#### Bank

Lloyds Bank plc Chippenham Branch, PO Box 1000, BS1 1LT

The members are pleased to present their report and the audited financial statements for the year ended 31 March 2023.

#### **Principal Activity**

Wiltshire Health and Care LLP is a public benefit entity whose principal activity is the provision of adult community health services across Wiltshire.

#### Results

The results for the year are a profit of £4,000, as outlined on page 16.

#### **Business Review**

The LLP has continued to deliver adult community health services for the people of Wiltshire during the financial year 2022/23. The LLP achieved a surplus of £4,000, against its planned break even position at the end of the financial year. This was in the main due to lower than expected expenditure for which provisions were made in the previous financial year. The LLP grew its income base in a sustainable manner by agreeing the development of additional commissioned services, including the addition of the new Heart Failure Service and the mobilisation of the Virtual Ward NHS@Home service.

The 2022/23 delivery year has been incredibly challenging for the whole of the health and care system. Wiltshire Health and Care teams have continued to see increased support needs on our inpatient wards, the capacity of our Home First teams being stretched by a combination of increasing demands and a reduction in availability of follow-on domiciliary care and our core community teams (including our learning disability team) have had to deal with a combination of ongoing high demand and the effects of temporary absence due to COVID. Waiting times for our clinic-based services increased as a direct result of responding to post-lockdown demands, and remain higher.

The response to these challenges has been marked by two aspects. Firstly, the resilience, commitment and dedication of our teams who have kept going throughout. Secondly, the focus of the LLP in previous years on investing to improve our outdated infrastructure has meant that our information technology systems and estates have been able to support in ways that would not have been possible in previous years.

2022/23 has seen significant investment in networking infrastructure to mitigate cyber security risks, as well as multiple outdated telephony systems being replaced with a single enterprise system across the organisation which will further transform services, offer staff greater opportunity to work flexibly and utilise the estate more efficiently, as well as offering huge improvements in patient experience on contacting WHC.

The LLP has also embedded the provision of the service to assess and support those experiencing 'Long Covid' across the wider Bath and North East Somerset, Swindon and Wiltshire area. This service, which includes working across multiple professions and organisations, has created an example of how support for a wider range of multiple long term conditions should be organised in the future. The LLP is also providing a post COVID Assessment Service and introduced a Virtual Hub COVID service.

The continued supply of adequate workforce to deliver commissioned services continues to be a significant risk. Following an increase in the previous year's vacancy rate, 22/23 has shown a decrease and this is also reflected in a decrease in both overall and voluntary turnover rates. Recruitment and retention continue to be a focus and the refresh of the organisation's recruitment strategy supports this high priority area.

Health roster is now utilised across all areas of the organisation with centralised partnership rostering fully embedded within Inpatients and MIU.

Usage of external temporary staffing continues to be required. For centrally rostered areas, daily reviews and escalation processes support the management of requests in line with safer staffing numbers and enhanced patient care needs. Data is reviewed and monitored monthly to ensure a continued focus on spend.

The impacts of inflation and the cost of living are being felt by the LLP. A temporary increase to mileage rates was introduced in recognition of the particular impact on teams delivering essential health services across a large geographic area. The effects of inflation are also being seen in relation to operating costs, with the potential for further rises a source of additional risk for 2023/24.

The LLP's operational priorities for 2023/24 are set out in our Delivery Plan 2022-2025, which contains 40 objectives. These are centred around building a comprehensive community-based model of care in line with national and local strategy; growing, developing and supporting our people; ensuring teams have the tools to do the job through further action to modernise infrastructure and a focus on the long term through pursuing financial and environmental sustainability.

#### **Going Concern**

The LLP is required to consider if the accounts should be prepared on a going concern basis and this expectation needs to be tested each year. It should be disclosed if there are material uncertainties interespect of events or conditions that may cast significant doubt on the entities ability to continue as a going concern and that it may therefore be unable to realise its assets and discharge its liabilities in the normal course of business. The delivery plan will be under review during 2023/24.

