All research and development expenditure is written off as incurred

#### Depreciation

Depreciation is provided on all tangible fixed assets at rates calculated to write off the cost or valuation, less estimated residual value of each asset evenly over its expected useful life, as follows

Plant, machinery tools and motor vehicles - 2-10 years Furniture, fixtures and fittings - 3-10 years

Amortisation of the company's short leasehold property is provided straight line over the life of the lease

#### Stocks and work in progress

Stocks and work in progress are stated at the lower of cost and net realisable value. Cost comprises material, direct labour and appropriate variable and fixed production overheads. Net realisable value is based on estimated selling price less any further costs expected to be incurred to completion and disposal

#### Taxation

Corporation tax payable is provided at the current rate on the taxable profit for the year

at 31 December 2009

#### 1. Accounting policies (continued)

#### Deferred taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more, tax, with the following exceptions

Deferred tax assets are recognised only to the extent that the directors consider that it is more
likely than not that there will be suitable taxable profits from which the future reversal of the
underlying timing differences can be deducted

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which timing differences reverse, based on rates and laws enacted or substantively enacted at the balance sheet date

#### Leases

Where the company enters into a lease which entails taking substantially all the risks and rewards of ownership of an asset the lease is treated as a finance lease. The asset is recorded in the balance sheet as a tangible fixed asset and is depreciated over its estimated useful life or the term of the lease, whichever is shorter. Future instalments under such leases, net of finance charges, are included within creditors. Rentals payable are apportioned between the finance element, which is charged to the profit and loss account, and the capital element which reduces the outstanding obligation for future instalments.

All other leases are accounted for as operating leases, and the rental charges are charged to the profit and loss account on a straight line basis over the life of the lease.

#### Pension costs

The company operates two pension schemes

Under the defined benefit scheme, the amounts charged to operating profit are the current service costs and gains or losses on settlements and curtailments. Past service costs are recognised immediately in the profit and loss account if the benefits have vested. If the benefits have not vested immediately, the costs are recognised over the period until vesting occurs. The interest cost and the expected return on assets are shown as a net amount of other finance costs or credits adjacent to interest. Actuarial gains and losses are recognised in the statement of total recognised gains and losses.

Defined benefit schemes are funded, with the assets of the scheme held separately from those of the Group, in separate trustee administered funds. Pension scheme assets are measured at fair value and habilities are measured on an actuarial basis using the projected unit method and discounted at a rate equivalent to the current rate of return on a high quality corporate bond of equivalent currency and term to the scheme habilities. The actuarial valuations are obtained at least triennially and are updated at each balance sheet date. The resulting defined benefit asset or hability is presented separately on the face of the balance sheet.

Under the defined contribution pension and death benefits plan all contributions are charged to the profit and loss account in the period to which they relate. Differences between contributions payable in the year and contributions actually paid are shown as either accruals or prepayments in the balance sheet.
