Notes to the Accounts
for the year ended 31 March 2016

1 Accounting basis

The accounts have been compiled on a basis that enables profits to be calculated in accordance with UK Generally Accepted Accounting Practice and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2015 interpreted as appropriate for Limited Liability Partnerships) and the Statement of Recommended Practice 2006.

Turnover

Turnover represents the value of goods and services supplied by the company, net of value added tax and trade discounts

Depreciation

Depreciation has been provided at the following rate in order to write off the assets over their estimated useful lives.

Plant and machinery	25% straight line
---------------------	-------------------

Work in Progress

Work in progress is valued on the basis of long term contracts, in line with guidance set out in ITF 40. The company classifies as long term those contracts where the activity extends over more than one accounting period. The amount recognised as turnover represents the amount of work carried out in the period. Where the outcome of a contract can be assessed with reasonable certainty, attributable profit is recognised in proportion to the amount of turnover recognised in the accounts. Full provision is made for any foreseeable losses. Long term contract balances are included in the balance sheet at net cost, less foreseeable losses, and included in debtors under amounts recoverable on contracts