The financial statements have been prepared on a going concern basis which the directors consider to be appropriate for the following reasons.

Commissioners have confirmed the extension of the core LLP contract through to 31 March 2025, with work ongoing with to consider arrangements after this date.

The LLP holds its principal contract to 31 March 2024 and has received formal notification from its commissioners that this principal contract will be renewed to 31 March 2025.

The Directors have prepared cash flow forecasts and performed a going concern assessment, which indicates that, in both the base and reasonably possible downsides, the LLP will require additional funds, through funding from its partner members, Royal United Hospitals Bath NHS Foundation Trust, Salisbury NHS Foundation Trust and Great Western Hospitals NHS Foundation Trust, to meet its liabilities as they fall due during the 12 month period from the date of approval of the financial statements, the going concern assessment period.

In considering the downside scenario it has been assumed that a further net increase in total non-pay costs of 2% could be incurred, reflecting the inflationary instability that still exists and equally that a potential 2% of income could be lost as discussions with the commissioner are not currently concluded. In assessing the downside scenario the impact is that in the event that this occurred this would mean running out of cash by June 2024, without remedial actions being implemented.

There are no other changes to liquidity impacting the going concern such as lending and there has not been any draw on external financial support as part of making the assessment.

The Members have indicated their intention to make available such funds as are needed by the LLP during the going concern assessment period. As with any company placing reliance on other group entities for financial support, the directors acknowledge that there can be no certainty that this support will continue although, at the date of approval of these financial statements, they have no reason to believe that it will not do so.

Consequently, the directors are confident that the LLP will have sufficient funds to continue to meet its liabilities as they fall due for at least 12 months from the date of approval of the financial statements and therefore have prepared the financial statements on a going concern basis.

#### **Designated Members**

The designated members who served during the year and to the date of this report are set out on page 3.

#### **Charitable Donations**

No charitable or political donations were made during the year (2021/22 £0).

# Policy regarding Members' Drawings and Capital

All contributions of Capital made by a Member shall be recorded by the LLP. No interest shall be payable on any Capital Contribution unless the Members agree otherwise. There have been no contributions made to date.

Should any Member provide any services to the LLP, the Member shall not make any profit on any elements of those services with all risks managed in line with the relevant regulatory framework. Arrangements are subject to periodical review by the Board.

In the event that the LLP makes any Profits a reserve shall be formed and will only be divided and converted into a debt to the Members if and when the Board (acting on behalf of the Members) has agreed to distribute those Profits among the Members as per section 8 of the Members Agreement.

· The amounts transferred in the year were £0 (2021/22: £0).

#### Disclosure of information to auditor

The members who held office at the date of approval of this members' report confirm that, so far as they are each aware, there is no relevant audit information of which the LLP's auditor is unaware; and each member has taken all the steps that they ought to have taken as a member to make themselves aware of any relevant audit information and to establish that the LLP's auditor is aware of that information.

#### **Auditor**

The independent auditors of Wiltshire Health and Care LLP are KPMG LLP. Pursuant to section 487 of the Companies Act 2006, the auditor will be deemed to be reappointed and KPMG LLP will therefore continue in office.

Approved by the Members and signed on behalf of the Members

# Streamlined Energy and Carbon Report

Streamlined Energy and Carbon Reporting (SECR) is a mandatory carbon and energy reporting scheme for large UK companies. Under the 2018 Regulations, LLPs which are "large" are also required to prepare and file energy and carbon information in their accounts and reports (in a new 'Energy and Carbon Report').

#### UK Energy Usage - electricity, gas, transport, and CO2e

In relation to our premises, the LLP currently does not own properties and occupies buildings owned by NHS Property Services (NHSPS) in the main.

