NOTES TO THE ABBREVIATED ACCOUNTS

AS AT 31 AUGUST 2007

1) Accounting policies

The following accounting policies have been consistently applied in dealing with the items which are considered material in relation to the company's accounts

Basis of preparation

The accounts have been prepared under the historical cost accounting rules and in accordance with the Financial Reporting Standard for Smaller Entities

Cash flow

The accounts do not include a cash flow statement because the company, as a small reporting entity, is exempt from the requirement to prepare such a statement under Financial Reporting Standard 1 "Cash flow statements"

Turnover

Turnover represents the amount of services provided stated net of value added tax. All the sales are from painting and decorating and are in the United Kingdom

Fixed assets and depreciation

Depreciation is provided by the company to write off the cost or valuation less the estimated residual value of its tangible fixed assets by annual instalments over their useful economic lives at the rate of 25% on the reducing balance. Depreciation is provided at 10% straight line on goodwill.

No depreciation is provided on freehold land

In accordance with SSAP 19 no depreciation is provided in respect of the freehold property. This represents a departure from the Companies Act 1985 requirements concerning the depreciation of fixed assets. The directors consider that the adoption of this policy is necessary to give a true and fair view.

Government Grants

Capital based government grants are included within accruals and deferred income in the balance sheet and credited to trading profit over the expected useful economic lives of the assets to which they relate.

NOTES TO THE ABBREVIATED ACCOUNTS (Cont'd)

AS AT 31 AUGUST 2007

1) Accounting policies (Cont'd)

Leases

Where the company enters into a lease which entails taking substantially all the risks and rewards of ownership of an asset, the lease is treated as a "finance lease". The asset is recorded in the balance sheet as a tangible fixed asset and is depreciated over its estimated useful life or the term of the lease, whichever is shorter. Future instalments under such leases, net of finance charges, are included within creditors. Rentals payable are apportioned between the finance element, which is charged to the profit and loss account, and the capital element which reduces the outstanding obligation for future instalments.

All other leases are accounted for as "operating leases" and the rental charges are charged to the profit and loss account on a straight line basis over the life of the lease.

Rents receivable on the freehold investment property under the terms of the operating lease are included in the profit and loss account on a receivable basis.

Pension costs

The company operates a money purchase pension scheme. The assets of the scheme are invested and managed independently of the finances of the company.

Stock

Stocks are stated at the lower of cost and net realisable value.

Taxation

The charge for taxation is based on the profit for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Provision is made for deferred tax only to the extent that it is probable that an actual liability will crystallise.
