#### Report of the Directors

The Directors of Clydesdale Bank Asset Finance Limited (the "Company") submit their report and Financial Statements for the year ended 30 September 2008.

#### Activities

The Company provides instalment credit finance and leasing facilities to industry, commerce and private individuals.

#### Profits and appropriations

The profit attributable to the shareholder for the year ended 30 September 2008 amounted to £12,346,000 (2007: £1,695,000) No dividends were paid during the year (2007: £nil). The directors do not recommend the payment of a final dividend in respect of this financial year (2007: £Nil).

#### Principal risks and uncertainties

The key risks facing the Company are discussed further in Note 17.

#### Going Concern

The directors are satisfied that the Company has adequate resources to meet its obligations for the foreseeable future and confirm that the Company is a going concern. For this reason they continue to adopt the going concern basis in preparing the financial statements.

#### **Business review**

The Company and its subsidiaries continue to provide leasing services. There has been no change to the business of the Company during the year. Lease income has increased in the year, consistent with the increase in finance lease receivables.

The directors do not rely on key performance indicators at the individual company level. The business is managed by monitoring product related information in conjunction with that of other leasing entities within the UK Group which is not specific to individual companies.

#### Directors and Directors' interests

In terms of the Articles of Association of the Company, no directors are required to retire by rotation.

#### Directors interests

The current directors are shown on page 2. None of the directors held shares in the Company or in any related UK company during the year. As the Company is a wholly owned subsidiary of National Australia Bank ("NAB"), which is incorporated in Australia, any interest which the Directors may have in NAB does not need to be notified to the Company and thus is not disclosed in this report.

#### Directors' liabilities

During the year the NAB Group paid a premium for a contract insuring the directors and officers of NAB, its subsidiaries and controlled entities against personal liabilities which may arise in the course of the performance of their duties, as well as protecting the NAB Group itself to the extent that it is obligated to indemnify directors and officers for such liability.

#### Report of the Directors

#### Employee involvement

The Company carries out an information programme to keep staff informed of business objectives and results. This is achieved through regular meetings, circulars, bulletins and specially commissioned videos as well as training courses for staff.

Under the UK National Share Incentive Plan employees are entitled to purchase up to £1,500 worth of NAB shares each year through the National Partnership Share Plan. Participants contribute each month and the trustee uses the contributions to purchase shares which are then held in trust for the participants. Participants are entitled to receive dividends and exercise voting rights in respect of these shares and there is no risk of forfeiture. In addition, up to £3,000 of free shares per employee may be gifted per annum through the plan.

#### Charitable and political donations

No charitable or political donations were made throughout the year (2007: £Nil).

#### Elective regime

In accordance with the provisions of the Companies Act 1985, as amended, the Company has elected to dispense with the laying of financial statements before a general meeting, the holding of annual general meetings and the obligation to appoint auditors annually.

#### Directors' statement as to disclosure of information to auditors

The Directors who were members of the board at the time of approving the directors' report are listed on page 2. Having made enquiries of fellow Directors and of the company's auditors, each of these Directors confirms that:

- to the best of each Director's knowledge and belief, there is no information relevant to the preparation of their report of which the company's auditors are unaware; and
- each Director has taken all the steps a Director might reasonably be expected to have taken to be aware of relevant audit information and to establish that the company's auditors are aware of that information.

On behalf of the Directors

With banegre

Keith Carnegie Director

22 July 2009

#### Statement of Directors' Responsibilities

The directors are responsible for preparing the Annual Report and the Financial Statements in accordance with applicable United Kingdom law and those International Financial Reporting Standards ("IFRS") as adopted by the European Union.

Company Law requires the Directors to prepare Financial Statements for each financial year, which give a true and fair view of the state of affairs of the Company, and of the profit or loss for that financial year. In preparing the Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- present information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information;
- provide additional disclosures when compliance with the specific requirements of IFRS is insufficient to enable users to understand the impact of particular transactions, other events and conditions on the entity's financial position and financial performance; and
- state that the company has complied with IFRS, subject to any material departures disclosed and explained in the financial statements.

The Directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Company and which enable them to ensure that the Financial Statements comply with the Companies Act 1985. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company and to prevent and detect fraud and other irregularities.

#### Independent Auditor's Report to the members of Clydesdale Bank Asset Finance Limited

We have audited the Financial Statements of Clydesdale Bank Asset Finance Limited for the year ended 30 September 2008 which comprise the Income Statement, the Balance Sheet, the Cash Flow Statement, and the related notes 1 to 19. These Financial Statements have been prepared on the basis of the accounting policies set out therein.

This report is made solely to the Company's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

#### Respective responsibilities of Directors and Auditors

The Directors' Responsibilities for preparing the Financial Statements in accordance with applicable United Kingdom law and International Financial Reporting Standards (IFRSs) as adopted by the European Union are set out in the Statement of Directors' Responsibilities.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the Financial Statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you whether the information given in the Directors' Report is consistent with the Financial Statements.

In addition we report to you if, in our opinion, the Company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding Directors' remuneration and transactions with the Company is not disclosed.

We read the Directors' Report and consider whether it is consistent with the audited financial statements. We consider the implications for our report if we become aware of any apparent misstatements or material inconsistencies with the financial statements. Our responsibilities do not extend to any other information.

#### Basis of audit opinion

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the Financial Statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the Financial Statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Financial Statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the Financial Statements.

#### Opinion

In our opinion:

- the Financial Statements give a true and fair view, in accordance with IFRSs as adopted by the European Union, of the state of the Company's affairs as at 30 September 2008 and of its profit for the year then ended;
- the Financial Statements have been properly prepared in accordance with the Companies Act 1985; and
- the information given in the Directors' report is consistent with the Financial Statements.

#### Notes to the Financial Statements

#### 1. Authorisation of financial statements and statement of compliance with IFRS

The financial statements of Clydesdale Bank Asset Finance Limited (the "Company") for the year ended 30 September 2008 were authorised for issue by the Directors on 22 July 2009 and the balance sheet was signed on their behalf by Keith Carnegie.

The Company is incorporated in the UK and registered in Scotland.

The ultimate parent undertaking, and ultimate controlling party is NAB, a company incorporated in the State of Victoria, Australia. This company also heads the largest group in which the results of the company are consolidated. The smallest group in which the results of the company are consolidated is that headed by Clydesdale Bank PLC which is incorporated and registered in Scotland.

Copies of the Clydesdale Bank PLC Group Financial Statements may be obtained from the Corporate Affairs Department, Clydesdale Bank PLC, 30 St. Vincent Place, Glasgow, G1 2HL.

The Financial Statements of the Company have been presented in accordance with International Financial Reporting Standards as adopted by the European Union and as applied in accordance with the Companies Act 1985. The principal accounting policies adopted by the Company are set out in Note 2.

#### 2. Accounting policies

#### Basis of preparation

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and the disclosed amount of contingent liabilities. Assumptions made at each balance sheet date are based on best estimates at that date. Although the Company has internal control systems in place to ensure that estimates can be reliably measured, actual amounts may differ from those estimates. It is not anticipated that such differences would be material.

The financial statements have been prepared on a going concern basis, under the historical cost convention, as modified by the application of fair value measurements as required by the relevant accounting standards.

#### Currency of presentation

All amounts are expressed in pounds sterling and all values are rounded to the nearest thousand pounds unless otherwise stated.

#### Investment in controlled entities

Investments in controlled entities are stated at original cost, and are written down to recoverable amount where their carrying value exceeds recoverable amount. Investments in controlled entities are tested on an annual basis for impairment, and additionally whenever an indication of impairment exists. Any decrement in the carrying value is recognised as an expense in the income statement in the reporting period in which the impairment loss occurs.