Actual usage data has been provided for 2022/23 and is included in the table below. This was calculated using the appropriate CO2e conversion factors taken from the latest available UK Government GHG Conversion Factors for Company Reporting. Arrangements are in place with the Facilities Services Manager at NHSPS to receive Gas (kWh) and Electricity (kWh) measurements across our hospital sites for each reporting period. Similarly, we continue to ensure that we obtain this same data from the property owners of the other (non-NHSPS) sites that we occupy.

In relation to energy use relating to our transport, we have directly collected this information, and included it in the table below.

The 2021/22 gas and electricity emissions have been restated, correcting an overstatement of emissions for one WHC location.

There has been an increase in fuel emissions during the year, this is partly the result of more accurate infomation being available in 2022/23. Overall mileage is up 11%, however electric car mileage has increased by 15%, and hybrid car mileage has increased by 84% compared to 2021/22.

The electricity emissions have fallen, despite restating 2021/22. Overall emissions have increased 8.66% compared to 2021/22 after restating gas and electricity.

•			
	Usage	Usage	Unit of measurement
	2022/23	2021/22	
Energy consumption used to calculate emissions 1:	5,350,897	5,097,467	kWh
Emissions from combustion of gas:	452,111	428,542	CO2e kg
, ,	452.11	428.54	CO2e Tons
Emissions from combustion of fuel for transport	555,295	452,528	CO2e kg
purposes:	555.30	452.53	CO2e Tons
Emissions from purchased electricity:	158,551	191,916	CO2e kg
	158.55	191.916	CO2e Tons
Total gross CO2e:	1,165,957	1,072,986	CO2e kg
	1,165.96	1,072.99	CO2e Tons
Intensity ratio: tCO2e gross figure based from	0.017	0.016	CO2e kg/Revenue
mandatory fields above/ e.g. £100,000 revenue:	0.00	0.00	CO2e Tons/Revenue

<sup>[1]</sup> This includes Gas, Transport Fuel and Electricity consumption

# **Streamlined Energy and Carbon Report**

# **Energy efficiency action**

The LLP has undertaken the following principal measures for the purpose of increasing its energy efficiency:

The LLP has changed its approach for leasing fleet/lease vehicles. The LLP made the decision in 2020/21 to only lease low or ultra-low carbon vehicles as pool cars were renewed. This is in line with the commitment and strategy of the NHS Long Term Plan. All leased pool cars will be low or ultra low carbon by June 2023.

Introduction of salary sacrifice scheme to support lease of electric cars in 2023/24. As noted above, this will increase the proportion of business miles being completed using electric vehicles.

The LLP has fully embedded its changed approach to the conduct of meetings. The LLP's default position is to hold meetings virtually. To facilitate this, all relevant staff members have been provided with access to MS Teams, and the necessary IT hardware. This will help to maintain a level of transport use lower than the comparable pre-pandemic position.

The LLP has evolved its approach for delivery of clinical consultations. Although the impact of this is not always seen in the LLP's emissions, the broader impact on Wiltshire is that it reduces the need for patients, carers and families to travel for health appointments.

# Statement of members' responsibilities in respect of the Members' report and the financial statements

The members are responsible for preparing the Members' Report and the streamlined energy and carbon report and the financial statements in accordance with applicable law and regulations.

The Limited Liability Partnerships (Accounts and Audit) (Application of Companies Act 2006) Regulations 2008 require the members to prepare financial statements for each financial year. Under that law the members have elected to prepare the financial statements in accordance with UK Accounting Standards and applicable law (UK Generally Accepted Accounting Practice), including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland and applicable law.

Under Regulation 8 of the Limited Liability Partnerships (Accounts and Audit) (Application of Companies Act 2006) Regulations 2008 the members must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the LLP and of its profit or loss for that period. In preparing these financial statements, the members are required to:

- · select suitable accounting policies and then apply them consistently;
- · make judgments and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the LLP's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the LLP or to cease operations, or have no realistic alternative but to do so.

