NOTES TO THE ABBREVIATED ACCOUNTS FOR THE YEAR ENDED 31 DECEMBER 2013

1. ACCOUNTING POLICIES

Accounting convention

The financial statements have been prepared under the historical cost convention and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

Turnover

Turnover represents commission earned, stated net of value added tax. Consideration is given to the point at which the company is entitled to receive the income.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life or, if held under finance lease, over the lease term, whichever is the shorter.

Fixtures and fittings	- 15% straight line
Motor Vehicles	- 25% straight line
Computer equipment	- between 20% and 33% straight line

Computer equipment includes monies spent on the development of the company's online trading system, comprising internal salaries at actual labour costs and external consultancy fees. These specific costs are depreciated over a period of 5 years, being the period the directors have assessed as equivalent to the period over which the company accrues economic benefits from the system. Costs incurred for enhancement of the system are capitalised, whereas costs incurred relating to its ongoing maintenance are expensed through the profit & loss account.

Investment properties are shown at their open market value as required by Statement of Standard Accounting Practice ("SSAP")19. The investment properties are revalued annually by the directors with any surplus or deficit on the revaluation being transferred to the revaluation reserve. If a deficit is expected to be permanent and reduces the value of the property below its cost then this permanent impairment is transferred to the profit and loss account.

The companies Act 2006 requires all properties to be depreciated. However, this requirement conflicts with the generally accepted accounting principle set out in SSAP19. The directors consider that, because these properties are not held for consumption but for their investment potential, to depreciate them would not give a true and fair view and that it is necessary to adopt SSAP19 in order to give a true and fair view.

Deferred tax

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Pension costs and other post-retirement benefits

The company operates a defined contribution pension scheme. Contributions payable to the company's pension scheme are charged to the profit and loss account in the period to which they relate.

Hire purchase contracts

The company operates hire purchase contracts. Amounts due under such agreements are included in debtors net of any finance charges. The finance element of the rental payment is credited to the profit and loss account when it is paid.
