COMPANIES MOLES

OBJECTIVES

in the United Kingdom.

LONG TERM RECORD

CHAIRMAN'S STATEMENT

Directors – Donald Grant retired from the board at the end of June, after serving as a director since 1969 and as Chairman for the last six years. On behalf of the directors and shareholders I should like to express our thanks to him for his commitment, leadership and stewardship of your company and wish him well in retirement.

At the end of the financial year Roland Jarvis also retired from the board following his move to the South of England. I would thank him also for his valuable contribution over the past eight years. On 1 November 1993 Lord Ramsay was appointed a director in his place. Lord Ramsay has merchant banking experience, including investment in small companies, and I am sure his knowledge of the City will be of great benefit to us.

Objectives – Your board believes strongly in the attractions of smaller companies as vehicles which are able to generate above-average returns and has for a number of years concentrated investment in companies with a market capitalisation of below £75 million. This segment of the stockmarket however, has proved to be a very difficult investment area over most of the past five years.

Accordingly your board has decided to extend the unitures of stocks in which your company invests, and in future will measure the capital performance of the assets against the FTSE Small Cap Index (excluding Investment Trusts). At 31 October 1993 the upper size limit of companies in that index was £285 million.

Net Asset Value – In the twelve months to 31 October 1993 the net asset value per share rose by 37.4%, from 220.8p to 303.4p. This performance was ahead of the FT Actuaries All-Share Index which rose by 24.6%.

Dividend – The earnings of a number of small companies in which your company was invested were badly affected by the recession, which proved to be deeper and longer than expected. As indicated at the time of the interim report, your board believes that it is prudent to reduce the annual dividend to a level commensurate with the earnings of your company. A final dividend of 6p per share is recommended and your board hopes that dividend increases from this lower base can be resumed in future years.

Share Capital – At the Extraordinary General Meeting held on 29 November 1993 shareholders passed a resolution to reduce the capital of your company by £425,000, representing the paid-up value of the preference stock. This resolution has to be confirmed by the Court of Session before the reduction becomes effective.

Secretary – Dunedin Fund Managers Limited, the investment manager of your company, was also appointed as its Secretary with effect from 1 November 1993 and a fee of £24,500 was paid to KPMG Peat Marwick, the previous Secretary, in connection with the change. The registered office of your company was changed to Belsize House, West Ferry, Dundee from the same date.

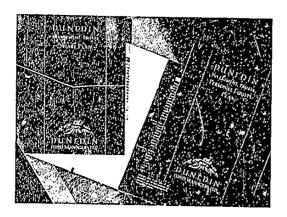

Outlook – The recent results season has produced evidence of improvement in companies' earnings and this trend is expected to continue in the current year. As better earnings are reported, investors' sentiment will improve and, I believe, small company shares will regain more of their traditional premium valuation to the broader stockmarket.

W D Marr, Chairman 29 November 1993

INVESTOR INFORMATION

It is the business of investment trusts, advised by their managers, to invest in the shares of other companies. The purchase of investment trust shares is therefore an ideal way to acquire a spread of investments, managed at low cost, to provide capital and/or income growth.

£1,000 invested in **Dundee and London**Investment Trust on 1 November 1978
would, after 15 years with dividends reinvested,
have been worth £8,749 by 1 November
1993. This compares with £3,567 for the
highest rate available from a building society
and £2,796 for the UK Retail Price Index.

HOW DO YOU INVEST?

Ordinary Shares – Shares can be bought or sold directly through a stockbroker or indirectly through a lawyer, accountant or other professional adviser.

Two other methods which are becoming increasingly popular are the Dunedin Investment Trusts Share Plan and the Dunedin Investment Trusts Personal Equity Plan.

Dunedin Investment Trusts Share Plan – Originally introduced in January 1987, the Plan has attracted over 800 investors to Dundee and London Investment Trust. You can buy shares in the Trust either by making regular monthly payments (minimum £30 per month) or by making an occasional lump sum investment (minimum £250 initially and minimum £30 thereafter). Lump sums of £250 or more are invested twice weekly. If you already own shares, you can also join the Share Plan and have your dividends reinvested.