Under Regulation 6 of the Limited Liability Partnerships (Accounts and Audit) (Application of Companies Act 2006) Regulations 2008, the members are responsible for keeping adequate accounting records that are sufficient to show and explain the LLP's transactions and disclose with reasonable accuracy at any time the financial position of the LLP and enable them to ensure that its financial statements comply with those regulations. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such

The members are responsible for the maintenance and integrity of the corporate and financial information included on the LLP's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

#### **Opinion**

We have audited the financial statements of Wiltshire Health and Care LLP ("the LLP") for the year ended 31 March 2023 which comprise the Statement of Comprehensive Income, Statement of Financial Position, Cash Flow Statement, Statement of Changes in Equity and related notes, including the accounting policies in 1.

In our opinion the financial statements:

- give a true and fair view, of the state of affairs of the LLP as at 31 March 2023 and of its profit for the year then ended;
- have been properly prepared in accordance with UK accounting standards, including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland; and
- have been prepared in accordance with the requirements of the Companies Act 2006 as applied to limited liability partnerships by the Limited Liability Partnerships (Accounts and Audit) (Application of Companies Act 2006) Regulations 2008.

#### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the LLP in accordance with, UK ethical requirements including the FRC Ethical Standard. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

#### Going concern

The members have prepared the financial statements on the going concern basis as they do not intend to liquidate the LLP or to cease its operations, and as they have concluded that the LLP's financial position means that this is realistic. They have also concluded that there are no material uncertainties that could have cast significant doubt over its ability to continue as a going concern for at least a year from the date of approval of the financial statements ("the going concern period").

In our evaluation of the members' conclusions, we considered the inherent risks to the LLP's business model and analysed how those risks might affect the LLP's financial resources or ability to continue operations over the going concern period.

Our conclusions based on this work:

- we consider that the members' use of the going concern basis of accounting in the preparation of the financial statements is appropriate;
- we have not identified, and concur with the members' assessment that there is not, a material uncertainty related to events or conditions that, individually or collectively, may cast significant doubt on the LLP's ability to continue as a going concern for the going concern period.

However, as we cannot predict all future events or conditions and as subsequent events may result in outcomes that are inconsistent with judgements that were reasonable at the time they were made, the above conclusions are not a guarantee that the LLP will continue in operation.

#### Fraud and breaches of laws and regulations - ability to detect

Identifying and responding to risks of material misstatement due to fraud

To identify risks of material misstatement due to fraud ("fraud risks") we assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. Our risk assessment procedures included:

- Enquiring of management, the Audit Committee and internal audit and inspection of policy documentation as to the LLP's high-level policies and procedures to prevent and detect fraud, including the internal audit function, and LLP's channel for "whistleblowing", as well as whether they have knowledge of any actual, suspected or alleged fraud.
- · Reading Board and Audit Committee minutes.
- Using analytical procedures to identify any usual or unexpected relationships.
- Reviewing the LLP's accounting policies.

We communicated identified fraud risks throughout the audit team and remained alert to any indications of fraud throughout the audit.

As required by auditing standards, we performed procedures to address the risk of management override of controls and the risk that LLP management may be in a position to make inappropriate accounting entries. On this audit we did not identify a fraud risk related to revenue recognition because of the non-complex recognition due to the nature of the revenue, which limits the opportunities to fraudulently misstate revenue.

We also recognised a fraud risk related to expenditure recognition, particularly in relation to year-end accruals. We consider this risk to be applicable to non-payroll and non-depreciation expenditure.

We also performed procedures including:

- Identifying journal entries and other adjustments to test based on risk criteria and comparing the identified entries to supporting documentation. These included unusual posted to cash.
- Inspecting cash payments and purchase invoices in the period following 31 March 2023 to verify expenditure had been recognised in the correct accounting period.

