## Notes on the Accounts for the year ended 31 March 2006

#### 1. Significant accounting policies

Basis of preparation

The Accounts have been prepared in accordance with all applicable United Kingdom accounting standards. The principal accounting policies are summarised below and have been applied consistently

Under Financial Reporting Standard 1 (FRS 1), the Company is exempt from the requirement to prepare a cash flow statement on the grounds that the ultimate parent undertaking includes the Company in its own published consolidated Accounts

As the Company is a wholly owned subsidiary of Scottish and Southern Energy plc (SSE plc), it has taken advantage of the exemption contained in FRS 8 and has therefore not disclosed transactions or balances with entities which form part of the Scottish and Southern Energy Group (the Group)

The company has adopted a number of new accounting policies or has amended previous policies as a result of new accounting standards becoming applicable. In particular, the impact and applicability of the following standards should be noted

- The presentation aspects of FRS 25 Financial Instruments Disclosure and Presentation,
- FRS 21 Events after the Balance Sheet,
- FRS 28 Corresponding amounts

The company has changed its application of FRS 19 Deferred Taxation by ceasing to measure the provision for deferred tax on a discounted basis

#### **Turnover**

Turnover represents the amounts (excluding value added tax) derived from the provision of lease finance to customers

#### Finance Leases

Finance lease income is allocated to accounting periods so as to give a constant rate of return on the net cash investment in the lease. The total net investment in the finance leases included in the balance sheet represents total lease payments receivable net of finance lease income relating to future accounting periods.

#### Taxation

The charge for taxation is based on the profit for the year and takes into account deferred taxation

Current tax, including UK corporation tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted, or substantially enacted, by the balance sheet date

Deferred taxation arises in respect of items where there are timing differences between their treatment for accounting and taxation purposes. This is recognised where an obligation to pay more tax in the future has originated but not reversed at the balance sheet date. A deferred tax asset is recognised only when it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted

## Notes on the Accounts for the year ended 31 March 2006

### 2. Prior year adjustment

The Company has changed the accounting policy on deferred tax to align it with the new group accounting policy. Previously, deferred tax was measured on a discounted basis. The change in accounting policy is to state deferred tax on an un-discounted basis. A prior year adjustment has been made in respect of this change in measurement basis, resulting in a decrease in the tax charge and an increase in the profit for 2005 of £3,593. The deferred tax liability at 31 March 2005 has increased by £70,703 with a consequent reduction in net assets of the same value at that date
