CDC SCOTS GP LIMITED

Notes to the financial statements
Year ended 31 December 2011

1. Incorporation, ownership and principal activity

CDC Scots GP Limited (the "Company") was incorporated under the laws of Scotland on 7th June 2010 (the Company number is 379812). It is a wholly owned subsidiary of CDC Group plc, a public limited company incorporated in England and Wales whose registered office is Level 2, Cardinal Place, 80 Victoria Street, London SW1E 5JL, United Kingdom.

The Company's registered office is located at the 50 Lothian Road, Festival Square, Edinburgh EH3 9WJ, Scotland.

The principal activity of the Company is that of an investment company.

2. Significant accounting policies

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS"), which comprise standards and interpretations approved by the International Accounting Standards Board, and International Accounting Standards ("IAS") and Standing Interpretations Committee interpretations that remain in effect.

The financial statements are prepared on a historical cost basis except as disclosed in the accounting policies below.

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

a) Basis of preparation

The financial statements have been prepared on a going concern basis.

b) Currency

The financial statements are expressed in US dollars.

Monetary assets and liabilities denominated in non-US dollar currency are translated into US dollars at exchange rates prevailing at the year end. Non-monetary assets and liabilities and transactions occurring in non-US dollar currency are translated at the rates of exchange prevailing on the date of each transaction. Exchange gains and losses are dealt with in the non-consolidated statement of comprehensive income.

CDC SCOTS GP LIMITED

Notes to the financial statements
Year ended 31 December 2011

2. Significant accounting policies (continued)

c) Equity investments

Investments are valued in accordance with IAS 39 (Financial Instruments: Recognition and Measurement). Investments consist of unquoted equity. All equity investments are classified as held-for-trading and held at fair value with any resultant gain or loss in value recognised in the non-consolidated statement of comprehensive income.

Investments are valued in accordance with CDC Group plc's equity valuation guidelines, which are developed in accordance with the International Private Equity and Venture Capital Association Valuation Guidelines.

Investments are valued at fair value, which is the amount for which an asset could be exchanged between knowledgeable, willing parties in an arm's length transaction, as follows:

- investments where fair value derives mainly from the underlying assets, such as funds managed by fund managers, are valued at net asset value using appropriate valuation measures for the underlying assets and liabilities;
- realisations in process are valued at the expected realisation proceeds, although discounts are applied to reflect the level of certainty of the transaction completion;
- if there has been a recent investment in the company, the price of the recent investment, less any impairment charge, is used to determine fair value;
- early stage companies without positive cash flow or profit are valued using an appropriate industry benchmark if that gives a reliable estimate of fair value;
- companies with maintainable profits or cash flows are valued on an earnings basis using an appropriate earnings multiple from companies in similar sectors and markets;
- companies in industries with specific valuation metrics are valued using those specific valuation metrics where they provide the most reliable estimate of fair value;
- companies with no maintainable profits or cash flows at present, but whose cash flows can be forecast with confidence, are valued using future cash flows discounted at the appropriate risk-adjusted discount rate; and
- in exceptional cases, where fair value cannot be reliably measured, the investment is valued at the previous carrying value unless there is evidence of value impairment, in which case value is reduced to reflect the extent of estimated impairment.

d) Revenue recognition

Interest is recognised as earned on an accruals basis, but is excluded if it becomes more than ninety days overdue. Investment income is accounted for on an accruals basis unless collectability is in doubt.

e) Cash and cash equivalents

Cash comprises cash at bank. Cash equivalents are short term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of change in value.

f) Related parties

Parties are considered to be related to the Company if they have the ability, directly or indirectly, to control the Company or exercise significant influence over the Company in making financial and operating decisions, or vice versa, or where the Company is subject to common control or common significant influence.

g) New standards and interpretations

The following standards and interpretations were effective for accounting periods commencing on or after 1 January 2011: IAS 24 – Related Party disclosures (revised 2009); and Amendments to IFRIC 14 – Prepayments of a Minimum Funding Requirement.

The Directors judge that the adoption of these standards has not had a material impact on the Company's financial statements in the period of initial application.

CDC SCOTS GP LIMITED

Notes to the financial statements
Year ended 31 December 2011

2. Significant accounting policies (continued)

h) Taxation

The tax expense represents the sum of the tax currently payable and deferred tax. The tax currently payable is based on taxable profit for the period.

Current and deferred taxes are recognised as a tax credit or expense in the year in which they arise except for deferred taxes recognised or disposed of upon the acquisition or disposal of a subsidiary.

Deferred tax is provided in full using the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which temporary differences reverse, based on tax rates and laws enacted or substantially enacted at the statement of financial position date.

Deferred tax assets are recognised only to the extent that the Directors consider that it is probable that there will be suitable taxable profits from which the future reversal of the underlying temporary differences can be deducted.

3. Related party transactions

The following are related party transactions and balances to the year/period ending 31 December. All transactions are carried out on an arm's length basis.

Name of company / partnership	Nature of relationship	Nature of transactions / balances	2011 US\$	2010 US\$