# Identifying and responding to risks of material misstatement due to non-compliance with laws and regulations

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general sector experience and through discussion with the directors and other management (as required by auditing standards), and from inspection of the LLP's regulatory and legal correspondence and discussed with the directors and other management the policies and procedures regarding compliance with laws and regulations.

As the LLP is regulated, our assessment of risks involved gaining an understanding of the control environment including the entity's procedures for complying with regulatory requirements.

We communicated identified laws and regulations throughout our team and remained alert to any indications of non-compliance throughout the audit.

The potential effect of these laws and regulations on the financial statements varies considerably.

The LLP is subject to laws and regulations that directly affect the financial statements including financial reporting legislation. We assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Whilst the LLP is subject to many other laws and regulations, we did not identify any others where the consequences of non-compliance alone could have a material effect on amounts or disclosures in the financial statements.

#### Context of the ability of the audit to detect fraud or breaches of law or regulation

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remained a higher risk of non-detection of fraud, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. Our audit procedures are designed to detect material misstatement. We are not responsible for preventing non-compliance or fraud and cannot be expected to detect non-compliance with all laws and regulations.

#### Other information

The members are responsible for the other information, which comprises the members' report and the streamlined energy and carbon report. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work, we have not identified material misstatements in the other information.

Matters on which we are required to report by exception

Under the Companies Act 2006 as applied to limited liability partnerships we are required to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- we have not received all the information and explanations we require for our audit We have nothing to report in these respects.

#### Members' responsibilities

As explained more fully in their statement set out on page 10, the members are responsible for: the preparation of the financial statements and for being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the LLP's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the LLP or to cease operations, or have no realistic alternative but to do so.

#### Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsresponsibilities.

#### The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the members of the LLP; as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006, as required by Regulation 39 of the Limited Liability Partnerships (Accounts and Audit) (Application of Companies Act 2006) Regulations 2008. Our audit work has been undertaken so that we might state to the LLP's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the LLP and the LLP's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Notes on pages 19 to 27 form part of the financial statements.

#### 1. Accounting policies

The principal accounting policies used in the preparation of the financial statements, which have been consistently applied in the current and preceding financial years, are as follows:

#### 1.1 Basis of preparation

These financial statements were prepared in accordance with Financial Reporting Standard 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland ("FRS 102") and The Statement of Recommended Practice, 'Accounting by Limited Liabilities Partnerships' with the consideration that the LLP is a public benefit entity. The presentation currency of these financial statements is sterling. All amounts in the financial statements have been rounded to the nearest £1,000.

The accounting policies set out below have, unless otherwise stated, been applied consistently to all periods presented in these financial statements.

#### 1.2 Going concern

The LLP is required to consider if the accounts should be prepared on a going concern basis and this expectation needs to be tested each year. It should be disclosed if there are material uncertainties in respect of events or conditions that may cast significant doubt on the entities ability to continue as a going concern and that it may therefore be unable to realise its assets and discharge its liabilities in the normal course of business. The delivery plan will be under review during 2023/24.

The financial statements have been prepared on a going concern basis which the directors consider to be appropriate for the following reasons.

Commissioners have confirmed the extension of the core LLP contract through to 31 March 2025, with work ongoing with to consider arrangements after this date.

The LLP holds its principal contract to 31 March 2024 and has received formal notification from its commissioners that this principal contract will be renewed to 31 March 2025.

The Directors have prepared cash flow forecasts and performed a going concern assessment, which indicates that, in both the base and reasonably possible downsides, the LLP will require additional funds, through funding from its partner members, Royal United Hospitals Bath NHS Foundation Trust, Salisbury NHS Foundation Trust and Great Western Hospitals NHS Foundation Trust, to meet its liabilities as they fall due during the 12 month period from the date of approval of the financial statements, the going concern assessment period.

In considering the downside scenario it has been assumed that a further net increase in total non-pay costs of 2% could be incurred, reflecting the inflationary instability that still exists and equally that a potential 2% of income could be lost as discussions with the commissioner are not currently concluded. In assessing the downside scenario the impact is that in the event that this occurred this would mean running out of cash by June 2024, without remedial actions being implemented.