Dividends from shares within the Plan can be reinvested, paid direct to you or mandated as required.

There is **no charge** for buying, selling or holding shares through the Plan, other than Government Stamp Duty of 0.5% which is currently payable on all share purchases.

Dunedin Investment Trusts Personal Equity Plan - The Dunedin Investment Trusts PEP was launched in 1990 and has already attracted over 1,500 investors to Dundee and London Investment Trust. The advantage of the PEP is that the income and capital growth from all investments held within it are free from Income Tax on dividends and free from Capital Gains Tax. You can invest up to £6,000 in Dundee and London Investment Trust through a PEP in the tax year 1993/94. A regular income facility is available through the PEP, whereby you can elect to receive tax free income twice yearly. There is a set up cost of £30 (plus VAT) and an annual charge of 0.5% (plus VAT), which is considerably cheaper than most other PEPs. There is no charge for buying or selling shares

in the Trust within the PEP other than Government Stamp Duty of 0.5% on purchases.

The Dunedin Investment Trusts Share Exchange Scheme - is now available within both the Share Plan and the PEP. This provides a convenient method for investors to sell an existing shareholding in any UK quoted company with the proceeds being reinvested in the Trust.

Please remember that past performance is not necessarily a guide to the future. The price of shares and the income from them can go down as well as up and you may not get back the amount invested.

Keeping you informed - The share price of Dundee and London Investment Trust appears under the heading 'Investment Trusts' in the Financial Times, The Daily Telegraph, The Times, The Guardian, The Independent, The Scotsman and The Herald. You can also obtain the latest share price by phoning FT City-Line on 0336 432385.

This year's Annual General Meeting will be held at Belsize House, West Ferry, Dundee on Tuesday 25 January 1994 at noon.

INVESTMENT MANAGER'S REVIEW

From left to right, David McCraw is the Dunedin director with responsibility for your company and Neil Pirie is the fund manager.

The financial year under review has seen a resurgence of interest in small companies, which is reflected in the increase of 37.4% in the net asset value per share. This compares with a rise of 24.6% in the FTA All-Share Index. The departure of sterling from the Exchange Rate Mechanism in September 1992 and the subsequent interest rate cuts heralded a major reversal in the attitudes of investors towards small companies, ending a prolonged period of poor returns.

The impact of the long and deep recession which the UK economy had experienced was felt particularly sharply by small companies. A considerable number have had to reduce or pass their dividends in order to conserve cash and ensure that they are financially strong enough to participate in the recovery. This has adversely affected the company's income position which was also impacted by a reduction in deposit interest. Lower interest rates contributed to this reduction but the main element is attributable to the fact that the company became more fully invested in equities during the year.

As outlined in the Chairman's statement, it was considered appropriate to widen the universe of potential investments from the previous concentration on companies with a market capitalisation of less than £75 million and from 1 November 1993, the Board has selected the FTSE Small Cap index (excluding Investment Trusts) as the benchmark against which the company's capital performance will be measured.

Rather than set a specific upper size limit, we will look to invest in companies where the market capitalisation is within the range of the FTSE Small Cap index. The upper level of the market capitalisation range for this index is £285 million currently, and this change of emphasis will make the company more flexible, leaving it better placed to take advantage of the many opportunities which are expected to arise in the small company market.

As a result of these measures, a number of holdings at the smaller end of the market capitalisation scale have been disposed of, including Norish, Folkes Group and Computer People. New holdings include Manders and Peter Black which are both capitalised in excess of £100 million. The table on page 9 provides an analysis of the company's holdings by market capitalisation and comparative figures for the FTSE Small Cap Index.

