We continue to identify potential challenges ahead and recognise that significant risks remain in relation to COVID-19 variants and the economic consequences from the response to it, such as inflationary challenges in the short term and potential future changes to the tax landscape. Overall, we remain confident in the Group's ability to withstand further challenges that may or may not emerge from the current risk environment. Further information is set out in the St. James's Place plc Annual Report and Accounts 2021.

**2.5 Financial instruments (continued)**

**Financial assets**

The Company classifies all of its financial assets as assets held at amortised cost.

**At amortised cost**

Financial assets held at amortised cost are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise principally through the provision of goods and services to customers (e.g. other receivables), but also incorporate other types of contractual monetary asset. They are initially recognised at fair value plus transaction costs that are directly attributable to their acquisition or issue, and are subsequently carried at amortised cost using the effective interest rate method, less provision for impairment.

Impairment provisions are recognised when there is objective evidence (such as significant financial difficulties on the part of the counterparty or default or significant delay in payment) that the Company will be unable to collect all of the amounts due under the terms receivable, the amount of such a provision being the difference between the net carrying amount and the present value of the future expected cash flows associated with the impaired receivable. For other receivables, which are reported net, such provisions are recorded in a separate allowance account with the loss being recognised within administrative expenses in the Statement of Comprehensive Income. On confirmation that the other receivable will not be collected, the gross carrying value of the asset is written off against the associated provision.

**Financial liabilities**

The Company classifies all of its financial liabilities as liabilities at amortised cost.

**At amortised cost**

Financial liabilities at amortised cost are initially recognised at fair value net of any transaction costs directly attributable to the issue of the instrument. Such interest bearing liabilities are subsequently measured at amortised cost using the effective interest rate method, which ensures that any interest expense over the period to repayment is at a constant rate on the balance of the liability carried into the Statement of Financial Position.
