Report of the Board of Directors

1 The Board of Directors presents its report together with the audited financial statements of the Company for the year ended 31 December 2011

Principal activities

The principal activity of the Company, which is unchanged from last year, is to buy, sell and otherwise deal in petroleum products in Cyprus through a local branch. It is the intention of the board of directors that this business will continue for the foreseeable future.

Review of developments, position and performance of the Company's business

The profit of the Company for the year ended 31 December 2011 was €11 381 340 (2010 profit of €9 909 299) On 31 December 2011 the total assets of the Company were €103 799.955 (2010 €102 805 257) and the net assets were €58 700 368 (2010 net assets €47 319 028) The financial position, development and performance of the Company as presented in these financial statements are considered satisfactory

Principal risks and uncertainties

The management of the business and the execution of the Company's strategy are subject to a number of risks. The key business risks and uncertainties affecting the Company are considered to relate to the price fluctuations of oil in the international markets. Principal risks and uncertainties faced by the Company are also disclosed in Notes 3 and 26 of the financial statements.

Business risks

Given the straightforward nature of the business, the Company's directors are of the opinion that analysis using key performance indicators (KPI's) is not necessary for an understanding of the development, performance or position of the business. The Company measures its performance against a five year business plan which includes revenue and profits.

Report of the Board of Directors (continued)

Financial risk management

- The Company's activities expose it to a variety of financial risks market risk (including foreign exchange risk, commodity price risk and fair value interest rate risk), credit risk and liquidity risk
- (i) Market risk foreign exchange risk

 The Company imports petroleum products from overseas and is exposed to foreign
 exchange risk arising from various currency exposures, primarily with respect to the US
 dollar. Foreign exchange risk arises when future commercial transactions or recognised
 assets or liabilities are denominated in a currency that is not the Company's functional
 currency. Management monitors the exchange rate fluctuations on a continuous basis and
 acts accordingly.
- (ii) Market risk commodity price risk
 The Company is exposed to commodity price risk through its purchases and distribution of
 petroleum products within Cyprus Management monitors the price fluctuations on a
 continuous basis and acts accordingly
- (III) Market risk fair value interest rate risk
 As the Company has no significant interest-bearing assets, the Company's income and operating cash flows are substantially independent of changes in market interest rates. The Company's interest rate risk arises principally from short-term borrowings. Borrowings issued at variable rates expose the Company to cash flow interest rate risk. Borrowings issued at fixed rates expose the Company to fair value interest rate risk. The Company's management monitors the interest rate fluctuations on a continuous basis and acts accordingly.
- (iv) Credit risk

 Credit risk arises from cash and cash equivalents, deposits with banks and financial institutions, as well as credit exposures to wholesale and retail customers, including outstanding receivables and committed transactions. The Company has implemented policies that require appropriate credit checks on potential customers before sales are made. Where debt finance is utilised, this is subject to pre-approval by the board of directors and such approval is limited to reputable financial institutions. The amount of exposure to any individual counterparty is subject to a limit, which is reassessed annually
- (v) Liquidity risk

 Prudent liquidity risk management implies maintaining sufficient cash and cash
 equivalents, the availability of funding through an adequate amount of committed credit
 facilities. The management maintains flexibility in funding by maintaining availability under
 committed credit lines.

Report of the Board of Directors (continued)

Financial risk management (continued)

(vi) Capital risk management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital

In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt

Consistent with others in the industry, the Company monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the balance sheet plus net debt.

During 2011, the Company's strategy, which was unchanged from 2010, was to maintain the gearing ratio within 20% to 40%

Supplier payment policy

The Company's policy is to agree the terms of payment at the start of business with each supplier, to ensure suppliers are aware of those terms and to abide by them The wholly owned subsidiaries of the group comply with the Confederation of British Industry (CBI) Prompt Payers Code, copies of which can be obtained from the CBI, Centrepoint, 103 New Oxford Street, London, WC1A 1DU The Company's creditor days (year end trade creditors divided by purchases) for its continuing business for the year were 23 days (2010 37 days) This calculation excludes the businesses acquired during the year

Report of the Board of Directors (continued)

Future developments of the Company

8 The Board of Directors does not expect any material changes or developments in the operations, financial position and performance of the Company in the foreseeablefuture

Results

9 The Company's results for the year are set out on page 9

Board of Directors

The Directors who held office during the year and at the date of this report are shown on page 1

