NOTES TO THE FINANCIAL STATEMENTS (Continued)

2. Principal accounting policies (continued)

(a) Basis of preparation (continued)

The presentational impact of these standards and interpretations is being assessed. The Directors expect that the adoption of these standards and interpretations in future periods will have no material impact on the financial statements of the Company.

The preparation of financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions which affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best assessment of the amounts, actual events or actions and results may ultimately differ from those estimates.

(b) Basis of consolidation

The Company is exempt under the provisions of Section 400 of the Companies Act 2006 from the requirement to produce group financial statements as it is a wholly owned subsidiary of Viridor Limited which is registered in the European Economic Area and which itself produces consolidated financial statements. Accordingly the financial statements are presented for the Company as an individual undertaking. Group financial statements are included in the Annual Report of Pennon Group Plc which is available from Peninsula House, Rydon Lane, Exeter, Devon, EX2 7HR.

(c) Investment in subsidiary undertakings

Investments in subsidiary undertakings are initially recorded at cost, being the fair value of the consideration paid, including associated acquisition costs. Subsequently, investments are reviewed for impairment on an individual basis annually, or if the events or changes in circumstances indicate that the carrying value may not be fully recoverable.

(d) Derivatives and financial instruments

The Company classifies its financial instruments in the following categories:

Other receivables do not carry any interest and are recognised initially at fair value and subsequently at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of the receivables.

Other payables are not interest bearing and are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

The Company does not use derivative financial instruments.

(e) Share capital

Ordinary shares are classified as equity.

Critical accounting judgements and estimates

The Company's principal accounting policies are set out in note 2. Management is required to exercise significant judgement and make use of estimates and assumptions in the application of these policies.

The area which management believes require the most critical accounting judgements is :

Carrying value of investment in subsidiaries The Company's accounting policy for investment in subsidiaries is detailed in note 2. The carrying value of investment at 31 March 2011 was £6,855,000 (2010 £6,855,000).
