The accompanying notes are an integral part of this Balance Sheet.

1. ACCOUNTING POLICIES

1.1 Accounting Conventions

The financial statements are prepared under the historical cost convention

1.2 Turnover

Turnover represents revenue recognised in the accounts. Revenue is recognised when the company fulfills it's contractual obligations to customers by supplying goods and services and excludes value added tax. (Where services are performed gradually over time revenue is recognised as activity progresses by reference to the value of work performed).

1.3 Goodwill

Acquired goodwill is written off in equal annual instalments over its estimated useful economic life of 5 years.

1.4 Depreciation of Tangible Assets

Depreciation is provided on tangible assets at the following rates in order to write off the cost less residual value over the assets' expected useful life :

Plant and Equipment - 20% per annum

1.5 Stock

Stock is valued at the lower of cost and net realisable value, after making allowance for obsolete and slow moving items.

1.6 Deferred Taxation

Deferred tax arises as a result of including items of income and expenditure in taxation computations in periods different from those in which they are included in the company's accounts. Deferred tax is provided in full on timing differences which result in an obligation to pay more (or a right to pay less) tax at a future date, at the tax rates that are expected to apply when the timing differences reverse based on current tax rates and laws.

Deferred tax is not provided on timing differences arising from the revaluation of fixed assets where there is no commitment to sell the asset.

Deferred tax assets are recognised to the extent that it is regarded as more likely than not that they will be recovered. Deferred tax assets and liabilities are not discounted.
