### **Notes to the Financial Statements for the Year Ended 31 March 2023 (continued)**

#### **2 Significant accounting policies (continued)**

##### **2.3 Financial assets**

###### Receivables

The Company classifies its financial assets in the category of receivables. Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets. The Company's receivables comprise amounts owed by group undertakings in the statement of financial position.

###### Recognition and measurement

Receivables are classified and recorded at amortised cost and reduced by allowances for expected credit losses. Estimated future credit losses are first recorded on initial recognition of a receivable and are based on estimated probability of default. Individual balances are written off when management deems them to be uncollectible.

###### Impairment of financial assets

Assets are carried at amortised cost. The Company assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

##### **2.4 Share capital**

Ordinary shares are classified as equity. Equity instruments are measured at the fair value of the cash or other resources received or receivable, net of the direct costs of issuing the equity instruments.

#### **3 Critical accounting estimates and judgements**

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

No estimates or assumptions have been identified as having significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.