Statement of Directors' Responsibilities

- 11 The directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations
- Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union. Under company law the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to
- select suitable accounting policies and then apply them consistently,
- make judgements and accounting estimates that are reasonable and prudent,
- state whether applicable International Financial Reporting Standards (IFRSs) as adopted by the European Union have been followed, subject to any material departures disclosed and explained in the financial statements.
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business
- The directors are responsible for keeping adequate accounting records that are sufficient to show and explain the company's transactions and disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.
- 14 The directors are responsible for the maintenance and integrity of the company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions

Report of the Board of Directors (continued)

Branches

15 The Company currently operates through a branch in Cyprus

Events after the balance sheet date

There were no material post balance sheet events, which have a bearing on the understanding of the financial statements

Independent Auditors and Disclosure of Information to Auditors

- So far as the Directors are aware, there is no relevant audit information of which the Company's auditors are not aware. The Directors have taken all the relevant steps that they ought to have taken in their duty as a Director to make themselves aware of any relevant audit information and to establish that the Company's auditors are aware of that information.
- This confirmation is given and should be interpreted in accordance with the provisions of Section 418 of the Companies Act 2006
- 19 The Company has elected to dispense with the obligation to appoint auditors annually and, accordingly, PricewaterhouseCoopers LLP shall be deemed to be reappointed as auditors for a further term

By Order of the Board

Akis Pegasiou Chairman

4 May 2012

Independent auditor's report

To the Members of Hellenic Petroleum Cyprus Limited

We have audited the financial statements of Hellenic Petroleum Cyprus Limited for the year ended 31 December 2011 which comprise the Statement of Comprehensive Income, the Balance Sheet, the Statement of Changes in Equity, the Statement of Cash Flows, a summary of significant accounting policies and other explanatory information. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union.

Respective responsibilities of directors and auditors

As explained more fully in the Directors' Responsibilities Statement set out on page 5, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the Annual Report to identify material inconsistencies with the audited financial statements. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Opinion on financial statements

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 December 2011 and of its profit and cash flows for the year then ended;
- have been properly prepared in accordance with IFRSs as adopted by the European Union;
- have been prepared in accordance with the requirements of the Companies Act 2006.

Opinion on other matter prescribed by the Companies Act 2006

In our opinion the information given in the Directors' Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- · certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

Stephney Dallmann

Notes to the financial statements

1 General information

Country of incorporation

The Company is incorporated and domiciled in the United Kingdom as a private limited liability company operating in Cyprus as a branch—Its registered office is at 125 Old Broad Street, London EC2N 1AR, United Kingdom

2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented in these financial statements unless otherwise stated.

Basis of preparation

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS as adopted by the EU), IFRIC interpretations and the Companies Act 2006 applicable to companies reporting under IFRS. The Company continues to adopt the going concern basis in preparing its financial statements.

The financial statements have been prepared under the historical cost convention

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates and requires management to exercise its judgment in the process of applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 4.

The directors consider that the accounting policies as set out below are suitable, have been consistently applied and are supported by appropriate judgements and estimates

Group financial statements

The company is itself a subsidiary company and is exempt from the requirement to produce group accounts by virtue of Section 400 of the Companies Act 2006 These financial statements therefore present financial information about the company as an individual undertaking and not about the group

The results of the subsidiary undertaking are dealt within the consolidated financial statements of the ultimate parent undertaking, Hellenic Petroleum S A, a company registered in Greece Copies of the consolidated financial statements can be obtained from the Company Secretary at 8A Chimaras street,15125, Marousi, Athens, Greece

2 Summary of significant accounting policies (continued)

Adoption of new and revised IFRSs

During the current year the Company adopted all the new and revised International Financial Reporting Standards (IFRS) that are relevant to its operations and are effective for accounting periods beginning on 1 January 2011. This adoption did not have a material effect on the accounting policies of the Company.

