#### STRATEGIC REPORT

#### FOR THE YEAR ENDED 31 DECEMBER 2020

The Directors present the Strategic report and financial statements for the year ended 31 December 2020.

#### Review of the business

AMT Sybex Limited ("the Company") is a wholly owned subsidiary (indirectly held) of Capita plc. Capita plc along with its subsidiaries are hereafter referred to as "the Group". The Company operates within the Group's Software division.

The principal activity of the Company continues to be that of enterprise software sale (active licences) and delivery of associated services to the United Kingdom ("UK") and Global infrastructure and energy industries. The Company is a key supplier to a large number of blue-chip FTSE100 companies, global utilities and public sector organisations in the UK and Ireland. There have not been any changes in the Company's principal activities in the current year. The Directors are not aware, at the date of this report, of any Likely major changes in the Company's activities in the next year.

As shown in the Company's income statement on page 10, revenue increased from £33,544,666 in 2019 to £35,218,018 in 2020 and operating profit decreased from £6,563,463 to £5,401,309 over the same period. Operating profit was higher in 2019 due to the investment income from group companies of £1.057,040 included in operating profit.

The balance sheet on pages 11-12 of the financial statements shows the Company's financial position at the year end. The Company's net assets increased to £14,062,080 in 2020 as compared to net assets of £9,141,714 in 2019. Net assets have increased due to reduction in bank financial liabilities, a reduction in deferred income due to the unwind of revenue on completed IFRS 15 projects, and lower corporation tax payable. Details of amounts owed by/to its parent company and fellow subsidiary undertakings of Capita plc are shown in note 12 and note 14 to the financial statements.

Key performance indicators used by Capita plc are operating margins, free cash flow, capital expenditure and return on capital employed. Capita plc and its subsidiaries manage their operations on a divisional basis and as a consequence, some of these indicators are monitored only at a divisional level. The performance of the Software division of Capita plc for 2020 is discussed in the Group's annual report which does not form part of this report.

#### Principal risks and uncertainties

The Company is subject to various risks and uncertainties during the ordinary course of its business many of which result from factors outside of its control. The Company's risk management framework provides reasonable (but cannot provide absolute) assurance that significant risks are identified and addressed. An active risk management process identifies, assesses, mitigates and reports on strategic, financial, operational and compliance risk.

The principal themes of risk for the Company are:

- Strategic: changes in economic and market conditions such as contract pricing and competition.
- Financial: significant failures in internal systems of control and lack of corporate stability.
- Operational: including recruitment and retention of staff, maintenance of reputation and strong supplier and customer relationships, operational IT risk, and failures in information security controls.
- Compliance: non-compliance with laws and regulations. The Company must comply with an extensive range of requirements that govern and regulate its business.

To mitigate the effect of these risks and uncertainties, the Company adopts a number of systems and procedures, including:

- Regularly reviewing business conditions to be able to respond quickly to changes in market conditions.
- Applying procedures and controls to manage compliance, financial and operational risks, including adhering to an internal control framework.

Capita plc has also implemented appropriate controls and risk governance techniques across all of our businesses which are discussed in the Group's annual report and does not form part of this report.

# **STRATEGIC REPORT (CONTINUED)**

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### Section 172 statement

Capita ple's section 172 statement applies to both the Division and the Company to the extent it relates to the Company's activities. Common policies and practices are applied across the Group through divisional management teams and a common governance framework. The following disclosure describes how the Directors have regard to the matters set out in section 172(1a) to (f) and forms the Directors' statement as required under section 414CZA of the Companies Act 2006.

Further details of the Group's approach to each stakeholder are provided in Capita plc's section 172 statement on pages 38 and 39 of Capita plc's 2020 Annual Report.

#### Stakeholders

| Our People   |  |
|--|--|
| What matters to them?  | Flexible working, learning and development opportunities leading to career progression, fair pay and benefits as a reward for performance, two-way communication, and feedback.  |
| How we engaged?  | People surveys, regular all-employee communications.   |
| Topics of Engagement   | Protection of employees during Covid-19, human resources policies during Covid-19, future ways of working as a result of Covid-19, and creating an inclusive workplace.  |
| Outcomes and actions   | Issue of Capita specific Covid-19 guidance and regular updates, new and temporary human resource policies (eg. furlough and flexible working).   |
| Key Metrics  | Employee net promoter score, people survey completion level.   |
| Clients and Customers  |  |
| What matters to them?  | High-quality service delivery, sustainability, and rapid response to support pandemic planning.  |
| How we engaged? Client meetings and surveys, regular meetings with key clients and customers.  |  |
| Topics of Engagement Remote working on client services as a result of Covid-19, current service delivery services, and co-creation of client value propositions. |  |
| Outcomes and actions   | Receipt of regular detailed feedback summaries, application of standard Capita ple policies and procedures which includes the establishment of the Group contract review committee to ensure delivery against contractual obligations. |
| Key Metrics  | Customer net promoter score, specific feedback on client engagements.  |
| Supplier and Partners  |  |
| What matters to them?  | Payments made within agreed payment terms, clear and fair procurement process, building lasting commercial relationships, and working inclusively with all types of business.  |
| How we engaged?  | Supplier meetings throughout the source to procure process, regular reviews with suppliers, and supplier questionnaires.   |
| Topics of Engagement   | Supplier payments, sourcing requirements, supplier performance, and the Supplier Charter.  |
| Outcomes and actions   | Alignment of payments with agreed terms, supplier feedback on improvements to the procurement process, improvement plans and innovation opportunities, and improved adherence to the Supplier Charter.                                 |
| Key Metrics  | Percentage of supplier payments within agreed terms, supplier relationship management feedback score, and supplier diversity profile.  |

|-----------------------|---|
| What matters to them? | Social mobility, youth skills and jobs, digital inclusion, diversity and inclusion, climate change, and business ethics.                        |
| How we engaged?       | Membership of non-governmental organisations, and charitable and community partnerships.  |
| Topics of Engagement  | Youth employment, tackling digital exclusion, workplace inequalities, and carbon reduction targets.   |
| Outcomes and actions  | Implementation of real living wage, youth and employability programme, and commitments to tackle racism and enhance ethnic diversity.           |
| Key Metrics           | Percentage reduction in carbon footprint, amount of community investment, and responsible business report 2020: capita.com/responsiblebusiness. |

On behalf of the board

S N Taylor on behalf of Capita Corporate Director Limited

#### Director

26 May 2021

#### **DIRECTORS' REPORT**

#### FOR THE YEAR ENDED 31 DECEMBER 2020

The Directors present their Directors' report and financial statements for the year ended 31 December 2020.

#### Results and dividends

The results for the year are set out on page 10.

No dividend was proposed or paid during the year (2019: £nil).

