Abbreviated balance sheet (continued)
As at 31 July 2015

The abbreviated financial statements, which have been prepared in accordance with the special provisions relating to companies subject to the small companies regime within Part 15 of the Companies Act 2006 and the Companies Act 2006 and the Small Companies and Groups (Accounts and Directors' Report) Regulations 2008, were approved and authorised for issue by the board and were signed on its behalf by:

Mr Adam Heyes
Director

Date: **31 MARCH 2016**

The notes on pages 3 to 6 form part of these financial statements.

**Notes to the abbreviated financial statements
For the year ended 31 July 2015**

1. Accounting policies

1.1 Basis of preparation of financial statements

The full financial statements, from which these abbreviated financial statements have been extracted, have been prepared on the going concern basis under the historical cost convention and in accordance with Companies Act 2006 and applicable accounting standards in the United Kingdom. The principal accounting policies, which have been applied consistently throughout the year, are set out below.

1.2 Cash flow statement

The company has taken advantage of the exemption in FRS 1 'Cash flow statements' from the requirement to present a cash flow statement on the grounds that it is a small company.

1.3 Turnover

Turnover represents the invoiced value of goods supplied during the year excluding value added tax. Revenue in respect of goods is recognised on customer receipt.

1.4 Intangible fixed assets and amortisation

Goodwill is the difference between amounts paid on the acquisition of a business and the fair value of the identifiable assets and liabilities. It is amortised to the profit and loss account over its estimated economic life.

1.5 Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation. Depreciation is provided at rates calculated to write off the cost of fixed assets, less their estimated residual value, over their expected useful lives on the following bases:

Store fit out	- 10%/14.30% straight line
Store equipment	- 20% reducing balance
Office equipment	- 20% reducing balance

1.6 Stocks

Stocks are valued at the lower of cost and net realisable value. Net realisable value is the price at which stocks can be sold in the normal course of business after allowing for the cost of realisation. Cost is determined using the first-in, first-out method. Provision is made for slow moving and obsolete stocks.

1.7 Deferred taxation

Full provision is made for deferred tax assets and liabilities arising from all timing differences between the recognition of gains and losses in the financial statements and recognition in the tax computation.

A net deferred tax asset is recognised only if it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax assets and liabilities are calculated at the tax rates expected to be effective at the time the timing differences are expected to reverse.

Deferred tax assets and liabilities are not discounted.

1. Accounting policies (continued)

1.8 Pensions

The company operates a defined contribution pension scheme and the pension charge represents the amounts payable by the company to the fund in respect of the year.

1.9 Debtors

Debtors are stated after all known bad debts have been written off and specific provision has been made against all debts considered doubtful of collection.

1.10 Leased assets

Where the company enters into a lease which entails taking substantially all the risks and rewards of ownership of an asset, the lease is treated as a "finance lease". The asset is recorded in the balance sheet as a tangible fixed asset and is depreciated over its estimated useful economic life or the term of the lease, whichever is shorter. Future installments of such leases, net of finance charges, are included with creditors. Rentals payable are apportioned between the finance element, which is charged to the profit and loss account, and the capital element which reduces the outstanding obligation for future installments.

Rentals under operating leases are charged to the profit and loss account as incurred.
