## ACCOUNTING POLICIES

---

### BASIS OF ACCOUNTING

The financial statements have been prepared under the historical cost convention modified to include the revaluation of certain fixed assets and in accordance with the Financial Reporting Standard for Smaller Entities (effective January 2007).

### TURNOVER

The turnover shown in the profit and loss account represents amounts invoiced during the period.

### FIXED ASSETS

All fixed assets are initially recorded at cost.

### DEPRECIATION

Depreciation is calculated so as to write off the cost of an asset, less its estimated residual value, over the useful economic life of that asset as follows:

Short Leasehold Property/Revaluations	- Over the term of the lease & 25% reducing balance
Fixtures and Fittings	- 15% reducing balance
Equipment	- 10% & 15% reducing balance
Motor Vehicles	- 20% reducing balance

An amount equal to the excess of the annual depreciation charge on revalued assets over the notional historical cost depreciation charge on those assets is transferred annually from the revaluation reserve to the profit and loss reserve.

### STOCKS

Stocks are valued at the lower of cost and net realisable value. Cost is computed on an average cost basis. Net realisable value is based on estimated selling price less the estimated cost of disposal.

### OPERATING LEASE AGREEMENTS

Rentals applicable to operating leases where substantially all of the benefits and risks of ownership remain with the lessor are charged against profits on a straight line basis over the period of the lease.

### PENSION COSTS

The company made contributions into employees private pension schemes during the year. The assets of these schemes are held separately from those of the company. The contributions are charged to the profit and loss.

## ACCOUNTING POLICIES

---

### DEFERRED TAXATION

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.

### FINANCIAL INSTRUMENTS

Financial instruments are classified and accounted for, according to the substance of the contractual arrangement, as either financial assets, financial liabilities or equity instruments. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.