#### Environment

Capita plc recognises the importance of its environmental responsibilities, monitors its impact on the environment, designs and implements policies to reduce any damage that might be caused by the Group's activities. The Company operates in accordance with Group policies, which are described in the Group's annual report which does not form part of this report. Initiatives designed to minimise the Company's impact on the environment include safe disposal of waste, recycling and reducing energy consumption.

#### Directors

The Directors who held office during the year and up to the date of signature of the financial statements were as follows:

S N Taylor on behalf of Capita Corporate Director Limited

S J Maynard (Resigned 29 June 2020)

C F Baker

J Cowan

A J Timlin (Appointed 29 June 2020)

#### **Political donations**

The Company made no political donations and incurred no political expenditure during the year (2019: £nil).

#### Disabled persons

It is the Company's policy to give full consideration to suitable applications for employment of disabled persons. Disabled employees are eligible to participate in all career development opportunities available to staff. Opportunities also exist for employees of the Company who become disabled to continue in their employment or to be retrained for other positions in the Company or Group.

#### Employee involvement

The Company participates in the Group's policies and practices to keep employees informed on matters relevant to them as employees through regular meetings, newsletters, email notices and intranet communications. These communication initiatives enable employees to share information within and between business units and employees are encouraged, through an open door policy, to discuss with management matters of interest to the employee and subjects affecting day to day operations of the Company. The Group's share incentive plan is designed to promote employee share ownership and to give employees the opportunity to participate in the future success of the Group.

#### Auditor

Pursuant to section 487 of the Companies Act 2006, the auditor will be deemed to be reappointed and KPMG LLP will therefore continue in office.

#### **DIRECTORS' REPORT (CONTINUED)**

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### Statement of Directors' responsibilities in respect of the Strategic report, the Directors' report and the financial statements

The Directors are responsible for preparing the Strategic report, the Directors' report and the financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with UK accounting standards and applicable law (UK Generally Accepted Accounting Practice), including FRS 101 *Reduced Disclosure Framework*.

Under company law the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable UK accounting standards have been followed, subject to any material departures disclosed and
  explained in the financial statements;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern, and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006. They are responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company and to prevent and detect fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

#### Statement of disclosure to auditor

So far as each person who was a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditor in connection with preparing its report, of which the Company's auditor is unaware. Having made enquiries of fellow Directors and the Company's auditor, each Director has taken all the steps he/she might reasonably be expected to take as a Director in order to make himself/herself aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

#### Qualifying third party indemnity provisions

The Company has granted an indemnity to the Directors of the Company against liability in respect of proceedings brought by third parties, subject to the conditions set out in the Companies Act 2006. Such qualifying third party indemnity provision remains in force as at the date of approving the Directors' report.

#### INDEPENDENT AUDITOR'S REPORT

#### TO THE MEMBERS OF AMT-SYBEX LIMITED

#### Opinion

We have audited the financial statements of AMT Sybex Limited ("the company") for the year ended 31 December 2020 which comprise the Income Statement, the Balance Sheet and the Statement of Changes in Equity, and related notes, including the accounting policies in note 1.

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 December 2020 and of its profit for the year then
  ended:
- have been properly prepared in accordance with UK accounting standards, including FRS 101; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

#### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities are described below. We have fulfilled our ethical responsibilities under, and are independent of the company in accordance with, UK ethical requirements including the FRC Ethical Standard. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion.

#### Material uncertainty related to going concern

We draw attention to note 1 to the financial statements which indicates that the Company is reliant on its ultimate parent undertaking, Capita plc, in regard to its ability to continue as a going concern. The most recent financial statements of Capita plc include material uncertainties that may cast significant doubt on its ability to continue as a going concern. The reliance of the Company on Capita plc accordingly means that these events and conditions constitute a material uncertainty that may cast significant doubt on the Group's and in turn, the Company's ability to continue as a going concern.

Our opinion is not modified in respect of this matter.

#### Going concern basis of preparation

The directors have prepared the financial statements on the going concern basis. As stated above, they have concluded that a material uncertainty related to going concern exists.

Based on our financial statements audit work, we consider that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

#### Fraud and breaches of laws and regulations - ability to detect

Identifying and responding to risks of material misstatement due to fraud

To identify risks of material misstatement due to fraud ("fraud risks") we assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud.

Our risk assessment procedures included:

- Enquiring of directors and inspection of policy documentation as to the Company's high-level policies and procedures to
  prevent and detect fraud, including the Company's channel for "whistleblowing" as well as whether they have knowledge of
  any actual, suspected or alleged fraud.
- Reading Board minutes and internal audit reports.
- · Considering remuneration incentive schemes and performance targets for management.
- Using analytical procedures to identify any unusual or unexpected relationships.

We communicated identified fraud risks throughout the audit team and remained alert to any indications of fraud throughout the audit.

#### INDEPENDENT AUDITOR'S REPORT (CONTINUED)

#### TO THE MEMBERS OF AMT-SYBEX LIMITED

#### Fraud and breaches of laws and regulations - ability to detect (continued)

As required by auditing standards, and taking into account possible pressures to meet profit and revenue targets, we perform procedures to address the risk of management override of controls and the risk of fraudulent revenue recognition, in particular around incorrect assessment of point in time rather than over time revenue recognition as required by IFRS 15, revenue recorded in the wrong period, the risk that management may be in a position to make inappropriate accounting entries, and the risk of bias in accounting judgements such as the profiling of the deferred income.

We also identified a fraud risk related to inappropriate capitalisation and recoverability of contract assets. Judgement may be required in determining whether the costs incurred are appropriate to be capitalized, where a contract is not performing as expected the costs capitalised may not be recoverable and an impairment of the asset should be recorded and where there are indications that a contract may be loss making in the future an onerous contract provision may also need to be recorded.

We performed procedures including:

- Identifying journal entries and other adjustments to test based on risk criteria and comparing the identified entries to supporting documentation. These included those posted by senior finance management or individuals who do not frequently post journals, and those posted to unusual accounts, including unexpected combination of entries related to revenue, expenses, cash and borrowings.
- Reviewing the accounting treatment of contracts to determine whether the revenue recognition methodology was appropriate.
- Selecting samples of revenue entries in the period immediately before and after the year end and amounts recorded within
  accrued income and deferred income at the year end. For all entries selected we obtained and agreed back to source
  documentation to assess whether revenue was recorded in the correct period.
- Selecting samples from additions to contract fulfilment assets during the year, which we agreed back to calculations and source documentation to assess whether the capitalisation was appropriate.
- Reviewing management's contract profitability forecasts for contracts with significant contract fulfilment assets and
  challenging the key assumptions in order to assess whether any impairment should be recorded against the carrying value of
  the contract fulfilment assets.