#### Finance leases

#### Classification

Assets leased to customers are classified as finance leases if the lease agreements transfer substantially all the risks and rewards of ownership to the lessee. When assets are held subject to a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income.

#### Recognition and subsequent measurement

Assets held under finance leases are recognised as finance lease receivables on Balance Sheet. Initial direct costs are included in the initial measurement of the finance lease receivable and reduce the amount of income recognised over the lease term. Initial direct costs include amounts such as commissions, legal fees and internal costs that are incremental and directly attributable to negotiating and arranging a lease.

#### Notes to the Financial Statements (continued)

#### 2. Accounting policies (continued)

#### Finance leases (continued)

The recognition of finance income is based on a pattern reflecting a constant periodic rate of return on the net investment in the lease discounted at the interest rate implicit in the lease. The net investment in the lease is the aggregate of the minimum lease payments receivable under a finance lease, and any unguaranteed residual value accruing.

When a lease is disposed of, the gain or loss on sale is recognised in the Income Statement on the effective date of sale.

#### Impairment of financial assets

The Company assesses at each balance sheet date whether there is objective evidence that a financial asset is impaired. Impairment losses are incurred if there is objective evidence of impairment as a result of one or more loss events that occurred after the initial recognition of the asset and prior to the balance sheet date ('a loss event'), and that loss event or events has had an impact on the estimated future cash flows of the financial asset that can be reliably estimated.

#### Revenue recognition

#### (i) Finance leases

Finance lease income is recognised over the term of the lease using the net investment method (before tax) reflecting a constant periodic rate of return.

#### (ii) Fees

Loan origination fees that are integral to the yield of a lease agreement are separately identified for deferral and recognised as revenue using the effective interest rate method. Loan origination costs that are associated with the commencement of a lease agreement are separately identified for deferral and recognised using the effective interest rate method. The net origination fees are recognised as lease income.

Other fees are recognised as revenue in the period the service is provided.

#### Income tax

Income tax expense or revenue is the tax payable (or receivable) on the current period's taxable income based on the applicable tax rate adjusted by changes in deferred tax assets and liabilities.

Deferred tax assets and liabilities are recognised for temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Financial Statements. Deferred tax is determined using tax rates and laws that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled. A deferred tax asset or liability is not recognised if it arises from initial recognition of an asset or liability that at the time of the transaction affects neither accounting profit nor taxable profit or loss.

Deferred tax assets are only recognised for temporary differences, unused tax losses and unused tax credits if it is probable that future taxable amounts will arise to utilise those temporary differences and losses.

Income tax on the profit or loss for the year comprises current and deferred tax. Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustments to tax payable in respect of previous years.

Notes to the Financial Statements (continued)

#### 2. Accounting policies (continued)

#### Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise balances with less than three months' maturity from the date of inception.

Cash and cash equivalents are brought to account at the face value or the gross value of the outstanding balance where appropriate.

#### Accounting developments

During the year the IASB and International Financial Reporting Interpretations Committee issued the following standards with an effective date after the date of these financial statements.

International Financial Reporting Standards		Effective Date: Annual periods beginning on or after
IAS 1	Revised - Presentation of Financial Statements	1 January 2008
IAS 23	Revised - Borrowing costs	1 January 2009
IFRS 7	Amendment - Reclassification of Financial Instruments (i)	1 July 2008

(i) This amendment was issued on 13 October 2008 with a transition period whereby reclassifications can be made on or after 1 July 2008. The Group has not applied this retrospectively. Subsequent reclassifications made during the periods beginning on or after 1 November 2008 shall be reclassified from that date.

The directors do not anticipate that the adoption of these standards will have a material impact on the Company's financial statements in the period of initial application.

# CLYDEŞDALE BANK ASSET FINANCE LIMITED Risk Overview

#### 17. Risk overview

#### Management of risk

Effective management of risk is a key capability for a successful financial services provider, and is fundamental to the Company's strategy as well as that of its immediate parent, Clydesdale Bank PLC ("CB"), and of its ultimate parent entity National Australia Bank Limited ("NAB").

