# NOTES TO THE ACCOUNTS at 31 May 2012

### 1. ACCOUNTING POLICIES

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the financial statements.

### Accounting convention

The accounts are prepared under the historical cost convention, and in accordance with applicable accounting standards.

### **Turnover**

Turnover represents the amounts derived from the provision of services which fall within the company's ordinary activities, stated net of value added tax. Fees are credited to income when they are earned and the fee has been agreed. None of the turnover was derived from overseas.

#### Taxation

Corporation tax payable is provided on the taxable profits at the current rate.

### Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more, or right to pay less, tax in future have occurred at the balance sheet date. This is subject to deferred tax assets only being recognised if it is considered more likely than not that there will be suitable profits from which the future reversal of the underlying timing differences can be deducted. Timing differences are differences arising between the company's taxable profits and its results as stated in the financial statements which are capable of reversal in one or more subsequent periods.

### Investments

Investments are held at cost less any provision for diminution in value.

### Dividends on shares presented within equity

Dividends unpaid at the balance sheet date are only recognised as a liability at that date to the extent that they are appropriately authorised and are no longer at the discretion of the company. Unpaid dividends that do not meet these criteria are disclosed in the notes to the financial statements.

## Going Concern

No material uncertainties that may cast significant doubt about the ability of the company to continue as a going concern have been identified by the directors.

The directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing the annual financial statements.