Identifying and responding to risks of material misstatement due to non-compliance with laws and regulations

We identified areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements from our general commercial and sector experience and through discussion with the directors (as required by auditing standards), and from inspection of the Company's regulatory and legal correspondence and discussed with the directors the policies and procedures regarding compliance with laws and regulations.

We communicated identified laws and regulations throughout our team and remained alert to any indications of non-compliance throughout the audit.

The potential effect of these laws and regulations on the financial statements varies considerably.

Firstly, the Company is subject to laws and regulations that directly affect the financial statements including financial reporting legislation (including related companies legislation), distributable profits legislation and taxation legislation and we assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items.

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: health and safety, anti-bribery, and employment law. Auditing standards limit the required audit procedures to identify non-compliance with these laws and regulations to enquiry of the directors and inspection of regulatory and legal correspondence, if any. Therefore, if a breach of operational regulations is not disclosed to us or evident from relevant correspondence, an audit will not detect that breach.

#### INDEPENDENT AUDITOR'S REPORT (CONTINUED)

#### TO THE MEMBERS OF AMT-SYBEX LIMITED

#### Fraud and breaches of laws and regulations - ability to detect (continued)

Context of the ability of the audit to detect fraud or breaches of law or regulation

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remained a higher risk of non-detection of fraud, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. Our audit procedures are designed to detect material misstatement. We are not responsible for preventing non-compliance or fraud and cannot be expected to detect non-compliance with all laws and regulations.

#### Strategic report and directors' report

The directors are responsible for the strategic report and the directors' report. Our opinion on the financial statements does not cover those reports and we do not express an audit opinion thereon.

Our responsibility is to read the strategic report and the directors' report and, in doing so, consider whether, based on our financial statements audit work, the information therein is materially misstated or inconsistent with the financial statements or our audit knowledge. Based solely on that work:

- we have not identified material misstatements in the strategic report and the directors' report;
- in our opinion the information given in those report for the financial year is consistent with the financial statements; and
- in our opinion those reports have been prepared in accordance with the Companies Act 2006.

#### Matters on which we are required to report by exception

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit.

We have nothing to report in these respects.

#### Directors' responsibilities

As explained more fully in their statement set out on page 5, the directors are responsible for: the preparation of the financial statements and for being satisfied that they give a true and fair view; such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error; assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and using the going concern basis of accounting unless they either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

# INDEPENDENT AUDITOR'S REPORT (CONTINUED) TO THE MEMBERS OF AMT-SYBEX LIMITED

#### Auditor's responsibilities

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue our opinion in an auditor's report. Reasonable assurance is a high level of assurance, but does not guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

A fuller description of our responsibilities is provided on the FRC's website at www.frc.org.uk/auditorsrcsponsibilities.

#### The purpose of our audit work and to whom we owe our responsibilities

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members, as a body, for our audit work, for this report, or for the opinions we have formed

Malcolm Footer (Senior Statutory Auditor) for and on behalf of KPMG LLP, Statutory Auditor Chartered Accountants 15 Canada Square London E14 5GL

The notes on pages 14 to 38 form an integral part of these financial statements

**Share capital** – The balance classified as share capital is the nominal proceeds on issue of the Company's equity share capital, comprising 100,003 ordinary shares.

**Share Premium** – The amount paid to the Company by shareholders, in cash or other consideration, over and above the nominal value of shares issued to them.

Capital redemption reserve – The Company can redeem shares by repaying the market value to the shareholder whereupon the shares are cancelled. Redemption must be from distributable profits. The capital redemption reserve represents shares redeemed.

Retained deficit/earnings - Represents accumulated losses/profits in the Company.

#### NOTES TO THE FINANCIAL STATEMENTS

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies

#### 1.1 Basis of preparation

AMT-Sybex Limited is a Company incorporated and domiciled in the UK. The financial statements are prepared under the historical cost basis except where stated otherwise and in accordance with applicable accounting standards.

In determining the appropriate basis of preparation for the annual report and financial statements for the year ended 31 December 2020, the Company's Directors ("the Directors") are required to consider whether the Company can continue in operational existence for the foreseeable future, being a period of at least 12 months following the approval of these accounts. The Directors have concluded that it is appropriate to adopt the going concern basis, having undertaken a rigorous assessment of the financial forecasts, key uncertainties, and sensitivities, as set out below.

#### **Board** assessment

#### Base case scenario

The financial forecasts used for the going concern assessment are derived from the 2021-2023 business plans ('BP') for the Company which have been subject to review and challenge by management and the Directors. The Directors have approved the projections. The BP captures the benefits that the Capita group-wide transformation plan is anticipated to deliver, including sales growth together with margin improvements and cost out targets, and the costs to achieve these. Covid-19 has introduced unprecedented economic uncertainties and has led to increased judgement particularly in forecasting future financial performance. The forecast impact of Covid-19 has been incorporated within the base case forecasts, however the continuing uncertainty over how the COVID-19 pandemic might evolve, including the speed and timing of economic recovery, makes precise forecasting challenging.

#### Severe but plausible downside

In addition to the base case, the Directors considered severe but plausible downside scenarios, recognising the execution risk associated with the transformation programme and the broader uncertainty arising from COVID-19. The downside scenarios include trading downside risks, which assumes the transformation plan is not successful in delivering the anticipated revenue growth, together with increased attrition, and further impacts of Covid-19. In addition, the downside scenario includes potential adverse financial impacts that could arise from unforeseen operational issues leading to contract losses and eash outflows.

Offsetting these risks the Directors have considered available mitigations within the direct control of the Company, including continued reductions to variable pay rises, setting aside any bonus payments and limiting discretionary spend.

Finally, the assessment has considered the extent to which the Company is reliant on the Group. The Company is reliant on the Group in respect of the following:

- provision of administrative support services and should the Group be unable to deliver these services, the Company would have difficulty in continuing to trade;
- participation in the Group's notional cash pooling arrangements, of which £526,619 was overdrawn at 30 April 2021.
   In the event of a default by the Group, the Company may not be able to access the overdraft facility within the pooling arrangement; and
- recovery of receivables of £8,008,893 from fellow Group undertakings as of 30 April 2021. If these receivables are not
  able to be recovered when forecast by the Company, then the Company may have difficulty in continuing to trade.

Given the reliance the Company has on the Group, the Directors have considered the financial position of the ultimate parent undertaking as disclosed in its most recent financial statements, being for the year ended 31 December 2020.