The Company manages risk within an established 'three lines of defence' framework. Control is exercised through clearly defined delegation of authority, with clear and rapid communication and escalation channels throughout the organisation. The first line of defence comprises the business units managing the risks associated with their activities. The second line encompasses dedicated risk functions who are accountable for independent monitoring and oversight. The third line of defence relates to Internal Audit independently reviewing, monitoring, and testing business unit compliance with risk policies and procedures, and regularly assessing the overall effectiveness of the risk management framework.

These company level defences are overlaid by a broader UK group risk management framework and procedure. This framework includes a European Board Risk Committee and a UK Regional Risk Management Committee.

The European Board Risk Committee focuses on key elements of risk, including compliance risk, operational risk, material risk, credit risk and balance sheet management.

The UK Regional Risk Management Committee independently monitors and systematically assesses the risk profile within the region against established risk appetite parameters. They also assist the 'front-line' businesses in the design and implementation of appropriate risk management policies/strategies, and work with the businesses to promote awareness of the need to manage risk. Together with the UK Risk Management function, efforts continue to evolve the organisational culture and staff behaviours.

#### Operational risk and compliance

Operational risk is the risk of loss resulting from inadequate or failed processes, people or systems, or from external events. This includes risk relating to the management of ongoing activities, as well as to organisational changes such as project and change initiatives.

Compliance is the requirement to comply with external regulatory and legal obligations in addition to operating within the Company and regional policies and standards. This includes risk relating to reputational impact, incurring restrictive conditions and undertakings by regulators on how the Company does business.

Operational risk and compliance is monitored and managed through the UK Regional Risk Management Committee and, ultimately, the European Board Risk Committee. These committees receive reports on group wide operational risk issues, including any pertinent issues of the Company, and manage these risk issues within prudential parameters. These boards operate within a framework called the 'Operational Risk and Compliance Framework' ("ORCF").

The ORCF is based on a set of core principles and defines the Company's standards for operational risk management and compliance. Its design recognises the importance of embedding operational risk and compliance into 'business-as-usual' activities. It has particular focus on defining and implementing the right behaviours and incorporating risk considerations into the Company's systems and processes.

The ORCF is an essential element of the business strategy, which underpins all operational risk management activities. It includes:

- an established governance structure that is used to ensure consistent application, management and reporting of the operational risk management process. This element also includes the establishment and communication of the Company's operational risk appetite;
- a structured risk management process to facilitate the identification, quantification and management of risks.

The Company is committed to sound operational risk management and compliance within this framework.

Risk Overview (continued)

#### 17. Management of risk (continued)

#### Fair values

The fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

The carrying amounts of cash and cash equivalents, amounts due from and due to related entities, and other trade receivables and payables are considered to approximate fair value. This is due to their short term nature.

The carrying amounts for lease receivables are based on the cashflows coming from an internal accounting system.

#### Credit risk

Credit risk is the potential that a borrower or a counterparty will fail to meet its obligations in accordance with agreed terms. The NAB Group's credit risk management infrastructure is framed to provide sound management principles and practices for the maintenance of appropriate asset quality across the NAB Group. These principles and practices are followed by the Company. Group Portfolio Management & Policy, a division of NAB Group Risk Management, is responsible for the development and maintenance of credit policies and key credit risk systems that form the basis of the Company's credit risk management.

The Company achieves its credit risk management objectives through both the traditional focuses on approval and monitoring of individual transactions and asset quality, analysis of the performance of the various credit risk portfolios and the independent oversight of credit portfolios, all of which are within the established group credit risk policy and management framework. Portfolio monitoring techniques cover such areas as industry or geographic concentrations and delinquency trends.