At the date of approval of these financial statements the following financial reporting standards were issued by the International Accounting Standards Board but were not yet effective and the Company has not early adopted

(i) Adopted by the European Union

Amendments

 Amendments to IFRS 7 "Financial Instruments Disclosures" on derecognition of financial instruments (effective for annual periods beginning on or after 1 July 2011)

(ii) Not adopted by the European Union

New standards

- IFRS 9 "Financial Instruments" (and subsequent amendments to IFRS 9 and IFRS 7) (effective for annual periods beginning on or after 1 January 2015)
- IFRS 10 "Consolidated Financial Statements" (effective for annual periods beginning on or after 1 January 2013)
- IFRS 11, "Joint Arrangements" (effective for annual periods beginning on or after 1 January 2013)
- IFRS 12, "Disclosure of Interests in Other entities" (effective for annual periods beginning on or after 1 January 2013)
- IFRS 13, "Fair Value Measurement" (effective for annual periods beginning on or after 1 January 2013)
- IAS 27, "Consolidated and Separate Financial Statements" (effective for annual periods beginning on or after 1 January 2013)
- IAS 28, "Investments in Associates and Joint Ventures" (effective for annual periods beginning on or after 1 January 2013)

Amendments

- Amendment to IAS 12 "Income Taxes" on deferred tax relating to recovery of underlying assets (effective for annual periods beginning on or after 1 January 2012)
- Amendment to IFRS 1 "First-time adoption of International Financial Reporting Standards" on severe hyperinflation and removal of fixed dates for First Time Adopters (effective for annual periods beginning on or after 1 July 2011)

2 Summary of significant accounting policies (continued)

Adoption of new and revised IFRSs (continued)

- Amendment to IAS 1 "Financial Statements Presentation" on Presentation of Items of Other Comprehensive Income" (effective for annual periods beginning on or after 1 July 2012)
- Amendments to IAS 19 "Employee Benefits" (effective for annual periods beginning on or after 1 January 2013)
- Amendments to IFRS 7 "Financial Instruments Disclosures" on Offsetting Financial Assets and Financial Liabilities (effective for annual periods beginning on or after 1 January 2013)
- Amendments to IAS 32 "Financial Instruments Presentation" on Offsetting Financial Assets and Financial Liabilities (effective for annual periods beginning on or after 1 January 2014)

New IFRICs

• IFRIC 20 "Stripping Costs in the Production Phase of a Surface Mine" (effective for annual periods beginning on or after 1 January 2013)

The Board of Directors expects that the adoption of these financial reporting standards in future periods will not have a material effect on the financial statements of the Company

Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of business. Revenue is shown net of value added tax, rebates and discounts. Revenues earned by the Company are recognised on the following bases.

(i) Sales of goods and related commissions

Sales of goods are recognised when significant risks and rewards of ownership of the goods have been transferred to the customer, which is usually when the Company has sold or delivered goods to the customer, the customer has accepted the goods and collectibility of the related receivable is reasonably assured

(ii) Interest income

Interest income is recognised using the effective interest method. When a receivable is impaired, the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flows discounted at the original effective interest rate of the instrument and continues unwinding the discount as interest income. Interest income on impaired receivables are recognised using the original effective interest rate.

(III) Management fee income

Management fee income is recognised on an accruals basis to R A M Oil Limited, a company under common control

2 Summary of significant accounting policies (continued)

Revenue recognition (continued)

(iv) Other income

Other income relates to sale of goods and other services which are recognised when significant risks and rewards of ownership of goods and services have been transferred to the customer, which is usually when the Company has sold or delivered goods to the customer, the customer has accepted the goods and services and collectibility of the related receivable is reasonably assured

Employee benefits

The Company and the employees contribute to the Cyprus Government Social Insurance Fund based on employees' salaries. This Fund is treated as a defined contribution scheme. In addition, the Company operates two defined benefit retirement schemes the assets of which are held in a separate trustee-administered fund. The Company has elected to recognise actuarial gains and losses through the Income Statement using the corridor approach (further refer to Note 24). The defined contribution scheme is funded by contributions from employees and by the Company. The Company's contributions are expensed as incurred and are included in staff costs. The Company has no further payment obligations once the contributions have been paid. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available. A defined benefit plan is a pension plan that is not a defined contribution plan. Typically, a defined benefit plan defines an amount of pension benefit that an employee will receive on retirement, usually dependent on factors, such as age, years of service and compensation.

Foreign currency translation

(i) Functional and presentation currency

Items included in the Company's financial statements are measured using the currency of the primary economic environment in which the entity operates ("the functional currency") The financial statements are presented in Euro (€), which is the Company's functional and presentation currency

(II) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement under finance costs.

2 Summary of significant accounting policies (continued)

Current and deferred income tax

Taxation on profits and losses for the year comprises current and deferred tax. Taxation is recognised in the statement of comprehensive income except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using rates enacted at the balance sheet date and any adjustment to tax payable in respect of previous years

Deferred tax assets and liabilities are calculated in respect of temporary differences using the balance sheet liability method. Deferred income taxes are provided for all temporary differences arising between the tax basis of assets and liabilities and their carrying values for financial reporting purposes. A deferred tax asset is recorded only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised. Deferred tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date.