#### Ultimate parent undertaking Capita plc

The Capita plc Board ('the Board') concluded that it was appropriate to adopt the going concern basis, having undertaken a rigorous assessment of the financial forecasts, key uncertainties and sensitivities, when preparing the Group's consolidated financial statements to 31 December 2020.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.1 Basis of preparation (continued)

These financial statements were approved by the Board on 16 March 2021 and are available on the Group's website ( www.capita.com/investors). Below is a summary of the position as at 16 March 2021:

Accounting standards require that the foreseeable future covers a period of at least 12 months from the date of approval of the financial statements, although they do not specify how far beyond 12 months a Board should consider. In the prior year, the Board considered an extended period out to 31 August 2022 (30 months) which aligned with the expiry of the revolving credit facility (RCF). The Board continued to consider the period out to 31 August 2022 for the purpose of the going concern assessment, which reflects a period of at least 18 months from the date of approval of the Group consolidated financial statements (the going concern period). While this is a shorter period, it does align with the expiry of the RCF which is a key consideration. The Board also considered any committed outflows beyond this period in forming their assessment.

To address the resilience of the Group to its severe but plausible downside scenarios, the Board has been exploring a refinancing of the debt maturities to reprofile the debt repayments to align with the completion of the transformation programme while also providing the financial support necessary to complete the required investments. While refinancing was not completed in 2020, the Board did successfully arrange backstop facilities in February and August 2020, is already in discussion with lenders, and is targeting completion of a refinancing in 2021.

In addition to refinancing, the Board has approved a continuation of the previously announced disposal programme which covers businesses that do not align with the longer-term strategy for the Group. The Group has a strong track record of executing major planned disposals and the Board is confident that the disposal programme can be delivered given the strength of the underlying businesses and the value they deliver. The planned disposals will introduce considerable net cash proceeds to the Group, albeit with a corresponding removal of consolidated profits associated with these businesses.

#### Material uncertainties related to the group:

The Board recognises that any refinancing, should the severe downside play out, would require third party agreements from lenders. Furthermore, the disposal programme requires agreement from third parties, and major disposals may be subject to shareholder and lender approval. Such agreements and approvals are outside the direct control of the Group. Accordingly, these events give rise to material uncertainties, as defined in auditing and accounting standards, relating to events and circumstances which may cast significant doubt about the Group's and Parent's ability to continue as a going concern and, therefore, that the Group and Company may be unable to realise their assets and discharge their liabilities in the normal course of business.

Reflecting the Board's confidence in the transformation programme, ability to refinance, and execution of the approved disposal programme, the Company continues to adopt the going concern basis in preparing the financial statements. The Board has concluded that the Group and Parent Company will continue to have adequate financial resources to realise their assets and discharge their liabilities as they fall due over the period to 31 August 2022. Consequently, these financial statements do not include any adjustments which would be required if the going concern basis of preparation is inappropriate.

#### Conclusion

Although the Company has a reliance on the Group as detailed above, even in a severe but plausible downside for both the Company and the Group, the Directors are confident the Company will continue to have adequate financial resources to release its assets and discharge its liabilities as they fall due over the period to 31 August 2022 (the "going concern period"). Consequently, the annual report and financial statements have been prepared on the going concern basis.

However, as the Group's financial statements have identified material uncertainties giving rise to significant doubt over the Group's ability to continue as a going concern, given the Company's reliance on the Group as set out above, this in turn gives rise to a material uncertainty relating to events and circumstances which may cast significant doubt about the Company's ability to continue as a going concern and, therefore, that the Company may be unable to realise its assets and discharge its liabilities in the normal course of business. The financial statements do not include any adjustments which would be required if the going concern basis of preparation were to be deemed inappropriate.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.2 Compliance with accounting standards

The Company has applied FRS 101 – Reduced Disclosure Framework in the preparation of its financial statements. The Company has prepared and presented these financial statements by applying the recognition, measurement and disclosure requirements of International accounting standards in conformity with the requirements of the Companies Act 2006.

The Company's ultimate parent undertaking, Capita plc, includes the Company in its consolidated statements. The consolidated financial statements are prepared in accordance with International accounting standards in conformity with the requirements of the Companies Act 2006 and International Financial Reporting Standards (IFRSs) adopted pursuant to Regulation (EC) No 1606/2002 as it applies in the European Union and are available to the public and may be obtained from Capita plc's website on https://www.capita.com/investors.

In these financial statements, the Company has applied the disclosure exemptions available under FRS 101 in respect of the following disclosures:

- A cash flow statement and related notes;
- Comparative period reconciliations for share capital, property, plant and equipment and intangible assets;
- Disclosures in respect of transactions with wholly owned subsidiaries;
- Disclosures in respect of capital management;
- The effects of new but not yet effective IFRSs;
- Disclosures in respect of the compensation of key management personnel; and
- Certain disclosures permissible by IFRS 15.

As the consolidated financial statements of Capita ple include equivalent disclosures, the Company has also taken the disclosure exemptions under FRS 101 available in respect of the following disclosures:

- Certain disclosures required by IFRS 2 Share Based Payments in respect of Group settled share based payments;
- Certain disclosures required by IAS 36 Impairments of assets in respect of the impairment of goodwill and indefinite life intangible assets;
- Certain disclosures required by IFRS 3 Business Combinations in respect of business combinations undertaken by the Company, in the current and prior periods including the comparative period reconciliation for goodwill; and
- Certain disclosures required by IFRS 13 Fair Value Measurement and the disclosures required by IFRS 7 Financial Instrument Disclosures.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.3 Changes in accounting policies

The Company has adopted the new amendments to standards detailed below but they do not have a material effect on the Company's financial statements.

| New amendments   | Effective date |
|--|----------------|
| Amer.dments to References to the Conceptual Framework in IFRS Standards  | 1 January 2020 |
| Definition of Material (Amendments to IAS 1 and IAS 8)                   | 1 January 2020 |
| Interest Rate Benchmark Reform (Amendments to IFRS 9, IAS 39 and IFRS 7) | 1 January 2020 |
| Definition of a Business (Amendments to IFRS 3)                          | 1 January 2020 |

#### 1.4 Revenue recognition

Revenue is earned within the United Kingdom.

The revenue and profits recognised in any period are based on the delivery of performance obligations and an assessment of when control is transferred to the customer.

In determining the amount of revenue and profits to record, and related balance sheet items (such as contract fulfilment assets, capitalisation of costs to obtain a contract, trade receivables, accrued income and deferred income) to recognise in the period, management is required to form a number of key judgements and assumptions. This includes an assessment of the costs the Company incurs to deliver the contractual commitments and whether such costs should be expensed as incurred or capitalised. These judgements are inherently subjective and may cover future events such as the achievement of contractual milestones, performance KPIs and planned cost savings. In addition, for certain contracts, key assumptions are made concerning contract extensions and amendments, as well as opportunities to use the contract developed systems and technologies on other similar projects.