There are no other changes to liquidity impacting the going concern such as lending and there has not been any draw on external financial support as part of making the assessment.

The Members have indicated their intention to make available such funds as are needed by the LLP during the going concern assessment period. As with any company placing reliance on other group entities for financial support, the directors acknowledge that there can be no certainty that this support will continue although, at the date of approval of these financial statements, they have no reason to believe that it will not do so.

Consequently, the directors are confident that the LLP will have sufficient funds to continue to meet its liabilities as they fall due for at least 12 months from the date of approval of the financial statements and therefore have prepared the financial statements on a going concern basis.

#### 1.3 Turnover

Turnover represents amounts chargeable to customers for services provided during the year, based upon contractual arrangements with all customers, including other NHS bodies, and is recorded as earned under those contractual arrangements. Where services are invoiced in advance of the service being performed or delivered, then income is deferred until the service is carried out. Income is accrued where it has been earned by the performance of the service, but is not yet invoiced to the customer.

#### 1.4 Expenditure on other goods and services

Expenditure on goods and services is recognised when, and to the extent that, they have been received, and is measured at the fair value of those goods and services. Expenditure is recognised in operating expenses except where it results in the creation of a non-current asset such as property, plant and equipment.

#### 1.5 Employee benefits

Past and present employees are covered by the provisions of the two NHS Pension Schemes. Details of the benefits payable and rules of the Schemes can be found on the NHS Pensions website at www.nhsbsa.nhs.uk/pensions. Both are unfunded defined benefit schemes that cover NHS employers, GP practices and other bodies, allowed under the direction of the Secretary of State in England and Wales. They are not designed to be run in a way that would enable public bodies to identify their share of the underlying scheme assets and liabilities. Therefore, each scheme is accounted for as if it were a defined contribution scheme: the cost to the public body of participating in each scheme is taken as equal to the contributions payable to that scheme for the accounting period.

In order that the defined benefit obligations recognised in the financial statements do not differ materially from those that would be determined at the reporting date by a formal actuarial valuation, the FReM requires that "the period between formal valuations shall be four years, with approximate assessments in intervening years".

#### 1.6.1 Property, plant and equipment

#### Recognition

Property, plant and equipment is capitalised where:

- · it is held for use in delivering services or for administrative purposes
- it is probable that future economic benefits will flow to, or service potential be provided to, the LLP
- · it is expected to be used for more than one financial year
- · the cost of the item can be measured reliably
- · the item has cost of at least £5,000, or
- collectively, a number of items have a cost of at least £5,000 and individually have cost of more than £250,

Where a large asset, for example a building, includes a number of components with significantly different asset lives, e.g., plant and equipment, then these components are treated as separate assets and depreciated over their own useful lives.

## Subsequent expenditure

Subsequent expenditure relating to an item of property, plant and equipment is recognised as an increase in the carrying amount of the asset when it is probable that additional future economic benefits or service potential deriving from the cost incurred to replace a component of such item will flow to the enterprise and the cost of the item can be determined reliably. Where a component of an asset is replaced, the cost of the replacement is capitalised if it meets the criteria for recognition above. The carrying amount of the part replaced is de-recognised. Other expenditure that does not generate additional future economic benefits or service potential, such as repairs and maintenance is charged to the Statement of Comprehensive Income in the period in which it is incurred.

#### Measurement

#### Valuation

All property, plant and equipment assets are measured initially at cost, representing the costs directly attributable to acquiring or constructing the asset and bringing it to the location and condition necessary for it to be capable of operating in the manner intended by management.

IT equipment, transport equipment, furniture and fittings, and plant and machinery that are held for operational use are valued at depreciated historic cost where these assets have short useful lives or low values or both, as this is not considered to be materially different from current value in existing use.