Property, plant and equipment

Property, plant and equipment are stated at their historical cost less accumulated depreciation. Cost includes the original purchase price of the asset and the costs attributable to bringing the asset to its working condition for its intended use. Certain tangible fixed assets reflect a previous revaluation which was carried out as at 1 January 1987 (other than fixed assets in territories occupied by Turkish forces).

Land is not depreciated. Depreciation on other property, plant and equipment is calculated using the straight-line method to allocate their cost to their residual values, over their estimated useful lives. The annual depreciation rates are as follows

	%
Buildings	3-4
Furniture, fixtures and office equipment	10-20
Motor vehicles	10-20
Plant and Machinery	10
Land	nıl

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount

2 Summary of significant accounting policies (continued)

Property, plant and equipment (continued)

Expenditure for repairs and maintenance of property, plant and equipment is charged to the income statement of the year in which they were incurred. The cost of major renovations and other subsequent expenditure are included in the carrying amount of the asset or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably

Gains and losses on disposal of property, plant and equipment are determined by comparing proceeds with carrying amount and these are included in the income statement

Leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease.

Goodwill

Goodwill arises on the acquisition of subsidiaries, associates and joint ventures and represents the excess of the consideration transferred over the Company's interest in net fair value of the net identifiable assets, liabilities and contingent liabilities of the acquiree and the fair value of the non-controlling interest in the acquiree

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the CGUs, or groups of CGUs, that is expected to benefit from the synergies of the combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes.

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. The carrying value of goodwill is compared to the recoverable amount, which is the higher of value in use and the fair value less costs to sell. Any impairment is recognised immediately as an expense and is not subsequently reversed.

2 Summary of significant accounting policies (continued)

Computer software

Costs that are directly associated with identifiable and unique computer software products controlled by the Company and that will probably generate economic benefits exceeding costs beyond one year are recognised as intangible assets. Subsequently computer software is carried at cost less any accumulated amortisation and any accumulated impairment losses. Expenditure, which enhances or extends the performance of computer software programmes beyond their original specifications is recognised as a capital improvement and added to the original cost of the computer software. Costs associated with maintenance of computer software programmes are charged to the income statement of the year in which they were incurred. Computer software costs are amortised using the straight-line method over their estimated useful lives, not exceeding a period of five years. Amortisation commences when the computer software is available for use and is included within administrative expenses.

The annual amortisation rate is 33,33%

Impairment of non-financial assets

Assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. Assets that are subject to depreciation or amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units).

Investments in subsidiaries

Subsidiaries are all entities (including special purpose entities) over which the Company has the power to govern the financial and operating policies generally accompanying a shareholding of more than one half of the voting rights. The Company carries the investments in subsidiaries at cost less any impairment.

Derivative financial instruments

Derivative financial instruments which include foreign exchange contracts are initially recognised in the balance sheet at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. Fair values are obtained from quoted market prices. Derivatives are included within financial assets at fair value through profit or loss when fair value is positive and within financial liabilities at fair value through profit or loss when fair value is negative.

Changes in the fair value of derivatives are recognised in profit or loss within other gains

2 Summary of significant accounting policies (continued)

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the balance sheet when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted average cost method. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads (based on normal operating capacity). It excludes borrowing costs. Net realisable value is the estimated selling price in the ordinary course of business less applicable variable selling expenses.

Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost, using the effective interest method, less provision for impairment. A provision for impairment of trade receivables is established when there is objective evidence that the Company will not be able to collect all amounts due according to the original terms of receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement within "selling and marketing costs". When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited against "selling and marketing costs" in the income statement.

