Notes to the Financial Statements

1. Accounting policies

The principal accounting policies, which have been applied consistently throughout the current and prior period are:

(a) Basis of accounting

The financial statements are prepared under the historical cost convention and in accordance with applicable United Kingdom accounting standards, unless otherwise stated.

No cash flow statement has been presented as provided by FRS 1 (Revised) as the consolidated financial statements of the immediate holding company (Note 18) contain a consolidated cash flow statement which include the cash flows of this Company and are publicly available.

The balance sheet at 30 June 2010 shows that the Company is in a net liability position. The directors have reviewed the trading prospects and projected cash flows of the business and have agreed funding from its immediate parent company (Note 18) based on these projections as part of a refinancing arrangement. Details of the parent company refinancing and new bank facilities are set out in the financial statements of The Premier Property Group Limited. On that basis the directors have a reasonable expectation that there are adequate resources to allow the Company to continue to realise its assets and discharge its liabilities in the normal course of business for the foreseeable future. Accordingly, the directors have determined that it is appropriate to continue to adopt the going concern basis of accounting in the preparation of these financial statements.

(b) Tangible fixed assets

Development properties are those properties in respect of which construction and development have not been completed at the balance sheet date. They are reflected at cost, including an allocation of overheads and interest charges on external borrowings which are related to the properties, where recoverability is reasonably certain. In the opinion of the directors, the residual value of those development properties currently being operated for business purposes is sufficient to eliminate the requirement for depreciation. Provisions are made against the carrying value of development properties when the directors consider book value to exceed recoverable value. The directors consider that these policies are necessary to provide a true and fair view.

Development properties are classified within tangible fixed assets or stocks according to the specific disposal or realisation strategy for each property with all properties held for both development and resale treated as stock.

(c) Stocks and work in progress

Development properties held for development and resale are valued at the lower of the cost and net realisable value. Land held for development, including land in the course of development until legal completion of sale, is valued at cost. Work in progress on development properties is valued at the cost of labour and materials plus interest incurred on borrowings for development expenditure until the date of practical completion.

The estimated net realisable values for stock and work in progress are based on the directors' assessment of residual values for land and properties under development and projected net sales proceeds for completed properties. The key assumptions in assessing these values take into account current market rental levels, investment yields and construction cost data.

(d) Capitalised interest

Interest is capitalised from the point at which development expenditure is incurred until the date of practical completion, except where there is a substantial delay between acquisition and commencement of physical construction, where capitalisation will commence at the latter point.

Notes to the Financial Statements (continued)

1. Accounting policies (continued)

(e) Taxation

Current tax, including UK corporation tax and foreign tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

The taxation liabilities of certain group undertakings are reduced wholly or in part by the surrender of losses by fellow group undertakings. The tax benefits arising from group relief are normally recognised in the financial statements of the surrendering undertakings.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is not recognised when fixed assets are sold and it is more likely than not that the taxable gain will be rolled over, being charged to tax only if and when the replacement assets are sold.

Deferred tax is measured at the average tax rates that are expected to apply in the periods in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantively enacted by the balance sheet date. Deferred tax is measured on a non-discounted basis.

(f) Turnover and revenue recognition

Income from the sale of development properties is recognised when the transaction is complete.

The following is included in other operating expenses:

	17 months to 30 June 2010	15 months to 31 January 2009

3. Exceptional items

The charge of £324,000 (2009 - £2,764,303) relates to a reduction in the net realisable value of development properties.

4. Staff costs

The Company had no employees during the current and prior period and none of the directors received any remuneration from the Company or from other undertakings in respect of services to it.

Current tax		
UK Corporation tax	-	-
Adjustments in respect of prior period		
UK corporation tax	(156,712)	-
Total tax credit on loss on ordinary activities	(156,712)	-

The difference between the total current tax shown above and the amount calculated by applying the standard rate of UK corporation tax to the loss before tax is as follows:

	17 months to 30 June 2010 £	15 months to 31 January 2009 £
Loss on ordinary activities before tax	(589,141)	(2,973,512)

Unrelieved tax losses and other deductions arising in the period	164,854	851,067

The Company suffers its losses in the UK, therefore the tax rate used for tax on loss on ordinary activities is the standard rate for UK corporation tax, currently 28% (2009 – 28.62%).

No deferred tax provision has been made in the period. In the opinion of the directors there is an unprovided deferred tax asset at 30 June 2010 of £851,173 (2009 – £832,583).
