STEEL CITY GP 2 LIMITED

Notes to the Financial Statements

for the Period Ended 31 December 2022

1. Accounting policies

Basis of measurement and preparation

These financial statements have been prepared in accordance with the provisions of Section 1A (Small Entities) of Financial Reporting Standard 102

Other accounting policies

3 Summary of significant accounting policies The principle accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) Basis of preparation The financial statements have been prepared on a going concern basis, under the historical cost convention, as modified by the recognition of investment at fair value by the revaluation of certain financial assets and liabilities measured at fair value. The preparation of financial statements in compliance with FRS 102 Section 1A requires the use of certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies as disclosed in note 4. By applying section 1A, the Company has elected not to prepare a Statement of cash flow. The financial statements of the Company show the result for the year ended 31 December 2022 and the comparatives show the result for the year ended 31 December 2021.

(b) Going concern The Company has made a loss during the year of £1,800 (2021: £3,791) and is in a net liability of £5,635 (2021: £3,835) at the financial year end. The Directors, having considered the Company's objectives along with the financial support from its parent company, Steel City Property Co Limited, are satisfied that the Company has adequate resources to continue in operational existence for the foreseeable future. Accordingly, the Company has adopted the going concern basis in preparing these financial statements.

(c) Foreign currency

(i) Functional and presentation currency The Company's financial statements are presented in Pound Sterling (£). The Company's functional and presentation currency is the pound sterling.

(d) Revenue recognition Revenue represents a fixed priority profit shares from Steel City LP as per limited partnership agreement. Revenue is recognised on an accruals basis.

(e) Expense recognition Expenses are recognised on an accruals basis in the period in which they are incurred.

(f) Financial instruments The Company has chosen to adopt Sections 11 and 12 of FRS 102 in respect of financial instruments.

(i) Financial assets Basic financial assets, including trade and other receivables, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of future receipts discounted at a market rate of interest. Such assets are subsequently carried at amortised cost using the effective interest method. At the end of each reporting date, financial assets measured at amortised cost are assessed for objective evidence of impairment. If an asset is impaired, the impairment loss is the difference between the carrying amount and the present value of the estimated cashflows discounted at the asset's original effective interest rate. The impairment loss is recognised in the Statement of comprehensive income. If there is a decrease in the impairment loss arising from an event occurring after the impairment was recognised, the impairment is reversed. The reversal is such that the current carrying amount does not exceed what the carrying amount would have been had the impairment not been previously been recognised. The impairment reversal is recognised in the Statement of comprehensive income. Financial assets are derecognised when (a) the contractual rights to the cash flows from the assets expire or are settled, or (b) substantially all the risk and rewards of the ownership of the assets are transferred to another party or (c) despite having retained some significant risks and rewards of ownership, control of the asset has been transferred to another party who has the practical ability to unilaterally sell the asset to an unrelated third party without imposing additional restrictions.

(ii) Financial liabilities Basic financial liabilities, including creditors, are initially recognised at transaction price, unless the arrangement constitutes a financing transaction, where the debt instrument is measured at the present value of the future receipts discounted at a market rate of interest. Debt instruments are subsequently carried at amortised cost, using the effective interest rate method. Debt instruments are subsequently carried at amortised cost, using the effective interest rate method.

Derecognition of financial liabilities A financial liability (in whole or in part) is derecognised when the Company has extinguished its contractual obligations, it expires or is cancelled. Any gain or loss on derecognition is taken to the Statement of comprehensive income.

(g) Share capital Share capital are classified as equity. Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

(h) Taxation Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the Statement of financial position date. Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the Statement of financial position date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the Statement of financial position date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

4 Critical accounting judgements and estimation uncertainty Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.
