TERRACE HILL LETTINGS
NOTES TO THE FINANCIAL STATEMENTS
YEAR ENDED 31 OCTOBER 2007

1. ACCOUNTING POLICIES

Basis of accounting

The financial statements have been prepared under the historical cost convention, modified to include the revaluation of certain fixed assets

Cash flow statement

The directors have taken advantage of the exemption in Financial Reporting Standard No 1 (Revised 1996) from including a cash flow statement in the financial statements on the grounds that the company is small.

Turnover

Rental income is recognised in the period to which it relates

Deferred Taxation

Deferred tax balances are recognised in respect of all timing differences that have originated but not reversed by the balance sheet date except that

deferred tax is not recognised on timing differences arising on re valued properties unless the company has entered into a binding sale agreement and is not proposing to take advantage of rollover relief; and

the recognition of deferred tax assets is limited to the extent that the Company anticipates to make sufficient taxable profits in the future to absorb the reversal of underlying timing differences.

Deferred tax balances are not discounted

Investment properties

Investment properties are accounted for in accordance with SSAP 19, as follows:

(i) investment properties are revalued annually. The surplus or deficit on revaluation is transferred to the revaluation reserve unless a deficit below original cost, or its reversal, on an individual investment property is expected to be permanent, in which case it is recognised in the profit and loss account for the year, and

(ii) no depreciation is provided in respect of leasehold properties where the lease has over 20 years to run.

Although the Companies Act would normally require systematic annual depreciation of fixed assets, the directors believe that the policy of not providing depreciation is necessary in order for the accounts to give a true and fair view, since the current value for investment properties, and changes to that current value, are of prime importance rather than a calculation of systematic annual depreciation. Depreciation is only one of the many factors reflected in the annual valuation, and the amount which might otherwise have been included cannot be separately identified or quantified
