3 Deferred Taxation

The change for taxation takes into account taxation deferred as a result of timing differences between the treatment of certain items for taxation and accounting purposes. In general, deferred taxation is recognised in respect of all timing differences that have originated but not reserved at the balance sheet date.

However deferred tax assets are recognised only to the extent that the directors consider that it is more likely than not, they will be recovered against the reversal of deferred tax liabilities or other future taxable profits.

Deferred taxation is measured on a non discounted basis at the average tax rates that would apply when the timing differences are expected to reverse based on tax rates and laws that have been enacted by the balance sheet date.

4 Transactions with Directors

During the year the directors received dividends of £57600 by virtue of their shareholding.
