The director is satisfied that the company is entitled to exemption from the provisions of the Companies Act 2006 (the Act) relating to the audit of the financial statements for the period by virtue of section 477, and that no member or members have requested an audit pursuant to section 476 of the Act.

The director acknowledges his responsibility for:

- (i) ensuring that the company keeps adequate accounting records which comply with section 386 of the Act, and
- (ii) preparing financial statements which give a true and fair view of the state of affairs of the company as at the end of the financial period and of its profit or loss for the financial period in accordance with the requirements of section 393, and which otherwise comply with the requirements of the Act relating to financial statements, so far as applicable to the company.

These abbreviated accounts have been prepared in accordance with the special provisions for small companies under Part 15 of the Companies Act 2006.

These abbreviated accounts were approved and signed by the director and authorised for issue on 26/9/2013

J D Colquhoun

The notes on pages 2 to 5 form part of these abbreviated accounts.

## **NOTES TO THE ABBREVIATED ACCOUNTS**

**PERIOD FROM 1 FEBRUARY 2012 TO 31 MARCH 2013**

---

### **1. Accounting policies**

#### **Basis of accounting**

The financial statements have been prepared under the historical cost convention, and in accordance with the Financial Reporting Standard for Smaller Entities (effective April 2008).

#### **Cash flow statement**

The company has adopted the Financial Reporting Standard for Smaller Entities (effective April 2008) and is consequently exempt from the requirement to include a cash flow statement in the financial statements.

#### **Turnover**

The turnover shown in the profit and loss account represents the value of all goods sold during the period, less returns received, at selling price exclusive of Value Added Tax. Sales are recognised at the point at which the company has fulfilled its contractual obligations and the risks and rewards attaching to the product, such as obsolescence, have been transferred to the customer.

#### **Goodwill**

Positive purchased goodwill arising on acquisitions is capitalised, classified as an asset on the Balance Sheet and amortised over its estimated useful life up to a maximum of 20 years. This length of time is presumed to be the maximum useful life of purchased goodwill because it is difficult to make projections beyond this period. Goodwill is reviewed for impairment at the end of the first full financial year following each acquisition and subsequently as and when necessary if circumstances emerge that indicate that the carrying value may not be recoverable.

During the period the company was unable to renew certain contracts. Following an impairment review the carrying value of goodwill was considered to be overstated, and has been reduced to £nil at the year end.

#### **Amortisation**

Amortisation is calculated so as to write off the cost of an asset, net of anticipated disposal proceeds, over the estimated useful economic life of that asset as follows:

Goodwill - 10% straight line

#### **Tangible fixed assets**

Tangible fixed assets are stated at cost less depreciation. Cost represents purchase price together with any incidental costs of acquisition.

#### **Depreciation**

Depreciation is calculated so as to write off the cost of an asset, net of anticipated disposal proceeds, over the useful economic life of that asset as follows:

Plant and Machinery - 20% straight line  
Fixtures and Fittings - 20% straight line

## **NOTES TO THE ABBREVIATED ACCOUNTS**

**PERIOD FROM 1 FEBRUARY 2012 TO 31 MARCH 2013**

---

### **1. Accounting policies *(continued)***

#### **Pension costs**

The company operates a defined contribution pension scheme and the pension charge represents the amounts payable by the company to the fund in respect of the year. The assets of the scheme are held separately from those of the company in an independently administered fund.

#### **Deferred taxation**

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more tax, or a right to pay less tax, or a right to receive repayments of tax.

Deferred tax assets are recognised only to the extent that the directors consider it more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted. Deferred tax assets and liabilities recognised have not been discounted.

Deferred tax is measured on a non-discounted basis at the average tax rates that are expected to apply in the periods in which timing differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

#### **Foreign currencies**

Monetary assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Non-monetary assets and liabilities and transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of the transaction. Exchange differences are taken into account in arriving at the operating profit.

#### **Financial instruments**

Financial instruments are classified and accounted for as financial assets, financial liabilities or equity instruments, according to the substance of the contractual arrangement.

Financial instruments which are assets are stated at cost less any provision for impairment. Financial liabilities are stated at principal capital amounts outstanding at the period end. Issue costs relating to financial liabilities are deducted from the outstanding balance and are amortised over the period to the due date for repayment of the financial liability.

An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities. A financial liability is any contractual arrangement for an entity to deliver cash to the holder of the associated financial instrument.

If a financial instrument contains both an equity and a liability element, then the liability element is first established with any residual value being disclosed within equity shareholders' funds. The liability element is the present value of the future payments guaranteed to be made to the holders of the financial instrument.

## NOTES TO THE ABBREVIATED ACCOUNTS

**PERIOD FROM 1 FEBRUARY 2012 TO 31 MARCH 2013**

### 1. Accounting policies *(continued)*

#### Employee benefit trusts (ebt)

Trusts have been established for the benefit of company employees and certain of their dependents. Monies held in these trusts are held by independent trustees and managed at their discretion.

Where the company retains future economic benefit from, and has de facto control of the assets and liabilities of the trust, they are accounted for as assets and liabilities of the company until the earlier of the date that an allocation of trust funds to employees in respect of past services is declared and the date that assets of the trust vest in identified individuals.

Where monies held in a trust are determined by the company on the basis of employees' past services to the business and the company can obtain no future economic benefit from those monies, such monies, whether in the trust or accrued for by the company are charged to the profit and loss account in the period to which they relate.

### 2. Fixed assets

**NOTES TO THE ABBREVIATED ACCOUNTS**  
**PERIOD FROM 1 FEBRUARY 2012 TO 31 MARCH 2013**

---

**3. Share capital** *(continued)*

On 7 March 2012 the company's ordinary shares were redesignated as shown above. The rights attaching to the various classes of shares are as follows:

Each share in the company shall carry the right to receive notice of and to attend, speak and vote at all general meetings of the company;

Any payment of dividends may be declared in respect of one class of shares and not another, and may be declared at different rates on different classes of shares in issue;

On a return of assets on liquidation, capital reduction or otherwise, the assets of the company remaining after the payment of the company's liabilities shall be distributed among the holders of the equity shares pro-rata to the number of equity shares held, as if they all constituted shares of the same class.
