As permitted by Section 444 of the Companies Act 2006, the directors have elected not to include a copy of the profit and loss account within the financial statements.

These financial statements have been prepared and delivered in accordance with the provisions applicable to companies subject to the small companies regime.

The financial statements were approved by the board of directors and authorised for issue on 27 September 2021 and are signed on its behalf by:

Alastair Stewart

Notes to the financial statements For the 12 month period ended 31 December 2020

1 CORPORATE INFORMATION

Central Plains Group Limited ("the company") is a private company limited by shares and is incorporated in England. The address of its registered office is at Level 13, Broadgate Tower, 20 Primrose Street, EC2A 2EW.

The Company's main activity is to operate as a holding for subsidiaries engaged in the cultivation, distribution and processing of arable crops, in the Lviv region, Western Ukraine.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation

These financial statements have been prepared in accordance with FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" ("FRS 102") and the requirements of the Companies Act 2006 as applicable to companies subject to the small companies regime. The disclosure requirements of section 1A of FRS 102 have been applied other than where additional disclosure is required to show a true and fair view.

The company has taken advantage of the exemption under section 399 of the Companies Act 2006 not to prepare consolidated accounts, on the basis that the group of which this is the parent qualifies as a small group. The financial statements present information about the company as an individual entity and not about its group.

The financial statements have been prepared under the historical cost convention. The principal accounting policies adopted are set out below.

Going concern

The company meets its day to day working capital requirements through its bank and shareholders' facilities. The company has received significant funding from its shareholders during the year to be able to meet its capital expenditure and operational budgeted operations for the next 12 months from the approval date of these financial statements. After making inquiries, the directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. The company therefore continues to adopt the going concern basis in preparing its financial statements.

Presentation and functional currency

These financial statements are presented in the pounds sterling ("£") which is the company's functional and presentation currency.

Interest income

Interest income is recognised using the effective interest rate method.

Notes to the financial statements For the 12 month period ended 31 December 2020

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Taxation

Taxation expense for the period comprises current and deferred tax recognised in the reporting period. Tax is recognised in the profit and loss account, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case tax is also recognised in other comprehensive income or directly in equity respectively.

Current or deferred taxation assets and liabilities are not discounted.

(i) Current tax

Current tax is the amount of income tax payable in respect of the taxable profit for the year or prior years. Tax is calculated on the basis of tax rates and laws that have been enacted or substantively enacted by the period end.

Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

(ii) Deferred tax

Deferred tax arises from timing differences that are differences between taxable profits and total comprehensive income as stated in the financial statements. These timing differences arise from the inclusion of income and expenses in tax assessments in periods different from those in which they are recognised in financial statements.

Deferred tax is recognised on all timing differences at the reporting date. Unrelieved tax losses and other deferred tax assets are only recognised when it is probable that they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Deferred tax is measured using tax rates and laws that have been enacted or substantively enacted by the period end and that are expected to apply to the reversal of the timing difference.

Foreign currencies

Transactions and balances

Transactions in foreign currencies are initially recorded at the functional currency rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the balance sheet date. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as of the date of the initial transactions.

Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at period end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss accounts. All foreign exchange gains/losses are presented in the profit and loss account within 'other operating (losses)/gains'.

Exchange differences arising on a monetary item that forms part of the company's net investment in a foreign operation is recognised in profit and loss in the separate financial statements of the company or the individual financial statements of the foreign operation, as appropriate.

Notes to the financial statements
For the 12 month period ended 31 December 2020

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Investments in subsidiaries

Investments in subsidiaries are included in the balance sheet of the company at cost less provisions for any impairment. At each reporting date the investment is assessed for any indication of impairment. If any such indication exists, the recoverable amount of the investment is estimated. Where the recoverable amount of the investment is less than the carrying amount, the impairment loss is recognised immediately in the income statement.

Impairment of non-financial assets

At each reporting date, the company reviews the carrying amounts of its property, plant and equipment and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. Where the asset does not generate cash flows that are independent from other assets, the company estimates the recoverable amount of the cash generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs to sell and value in use. Value in use is defined as the present value of the future cash flows, before tax and interest, as a result of the asset's (or asset's cash generating unit's) continued use. These cash flows are discounted to their present value using a pre-tax discount rate that represents the current market risk-free rate and the risks inherent in the asset.

If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised as an expense immediately, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease. Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years.

Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less and bank overdrafts. Bank overdrafts, when applicable, are shown within borrowings in current liabilities.

Trade payables and accruals

These amounts represent liabilities for goods and services provided to the company prior to the end of the financial period which are unpaid. The amounts are unsecured. Trade and notes payable are presented as current liabilities unless payments is not due within 12 months after the reporting period. They are recognised initially at fair value and subsequently measured at amortised cost using the effective interest rate method.

Share capital/equity instruments

Ordinary shares are classified as equity. Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

Notes to the financial statements For the 12 month period ended 31 December 2020

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Financial instruments

(i). Financial assets

Basic financial assets, including trade and other receivables, cash and bank balances, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest.

Such assets are subsequently carried at amortised cost using the effective interest method. At the end of each reporting period financial assets measured at amortised cost are assessed for objective evidence of impairment.

Financial assets are derecognised when (a) the contractual rights to the cash flows from the asset expire or are settled; or (b) substantially all the risks and rewards of the ownership of the asset are transferred to another party; or (c) despite having retained some significant risks and rewards of ownership, control of the asset has been transferred to another party who has the practical ability to unilaterally sell the asset to an unrelated third party without imposing additional restrictions.

(ii). Financial liabilities

Basic financial liabilities, including trade and other payables, bank loans, loans from related parties, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future payments discounted at a market rate of interest. Debt instruments are subsequently carried at amortised cost, using the effective interest rate method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the drawdown occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a pre-payment for liquidity services and amortised over the period of the facility to which it relates.

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less. If not, they are presented as non-current liabilities. Trade payables are recognised initially at transaction price and subsequently measured at amortised cost using the effective interest method.

The company does not use derivatives in its operations.

Financial liabilities are derecognised when the liability is extinguished, that is when the contractual obligation is discharged, cancelled or expires.

3 EMPLOYEES AND DIRECTORS

The company had no employees during 2019 or 2020.

Notes to the financial statements For the 12 month period ended 31 December 2020