#### Depreciation

Items of property, plant and equipment are depreciated over their remaining useful lives in a manner consistent with the consumption of economic or service delivery benefits. Freehold land is considered to have an infinite life and is not depreciated.

•	
Furniture and fittings 5	- 5 - 10 - 5

#### Impairments

An impairment that arises from a clear consumption of economic benefit or of service potential is reversed when, and to the extent that, the circumstances that gave rise to the loss is reversed. Reversals are recognised in operating expenditure to the extent that the asset is restored to the carrying amount it would have had if the impairment had never been recognised. Any remaining reversal is recognised in the revaluation reserve. Where, at the time of the original impairment, a transfer was made from the revaluation reserve to the income and expenditure reserve, an amount is transferred back to the revaluation reserve when the impairment reversal is recognised.

Other impairments are treated as revaluation losses. Reversals of 'other impairments' are treated as revaluation gains.

#### De-recognition

Assets intended for disposals are reclassified as 'held for sale' once all of the following criteria are met. The sale must be highly probable and the asset available for immediate sale in its present condition.

Following reclassification, the assets are measured at the lower of their existing carrying amount and their fair value less costs to sell. Depreciation ceases to be charged. Assets are de-recognised when all material sale contract conditions have been met.

Property, plant and equipment which is to be scrapped or demolished does not qualify for recognition as 'held for sale' and instead is retained as an operational asset and the asset's useful life is adjusted. The asset is derecognised when scrapping or demolition occurs.

#### Donated and grant funded assets

Donated and grant funded property, plant and equipment assets are capitalised at their fair value on receipt. The donation/grant is credited to income at the same time, unless the donor has imposed a condition that the future economic benefits embodied in the grant are to be consumed in a manner specified by the donor, in which case, the donation/grant is deferred within liabilities and is carried forward to future financial years to the extent that the condition has not yet been met.

The donated and grant funded assets are subsequently accounted for in the same manner as other items of property, plant and equipment.

#### 1.6.2 Intangible Assets

#### Recognition

Intangible assets are non-monetary assets without physical substance which are capable of being sold separately from the rest of the LLP's business or which arise from contractual or other legal rights. They are recognised only where it is probable that future economic benefits will flow to, or service potential be provided to, the LLP and where the cost of the asset can be measured reliably.

#### Software

Software which is integral to the operation of hardware, e.g. an operating system, is capitalised as part of the relevant item of property, plant and equipment. Software which is not integral to the operation of hardware, e.g. application software, is capitalised as an intangible asset.

#### Measurement

Intangible assets are recognised initially at cost, comprising all directly attributable costs needed to create, produce and prepare the asset to the point that it is capable of operating in the manner intended by management.

Subsequently intangible assets are measured at current value in existing use. Where no active market exists, intangible assets are valued at the lower of depreciated replacement cost and the value in use where the asset is income generating. Revaluations gains and losses and impairments are treated in the same manner as for property, plant and equipment. An intangible asset which is surplus with no plan to bring it back into use is valued at fair value where there are no restrictions on sale at the reporting date and where they do not meet the definitions of investment properties or assets held for sale.

Intangible assets held for sale are measured at the lower of their carrying amount or fair value less costs to sell.

#### Amortisation

Intangible assets are amortised over their expected useful lives in a manner consistent with the consumption of economic or service delivery benefits.

#### 1.7 Stock

Stock is valued at the lower of cost and net realisable value. The cost of inventories is measured using the first in, first out (FIFO) method.

An Asset Register was introduced last year and Material Management is now being used which has improved the stock control and ensured a more accurate stock register is being kept

#### 1.8 Cash and cash equivalents

Cash and cash equivalents comprise all cash balances

# 1.9 Financial instruments and financial liabilities

Financial assets and financial liabilities which arise from contracts for the purchase or sale of non-financial items (such as goods or services), which are entered into in accordance with the LLP's normal sale or usage requirements, are recognised when, and to the extent which, performance occurs, i.e. when receipt or delivery of the goods or services is made. These assets and liabilities are categorised as fair value through income and expenditure and loans and debtors.