Revenue is recognised either when the performance obligation in the contract has been performed (so 'point in time' recognition) or 'over time' as control of the performance obligation is transferred to the customer.

For all contracts, the Company determines if the arrangement with a customer creates enforceable rights and obligations. This assessment results in certain Master Service Agreements ('MSA's') not meeting the definition of a contract under IFRS 15 and as such the individual call-off agreements, linked to the MSA, are treated as individual contracts.

The Company enters into contracts which contain extension periods, where either the customer or both parties can choose to extend the contract or there is an automatic annual renewal, and/or termination clauses that could impact the actual duration of the contract. Judgement is applied to assess the impact that these clauses have when determining the appropriate contract term. The term of the contract impacts both the period over which revenue from performance obligations may be recognised and the period over which contract fulfillment assets and capitalised costs to obtain a contract are expensed.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.4 Revenue recognition (continued)

For centracts with multiple performance obligations management applies judgement to consider whether those promised goods and services are (i) distinct - to be accounted for as separate performance obligations; (ii) not distinct - to be combined with other promised goods or services until a bundle is identified that is distinct or (iii) part of a series of distinct goods and services that are substantially the same and have the same pattern of transfer to the customer.

At contract inception the total transaction price is estimated, being the amount to which the Company expects to be entitled and has rights to under the present contract. This includes an assessment of any variable consideration where the Company's performance may result in additional revenues based on the achievement of agreed KPIs. Such amounts are only included based on the expected value or the most likely outcome method, and only to the extent that it is highly prebable that no revenue reversal will occur.

The transaction price does not include estimates of consideration resulting from change orders for additional goods and services unless these are agreed.

Once the total transaction price is determined, the Company allocates this to the identified performance obligations in proportion to their relative stand-alone selling prices and recognises revenue when (or as) those performance obligations are satisfied. The Company infrequently sells standard products with observable standalone prices due to the specialised services required by customers and therefore the Company applies judgement to determine an appropriate standalone selling price. More frequently, the Company sells a customer bespoke solution, and in these cases the Company typically uses the expected cost-plus margin or a contractually stated price approach to estimate the standalone selling price of each performance obligation.

For each performance obligation, the Company determines if revenue will be recognised over time or at a point in time. Where the Company recognises revenue over time for long term contracts, this is in general due to the Company performing and the customer simultaneously receiving and consuming the benefits provided over the life of the contract.

For each performance obligation to be recognised over time, the Company applies a revenue recognition method that faithfully depicts the Company's performance in transferring control of the goods or services to the customer. This decision requires assessment of the real nature of the goods or services that the Company has promised to transfer to the customer. The Company applies the relevant output or input method consistently to similar performance obligations in other contracts.

When using the output method, the Company recognises revenue on the basis of direct measurements of the value to the customer of the goods and services transferred to date relative to the remaining goods and services under the contract. Where the output method is used, for long term service contracts where the series guidance is applied (see below for further details), the Company often uses a method of time elapsed which requires minimal estimation. Certain long-term contracts use output methods based upon estimation of number of users, level of service activity or fees collected.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.4 Revenue recognition (continued)

If performance obligations in a contract do not meet the overtime criteria, the Company recognises revenue at a point in time (see below for further details). The Company disaggregates revenue from contracts with customers by contract type, as management believe this best depicts how the nature, amount, timing and uncertainty of the Company's revenue and cash flows are affected by economic factors.

#### Contract term longer than 2 years

The Company provides a range of services in various segments under customer contracts with a duration of more than two years.

The nature of contracts or performance obligations categorised within this revenue type is diverse and active software licence arrangements (see definition below).

Active software licences are those where the Company has a continuing involvement after the sale or transfer of control to the customer, which significantly affects the intellectual property to which the customer has rights. The Company is in a majority of cases responsible for any maintenance, continuing support, updates and upgrades and accordingly the sale of the initial software is not distinct. The Company's accounting policy for licences is discussed in more detail below.

#### Over time service with contract length less than 2 years

The nature of contracts or performance obligations categorised within this revenue type is diverse and includes (i) short term outsourced service arrangements in the public and private sectors; and (ii) software maintenance contracts.

The Company has assessed that maintenance and support (i.e. on-call support, remote support) for software licences is a performance obligation that can be considered capable of being distinct and separately identifiable in a contract if the customer has a passive licence. These recurring services are substantially the same as the nature of the promise is for the Company to 'stand ready' to perform maintenance and support when required by the customer. Each day of standing ready is then distinct from each following day and is transferred in the same pattern to the customer.

#### Transactional (point in time) contracts

The Company delivers a range of goods or services in all reportable segments that are transactional services for which revenue is recognised at the point in time when control of the goods or services has transferred to the customer. This may be at the point of physical delivery of goods and acceptance by a customer or when the customer obtains control of an asset or service in a contract with customer-specified acceptance criteria.

The nature of contracts or performance obligations categorised within this revenue type is diverse and includes (i) provision of IT hardware goods; (ii) passive software licence agreements; (iii) commission received as agent from the sale of third party software; and (iv) fees received in relation to delivery of professional services.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.4 Revenue recognition (continued)

Passive software licences are licences which have significant stand-alone functionality and the contract does not require, and the customer does not reasonably expect, the Company to undertake activities that significantly affect the licence. Any ongoing maintenance or support services for passive licences are likely to be separate performance obligations. The Company's accounting policy for licences is discussed in more detail below.

#### Contract modifications

The Company's contracts are often amended for changes in contract specifications and requirements. Contract modifications exist when the amendment either creates new or changes the existing enforceable rights and obligations. The effect of a contract modification on the transaction price and the Company's measure of progress for the performance obligation to which it relates, is recognised as an adjustment to revenue in one of the following ways:

- a. prospectively as an additional separate contract;
- b. prospectively as a termination of the existing contract and creation of a new contract;
- c. as part of the original contract using a cumulative eatch up; or
- d. as a combination of b) and c).

For contracts for which the Company has decided there is a series of distinct goods and services that are substantially the same and have the same pattern of transfer where revenue is recognised over time, the modification will always be treated under either a) or b). d) may arise when a contract has a part termination and a modification of the remaining performance obligations.

The facts and circumstances of any contract modification are considered individually as the types of modifications will vary contract by contract and may result in different accounting outcomes.

Judgement is applied in relation to the accounting for such modifications where the final terms or legal contracts have not been agreed prior to the period end as management need to determine if a modification has been approved and if it either creates new or changes existing enforceable rights and obligations of the parties. Depending upon the outcome of such negotiations, the timing and amount of revenue recognised may be different in the relevant accounting periods. Modification and amendments to contracts are undertaken via an agreed formal process. For example, if a change in scope has been approved but the corresponding change in price is still being negotiated, management use their judgement to estimate the change to the total transaction price. Importantly any variable consideration is only recognised to the extent that it is highly probably that no revenue reversal will occur.