Share capital

Ordinary shares are classified as equity

Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred Borrowings are subsequently carried at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption value is recognised in statement of comprehensive income over the period of the borrowings, using the effective interest method, unless they are directly attributable to the acquisition, construction or production of a qualifying asset, in which case they are capitalised as part of the cost of that asset

2 Summary of significant accounting policies (continued)

Borrowings (continued)

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment and amortised over the period of the facility to which it relates

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset, being an asset that necessarily takes a substantial period of time to get ready for its intended use or sale, are capitalised as part of the cost of that asset, when it is probable that they will result in future economic benefits to the Company and the costs can be measured reliably

Borrowings are classified as current liabilities, unless the Company has an unconditional right to defer settlement of the liability for at least twelve months after the balance sheet date

Trade payables

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method

Cash and cash equivalents

In the statement of cash flows, cash and cash equivalents include cash in hand, deposits held at call with banks with original maturity of three months or less and bank overdrafts in the balance sheet bank overdrafts are shown within borrowings in current liabilities

Comparatives

Where necessary, comparative figures have been adjusted to conform with changes in presentation in the current year

3 Financial risk management

(i) Financial risk factors

The Company's activities expose it to a variety of financial risks market risk (including foreign exchange risk, commodity price risk and fair value interest rate risk), credit risk and liquidity risk

3 Financial risk management (continued)

(i) Financial risk factors (continued)

Market risk

Commodity price risk

The Company is exposed to commodity price risk through its purchases and distribution of petrol within Cyprus

Management monitors the price fluctuations on a continuous basis and acts accordingly, by seeking to pass any change in market price to its customers to minimize the profit and loss impact

As a result of passing changes in prices to its customers, the impact on profit and loss is immaterial

Foreign exchange risk

The Company imports petroleum products from overseas and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar. Foreign exchange risk arises when future commercial transactions or recognised assets or liabilities are denominated in a currency that is not the Company's functional currency.

Management monitors the exchange rate fluctuations on a continuous basis and acts accordingly

In 2011 the Company in an attempt to hedge foreign exchange risk, it entered into forward contracts with the bank that expire within the next three months after the balance sheet date. The Company's marine sales are mainly in US dollars. The risk management policy of the Company is to hedge between 75% and 100% of the anticipated cashflows (marine receivable balances).

At 31 December 2011, if the currency had weakened/strenghened by 5% against the US dollar with all other variables held constant, post tax profit for the year would have been €94 332 (2010 €55 192) higher/lower, as a result of foreign exchange gains/losses on translation of US denominated trade receivables

Fair value interest rate risk

As the Company has no significant interest-bearing assets, the Company's income and operating cash flows are substantially independent of changes in market interest rates

The Company's interest rate risk arises from short-term borrowings Borrowings issued at variable rates expose the Company to cash flow interest rate risk Borrowings issued at fixed rates expose the Company to fair value interest rate risk

3 Financial risk management (continued)

(i) Financial risk factors (continued)

Market risk (continued)

Fair value interest rate risk (continued)

At 31 December 2011, if interest rates on Euro-denominated borrowings had been 0,5% higher/lower with all other variables held constant, post-tax profit for the year would have been €93 924 (2010 €98 413) lower/higher, mainly as a result of higher/lower interest expense on floating rate borrowings

The Company's management monitors the interest rate fluctuations on a continuous basis and acts accordingly

Credit risk

Credit risk arises from cash and cash equivalents, deposits with banks and financial institutions, as well as credit exposures to wholesale and retail customers, including outstanding receivables and committed transactions

The Company has implemented policies that require appropriate credit checks on potential customers before sales are made. Where debt finance is utilised, this is subject to pre-approval by the board of directors and such approval is limited to reputable financial institutions. The amount of exposure to any individual counterparty is subject to a limit, which is reassessed annually

No credit limits were exceeded during the reporting period, and management does not expect any losses from non-performance by these counterparties

Liquidity risk

The table below analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

	Up to 1 month €	1 to 3 months €
At 31 December 2010

	<u>38 862 239</u>	3 578 763

3 Financial risk management (continued)

(i) Financial risk factors (continued)

Prudent liquidity risk management implies maintaining sufficient cash and cash equivalents and the availability of funding through an adequate amount of committed credit facilities. Management maintains flexibility in funding by maintaining availability under committed credit lines.

(ii) Capital risk management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital

In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt

Consistent with others in the industry, the Company monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the balance sheet plus net debt

The gearing ratios at 31 December 2011 and 2010 were as follows

	2011 €	2010 €
Total borrowings (Note 21) Less cash and cash equivalents (Note 19) Net debt	18 784 850 (15 863 289) 2 921 561	19 682 556 (9 360 919) 10 321 637
Total equity	58 700 368	47 319 028
Total capital as defined by management	61 621 929	57 640 665
Gearing ratio	5%	18%

The decrease in the gearing ratio during 2011 resulted primarily from increased cash and cash equivalents and borrowings repaid during the year

4 Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances

4 Critical accounting estimates and judgements (continued)

(1) Critical accounting estimates and assumptions

The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below

Income taxes

Significant judgment is required in determining the provision for income taxes. There are transactions and calculations for which the ultimate tax determination is uncertain. The Company recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made.