All financial assets are de-recognised when the rights to receive cash flows from the assets have expired or the LLP has transferred substantially all of the risks and rewards of ownership.

Financial liabilities are de-recognised when the obligation is discharged, cancelled or expires.

The LLP's loan's and receivables comprise: cash; debtors; and creditors.

Training and Education		842	439
Other		2,076	387
	•	.68,198	66,206

The employer contribution rate for NHS pensions increased from 14.3% to 20.6% (excluding administration charge) from 1st April 2019. Since 2019/20, NHS providers have continued to pay over contributions at the former rate with the additional amount being paid over by NHS England on providers' behalf. The full cost and related funding have been recognised in these accounts.

This note discloses costs and commitments incurred in operating lease arrangements where Wiltshire Health and Care LLP is the lessee.

The Premises charges are agreed on an annual rolling contract with no long term commitment. The future years premises costs are based on our expected committed as final contracts have not been agreed.

#### 18. Total members' interests

On the creation of the LLP and during the 12 months to 31st March 2023 no Member made any financial investment into the LLP. Members have not received any revenue or capital remuneration.

#### 19. Employee benefits

Past and present employees are covered by the provisions of the two NHS Pension Schemes. Details of the benefits payable and rules of the Schemes can be found on the NHS Pensions website at www.nhsbsa.nhs.uk/pensions. Both are unfunded defined benefit schemes that cover NHS employers, GP practices and other bodies, allowed under the direction of the Secretary of State in England and Wales. They are not designed to be run in a way that would enable NHS bodies to identify their share of the underlying scheme assets and liabilities. Therefore, each scheme is accounted for as if it were a defined contribution scheme; the cost to the NHS body of participating in each scheme is taken as equal to the contributions payable to that scheme for the accounting period.

In order that the defined benefit obligations recognised in the financial statements do not differ materially from those that would be determined at the reporting date by a formal actuarial valuation, the FReM requires that "the period between formal valuations shall be four years, with approximate assessments in intervening years". An outline of these follows.

#### a) Accounting valuation

A valuation of scheme liability is carried out annually by the scheme actuary (currently the Government Actuary's Department) as at the end of the reporting period. This utilises an actuarial assessment for the previous accounting period in conjunction with updated membership and financial data for the current reporting period, and are accepted as providing suitably robust figures for financial reporting purposes. The valuation of scheme liability as at 31st March 2023 is based on valuation data as 31st March 2020, updated to with summary global member and accounting data. In undertaking this actuarial assessment, the methodology prescribed in IAS 19, relevant FReM interpretations, and the discount rate prescribed by HM Treasury have also been used.

The latest assessment of the liabilities of the scheme is contained in the report of the scheme actuary, which forms part of the annual NHS Pension Scheme Accounts. These accounts can be viewed on the NHS Pensions website and are published annually. Copies can also be obtained from The Stationery Office.

(4,436)

(2,402)

3,640

(2,384)

#### Notes to the Financial Statements Year ended 31 March 2023

#### b) Full actuarial (funding) valuation

The purpose of this valuation is to assess the level of liability in respect of the benefits due under the schemes (taking into account recent demographic experience), and to recommend contribution rates payable by employees and employers.

The latest actuarial valuation undertaken for the NHS Pension Scheme was completed as at 31 March 2016. The results of this valuation set the employer contribution rate payable from April 2019. The Department of Health and Social Care laid Scheme Regulations in 2019 confirming the employer contribution rate to be 20.68% of pensionable pay.

The 2016 funding valuation was also expected to test the cost of the Scheme relative to the employer cost cap set following the 2012 valuation. Following a judgement from the Court of Appeal in December 2018 Government announced a pause to that part of the valuation process pending conclusion of the continuing legal process.