#### Principal versus agent

The Company has arrangements with some of its customers whereby it needs to determine if it acts as a principal or an agent as more than one party is involved in providing the goods and services to the customer. The Company acts as a principal if it controls a promised good or service before transferring that good or service to the customer. The Company is an agent if its role is to arrange for another entity to provide the goods or services. Factors considered in making this assessment are most notably the discretion the Company has in establishing the price for the specified good or service, whether the Company has inventory risk and whether the Company is primarily responsible for fulfilling the promise to deliver the service or good.

Where the Company is acting as a principal, revenue is recorded on a gross basis. Where the Company is acting as an agent revenue is recorded at a net amount reflecting the margin earned.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.4 Revenue recognition (continued)

#### Licences

Software licences delivered by the Company can either be right to access ('active') or right to use ('passive') licences. Active licences are licences which require continuous upgrade and updates for the software to remain useful, all other licences are treated as passive licences. The assessment of whether a licence is active or passive involves judgement. The key determinant of whether a licence is active is whether the Company is required to undertake activities that significantly affect the licenced intellectual property (or the customer has a reasonable expectation that it will do so) and the customer is, therefore, exposed to positive or negative impacts resulting from those changes.

When software upgrades are sold as part of the software licence agreement (i.e. software upgrades are promised to the customer), the Company applies judgement to assess whether the software upgrade is distinct from the licence (i.e. a separate performance obligation). If the upgrade is considered fundamental to the ongoing use of the software by the customer, the upgrades are not considered distinct and not accounted for as a separate performance obligation.

The Company considers for each contract that includes a separate licence performance obligation all the facts and circumstances in determining whether the licence revenue is recognised over time or at a point in time from the go live date of the licence.

#### Contract related assets and liabilities

As a result of the contracts which the Company enters into with its customers, a number of different assets and liabilities are recognised on the Company's balance sheet. These include but are not limited to:

- · Property, plant and equipment
- Intangible assets
- Contract fulfilment assets^
- · Contract assets derived from costs to obtain a contract^
- Trade receivables
- Accrued income^
- Deferred income^

#### Contract fulfilment assets

Contract fulfilment costs are divided into (i) costs that give rise to an asset; and (ii) costs that are expensed as incurred.

When determining the appropriate accounting treatment for such costs, the Company firstly considers any other applicable standards. If those other standards preclude capitalisation of a particular cost, then an asset is not recognised under IFRS 15.

If other standards are not applicable to contract fulfillment costs, the Company applies the following criteria which, if met, result in capitalisation:

- the costs directly relate to a contract or to a specifically identifiable anticipated contract;
- the costs generate or enhance resources of the entity that will be used in satisfying (or in continuing to satisfy) performance obligations in the future; and
- the costs are expected to be recovered.

<sup>^</sup> Refer below for the accounting policy applied following the adoption of IFRS 15

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.4 Revenue recognition (continued)

The assessment of this criteria requires the application of judgement, in particular when considering if costs generate or enhance resources to be used to satisfy future performance obligations and whether costs are expected to be recoverable. These costs may include process mapping and design, system development, project management, hardware (generally in scope of the Company's accounting policy for property, plant and equipment), software licence costs (generally in scope of the Company's accounting policy for intangible assets), recruitment costs and training.

The Company has determined that, where the relevant specific criteria are met, the costs for (i) process mapping and design; (ii) system development; and (iii) project management are likely to qualify to be capitalised as contract fulfilment assets.

#### Capitalisation of costs to obtain a contract

The incremental costs of obtaining a contract with a customer are recognised as an asset if the Company expects to recover them. The Company incurs costs such as bid costs, legal fees to draft a contract and sales commissions when it enters into a new contract.

Judgement is applied by the Company when determining what costs qualify to be capitalised in particular when considering whether these costs are incremental and whether these are expected to be recoverable. For example, the Company considers which type of sales commissions are incremental to the cost of obtaining specific contracts and the point in time when the costs will be capitalised.

The Company has determined that the following costs may be capitalised as contract assets (i) legal fees to draft a contract (once the Company has been selected as a preferred supplier for a bid); and (ii) sales commissions that are directly related to winning a specific contract. Costs incurred prior to selection as preferred supplier are not capitalised but are expensed as incurred.

#### Utilisation, derecognition and impairment of contract fulfilment assets and capitalised costs to obtain a contract

The Company utilises contract fulfilment assets and capitalised costs to obtain a contract to cost of sales over the expected contract period using a systematic basis that mirrors the pattern in which the Company transfers control of the service to the customer. The utilisation charge is included within cost of sales. Judgement is applied to determine this period, for example whether this expected period would be the contract term or a longer period such as the estimated life of the customer relationship for a particular contract if, say, renewals are expected.

A contract fulfilment asset or capitalised costs to obtain a contract is derecognised either when it is disposed of or when no further economic benefits are expected to flow from its use or disposal.

Management is required to determine the recoverability of contract related assets within property, plant and equipment, intangible assets as well as contract fulfilment assets, capitalised costs to obtain a contract, accrued income and trade receivables. At each reporting date, the Company determines whether or not the contract fulfilment assets and capitalised costs to obtain a contract are impaired by comparing the carrying amount of the asset to the remaining amount of consideration that the Company expects to receive less the costs that relate to providing services under the relevant contract. In determining the estimated amount of consideration, the Company uses the same principles as it does to determine the contract transaction price, except that any constraints used to reduce the transaction price will be removed for the impairment test.

Where the relevant contracts or specific performance obligations are demonstrating marginal profitability or other indicators of impairment, judgement is required in ascertaining whether or not the future economic benefits from these contracts are sufficient to recover these assets. In performing this impairment assessment, management is required to make an assessment of the costs to complete the contract.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.4 Revenue recognition (continued)

The ability to accurately forecast such costs involves estimates around cost savings to be achieved over time, anticipated profitability of the contract, as well as future performance against any contract-specific KPIs that could trigger variable consideration, or service credits.

Where a contract is anticipated to make a loss, these judgements are also relevant in determining whether or not an onerous contract provision is required and how this is to be measured.

#### Deferred and accrued income

The Company's customer contracts include a diverse range of payment schedules dependent upon the nature and type of goods and services being provided. The Company often agrees payment schedules at the inception of long term contracts under which it receives payments throughout the term of the contracts. These payment schedules may include performance-based payments or progress payments as well as regular monthly or quarterly payments for ongoing service delivery. Payments for transactional goods and services may be at delivery date, in arrears or part payment in advance.