In anticipation of economic recovery, the portfolio, as previously structured, gave emphasis to the capital goods sectors of the market. While we believe that the forecast recovery in earnings makes certain companies within these sectors attractive, it is desirable to have a more balanced portfolio in terms of

sector diversification. In order to reduce stock-specific risk, the number of holdings in the portfolio has been increased, and this has been funded by selling part of the larger holdings.

The strong performance of the small company market this year has encouraged a significant number of new issues in recent months. The company has participated in these issues on a very selective basis and will retain holdings in those companies which we consider to offer above-average returns.

In addition, a number of companies in the portfolio have sought to finance their expansion by way of rights issues and we have supported several of these, notably Perry Group and Marling Industries. There has generally been very little takeover activity in the UK stockmarket during the last twelve months, but the company's holding in Securiguard was bid for and a substantial profit was realised.

Notwithstanding the very strong performance of small companies during the last twelve months the outlook remains encouraging. The performance in 1993 only reversed a small part of the underperformance of smaller companies which had been experienced since 1988 and, with the ability of small companies to grow their earnings at a faster rate than large companies during periods of economic growth, out-performance should continue. Indeed, recent indications on earnings and dividends of companies in the portfolio have been encouraging.

NOTES ON THE ACCOUNTS

1 Accounting basis and policies

The accounts have been prepared under the historical cost convention, modified to include the revaluation of investments, and in accordance with applicable Accounting Standards. They have also been prepared on the assumption that approval as an investment trust will continue to be granted.

- (a) Revenue and expenses Income from investments, including taxes deducted at source and imputed tax credics, is included in revenue by reference to the date on which the investment is quoted ex-dividend. Foreign income is converted at the exchange rate applicable at the time of receipt. Interest receivable on short-term deposits and expenses are treated on an accruals basis.
- (b) Investments Listed investments are valued at market prices, foreign currencies being converted at the rate of exchange ruling at the relevant balance sheet date. Unlisted investments which include investments traded on the Unlisted Securities Market or under Rule 535(2) or (3) of The Sto 'k Exchange are valued by the directors taking account of latest dealing prices, brokers' valuations and other available accounting information as appropriate.
- (c) Realised capital reserves Gains and losses on realisation of investments and currency are dealt with in the realised capital reserves. 50% of the investment management and secretarial fees along with the associated irrecoverable VAT are charged to this reserve. The associated tax relief is credited to this reserve.
- (d) Unrealised appreciation/(depreciation) reserve Increases and decreases in the valuation of investments held are dealt with in this reserve.
- (e) Taxation ACT on dividends paid and proposed is included in current taxation payable and recoverable only to the extent that it is not covered by tax credits on franked investment income received up to the balance sheet date or receivable in the following year. Deferred tax is provided for on short–term timing differences.

DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE PREPARATION OF THE FINANCIAL STATEMENTS

The directors are required by law to prepare financial statements which give a true and fair view of the state of affairs of the company at the end of the financial year and of its revenue and cash flows for the year. In addition, the directors are responsible for ensuring that adequate accounting records are maintained, that the assets of the company are safeguarded and that fraud and other irregularities are prevented or detected.

The directors confirm that suitable accounting policies, consistently applied and supported by reasonable and prudent judgements and estimates, have been used in the preparation of the financial statements of the company for the year ended 31 October 1993 and that applicable Accounting Standards have been followed.

AUDITORS' REPORT TO THE MEMBERS OF DUNDEE AND LONDON INVESTMENT TRUST PLC

We have audited the financial statements on pages 16 to 23, which have been prepared under the historical cost convention modified to include the revaluation of investments and on the basis of the accounting policies set out on page 20.

Respective responsibilities of directors and auditors

As described above, the company's directors are responsible for the preparation of financial statements. It is our responsibility to form an independent opinion, based on our audit, on those statements and to report our opinion to you.

Basis of opinion

We conducted our audit in accordance with Auditing Standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material mis-statement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

Opinion

In our opinion the financial statements give a true and fair view of the state of affairs of the company as at 31 October 1993 and of its revenue for the year then ended and have been properly prepared in accordance with the Companies Act 1985.