The maximum exposure to credit risk for the components of the balance sheet are set out below:

Assets	2008	2007	
•	£'000	£'000	
Investments in controlled entities	600	600	
Finance lease receivables	740,038	598,323	
Due from related entities	272,325	284,482	
Trade and other receivables	200	2,686	
Total credit risk exposure	1,013,163	886,091	

The Company does not have any collateral or other credit enhancements supporting these assets. There are no undrawn commitments that the Company is exposed to. The credit quality of assets is disclosed within the consolidated financial statements of its immediate parent, Clydesdale Bank PLC.

#### Balance sheet market risk

Balance sheet market risk for the Company includes liquidity risk and structural interest rate risk.

The primary objective for the management and oversight of balance sheet market risk is to maintain the risk profile within approved risk appetite and limits, while implementing strategies that optimise stable current and future earnings from the impact of market volatility.

Policies, inclusive of risk appetite and limits, are approved by the NAB Board, with Group authority delegated to the NAB Group Asset and Liability Management Committee (Group ALCO) and CB Asset and Liability Management Committees (CB ALCOs) for their subsequent implementation and monitoring. UK Treasury manage balance sheet risk and Non-Traded Market Risk provide a risk oversight. While their responsibilities extend to the entire UK Group, the Company's activities fall within their remit.

#### Structural interest rate risk

Structural interest rate risk comprises the sensitivity of the Company's current and future net interest income to movements in market interest rates. The Company's major contributor to interest rate risk is the inability of the pricing basis of finance lease asset products to be replicated in the financial markets.

Interest rate risk is principally managed through the provision by CB of fixed rate lending to the Company. This fixed rate lending is ultimately offset against fixed rate liability products.

Risk Overview (continued)

#### 17. Management of risk (continued)

#### Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company has no material transactional exposures that give rise to net currency gains and losses.

#### Liquidity risk

Liquidity risk is the risk that the Company is unable to meet its current and future financial obligations as they fall due at acceptable cost.

CB provides the Company with its funding requirements via a fixed rate loan facility. This funding requirement is monitored by both UK Treasury and Company management and, when required, additional funding is provided to meet the Company's lending volumes and financial obligations.

The Directors do not believe there is a significant exposure to liquidity risk due to the related party nature of funding and liability exposures with fellow NAGE group companies.

#### 18. Events since the balance sheet date

No information has been identified since the balance sheet date about conditions existing at the balance sheet date which is required to be disclosed in these Financial Statements.

#### 19. Capital management overview

The Company is governed by NAB Group's capital management policy. The objectives of the NAB Group's capital management policy are to efficiently manage the capital base to optimise shareholder returns whilst maintaining capital adequacy and satisfying key stakeholders such as regulators and ratings agencies.

The Company is not subject to externally imposed capital requirements, however its capital is managed as part of the National Australia Group Europe Limited (NAGE) Group.

The NAGE Group's prime objectives in relation to the management of capital are to comply with the requirements set out by the Financial Services Authority (FSA), the NAGE Group's primary prudential supervisor, to provide a sufficient capital base to cover business risks, maintain a targeted credit rating and to support future business development.

The NAGE Group implemented Basel II requirements from 1 January 2008 in measuring operational and credit risks under the standardised approach and is progressively moving towards advanced approaches. Under Pillar I of Basel II, the NAGE Group calculates its minimum capital requirements based on 8% of RWAs. The FSA then applies a multiplier to this amount to cover risks under Pillar II of Basel II and generate a Final Individual Capital Guidance (ICG).

The ultimate responsibility for capital adequacy rests with the Board of Directors. The NAGE Group's Asset and Liabilities Committee (ALCO), which consists of an Executive Director, Chief Financial Officer and other senior executives, is responsible for the management of the capital process including approving policy, overseeing internal controls and setting internal limits over capital ratios.

The NAGE Group actively manages its capital position and reports this on a regular basis to senior management via ALCO and other governance committees. Capital requirements are included within an annual capital management plan with initiatives being executed against this plan.