Where payments made are greater than the revenue recognised at the period end date, the Company recognises a deferred income contract liability for this difference. Where payments made are less than the revenue recognised at the period end date, the Company recognises an accrued income contract asset for this difference.

At each reporting date, the Company assesses whether there is any indication that accrued income assets may be impaired by considering whether the revenue remains highly probable that no revenue reversal will occur. Where an indicator of impairment exists, the Company makes a formal estimate of the asset's recoverable amount. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

#### Onerous contracts

The Company reviews its long-term contracts to ensure that the expected economic benefits to be received are in excess of the unavoidable costs of meeting the obligations under the contract. The unavoidable costs are the lower of the net costs of termination or the costs of fulfilment of the contractual obligations. The Company recognises the excess of the unavoidable costs over economic benefits due to be received as an onerous contract provision.

#### 1.5 Goodwill

Goodwill is stated at cost less any accumulated impairment losses. It is not amortised but is tested annually for impairment. This is not in accordance with The Large and Medium-sized Companies and Company (Accounts and Reports) Regulations 2008 which requires that all goodwill be amortised. The Directors consider that this would fail to give a true and fair view of the profit for the year and that the economic measure of performance in any period is properly made by reference only to any impairment that may have arisen. It is not practicable to quantify the effect on the financial statements of this departure.

#### 1.6 Other Intangibles

Other intangibles are valued at cost less accumulated amortisation. Amortisation is calculated to write off the cost in equal annual instalments over their estimated useful life, which is typically between 3-8 years. In the case of capitalised software development costs, research expenditure is written off to the statement of profit and loss in the period in which it is incurred. Development expenditure is written off in the same way unless and until the Company is satisfied as to the technical, commercial and financial viability of individual projects. In these cases, the development expenditure is capitalised and amortised over the period during which the Company is expected to benefit.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.7 Property, plant and equipment

Property, plant and equipmen: are stated at cost less depreciation. Freehold land is not depreciated. Depreciation is provided at rates calculated to write off the cost less estimated residual value of each asset over its expected useful life, as follows:

Fixtures, fittings & equipment 5 years
Plant and machinery 3 - 5 years

#### 1.8 Leasing

The Company has elected not to recognise right of use assets and lease liabilities for lease of low-value assets and short-term leases. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

#### 1.9 Investments in subsidiaries

All investments are initially recorded at their cost. Subsequently they are reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable.

#### 1.10 Pensions

The Company participates in a number of defined contribution schemes and contributions are charged to the income statement account in the year in which they are due. These schemes are funded and the payment of contributions is made to separately administered trust funds. The assets of these schemes are held separately from the Company. The Company remits monthly pension contributions to Capita Business Services Ltd, a fellow subsidiary undertaking, which pays the Group liability centrally. Any unpaid contributions at the year-end have been accrued in the accounts of that company.

#### 1.11 Government grants

Government grants are not recognised until there is a reasonable assurance that the Company will comply with the conditions attaching to them and that the grants will be received. Government grants are recognised in the income statement on a systematic basis over the periods in which the Company recognises as expenses the related costs for which the grants are intended to compensate. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Company with no future related costs are recognised in the income statement in the period in which they become receivable.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.12 Taxation

Tax on the profit or loss for the year comprises current and deferred tax. Tax is recognised in the income statement except to the extent that it relates to items recognised directly in equity or other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is provided, using the liability method, on all temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences:

- · except where the deferred tax liability arises from the initial recognition of goodwill;
- except where the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is
  not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or
  loss; and
- in respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, except where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, carry-forward of unused tax assets and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carry-forward of unused tax assets and unused tax losses can be utilised, except where the deferred income tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.13 Share-based payments

The Company participates in various share option and sharesave schemes operated by Capita ple, the ultimate parent undertaking. Details of these schemes are contained in the Group's annual report.

The cost of equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted and is recognised as an expense over the vesting period, which ends on the date on which the relevant employees become fully entitled to the award. Fair value is determined using an option pricing model. In valuing equity-settled transactions, no account is taken of any vesting conditions, other than conditions linked to the price of the shares of the Company (market conditions).

No expense is recognised for awards that do not ultimately vest as a result of not meeting performance or service conditions. Where all service and performance vesting conditions have been met, the awards are treated as vesting, irrespective of whether or not the market condition is satisfied, as market conditions have been reflected in the fair value of the equity instruments.

At each balance sheet date before vesting, the cumulative expense is calculated, representing the extent to which the vesting period has expired and management's best estimate of the achievement or otherwise of non-market conditions, the number of equity instruments that will ultimately vest or in the ease of an instrument subject to a market condition, be treated as vesting as described above. The inovement in cumulative expense, attributable to the Company, since the previous balance sheet date is recognised in the profit and loss account and settled with Capita plc, the ultimate parent undertaking.

In accordance with IFRS 2, share option awards of the ultimate parent Company's equity instruments in respect of settling grants to employees of the Company are disclosed as a charge to the profit and loss account and a credit to equity.

The Company's policy is to reimburse its ultimate parent Company through the intercompany account for charges that are made to it. Hence the credit to equity has been eliminated, rather reflecting a credit to inter-Company which better describes the underlying nature of the transaction.

#### 1.14 Group Accounts

The financial statements present information about the Company as an individual undertaking and not about its Group. The Company has not prepared Group accounts as it is fully exempt from the requirement to do so by section 400 of the Companies Act 2006 as it is a subsidiary undertaking of Capita plc, a Company incorporated in England and Wales, and is included in the consolidated accounts of that Company.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies

(Continued)

#### 1.15 Financial instruments

#### Investments and other financial assets

#### (i) Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss); and
- those to be measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For investments in equity instruments that are not held for trading, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

The Company reclassifies debt investments when and only when its business model for managing those assets changes.

#### (ii) Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade date (that is, the date on which the Company commits to purchase or sell the asset). Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

#### (iii) Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

#### Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

Amortised cost: Assets that are held for collection of contractual cash flows, where those cash flows represent solely payments of principal and interest, are measured at amortised cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as a separate line item in the statement of profit or loss.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.15 Financial instruments (Continued)

FVOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses, which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses), and impairment expenses are presented as a separate line item in the statement of profit or loss.

FVPL: Assets that do not meet the criteria for amortised cost or FVOCI are measured at FVPL. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other gains/(losses) in the period in which it arises.

#### Equity instruments

The Company subsequently measures all equity investments at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the group's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in other gains/(losses) in the statement of profit or loss as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOC1 are not reported separately from other changes in fair value.

#### (iv) Impairment

The Company assesses, on a forward-looking basis, the expected credit losses associated with its debt instruments carried at amortised cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables, the Company applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

Financial assets may be designated upon initial recognition as at fair value through profit or loss if the assets are part of a group of financial assets which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management strategy.

