Report and Accounts

31 December 1992

Company Registered No 75177

**III ERNST & YOUNG** 

#### DIRECTORS' REPORT

The directors present their report and accounts for the year ended 31 December 1992.

#### **ACTIVITIES AND RESULTS**

The principal activity of the company is the provision and operation of a cable television service.

The loss after tax for the year is £2,223,000 and reflects operational losses offset by interest receivable and after charging exceptional items of £589,000.

The company undertook no further major construction during the year and trimmed its operations accordingly.

Throughout the year the directors sought funds with which to extend the company's cable network and meet its licence obligations. This search was carried out against a background of difficult but improving economic conditions and the directors are pleased to report that funding was achieved in September and October 1993 as detailed below.

#### POST BALANCE SHEET EVENTS

As detailed in note 22 to the accounts, on 26 September 1993 a \$15.6m equity investment was made by a subsidiary company of Ocom Corporation, which is in the course of being merged with International Cabletel Inc (CableTel). The above equity investment in CCV has enabled building construction to recommence in October 1993.

At the same time terms have been negotiated for the sale of the company to CableTel. Based on the market price of CableTel shares on 22 October 1993 and the rate of exchange on the same date, this values the company at some £48.3m

#### FIXED TANGIBLE ASSETS

The movements in Fixed tangible assets are set out in note 10 to the accounts on page 11.

#### 1. ACCOUNTING POLICIES

#### Basis of preparation

The financial statement have been prepared under the historic cost convention in accordance with applicable accounting standards, and in accordance with the Companies Act 1985.

The accounts have been prepared under the going concern concept on the basis that the security of the funding outlined in note 22 to these accounts will enable the company to continue its operation for the foreseeable future.

#### Depreciation

The cost of fixed tangible assets is written off on a straight line basis over their estimated useful economic lives commencing in the year following purchase. This takes account of the directors' estimate of the normal delay between the receipt, and full commissioning, of assets.

The depreciation rates are as follows:

 Network
 2%; 10%

 Furniture and fittings
 6.67%

 Headend
 10%

 Motor vehicles
 25%

 Production
 6.67%

 Office equipment
 10%

In addition, the depreciation rates on certain assets have been accelerated to reflect a revision of their useful lives.

#### Regional development grants

Regional development grants are credited to trading profit over the estimated useful economic lives of the assets to which they relate. The amounts shown in the balance sheet represent the total grants received to date less amounts amortised.

#### Deferred tax

Provision is made for deferred tax arising from timing differences between profit as computed for tax purposes and profit as stated in the accounts, except to the extent that the liability is unlikely to become payable in the future. Such provision has been reduced to nil by tax losses available for offset against future profits.

#### Pension costs

The company operates a defined benefit pension scheme covering all eligible employees. Payments made to the scheme are charged to the profit and loss account represent a proper charge to cover the accruing liabilities on a continuing basis. The pension scheme is subject to valuation, by an independent actuary, every three years.

#### Operating lease

Rentals paid under operating leases are charged to income on a straight line basis over the term of the lease.

#### Pension scheme:

The company operates a funded pension scheme providing defined benefits. The assets of the scheme are held separately from those of the company, being invested in units of an exempt unit trust.

The contributions are determined by a qualified actuary on the basis of triennial valuations using the Partly Projected Unit Method, with a control period, and making allowance for new entrants. A valuation was carried out on 6 April 1991. The assumptions which have the most significant effect on the results of the valuation are those relating to the rate of return on investments and the rate of increase in salaries, which were 9.5% per annum and 8% per annum respectively. In calculating the discounted income value of assets, equity dividends were assumed to increase in the future at 4.5% per annum. At the valuation date, the market value of the Scheme's assets amounted to £179,000 and the actuarial value of assets was sufficient to cover 132% of the liabilities for in-service members as calculated on the funding method employed. The pension charge was 24.3% for 1 January to 31 August 1992 and 21.5% for 1 September to 31 December 1992.
