Notes

(forming part of the financial statements)

1 Accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the company's financial statements

Basis of preparation

These financial statements have been prepared in accordance with applicable accounting standards and under the historical cost accounting rules

Under Financial Reporting Standard 1, the company is exempt from the requirement to prepare a cash flow statement on the grounds that a parent undertaking includes the company in its own published consolidated financial statements

Going concern

The company's business activities are set out in the business review section of the directors' report on page 1 in these financial statements

The company is expected to continue to generate positive cash flows on its own account for the foreseeable future. On the basis of their assessment of the company's financial position, the company's directors have a reasonable expectation that the company will be able to continue in operational existence for the foreseeable future. Thus, they continue to adopt the going concern basis of accounting in preparing the annual financial statements

Fixed assets and depreciation

Depreciation is provided to write off the cost less the estimated residual value of tangible fixed assets by equal instalments over their estimated useful economic lives, as follows

Plant and machinery	-	10 years
Fixtures, fittings, tools and equipment	-	3 to 10 years

Stocks

Stocks are stated at the lower of cost and net realisable value. Net realisable value is based on estimated selling price less all further costs to completion and all relevant marketing, selling and distribution costs

Taxation

The charge for taxation is based on the result for each year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes

Deferred tax assets or liabilities are calculated on a non-discounted full provision basis in respect of timing differences that are expected to reverse in future years

Leases

Where the company enters into a lease which entails taking substantially all the risks and rewards of ownership of an asset, the lease is treated as a "finance lease". The asset is recorded in the balance sheet as a tangible fixed asset and is depreciated over its estimated useful life or the term of the lease, whichever is shorter. Future instalments under such leases, net of finance charges, are included within creditors. Rentals payable are apportioned between the finance element, which is charged to the profit and loss account, and the capital element which reduces the outstanding obligation for future instalments

Rentals under operating leases are charged to the profit and loss account on a straight line basis over the life of the lease

Pensions

The company operates a defined contribution pension scheme. The assets of the scheme are held separately from those of the company in an independently administered fund. The amount charged against profits represents the contributions payable to the scheme in respect of the accounting period

Notes (continued)

1 Accounting policies (continued)

Turnover

Turnover represents amounts (excluding value added tax) derived from the provision of goods and services to customers. The turnover and operating profit, all of which arises in the United Kingdom, is attributable to the principal activity of the company.

Dividends

Dividends unpaid at the balance sheet date are only recognised as a liability at that date to the extent that they are appropriately authorised and are no longer at the discretion of the company. Unpaid dividends that do not meet these criteria are disclosed in the notes to the financial statements.

Foreign currency

Transactions denominated in foreign currencies are recorded in sterling at the actual exchange rate prevailing on the date of each transaction. Monetary assets and liabilities denominated in foreign currencies are stated at the rate prevailing at the balance sheet date. Any gain or loss arising from a change in exchange rates subsequent to the date of a transaction is included as an exchange gain or loss in the profit and loss account.

Notes (continued)

4 Tax on profit on ordinary activities

(a) The taxation charge is based on the profit for the year and comprises:

	2011 £000	2010 £000
<i>UK corporation tax</i>		
Current tax	42	58
Adjustments in respect of prior years	-	(1)

(b) Factors affecting the tax charge for the current year:

The current tax charge for the year is higher (2010 equal to) than the standard rate of corporation tax in the UK of 26.5% (2010 28%). The differences are explained below

	2011 £000	2010 £000
Profit on ordinary activities before tax	156	206

Adjustment in respect of prior years	-	(1)
	<hr/>	<hr/>
Total current tax charge for the year	42	57
	<hr/>	<hr/>

(c) Factors affecting future tax charges

There is no recognised or unrecognised deferred taxation.

The 2012 Budget on 21 March 2012 announced that the UK corporation tax rate will reduce to 22% by 2014. A reduction in the rate from 26% to 25% (effective from 1 April 2012) was substantively enacted on 5 July 2011, and a further reduction to 24% (effective from 1 April 2012) was substantively enacted on 26 March 2012.

This will reduce the company's future current tax charge accordingly.

It has not yet been possible to quantify the full anticipated effect of the announced further 2% rate reduction, although this will further reduce the company's future current tax charge and reduce the company's deferred tax accordingly.