#### Trade and other receivables

The Company assesses on a forward-looking basis the expected credit losses associated with its receivables carried at amortised cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk. For trade receivables, the Company applies the simplified approach permitted by IFRS 9, resulting in trade receivables recognised and carried at original invoice amount less an allowance for any uncollectible amounts based on expected credit losses.

#### Trade and other payables

Trade and other payables are recognised initially at fair value. Subsequent to initial recognition they are measured at amortised cost using the effective interest method.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 1 Accounting policies (Continued)

#### 1.15 Financial instruments (Continued)

#### Cash and cash equivalents

Cash and short-term deposits in the balance sheet comprise cash at bank and in hand and short-term deposits with an original maturity of 3 months or less. Bank overdrafts are shown within current financial liabilities.

#### Interest-bearing loans and borrowings

All loans and borrowings are initially recognised at their fair value less any directly attributable transaction costs.

After initial recognition, loans and borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the income statement over the period of the borrowings using the effective interest method.

Gains and losses are recognised in the income statement when the liabilities are derecognised, as well as through the amortisation process.

#### 1.16 Impairment of non-financial assets

At each reporting end date, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

#### 1.17 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example under an insurance contract, the reimbursement is recognised as a separate asset but only when recovery is virtually certain. The expense relating to any provision is presented in the income statement net of any reimbursement. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognised as a borrowing cost. The Company provides, on a discounted basis, for the future rent expense and related cost of leasehold property (net of estimated sub-lease income) where the space is vacant or currently not planned to be used for ongoing operations.

#### 1.18 Foreign exchange

Monetary assets and liabilities denominated in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. All differences are taken to profit and loss account.

#### NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

#### FOR THE YEAR ENDED 31 DECEMBER 2020

#### 2 Significant accounting judgements, estimates and assumptions

The preparation of financial statements in conformity with generally accepted accounting principles requires the Directors to make judgements and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingencies at the date of the financial statements and the reported income and expense during the reported periods. Although these judgements and assumptions are based on the Directors' best knowledge of the amount, events or actions, actual results may differ from these estimates.

The key sources of estimation uncertainty that have a significant risk of causing material adjustment to the carrying amounts of assets and liabilities within the next financial year are the measurement and impairment of goodwill and investments, the measurement of provisions, revenue and profit recognition on certain contractual arrangements:

- The Company determines whether goodwill is impaired on an annual basis and thus requires an estimation of the value
  in use of the cash-generating units to which the intangible assets are allocated. This involves estimation of future cash
  flows and choosing a suitable discount rate.
- The Company determines whether investments are impaired based on any impairment indicators. This involves
  estimation of the enterprise value of the investee which is determined based on the greater of discounted future cash
  flows at a suitable discount rate or through the recoverable value of investments held by the investee Company.
- The measurement of revenue and resulting profit recognition due to the size and complexity of some of the Company's
  contracts, requires judgements to be applied, including the measurement and timing of revenue recognition and the
  recognition of assets and liabilities, including an assessment of onerous contract, that result from the performance of the
  contract.

#### 3 Revenue

The total revenue of the Company for the year has been derived from its principal activity wholly undertaken in the United Kingdom.

#### 4 Operating profit

|   | Notes | 2020     | 2019      |
|---|-------|----------|-----------|
|   |       | £        | £         |
| Operating profit for the year is stated after charging: |       |          |           |
| Net foreign exchange (gains)/losses                     |       | (54,775) | 2,094     |

| Short-term lease rentals - other assets                 |       | 58,987   | 131,737   |

Audit fees are borne by the ultimate parent undertaking, Capita plc. The audit fee for the current period was £25,000 (2019: £15,502). The Company has taken advantage of the exemption provided by regulations 6(2)(b) of The Companies (Disclosure of Auditor Remuneration and Liability Limitation Agreements) Regulations 2008 not to provide information in respect of fees for other (non-audit) services as this information is required to be given in the Company accounts of the ultimate parent undertaking, which it is required to prepare in accordance with the Companies Act 2006.

| Deferred income tax credit     |               |           | 530,409          | 2,649,689 |

A change to the main UK corporation tax rate was substantively enacted on 17 March 2020. The rate applicable from 1 April 2020 now remains at 19 percent, rather than the previously enacted reduction to 17 percent. The UK deferred tax asset at 31 December 2020 has been calculated based on this rate, resulting in a £586,693 tax credit to the income statement in 2020.

On 3 March 2021, it was announced in the Budget that the UK tax rate will increase from 19% to 25% from 1 April 2023 onwards. This will increase the company's future income tax charge from 2023. If this rate change had theoretically been applied to the deferred tax balances at 31 December 2020, the deferred tax asset would have increased by £1,743,529.

|    | At 31 December 2020        | 10,745,551  |

In preparing these financial statements, the entity undertook a review to identify indicators of impairment of contract fulfilment assets. The entity determined whether or not the contract fulfilment assets were impaired by comparing the carrying amount of the asset to the remaining amount of consideration that the entity expects to receive less the costs that relate to providing services under the relevant contract. In determining the estimated amount of consideration, the entity used the same principles as it does to determine the contract transaction price, except that any constraints used to reduce the transaction price were removed for the impairment test.

In line with our accounting policy, as set out in note 1, if a contract or specific performance obligation exhibited marginal profitability or other indicators of impairment, judgement was applied to ascertain whether or not the future economic benefits from these contracts were sufficient to recover these assets. In performing this impairment assessment, management is required to make an assessment of the costs to complete the contract. The ability to accurately forecast such costs involves estimates around cost savings to be achieved over time, anticipated profitability of the contract, as well as future performance against any contract-specific KPIs that could trigger variable consideration, or service credits. Contract fulfilment asset impairments of £543,904 were identified as at 31 December 2020 (31 December 2019: £2,101,673).

|    |                      |          |         |          |

The property provision represents a dilapidations provision. The Company is required to perform repairs on leased properties, prior to the properties being vacated at the end of their lease term. Dilapidation provisions for such costs are where a legal obligation is identified and the liability can be reasonably quantified. The provisions are expected to be utilised within the next year.

Other provision represents a provision of €765,000 in relation to possible delivery slippages on an ongoing contract.

#### Share capital

The nominal proceeds on issue of the Company's equity share capital, comprising £1 ordinary shares.

#### 18 Employee benefits

The total costs charged to income in respect of defined contribution plans is £1,193,479 (2019: £1,264,185).

#### 19 Directors' remuneration

The remuneration of Directors was borne by another subsidiary of Capita plc. As no qualifying services were provided by the Directors on the Company's affairs, no Directors' remuneration has been affocated to the Company. The Directors of the Company were reimbursed for the expenses incurred by them whilst performing business responsibilities.
