Notes

(forming part of the financial statements)

1 Accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the company's financial statements

Basis of preparation

The financial statements have been prepared in accordance with applicable accounting standards and under the historical cost accounting rules

The appropriateness of the going concern basis is dependent on continued support from the parent company, Stanton Grove Limited, which has stated its intention to support the company for the foreseeable future. The director of the company therefore has a reasonable expectation that the company has adequate resources to continue in existence for the foreseeable future. For this reason, he continues to adopt the going concern basis in preparing the accounts

Under Financial Reporting Standard 1, the company is exempt from the requirement to prepare a cash flow statement on the grounds that it qualifies for the exemptions available to small companies

As 100% of the company's voting rights are controlled within the group headed by Stanton Grove Limited, the company has taken advantage of the exemption contained in Financial Reporting Standard 8 and has therefore not disclosed transactions or balances with entities which form part of the group

Pension costs

The company operates a money purchase pension scheme in respect of its employees. The assets of the scheme are held separately from those of the company in an independently administered fund

Taxation

The charge for taxation is based on the profit for the year and takes into account taxation deferred. Deferred tax arises as a result of including items of income and expenditure in taxation computations in years different from those in which they are included in the company's accounts. Deferred tax is provided in full on timing differences which result in an obligation to pay more (or less) tax at a future date, at the average tax rates that are expected to apply when the timing differences reverse, based on current tax rates and laws

Turnover

Turnover represents the amounts (excluding value added tax) derived from the provision of goods and services to customers during the year

All turnover and profits/(losses) before taxation are derived from the company's principal activities