In addition to the changes in rates of Corporation tax disclosed within Note 11, a number of further changes to the UK Corporation tax system were announced in the March 2011 UK Budget Statement. Further reductions to the main rates are proposed to reduce the rate by 1% per annum to 23% by 1 April 2014. These further changes had not been substantively enacted at the balance sheet date and, therefore, are not included in these financial statements. The proposed reductions of the main rate of corporation tax by 1% per year to 23% by 1 April 2014 are expected to be enacted separately each year.

Pension benefits

The present value of the pension obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) for pensions include the discount rate. Any changes in these assumptions will impact the carrying amount of pension obligations. The group determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the group considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based in part on current market conditions. Additional information is disclosed in Note 24

4 Critical accounting estimates and judgements (continued)

Contingency

Significant judgement is required in determining whether any contingencies relating to pending events require further provision or disclosure

Provisions are recognized when the company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation

Contingent liabilities are possible obligations whose existence will only be confirmed by future events not wholly within the control of the company, or present obligations where it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured with sufficient reliability. Contingent liabilities are not recognized in the financial statements but are disclosed unless the possibility of an outflow of economic resources is considered remote.

These are assessed based on consultation with legal counsel. The facts and circumstances relating to a particular case are evaluated in determining whether it is probable that there will be a future outflow of funds. Accordingly, significant management judgement relating to contingent liabilities is required, since the outcome of litigation is difficult to predict

11 Income tax expense (continued)

The tax on the Company's profit before tax differs from the theoretical amount that would arise using the applicable tax rate as follows

	2011 €	2010 €
Profit before tax	12 555,076	14 019 062
Tax calculated at the standard rate of corporation tax in the UK of 26,5% (2010 28%) Tax effect of expenses not deductible for tax purposes Tax effect of rate change Adjustments to tax charge in respect of prior years Elimination of UK deferred tax liability due to Foreign Branch Profit Election (Note 22)	3 327.095 384 638 (44 462) 7 385 (2 500 920)	3 925 337 472 162 (187 594)
Deferred tax rate difference (28% to 27%) Income tax charge	1 173 736	(100 142) 4 109 763

From 1 January 2009 onwards, under certain conditions, interest may be exempt from income tax and only subject to defence contribution at the rate of 10%, increased to 15% as from 31 August 2011

Based on current capital investment plans, the Company expects to continue to be able to claim capital allowances in excess of depreciation in future years at a similar level to the current year

Hellenic Petroleum Defined Contribution Scheme (Hellenic Petroleum Provident Fund)

The Hellenic Petroleum Stakeholder Pension Scheme is a defined contribution scheme open to all employees subject to certain conditions. The Company pays contributions at a rate of 5% of basic salary of participating employees. Contributions to the Scheme for the year ended 31 December 2011 amounted to €134 105 (2010 €141 510) (Note 8)

Hellenic Petroleum Defined Benefit Pension Schemes

The Share Purchase Agreement between BP plc and Hellenic Petroleum International A G. (the "Agreement") provided that the existing retirement benefit schemes for all retired and active employees (including employees that remain under the employment of the Company) were transferred to BP Eastern Mediterranean Ltd (BPEM) which would become the Founding Company of the schemes as from 1 December 2002 This was subject to the consent of the local regulatory authorities. In accordance with the Agreement, the Company is committed to set up its own retirement benefit schemes for its current active employees (other than those employees who will elect to continue to be members of the current BP schemes), equivalent to the existing ones, that will provide benefits for future service that are no less favourable overall than those provided by BP under the existing arrangements. The Company's new schemes will recognise the employee's credited service, participation vesting and as applicable, benefit accrual periods of service, which will accrue in BP's retained arrangement in which the Company will participate as a Member Company until the setting up of its own schemes For the period of participation, the Company pays the normal funding costs (i.e. current service costs), assuming that the schemes are neither in surplus or deficit

Under the Agreement, BP procured that a transfer of assets in respect of benefits accrued as of 31 December 2002, is made from its current schemes to the Company's new schemes with the amount of such transfer to be calculated at the expiration of any period of participation and paid in cash unless otherwise agreed. As part of negotiations with the Employee Trade Unions for the execution of the Agreement, the Company made a provision of €812 520 in 2002 for extra funding to be contributed to the new schemes to allow for notified discretionary practises, mainly for providing increased pension benefits in line with price inflation.

