#### 2.6 Provisions for liabilities

Provisions are made where an event has taken place that gives the company a legal or constructive obligation that probably requires the settlement by a transfer of economic benefit, and a reliable estimate can be made of the amount of the obligation.

Provisions are charged as an expense to the profit and loss account in the year that the company becomes aware of the obligation, and are measured at the best estimate at the Balance sheet date of the expenditure required to settle the obligation, taking into account relevant risks and uncertainties.

When payments are eventually made, they are charged to the provision carried in the Balance sheet.

#### 2.7 Financial instruments

The company only enters into basic financial instrument transactions that result in the recognition of financial assets and liabilities such as trade and other debtors and creditors and loans to related parties.

All financial assets and liabilities are initially measured at transaction price and subsequently measured at amortised cost.

#### NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 OCTOBER 2020

## 2. Accounting policies (continued)

#### 2.7 Financial instruments (continued)

For financial assets measured at cost less impairment, the impairment loss is measured as the difference between an asset's carrying amount and best estimate of the recoverable amount, which is an approximation of the amount that the company would receive for the asset if it were to be sold at the reporting date.

#### 2.8 Current and deferred taxation

Current tax is recognised for the amount of corporation tax payable in respect of the taxable profit for the current or past reporting period using the tax rates and laws that have been enacted or substantively enacted at the reporting date.

Deferred tax is recognised in respect of all timing differences at the reporting date, except as otherwise indicated.

Deferred tax is calculated using the tax rates and laws that have been enacted or substantively enacted by the reporting date that are expected to apply to the reversal of the timing difference.

#### 2.9 Government Grants

Government grants relate to the receipt of Coronavirus Job Retention Scheme income which is included within other operating income in the profit and loss account.