The above arrangements were subject to the consent of the local regulatory authorities. The local regulatory authorities have given their consent for the split of the old existing staff schemes, but did not approve the transfer of the existing pension fund to BPEM. They instead, approved the set-up of a new pension fund scheme by BPEM. Accordingly, the Company retained the existing scheme (which was renamed from BP Cyprus Non Contributory Pension Fund to Hellenic Petroleum Cyprus Non Contributory Pension Fund during 2006 ("Pension Fund)) and BPEM set up a new scheme (the BP Eastern Mediterranean Non Contributory Pension Fund), without this affecting the substance of the way the assets were split and the transfer value was calculated, as stipulated in the agreement outlined above. In accordance with the Agreement the BPEM Fund also covers the former employees of BP Cyprus Ltd as at 1.1 2003. The changes to the Share Purchase Agreement, also provides that BPEM Fund shall indemnify and hold harmless the existing fund, retained by the Company, in respect of any liabilities and/or obligations of the existing fund, provided such liabilities and obligations of the existing fund, arose prior to 31 December 2005.

24 Actuarial valuation of the defined benefit retirement plans

The Company has elected to recognise actuarial gains and losses through the Income statement using the corridor approach. The estimated future benefit payments from the Plan are projected using the adopted assumptions stated below. By discounting these payments back to any given valuation date, the amount required at the given valuation date to meet these future benefit payments was estimated. This amount is called the present value (cost) of employees' benefits.

Under IAS 19, this cost must be recognised in a systematic manner over the employees' working lives. A valuation method must be chosen to attribute the cost between that arising from service up to the valuation date (past service) and that arising from service after the valuation date (future service).

The present value of a defined benefit obligation (DBO) is the present value, without deducting any plan assets, of expected future payments required to settle the obligation resulting from employee service in the current and prior periods. The defined benefit obligation is calculated annually by independent actuaries.

The method chosen in this case is the Projected Unit Credit method because this is the only acceptable method under the revised IAS 19

Actuarial gains and losses arising from experience adjustment and changes in actuarial assumptions in excess of the greater of 10% of the fair value of plan assets or 10% of the present value of the defined benefit obligation are charged or credited to income over the employees expected average remaining working lives

Valuation Assumptions

Discount rate

IAS19 requires that the discount rate should reflect the rate at which the liabilities could effectively be settled. It recommends using the rates of return on high quality fixed income investments of the appropriate maturity. In general, we would consider the long and medium term yields on government bonds and AA-rated corporate bonds, depending on the average duration of the liabilities of each plan or country. The yields used as a reference to set the discount rate should be at a duration consistent with the duration of the liabilities.

The yields on the longer term corporate bond indices as at 31 December 2011 and corresponding yields for 31 December 2010 are as follows

Annual Yields

31 December 2011

31 December 2010

Boxx € AA 10+ years to maturity

4.60%

4.68%

An approach consistent with last year would result in a discount rate of 4,60% pa Therefore, for the accounting valuation as at 31 December 2011 a discount rate assumption of 4,60% pa was adopted

Price Inflation

As a base point for the financial assumptions, we need to establish an assumption for future increases in Cypriot price inflation (CPI) According to the ECB, euro area HICP inflation was 3,0% in November 2011, unchanged from the previous 2 months. Looking ahead, inflation rates are likely to stay above 2% for some months to come, before falling below 2% during the course of 2012. Inflation rates are expected to remain in line with price stability over the policy-relevant horizon.

Pension liabilities are long term in nature and it would be unusual to make ad-hoc adjustments to inflation assumptions based on current economic conditions. Future inflation expectations are priced into the market-related measures that most companies are using and we wouldn't expect a change in the assumptions relative to those measures.

Considering all the above we have retained an assumption of 2,00% pa

24 Actuarial valuation of the defined benefit retirement plans (continued)

Rate of pay increases

Salary growth for the Company's employees comprises three elements general pay increases, COLA (Cost of living allowance) increases and individual promotional/merit increases

Over the long-term, a real increase in general salaries (general increases and COLA) of 2,00% pa has been suggested, similar to last year. Also, similar to last year, an additional allowance of 0,50% pa for promotional increases has been proposed. The proposed total real salary increase is therefore retained at 2,50% pa

Therefore, as at 31 December 2011, we have retained the overall salary increase assumption of 4,50% pa

Rate of pension increases

These are granted at 100% of CPI each year and are therefore expected to move in line with price inflation. Therefore, an assumption of 2,00% pa has been adopted

Increase in Insurable Earnings Limit

The limit is assumed to increase at a rate of 1,00% pa above inflation. Therefore, an assumption of 3,00% pa has been adopted

Supplementary State pension increases

According to the current rules of the social insurance scheme, the earnings related part of the pension increases each year in line with price inflation. Therefore an assumption of 2,00% pa has been adopted.

Expected Return on Assets

The plans are funded, and, therefore, under IAS 19, an expected return on asset assumption is required. An expected rate of return for each asset class has been adopted, to reflect the targeted asset allocation (based on the latest Statement of Investment Principles), and market conditions as at 31 December 2011.

The following assumptions have been adopted

Asset Class	Target Allocation	Expected Return
Bonds	40%	4,60%
Equities	30%	8,00%
Property	20%	6,50%
Cash	10%	3,00%
Total	100%	5,84%

24 Actuarial valuation of the defined benefit retirement plans (continued)

Mortality after retirement

The following standard mortality tables for mortality have been used

Men EVK 2000 males

Women EVK 2000 females

It is believed that these tables are a reasonable representation of expected mortality in the Cypriot oil industry. The expected life expectancy at birth is 78,8 and 82,1 years for males and females respectively.

No allowance has been made for mortality before retirement

Withdrawals

No allowance has been made

Retirements

It is assumed that all members will retire at age 60. No allowance for early retirement has been made

Commutation

Members are assumed to commute the maximum possible, allowing for the provisions of Section 88 (1) of the Cyprus Social Insurance Law 1980 The commutation factor is 15,0

The table below summarises the main financial assumptions as at the current valuation data as well as those as at the last valuation date for comparison

Assumptions	31 December 2011	31 December 2010
Price Inflation	2,00%	2,00%
Pay increases	4,50%	4,50%
Pension increases	2,00%	2,00%

	<u>24 122 842</u>	<u>30 380 593</u>

The fair value of trade and other payables which are due within one year approximates their carrying amount at the balance sheet date

26 Contingencies

An agreement between the Government of the Republic of Cyprus and the Municipality of Larnaca was signed on 2 February 2001, whereby it was agreed that the oil terminals, which are situated within the Municipality of Larnaca, will be removed from their current location and relocated at a specified site at Vassiliko area and the land will be restored at the current site to its original condition, by the end of 2013-2015. The Company received legal advice which indicates that the Agreement is not binding for the Company, since the Company is not a party to the said Agreement. In addition there are a number of steps that must be followed before it becomes effective. If the relocation takes place, then the Company will face exceptional costs in that year and increased storage costs following relocation.

In addition to the above, the Company has contigent liabilities in respect of bank guarantees arising in the ordinary course of business from which it is anticipated that no material liability will arise. These guarantees amounted to €953 930 (2010 €657 979)

27 Commitments

(1) Derivative Financial Instruments

The notional amounts of the outstanding forward foreign exchange contracts at 31 December 2011 were €1 770 924. The fair value movement of the derivatives between the date initiated to the balance sheet date were immaterial to be recognised.

(ii) Operating lease commitments - where the Company is the lessee

The Company leases its offices and various petrol stations under non-cancellable operating lease agreements. The leases have varying terms, escalation clauses and renewal rights

The lease expenditure charged to the income statement during the year is disclosed in Note 7

27 Commitments (continued)

(ii) Operating lease commitments – where the Company is the lessee (continued)

The future aggregate minimum lease payments under non-cancellable operating leases are as follows

The above loan was provided by Hellenic Petroleum Finance PLC. The loan is unsecured, carries interest rate at Euribor plus a margin that is determined by the lender and is renewable on a monthly basis.

29 Events after the balance sheet date

In addition to the changes in rates of Corporation tax disclosed within Note 11, a number of further changes to the UK Corporation tax system were announced in the March 2011 UK Budget Statement. Further reductions to the main rates are proposed to reduce the rate by 1% per annum to 23% by 1 April 2014. These further changes had not been substantively enacted at the balance sheet date and, therefore, are not included in these financial statements. The proposed reductions of the main rate of corporation tax by 1% per year to 23% by 1 April 2014 are expected to be enacted separately each year.

There were no other material events after the balance sheet date, which have a bearing on the understanding of the financial statements
